

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

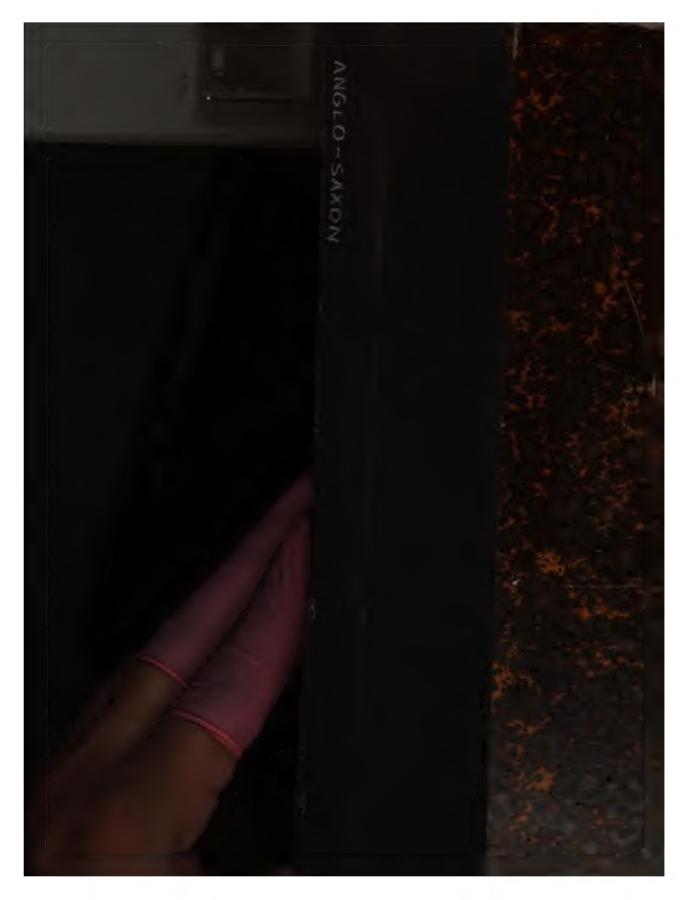

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

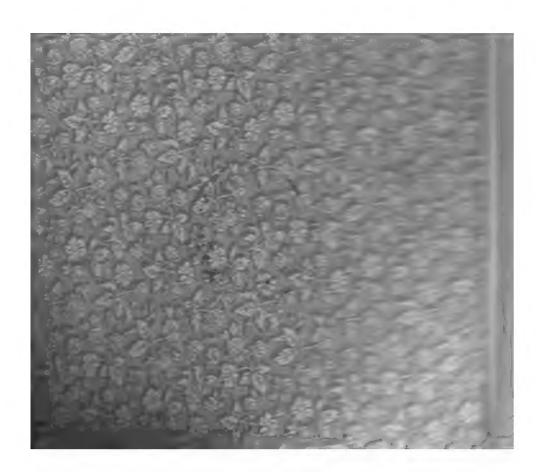

- + Make non-commercial use of the files We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + Maintain attribution The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

Introduction.

In making public the following investigation of the weapon names in Anglo-Saxon, attention should be called to the fact that, owing to the frequent use of general terms, such as wēpen, searu etc., applied to equipment and armour, and to that of the word sweord referring to sword, it has been deemed advisable not to include all references to the same, such only having been selected as are of interest either from an etymological or archaeological standpoint.

Furthermore, for a full list of the words (in simplex) used in Epic poetry to designate the coat of mail, which in prose refer usually to an ordinary garment, reference has been made to a dissertation on «Die altenglischen Kleidernamen» by Lilly L. Stroebe, Heidelberg 1904.

It is regretted that the dissertation by R. Wagner on Die Angriffswaffen der Angelsachsen» was received after the completion of the present investigation, so that comparison of results has been impossible.

The compiler also avails herself of this opportunity to express her thanks and feeling of profound indebtedness to Professor Johannes Hoops, of the University of Heidelberg, for his ever ready suggestion and aid in the planning and execution of the work. Owing to the necessity of having all proof-sheets sent from Heidelberg to America for correction, and as a result of having to read the first sheets while travelling from place to place, some even being lost in forwarding, the difficulties of proof-correction for the present volume have been well-nigh insurmountable. To this fact, then, is due the appended list of corrections, and the mistakes still remaining may also be attributed to the same cause, as well as to the failure to receive all of the final proof-sheets.

Baltimore, Md., Sept. 1905.

May Lansfield Keller.

First Part.

Antiquarian Investigation.

I. Introductory: General Survey etc.

To present with any degree of accuracy a picture of the war-equipment of the Germanic invaders of Great Britain, from the time of their first settlement in the island to the year of the Norman Conquest 1066, three prime factors must be taken into consideration: The testimony of historians, such as Agathias, Sidonius Apollinaris, Jordanes and others, with regard to the war-equipment of the various Germanic tribes of the continent; furthermore the entire range of the Anglo-Saxon literature with especial reference to Beowulf and poems such as the Elene or the Judith dealing principally with battles. The illuminations of the MSS. both on the continent and in England from the 8th century on. The grave-finds both in England and on the continent, covering the period between the 5th and 7th centuries, especial attention being given to Frankish remains, which with some few exceptions are identical with those of the Anglo-Saxons.

Simple as this may seem at first sight, the task is accompanied with many difficulties, for the historical testimony is many times contradictory, the epic poems

deal only with equipment of kings and great heroes, while the drawings of the MSS. are often mere conventional representations, frequently of Roman or Byzantine originals, and the grave-finds in more than one instance fail to corroborate history and poetry. On the whole, however, allowing for the aristocratic tendency of the epic, together with certain historical anachronisms, and by carefully comparing the grave-finds of Selzen in Germany, Londonières in Normandy, and Kent in England the arms and equipment of Franks and Anglo-Saxons between the 5th and 10th centuries may be ascertained with a fair degree of certainty.

Before entering upon the details, a general survey of the equipment of the Anglo-Saxons at this early period may be given.

The spear was the chief weapon of the Anglo-Saxons as the framea (longspear) had been among the Germans at the time of Tacitus. These spears were of two kinds,—a lighter and a heavier; one spear at least, and often two, having been found in the graves of almost every warrior, usually with the point to the ward to head, while in the Selzen graves they are reversed according to the Roman practice.

The battle axe is rarely found in English graves (8 in all) though rarely wanting in the graves of Frankish warriors.

The swords, as will be shown later, in the early period were very precious and costly possessions belonging

¹ For a discussion of the mortuary urns discovered in Norfolk, Suffolk, Cambridgeshire, Derbyshire, Sussex and their relation so those found in Jutland, parts of Friesland, on the borders of the Elbe, in Westphalia, Thuringia, in parts of Saxony etc. S. Kemble, Hor. Fer., p. 87.

² Germ. C. VI.

only to princes and warriors of wealth and rank, while the ordinary soldier carried only a spear. These swords were either the heavy two-edged broad sword corresponding to the Roman spata, or the one-edged Scrama sear so numerous in Frankish, so rare in Anglo-Saxon interments.

Bows were also used for war as well as the chase as a description of a battle in Beowulf proves, and slings were in use among the ordinary warriors.

Of the protective armour the shield alone was in the possession of all warriors. This was usually of linden-wood with an iron umbo or boss, the randbeog, in the centre to protect the hand, and serve as a weapon of offence in close conflict, while the edge was further strengthened by an iron band, or rim. In the case of princes gold and precious metals replaced the iron, while metal shields, though probably rare, were not unknown.

The helmet, as the sword, was the property only of the wealthy, one certainly, two probably (the second being doubtful) having been found in the many hundreds of graves opened and it is strongly to be suspected that many of the helms were simply leather caps strengthened with metal, (cf. galea: leterhelm in the glosses) which in the course of time has entirely disappeared. That metal helms existed, however, at the time of the Saxon invasion of England is certain from the description of the boar-adorned helmets of the Beowulf epic.

The body armour consisted of a leather coat frequently stiffened with metal for the ordinary soldiers,

¹ This rather negatives the idea that they are the weapone from which the Saxons are supposed to have taken their name; cf. Gotfridus Witerbiensis: Ipse brevis gladius apud illos Saxo vocatur, unde sibi Saxo nomen peperusse notatur. A misunderstanding of the two words sahs and Sahso.

and the byrne or shirt made of iron rings either woven together or sewn upon other material for the chief warriors of wealth and rank, which even as late as the 10th century was regarded as a costly possession.

(Later came metal greaves for the protection of the legs, but at this period the warriors fought for the most part bare-legged, or perhaps in the long leather boots and leg bandages) represented in the MSS. of the 9th and 10th centuries.

(Flags, drums, horns, and trumpets were part of every army's equipment, and remains of horses, bridles have in some few instances been found in the graves)

From the above then it is evident that at the time of the invasion, and during the early Anglo-Saxon period, the ordinary warrior was provided with spear and shield, possessed some sort of a leather shirt or coat for the protection of his body, and wore most likely a leather cap resembling a helmet, while swords, helmets, and corselets were the property only of the picked troops or celebrated warriors. The same holds true for the Frankish warriors of this early period, and even at the time of the Carolingians — arma, id est scutum et lanceam¹ — were still the equipment of the ordinary soldier.

At the time of the Carolingians, both in France and England, swords nevertheless were becoming more frequent, although still costly, and helms and corselets began to be more general.

In England, in the period following the Carolingian, metal greaves were introduced, the halsbearg for the protection of the neck, and at the very end of the Anglo-

¹ S. Capit. of Charl. from year 806, ed. Baluze, p. 450.

Saxon period the gavelock from the Celts and the crossbow from the French. Immediately following the Conquest the long bow came into general use, which was employed with such telling effect by the English in the Hundred Years' War, and the nasale or nose protector (may possibly have been known previously), which developed in the 12th and 13th centuries into the visor.

The Anglo-Saxons following the tradition of the old military tactics of the Germans of the continent fought in a wedge shaped formation with their king or leader on foot at their head, while the heavy infantry formed the point and wings, the light armed being placed at the centre.1 They were divided according to districts, as were the Germans of the time of Tacitus according to tribes, and until the time of the Norman Conquest the infantry, not the cavalry, formed the main body of the army." Following the Norman Conquest came a complete revolution in war tactics, the introduction by the Normans of the Feudal System together with Chivalry raised the cavalry, composed of Norman knights, to the first rank, which, united to the sturdy Anglo-Saxon infantry armed with the famous long bow, formed an almost invincible army. This process of amalgamation and reconstruction lies, however, beyond the Anglo-Saxon period, belonging rather to the history of Chivalry and the Middle Ages where its development may be traced in such works as San Martes Waffenkunde in der Ritterzeit, Köhler, Jähns and others mentioned in the Bibliography.

¹ Cf. the formation at the battle of Hastings. Köhler, Die Entw. des Kriegsw. u. der Kriegsführ in der Ritterzeit, p. 1 ff.

^{*} Cf. Roger of Hoveden, who, writing of a battle in 1055, says:

Anglos contra morem in equis pugnare jussit.

II. The Weapons of Attack.

Turning now to a more specific examination of the weapons, it will be seen at once that they fall naturally into two main divisions — first the weapons of attack, and second the weapons of defence, each of which may again be divided into several subdivisions, which will here be treated of more in detail than was possible in the preceding general sketch) An exhaustive treatment of the same, however, has not been attempted, the results of most excavations of Anglo-Saxon interments having appeared from time to time in the Arch., in Collec. Antiqua, and in various arch. journals, while Lindenschmidt's Merov. Altertümer, and L'Abbé Cochet's La Norm. Sout. are exhaustive treatises on the subject in their respective countries.

1. The Spear.

De Baye. — Indus. Art of the Anglo-Saxon, Pl. I. Neville. — Saxon Obsequies, Pls. XXXV, XXXVI. Smith. — Collec. Antiqua, Vol. III, Pl. I, figs. 10—25. Wylie. — Fairford Graves, Pl. XI, figs. 1—7.

As the shield is the oldest weapon of defence, so is the spear that of aggression. Used for the chase as well as for war it served a double purpose, and from the first simple wooden shaft with fire-hardened head, through the successive stages of development in the Stone, Bronze, and Iron Ages to its culminating point in the knightly lance of the Middle Ages, it has remained among the Germanic peoples the weapon par excellence not only of the ordinary soldier, but together with the sword has been found in the graves of those of noble birth. Symbol

of kingship among the Northern tribes¹, weapon of Wodan, badge of authority, and mark of the free man² it has played among Norsemen, Franks, and Anglo-Saxons an all important roll. From it the male line took its name spere-healf, as the female line from the spindle, and the spear was the constant companion of the warrior in time of peace as well as in war.³

From the time of Tacitus reference to the bearing of spears by the German tribes has constantly been made by Latin historians.⁴ The citations, however, will be here omitted excepting the three most important bearing directly on the use of this weapon by the Franks from the 5th to the 8th century, interesting for the sake of comparison with the similar Anglo-Saxon usage during this period. A citation from the Greek historian Agathias will also be given below.

In the middle of the 5th century Sidonius Apollinaris writing of the Franks speaks of clypeosque rotare ludus, et intortas praecedere saltibus hastas (Panag. Major.). In the 6th century appear in Gregory of Tours the hurling spear together with the sword, axe, and dagger or knife

¹ Cf. Lind., Alt. d. Merov. Zeit, fig. 201, for a representation of Childeric I., spear in hand, on his sealring. Cf. also Gregor of Tours VIII, 33, who writing of Gunthramnus giving the spear to Childeberti says: Hoc est indicium quod tibi omne regnum meum tradidi.

A special Edict of Charl, forbidding lances to those not free born. Ut servi lanceas non portent, qui inventus fuerit post bannum hasta frangatur in dorso ejus.

³ S. A. L. Th. XXXVI, p. 87, regarding wergeld for injury from spear not carried properly over the shoulder.

S. San Marte, p. 157 ff., and Lind., Merov. Altertümer, p. 170 ff.

⁵ Lib. II, c. 27.

as the ordinary equipment of the Frankish warrior¹, whilein the same century Procopius assigns the spear to the cavalry only, and neither spear nor bow but only the axeto the Frankish infantry. This in all probability, however, has reference to the equipment for this expedition only, namely that of Theodobert I. into Italy, and cannot betaken for the prevailing custom, as shortly afterwards Agathias (7th cent.) describes the Frankish foot soldiers as armed not only with the regular spear, but with the more unusual angon², which is hardly to be explained. by the supposition that in the course of a few years the Franks had given up the spear as infantry weapon, and then suddenly adopted it again, but rather that the passages in the writers, who omit it as part of every warrior's regular equipment, are descriptions of special expeditions, and not of the Frankish army as a whole.

From the year 806⁸ comes a special edict of Charl. de Armis non portandis, where arma = shield and spear, and from 813 a writ concerning the arming of troops where every soldier among other weapons must be provided with spear and shield, which proves it at this time as in the earlier period to have been the weapon of all classes.⁴

The MSS. mostly from the 9th and 10th centuries, though the one of chief interest (Harleian 603) is of a still later date, lead to exactly the same result concerning, the Anglo-Saxon use of the spear (cf. the Psalter Aureum⁵.

¹ Cf. also Greg. of Tours III, 10; V, 26; VII, 29.

² Lib. II, c. 5.

² Capit. III, No. I. (Ed. Baluze, p. 449.)

⁴ Capit. II, No. IX. (Ed. Baluze, p. 508.)

⁵ Psalter. Aureum IX and X, and the Utrecht Psalter, Taf. IV (pub. by Anton Springer).

and the Utrecht Psalter) where the horsemen and footmen alike are armed with round shield and spear, the angon being the predominating form. The Harl. MSS. shows throughout the fighting men armed with either angon or spear with crossbars, while only picked warriors have sword, axe, or bow and arrows. In the Aelfric MSS. (Claudius B. IV) the warriors are as frequently armed with the sword as with the spear, while the shepherds have only the spear, which points to a more general use of the sword at this time, but in general the MSS. show many more spears than swords.

From the laws of Canute, moreover, concerning Heriot it may be seen that double the number of spears and shields is required as the number of swords, corselets, and helms, while all those under the rank of thane are armed not with the sword, but with the spear.

As stated above the spear of the Anglo-Saxons consisted of the heavy spear used both for hurling and thrusting, and the lighter dart for hurling only. To the latter belong the daroo, the pil, the gafelue, and the angon, while the gar, and ætgar may be either light or heavy. The franca also may be regarded from the passages in By, as equivalent to gar, while the general Germ. expression spere refers to a light kind of throwing spear, as well as a spear for thrusting, the usual interpretation. As proof of this statement of, the passage from Ep. Alex. 153363, mid longsceaftum sperum of scotadon, or from the Sax. Chron. (AD. 1055) Ac ær pær wære ænig spere gescoten, both of which certainly point to the hurling of the spear, as the term scoten is not used in reference to thrusting.

¹ Ges. Lieberm., p. 358 [71 ff.], and cf. aword, Part I, p. 33.

Turning now to the grave-finds the contents of these interments both in England and Germany fully corroborate the historical evidence, as well as that of the laws and MSS., for in few warriors' graves heretofore opened has the spear head been found wanting, in some, in fact, opened at Little Wilbraham and Gilton, two have been discovered both, the heavy $g\bar{a}r$, and the lighter $daro\bar{c}$, the latter with a length of 9 inches from the Gilton graves.¹

The spear consisted of three parts: the head, the shaft, and the iron into which the wood of the shaft was fitted.* Sometimes, however, the latter consisted of a button to be driven into the staff by means of a nail issuing from the centre. This spike was probably used to plant the spear in the ground, thereby forming a wall to break the charge of cavalry. In most of the graves this spike has been found at the right side of the body about six feet from the spear head thus giving an approximate length to the spear shaft of six feet, the wood of which has long since rotted away, but enough of which remained in a few instances to be identified with certainty as ash. the use of ash wood for spear shafts has arisen the poetical term for spear, æsc, found so frequently in the epic poetry, but never in prose cf. By. 310 zesc acwehte; Wand. 99 eorlas fornōman easca þrýðe, wæpen wælgifru; B. 330 garas, esc-holt ufan græg etc.

Owing to its universal use both for throwing and thrusting³, for the chase and for war, the spear heads

¹ For the arrangement in grave cf. Smith, Collec. Antiq. III, p. 3.

² Cf. Fair. Graves, Pl. XI and Pag. Sax., Pl. IX.

^{*} Cf. B. 1766 gares fliht which points to throwing spear; Gaungu Hrolfs Saga c. 18. Sôti hafði atgeirr atvega með ok to spear for thrusting.

varied greatly both in form, size, and weight, from great sword like points 2 ft. long¹, or the ango with its length of 3 to 4 ft., to the light dart not exceeding 8 inches in length, while the weight of some of these may be inferred from such an expression as gārbēam, the spear tree Exod. 246. Cf. also the much later description in the Nib. (B. 73) for the description of Siegfried's spear Sivrit der fuort ir einen (gêr) wol zwei spannen breit.

A minute description of the countless spear heads of this period from the graves of Germany, France, and England, more than 20 varieties of the Anglo-Saxon type alone being on exhibition in the Brit. Mu., can not here be attempted, the ordinary varieties and a few of the rarer ones only will be discussed, accurate classifications being found in Hewitt² and Lindenschmidt.⁸

The simplest type of spear as well as the oldest is the Frankish spear found in the grave of Childeric⁴, which does not exceed a foot in length. This type has been found in many of the German graves, also in those of Belgium, France⁵, and England, though not in such great numbers.

The leaf shaped spear heads resemble closely the Roman type and are light and short. A noted example of this class is the famous Müncheberg spear with the runic inscription. This class is but seldom found in England, the most frequently occurring form has a lo-

¹ S. specimen in Brit. Mu.

⁸ Merov. Altertümer, p. 173 ff.

⁴ S. Merov. Altert., fig. 49.

⁵ Cf. Cochet, La Norm. Sout., p. 284 ff.

⁶ S. Anz. d. Mus. Nürnberg XIV — 1867, No. 2.

zenge-shaped head (Lind. fig. 62), which can be infinitely varied by making it more or less slender. This type is found everywhere in the graves of Germany, France, and England in great number and variety. The typical Anglo-Saxon spear head is almost lozenge-shaped¹ but with a somewhat longer point than the Frankish spear heads of the same class, the greatest number of A.-S. spear heads so far discovered being variations of this type. The blades were always of iron, the specimens found varying in length usually from 10 to 15 inches, one, however, from Little Wilbraham, Cambridge, having a length of but 2¹/₂ inches (of Lat. spicula i. sagitte: garas OE. Gl.), while some at Ozingell, Kent have a length of 21 inches.2 One extremely interesting specimen from Ash⁸ slopes from the socket two ft. to the shoulder of the blade, which does not exceed 31/4 inches in length and a quarter of an inch in width in its broadest part.4

These spear heads were attached to the shaft by means of rivets passing through the socket into the wood beneath. The cusps were of two kinds either with a socket into which the wooden handle fitted or with a spike to drive into the wood, examples of the latter, however, are extremely rare, the best coming from Livonia, at present in the Brit. Mu., together with a few from A.-S. graves.⁵ A ferule of bronze or iron was added to the socketed spear head at its juncture with the staff to insure additio-

⁴ For a specimen 2 ft. $5^{1}/4$ inches long, s. Horae Ferales, Pl. XXVII, fig. 4.

⁵ Cf. Smith Collec. Antiq., Vol. III, Pl. I.

nal strength.¹ A peculiar feature of the A.-S. cusps, which is characteristic for all varieties, and distinguishes them from the Danish and Frankish, which they closely resemble, in all other respects is the longitudinal slit in the socket, which received the wooden staff, and was then closed with iron or bronze rings, braided string or rivets.² Comparing these with the Frankish remains³ the difference will be observed at once, only three of the entire German collection possessing this slit.

A moment's survey of the number of spears recovered in comparison to the number of swords will give an idea of the rarity of the latter, and the great abundance of the former. Thus 125 graves opened at. L. Wilbraham yielded 35 spears to 4 swords, from Barrington 15 spear heads no swords, from Gilton 23 spear heads and 34 darts to 7 swords out of 106 graves examined, from 308 graves at Kingston Down 30 darts and 12 spears to 1 sword, from 181 graves at Siebertswold 20 darts, 22 spear heads to 6 swords (Invent Sepul.), from Faversham 45 spear heads to 20 swords, a most unusual find.⁴

The adornment of spears was not so rich as that of swords, nevertheless several spear heads have been discovered in A.-S. interments ornamented with engraved lines, and decorated with silver.⁵ Mention occurs, moreover, of a gar

golde fah Gn. (C.) 22, and in the will of Wulfsige a gold wreken spere¹, so that gold and silver spear heads for kings' weapons are very likely.

Regarding the strap for swinging the spear, the Lat. amentum, A.-S. sceaft-lo, sceaft-tog (?) nothing further is known than the passage from Isid.²

Of the unusual spear heads 3 only will be dealt with: the ango, the lancea uncata of Sid. Apoll., and the head with its sides formed on different planes.

Of these the ango A.-S. onga, is the most unusual in the grave-finds, the most frequent in the MSS.3, and the most interesting both because of its unusual form, and the minute description of the method of wielding it given by Agathias II c. 5, who describing the battle in Campania where the allied forces of the Franks and Alemannen were overthrown by Narses 554 A. D. gives the full equipment of the Frankish warriors, the chief weapons among whom were the άγγών and the πέλεχος άμφίστομος. The passage is quoted in full in the orig. Gr. in Arch. 36, p. 49, the substance of which is as follows: The weapon is of a length that may both be used as a javelin or in close fight against a charge of the enemy. The staff of the weapon is covered with iron lamina or hoops, so that but very little wood appears, even down to the spike at the butt end. On either side of the head of this javelin are certain barbs projecting downward close together as far as the shaft. The Frank soldier when engaged with the enemy casts his angon, which if it enters the body cannot be withdrawn in consequence

¹ Chart. Th., p. 55622.

² See Second Part, II, 1, Sécaft-lō.

⁸ Cf. Harl. 603, and Psalt. Aureum.

of the barbs; neither can it be disengaged if it pierce the shield, for the iron with which the staff is covered prevents the adversary from ridding himself of it by means of his sword. At this moment the Frank rushes forward places his foot on the shaft of the spear as it trails upon the ground, and having deprived his foe of his defence cleaves his skull with his axe or transfixes him with a second spear.

This form belongs to No. 5 of Hewitt's classification, and some such weapon is certainly referred to in B. 1438 where the seamonster was caught with eofor-sprēotum heoro-hōcyhtum. In the glossaries it appears as onga: aculeus. The angon has given rise to much discussion among archaeologists, the difficulty being to identify the various specimens discovered with the description of the same by Agathias.¹

Lindenschmidt believed that he had discovered the exact weapon answering to this description at Selzen² since then several more have been dug up varying in length from 31¹/₂ to 46.8 inches, the Selzen lance attaining this length, while the average is 3 ft. The effect of the blow depended not so much on the strength of the iron handle, which was only of medium weight and thickness, but on the skillful construction of the point, which penetrated at once the wooden shield, while the sharp hooks prevented its withdrawal. The point about 3.5 inches long was usually stronger than the iron staff measuring .48 to .64 of an inch in thickness and was always

¹ Cf. Lind. Merov. Altert., p. 178, Arch. XXXVI, p. 78, John Y. Akermann, Teut. and Celt. Weapons, Arch. XXXIV, 171—189, Wylie, Arch. XXXV, p. 48.

² S. Arch. XXXVI, Pl. VIII.

quadrilateral.¹ The hooks were usually two in number, only a single angon from Rennecourt possessing four. The staff was always very deep and very long with a longitudinal opening in some cases for the insertion of the wooden shaft to which it was made fast by means of wooden rings.²

Wylie working independent of Lindenschmidt arrived at the same conclusion identifying the spear head in the Musée de l'Artillerie at Paris with the angon of Agathias which is 22 inches long with slender stem at first quadrangular but becoming round near the ferule, the thin iron laminae or sheathing of which have disappeared owing to corrosion.

Corresponding to this and identical perhaps with the barbed lances of the Aelfric and Harleian MSS. is the English specimen from Strood in Kent on exhibition in the Brit. Mu. and represented in Collec. Antiqua 4, which found in a grave with the usual umbo, spear, and knife of Saxon interments, except in length of stem corresponds point for point to the angon of Agathias. It is of iron with quadrilateral head with a length of only 17½ inches, the remainder having been probably broken off, or it may show degeneration. Lindenschmidt disputes the title of angon for this admitting only the continental ones with long stems as true examples. Length of iron shaft to the extent of 3 or 4 ft. is not, however, imperative, and this with 3 or 4 other English examples may be regarded as

¹ Cf. the specimen from Arcy Lind., fig. 79.

² Cf. Lind., Tur. Altertumer d. Heid. Vorz. III, Heft IX, Taf. 5.

⁸ Cf. Arch. XXXV, p. 51, fig. 1.

⁴ Vol. V, Pl. II, fig. 1.

belonging to this rare class of spears. Lindenschmidt endeavers to prove the Roman pilum² the prototype of the Frankish angon, which in turn is derived from the old Etruscan iron spear³, against which, however, is the distinct mention by Agathias that the angon was of Frankish origin.⁴

But whatever the origin the fact remains that the angon is of extremely rare occurrence about 35 in all having been dug up, and that it is peculiar to the gravefinds of the Ripuarian Franks⁵ (the 5 Eng. examples excepted). A single example only, and that uncertain, having been discovered by Cochet during the whole course of his operations in Normandy.⁶

Lindenschmidt and Wylie seeking an explanation for the great scarcity of this weapon in the grave-finds have suggested that it was carried only by tried and experienced warriors, which is borne out by the finding of the angon only in the graves of the wealthiest, being usually found together with remains of horses' bits etc.

Its great frequence in the MSS, may possibly be due to mere conventional representation, but the fact remains

² Cf. Invent. Sepul., Pl. III, fig. 17; Arch. XXXVI, Pl. VIII, and Hor. Fer. Pl. XXVII, fig. 3. For a representation of this as late as the 15th century s. the illus. from the Chron. of Math. Paris. — Strutt A. A., p. 25.

Vegetius, De Re. Mil. I, 20, describes a pilum as ferro subtile trigo pracfixa. This trilateral head must have been barbed, for he adds in scuto fixa non possunt abscindi.

⁵ Cf. Mus. Etrus. Greg., Pl. XXI, fig. 6.

⁴ Cf. Lind, Altertumer d. Heid. Vorz. I, Heft XI, Taf. 5, and following text.

^{*} S. La Norm. Sout., p. 351, and Arch. XXXV, p. 281.

that it is found in both continental, and Anglo-Saxon MSS. in the hands of at least two thirds of the warriors there depicted.

Differing from the angon yet long mistaken for the same is the Lancea uncata of Sid. Apoll.¹ lance head was found in the Frankish graves at Douvrend² the prototype of which was the Scythian spear³, which although of bronze shows a remarkable identity of form. Although found in the interments of all the Germanic branches the form, on the whole, is rare, with wings at side perhaps to prevent the shaft from entering too far, and not to prevent withdrawal as in the case of the angon.4 England has furnished some extremely rare specimens of this lance, with wings at the side of the stem, one 19 inches long, with a strong and thick head has an ornamented socket and projecting wings, below which are the rivet holes; the iron rivets are further adorned with silver heads.⁵ Two other specimens have been found in England, the one from Henley-on-Thames being fully discussed in the Jour. of the Brit. Arch. Ass.6

The third of these rare lance heads is that with its sides formed on different planes, which in the

case of the specimen given by Kemble has sunk grooves on alternate sides of the blade in order to give it a rotary motion when thrown. It bears a close resemblance to the assagaye, and calls to mind the frequent A.-S. expression gares flyht, which refer to the throwing of such a spear. This reminds one also of the passage in the Walt. lied (V. 1289) sed illam (hastam) turbine terribilem tanto et stridore volantem.

At Fairford in Gloucestershire a very remarkable spear head was found shaped like a bayonet¹, four sided and measuring 16¹/₂ inches in length by two in its widest breadth, which corresponds more nearly even than the angon to the description of Thorolf's famous spear Bryuōvarar in the Egilsage, which had ferrum duas ulnas longum, in mucrone quattuor acie habentem, desinebat. This shows also points of resemblance to the Egyptian spears in Sir Gardner Wilkinson's work on the «Ancient Egyptians».²

2. The Sword.

Unlike the spear the sword was unknown to the rude civilization of the Stone Age, where weapons of war served also for the chase, and workmen's tools were as yet not entirely differentiated from implements of war. Appearing first in the Bronze Age the evolution of the sword out of the long knife of the Stone Age was closely connected with the knowledge of the working of metals, and was the first weapon designed and used exclusively for the purpose of war. With the sword came also the

¹ Fair. Graves, Pl. X, fig. 2.

² Vol. I, 2nd ed., p. 353.

need for protecting the body at close range, and in this necessity protective armour had its origin.

The bronze sword used for thrusting, which has been discovered in all parts of Europe inhabited by the Celtic tribes, is never found in Teutonic interments. The Teutons on their first appearance in Europe were in possession of iron, and the long blunt iron swords for cutting not thrusting (s. Tacitus VI) offer a striking contrast to the short sharp bronze swords of the Roman legions. According to Tacitus, however, it was a rare weapon, and even in the Salic law is not mentioned as part of a warrior's necessary equipment.

During the Merovingian period the sword became more general, but even at the time of the Carolingians the infantry were not required to carry swords¹, these being assigned only to the cavalry.²

Comparing these capitularies with the statements of Greg. of Tours and Agathias (s. spear p. 19ff.) both of whom assign the sword to the ordinary Frankish soldier, it will be seen how contradictory the evidence of the historians often is. Notwithstanding their statements it is safe to conclude both from the laws and the grave-finds that the sword together with the helmet and coat of mail continued

¹ Capit. II from year 813, No. IX, ed. Baluze, p. 508. — De hoste pergendi. . . . Et ipse Comes praevideat quomodo sint parati, id est, lanceam, scutum, aut arcum, cum duabus cordis, et sagittis duodecim. Et Episcopi, Comites, Abbates, hos homines qui hoc bene praevideant, habeant loricas vel galeas et (ad) temporalem hostem, id est aestivo tempore.

² Cf. the Encyclic, Capit. of 806 (Pertz III, 145), ita ut unus quisque caballarius habeat scutum, et lanceam, et spatham, et semi-spatam, arcum et pharetras cum sagittis, et in carris vestris utensilia diversi generis.

to be up to a late period the sign of rank both among Frankish and Anglo-Saxon warriors.

An examination of the laws of Canute concerning Heriot brings out the interesting fact that no one under the rank of thane had a sword to pay, because such was not a weapon suitable to his degree. The earls, however, were compelled to render 8 horses, 4 helmets, 4 coats of mail, 8 spears, 8 shields, and 4 swords, the king's thanes 2 swords etc., while the ordinary thane was required only to provide his own sword, horse, and equipment. Thus all who had swords had also horses to render and according to Kemble² the number of horses and weapons may be equivalent to the number of men, which each person was expected to bring into the field. Thus the requirement from the earl must have been to bring 4 horsemen equipped with sword, spear, shield, helmet, and coat of mail: and also 4 footmen armed with spear and shield. This corresponds exactly with the Capit. of the year 806 just mentioned, which assigns the broadsword only to horsemen, and receives confirmation from the game laws of Canute⁵, where only the head forester is in possession of

A. L. ed. Thorpe, p. 177, law 72, or Ges. Lieberm, II, law 71, p. 356 ff. Laws of King Canute, Gesetze II, De Hereotis. And beon pa heregeata svå hit mælië sý. I. ² Hor. Fer., p. 203.

³ A. L. VI, VII, and VIII, p. 183.

a sword.¹ Kemble adds furthermore that the swords found in the Anglo-Saxon, Norman, and German graves were broad swords which could be wielded only by horsemen.

In the Anglo-Saxon wills mention of valuable swords as part of the *Heriot* given to the royal lord on the death of a warrior occurs several times; but rarely in any will were more than two left except by a king or king's son, and in every instance they are regarded as costly gifts.² Aebelstan left in his will two silver hilted swords, the one by Wulfric wrought, the other owned by Ulfcytil, together with a golden sword belt and eight other costly swords, to various relatives and retainers, the largest number of valuable swords left in any will.

From a sentence in this will and from numerous passages in Beowulf and other poems³ it is evident that famous smiths and their work were held in great esteem and veneration among the Anglo-Saxons as well as among the Scandinavians, and Continental Germans, while the passing on of famous swords from father to son, or in the same family, was a well known custom. Striking, however, is the almost total absence of proper names for swords in the Anglo-Saxon literature, when contrasted with the vast number in the literature of Germany and Scandinavia⁴, 57 sword names alone being extant in Old Norse, not including the names for helmets, axes, hammers, arrows, spears, shields, war-banners, etc., which amount to several hundred, while in Anglo-Saxon three or four only are

¹ Cf. also B. 1035.

² Cf. Chart. Th., p. 500, 505, 557, 596, and will of Aedelst. 577.

^{*} B. 1681, 1663, 795 etc.

⁴ Cf. B. Kahle, Altwestnordische Namenstudien, Idg. Forsch., Bd. XIV., p. 204.

to be found in the whole range of the literature. Nægling the sword of Beowulf (B. 2680), Hrunting (B. 1457, 1659) Hunfero's sword, perhaps Hûn-Lâfing¹, and the sword Mimming in the Waldere Fragments (1³). The Kenningar are on the other hand frequent, so that the peculiar lack of proper names for weapons among a people resembling so nearly in ideas and customs their kindred on the continent among whom the naming of weapons was universal is hard to account for, especially as Norse or rather Danish sword names must have been known in England.

From the Anglo-Saxon glossaries it is evident that the general term sweord corresponds to the Roman word spatha, the large two-edged broadsword, but is also employed to translate the word framea. For the earlier meaning of framea 'spear', and the later one 'sword' consult the article by Müllenhoff', where it is clearly shown that the meaning of spear was original, and retained until the 3rd century, where the last record of its use as spear occurs by the Jurist Ulpian. The later meaning of sword belongs to the Christian literature, and from the Biblical literature was adopted by Greg. of Tours, Isidor. and in the Lat. of the Middle Ages is used almost exclusively with the meaning sword. Mēče, sweord, sečý, and heoru are synonymous terms, the two last being poetical words.

¹ S. Beit. XII, 32, and Zachers Zts. III, p. 396.

² Anz. f. d. A. VII, p. 19-164.

Dig. 43, 16, 3, § 2. Arma sunt omnia tela, hoc est et fustes et lapides non solum gladii, hastae, frameae (id est romphaeae). Romphaea = a powerful spear.

⁴ Cf. Psalms 97; 16¹⁸; 21²¹; 34⁸ in the Vulgata where framea is used, in every other instance gladius.

⁵ Isid. Orig. 18 c. 63. «Framea vero gladius ex utraque parte acutus quod vulgo spatham vocant.»

Bil meaning 'sword' is also found only in poetry being especially frequent in Beowulf, but in the glosses is used to translate falcastrum 'scythe'.

In Beowulf the sword plays a prominent part, the poetical Kenningar as well as the regular terms for sword being frequent. Thus it is variously designated as leoma the flashing light-beam (1570), beado-lēoma the battle-light (1523), brond the fire-brand (1454), fela laf the leavings of files (1032), laf a remnant, a precious heirloom (2628, 795, 1488 etc.), hilde-segese or egese the battle-saw, the terror of the battle (3154), mægen-fultum(a) the mighty help (B. 1455), and gatwine the battle-friend (2735). The sword is named, moreover, ečý from its edge (2506, 2578 etc.), ord from mucro, the point (1549, 556), while bil and mēče next to sweord are the most frequently recurring terms for the great two-edged sword of the heroes. Three swords wrought by the giants are mentioned: the great sword in Grendel's abode (1558), Wiglaf's sword (2616), and that of Eofor (2979). A sword blade of $st\bar{y}l$ is once mentioned in Beowulf (1533), but these blades were usually of iron (B. 2778) with richly adorned sword hilts of costly metal and set with precious stones cf. B. (2700) where the sword is fah and fæted adorned with golden plates, (2192) the golde gegyrede; næs mid Geatum þa sincmāððum sēlra on sweordes hād. This last description recalls the golden hilted swords of the Atlaquipa (stanz. 7).

> sjau eigom salhús sverþ full ero hverjo ero þeira hjǫlt ór golle.

Moreover the description of Grendel's sword hilt (B. 1694) is distinctly Scandinavian, the wreoven-hilt and wyrm-fah

being a very frequent Scandinavian ornamentation¹, while the runic inscription is also characteristic.²

Another reference to a sword bunden golde occurs in B. l. 1900, the wunden-mæl wrættum gebunden represents the hilt as adorned with etching of some description, and set with jewels as also the māðbum sweord (1023). Corresponding to these descriptions and also to the hyrsted sweord adorned with gold (672) of Beowulf are such passages as a gold geriseð on guman sweorde (Gn. Ex. 126), the scir mæled swyrd (Jud. 230), a gold hilted sword (Ridls. 5614), and the several costly swords referred to in the wills, many having hilts either of gold or silver.

At first glance the frequency of the sword at this period, to be inferred from Beowulf and other poems, would seem to offer a direct contradiction to the laws, wills, MSS., and grave-finds, which prove conclusively that it is the weapon only of warriors of wealth and rank. A closer examination shows, however, that in the poems the costly swords mentioned, and the rich gifts of jewelled swords are always either the property of heroes, or the gifts of kings to great warriors. The single exception occurs in B. (1900), where the gift of a valuable sword to the boatswain by Beowulf gives him such an exalted position among his fellows that it proves the rarity of such a possession among those of his class. An absence of the sword in the equipment of the hall thanes occurs at l. 1242, which may be accidental or a true statement of the case:

¹ On Dannenberger Bracteaten No. 3 and 4, and the Golden Horn of Gallehus. S. Dietr. Germ. X, p. 278 ff.

² Cf. Helgaquiþa 9.

Setton him to heafdon hilde-randas, bord-wudu beorhtan; pær on bence wæs ofer abelinge yð-gesesene heabo-steapa helm, hringed byrne prec-wudu prymlīc.

In an exactly parallel case Beowulf preparing himself for the night is described as giving his sword of rare worth to a servant to care for (671), in this instance the sword replaces the spear of the warriors mentioned in the passage previously quoted.

The testimony of the MSS. as stated in the general sketch is to be used with great discrimination owing to the conventionality of representation at the early period. One fact is, however, perfectly clear, namely that the sword without cross-piece is never represented, pointing to the fact that at the time of the illuminations of the MSS. (in most cases later than the 9th cent.) the primitive iron sword of the grave-finds without cross-piece had completely disappeared. The mountings of swords in the MSS. are usually colored yellow implying probably a surface of gold either from thin plates of this metal or from gilding.

With reference to the MSS. in particular — Harleian 603 shows comparatively few swords, the angon and regular spear by far predominating over all other weapons. Where, moreover, it does occur it is plainly the property of kings, leaders, or picked warriors and has often a gold adorned hilt. At pages 13, 29, 33, 65 and 67 occur representations of such, and at 69 two horsemen are represented armed with both angon and sword, the only example in this entire MS. of their being carried together. Comparison of the various illuminations leads then to the result that

¹ Cf. illus. to the IX. Psalm and to the XIII. opp. p. 8, where 4 swords are found.

the angon or spear, and shield are the property of the ordinary warrior and not the sword.

In Aelfric's Heptateuch (Cott. Claud. B. IV) swords are much more frequent than in the Harleian MS., in many cases they seem to have taken the place of the angon or spear¹, and resemble the great broad swords recovered from the graves² with cross-piece and gilded hilt.

The Psalter. Aureum⁸ represents the ordinary soldier with spear and round shield, the leaders usually with the sword.

An examination of the Psalter Illus. in the early Middle Ages⁴ gives the same results as the Psalter. Aureum.

The great Psalter of Boulogne⁵, probably by an Anglo-Saxon artist between 989 and 1008, has a precise duplicate in many parts, in Cott. Tib. C. VI. Here are represented the achievements of David; No. 2, the fight with Goliath, shows the latter in full armour with sword, shield, spear, and a kind of body armour; No. 3 gives a representation of a sword with cross-piece and clover-leaf handle. Pl. 39 represents foot soldiers armed with the usual round shield, angon or spear, but also with sword.⁶

The remaining examples are from the Cott. Psalter now in Utrecht (fol. 91 V) showing a king with sword and scepter.⁷

⁶ Cf. Harl. 603, p. 69.

⁷ Westwood, Pl. XXIX, and Pl. XXXV, from the Salisbury Psalter.

In Strutt¹ the horsemen of the 8th century appear without either sword or shield, only the spear, but from the same century is a representation of a foot soldier with a sword and sword belt.²

Turning to another, which, together with the laws, forms the most reliable source of information, the graves — their contents but serve to confirm previous statements. The swords recovered from the graves are of two kinds:

1. the two-edged sword proper or long sword (Lat. spatha, gladius), 3 ft. long with a somewhat rounded point, perfectly flat, the earlier ones without, the later ones with a small guard or cross-piece, and a handle of ivory, horn, wood or some other perishable material. 2. The solid one-edged blade, the scrama-seax with sharp point, rarely found in England, but frequent on the Continent. The best specimen of this class is the well known Thames Knife inscribed with runes which is preserved in the British Museum.

The oldest swords found in the graves consist of a rusted iron blade from 2¹/₂ to 3 ft. long, the width near handle being about 2¹/₂ inches, without cross-piece, double-edged, and tapering slightly toward the point, with a strig 4¹/₂ inches long. They are uniformally without pommel, the termination being merely a slight transverse projection from the iron strig for the purpose of securing the wood, which completed the handle.³

In the case of a sword recovered at Strood in Kents

D. and Hab. of the People of Eng., Vol. I, Pl. XIII.

¹ Id., for swords from 9th and 10th centuries cf. Pl. XXIX, No. 17, and Pl. XIX.

⁴ For examples of this primitive type see Sax. Obseq., Pl. XXXIV, Hor. Fer., Pl. XXVI, figs. 1 and 2.

For similar specimens of Invent. Sepul., Pl. XIV, and Hor. Fer. XXVI, figs. 1 and 3.

the remains of a scabbard is oxydized on to the blade, the interior being of wood, portions of which still remain together with a part of the outer covering, which resembles shagreen. For the relative proportion between the number of swords and spears found, s. p. 25, from which the relative scarcity of the sword becomes at once apparent, but 2 having been recovered from all Derbyshire, 15 from 750 Kentish graves, and from 1010 graves examined by Cochet in Normandy, but 8 swords were recovered, being found only in the most richly provided graves.

In the Later Iron Period No. 1 developed a crosspiece, two very early specimens from Gilton and Coombe^a showing the process of evolution, for here the cross-piece has projected but little beyond the edges of the blade. Eventually the guard became a very prominent feature of the Scandinavian sword.³ Proving beyond question that the type with well developed cross-piece belonged to the period in which the pagan practice of interring weapons with the dead had been abandoned, is the fact that genuine examples of this type found in England and in countries early christianized have, in most cases, been either dredged from the beds of rivers, or turned up among old foundations, though in districts where paganism held longer sway they have also been obtained from graves.⁴

The handles of later swords consisted of grip (hilt, heeft), pommel, and cross-piece, the grip, being as in the

⁴ For continental specimens s. Lind., Das Museum in Mains, Pl. XII, S, 6, 7; Cochet, La Norm. Sout., Pl. VII, fig. 1.

^{*} S. Worsaae's Afbildninger n. 383.

S. Pag. Sax., p. 47, and Hewitt, Ancient Arms and Armour, p. 31-37.

case of the earlier specimens, commonly formed of wood. portions of which (identified as pine) have been dug up adhering to the strig. This cross-bar was usually straight, but it sometimes curved toward the blade in the manner characteristic of the Danish cross-piece. These cross-pieces of metal, as well as the pommel, were often richly decorated and gilded, the form of the latter being either trefoil, cinquefoil hemispherical, rounded, or triangular, examples of each being found in one or the other of the MSS. mentioned above. Compare furthermore the numerous passages, cited at p. 36 ff. from Beowulf and other Anglo-Saxon poems, referring to ornamental hilts, which are, however, extremely rare in the grave-finds four or five only having been recovered from A.-S. interments, owing in all probability to the fact that such costly weapons were retained as heir-looms in the family of the deceased warrior and not buried with him. Later disturbance of the graves for the sake of their contents may also have contributed to bring about this scarcity of sword-finds.

A rare specimen of such a hilt comes from Coombe in E. Kent² found with another sword in a richly provided grave. This handle which is well adapted for a firm grasp is adorned with two metal fillets of bronze gilt at the pommel and cross-piece (cf. the silver hilted sword of Aedelstan), the whole of which is ornamented with a characteristic plaited pattern, and possesses a curious indented ornament on the pommel.

¹ S. specimen in Brit. Mu., also MSS. Cott. Tib. c. VI, fol. 9, and Cleop. C. VIII, the sword from the river Witham, Hor. Fer., Pl. XXVI, fig. 5, Arch. Jour. Vol. VI, p. 75, and Hewitt's Arms and Armour, Pl. IV, figs. 9, 10, 11, taken from Bähr's Livonian Collection.

² Pag. Sax., Pl. XXIV, or Collec. Antiq. II, Pl. XXXVIII, fig. 1.

A second one from Gilton to of silver gilt is remarkable for the metal loop and movable ring. This perhaps served for the appendage of a charm or talisman, possibly for one of the large crystal beads found only in the graves of men (cf. B. 672 hyrsted sweord).

Number three is a sword pommel, engraved with runes, from Ash², which corresponds to the gold-hilted rune-engraved sword described in Beowulf (1695). Two more, one from the Isle of Wight and a second from Reading³ together with a beautiful hilt of soft brown wood in the British Museum with mountings of gold filagree of the usual winding A.-S. pattern, and set with garnets, complete the list of discoveries in the graves of fine specimens of the gold-smith's art.

Danish or rather Scandinavian swords have been discovered surrounded with chains of gold, or wound with tine iron or gold wire⁴ with which may be compared B. (1564) fetel-hilt . . . hring mæl gebrægd, or covered with plates of gold and silver as in Beowulf (1694). Also from the latest pagan period come specimens with runic inscriptions let into the blade such as on king Hacon's sword Kuernbitr.⁵

For years it has been surmised that these swords, owing to their obtuse point, were not used for the thrust. Sidonius Apollinaris, however, disposes of this question with the words: Alii habetatorum caede gladiorum latera

dentata pernumerant. Alii caesim atque punctim fora minatos circulos loricarum metiuntur.¹

Number 2 the Scrama seax, the single-edged long knife or short sword, is found in many graves in France and Germany, but is of extremely rare occurrence in England, being found only in the graves at Ozingell in Kent, and appears but seldom in the MSS. or in the poems. In the glosses the word is frequently used to translate the Lat. culter, but in the compounds peoh-seax = Lat. semispatha, and hype-seax = lytel sweard, while in prose it refers in general to the small knives found in almost every grave of both sex both in England, France, and Germany. In the poetry on the other hand it refers to the short sword or Lat. machaera.2 These sword knives are probably the cultri validi (quos vulgo scrama saxos vocant) of Greg. of Tours 3 who describes them as incised or grooved. Worthy of notice in this connection also is the battle-call of Hengist to his followers on arriving in England Eu Saxones nimid eure Saxes! and of Widukind⁵ erat autem illis diebus Saxonibus longorum cutellorum usus, quibus usque hodie Anglii utuntur, morem gentis antiquae sectantes.

An excellent example from the cemetary at Ozingell⁶ 16 inches long, of iron, and provided with a cross-piece, corresponds point for point with the illustrated A.-S. Psalter

¹ Lib. III, Ep. 3.

⁴ Nennius, c. 46 p. 37.

⁵ Lib. I, c. 6.

⁶ Hewitt, Pl. IX, fig. 1.

of the Duc de Berri in the Paris library¹ where the spearman's adversary appears to be employing such an instrument as that from the Kentish grave. The handles were probably of wood, and the Thames knife is inscribed with runes, and the name of the soldier who bore it. An interesting discovery at Kingston Down, Kent was a short sword or dagger 10 inches long with a silver pommel neatly set with oblong squares of calcareous paste.²

Stæf-sweord.

The staff-sword, known to the ancient Egyptians and Greeks, was among the Romans identical with the *sparum*, the peasants' weapon, which combined a broad blade with a wooden staff.⁸

This curious weapon is also met with in Merovingian and Carolingian graves⁴ and is found recorded in A.-S.. Glossaries, though no trace of such has been discovered in the grave finds.

In the Middle Ages this weapon received in German the name Gläfe from Fr. glaive and was applied to the lance of the knights. The Fr. guisarme (gisarme) refers also to a kind of Gläfe, or staff-sword.

This weapon is also wide spread among non-European peoples being known to the Japanese and Chinese⁵, and to certain African tribes.

¹ Hewitt, p. 51, No. 8.

² Invent. Sepul., p. 55 and for the usual seax Collec. Antiq. II, Pl. LVIII, Invent. Sepul., Pl. XV, and Hor. Fer., Pl. XXVI, fig. 6.

^{*} S. Jähns Trutzwaffen, p. 260 and Taf. XXVIII, figs. 6, 7, 8, and 9.

⁴ The same fig. 11.

⁵ Cf. Jähns, p. 174 and 262, also H. B. Meyer, Seltene Waffen aus Asien, Afrika und Amerika im könig. Ethnogr. Mus. zu Dresden. Leipzig 1885.

Possibly the change in meaning of framea 'spear' to 'sword' is to be connected with this weapon half spear, half sword, although it is by no means certain.

The Sheath.

The sword-sheath was usually of wood covered with leather, and sometimes mounted in bronze.¹ In the British Museum is a sword found at Battle Edge, Oxfordshire, which retains the bronze chape and locket of its scabbard. These were sometimes gilded and even of gold. Occasionally the sheaths where adorned with a winding or snake pattern so characteristic of the period, and one bronze chape inlaid with figures of animals in gilt has been discovered.² For a Derbyshire example constructed of thin wood, overlaid with leather, and covered with a pattern of alternate fillets and lozenges, see the article by Bateman.³

The curious type of sword scabbard entirely of bronze is in all probability of northern manufacture, such having been found in parts of Scandinavia, and is not of Anglo-Saxon make. Frequently the scabbard is oxydized on to the blade of the sword as in the specimen from Strood, it being impossible to separate the one from the other.

The Sword Belt.

Among the Romans the cingulum militiae, a leather girdle worn about the hips, and used solely to support the

¹ For bronze chapes cf. Sax. Obseq., Pl. XXXIV, and Fair. Graves, Pl. III, fig. 3, also Lind., Merov. Altertumer, fig. 122.

² S. Arch. 38, p. 84, or Hor. Fer., Pl. XXVI, fig. 3.

^{*} Arch. jour., Vol. VII.

⁴ For the specimen from Yorkshire s. Hewitt, p. 44, and cf. Arch. jour. X, p. 259.

sword, was sharply distinguished from the cingulum for girding the tunic. Among the German tribes on the contrary the two fell together, and the cingulum militiae was no longer sword belt alone, but supported the clothing, served as pocket etc. Originally the sweord-fetel was a leather strap, more or less ornamented, attached directly to the sheath, girt about the waist, and fastened with a buckle; the buckles and tongues being frequently found in the graves of the Merovingian period. These are generally of bronze, sometimes of copper, and the metal is not infrequently gilded, embossed, or enamelled, some being set with garnets and other stones.¹

Often these belts were richly adorned, accounts of golden sword belts being not infrequent, cf. Procop.² for an account of such among the booty, Greg. of Tours³ who describes a baltheum magnum ex auro lapidibusque preciosis ornatum, Eginhart in his Epitome of the Hist. of France, also writes et gladio semper accinctus, cujus capulus ac baltheus aut aureus aut argenteus erat, and Wm. of Malmesbury, who gives an account of the sword belt given by Alfred to his son Aedelstan as follows: quem etiam praemature militem fecerat, donatum chlamy de coccinea gemmato baltheo, ense Saxonico cum vagina aurea.

The belt is also occasionally worn across the body suspended from the right shoulder as in the Cott. MS. Tiber. C. VI, fol. 9.4

The Anglo-Saxon wills mention some richly adorned A.-S. sword belts; thus in Chart. Th. 557 pes swurdes

² Bell. Vand. lib. II, c. 9.

⁸ Lib. X, c. 21.

⁴ Cf. also Strutt, D. u. Hab. of the People of England, Pl. XXIX, No. 17.

mid pam sylfrenan hilte was attached to pone gyldenan fetils; in the will of Aederic¹ his sword mid fetele is part of the Heriot; also mention is made of a gyldenan fetels.²

In the 13th century the sword sheath was attached not directly to the belt, but was suspended by means of small leather straps and rings, so that it could easily be detached without removing the belt itself. This enabled the warrior further to carry his sword in his hand if so desired. This then was the origin of the cingulum militaris or baltheus militaris, which was known in England as the balderich, the encircling with which attended the ceremony of knighting in the days of Chivalry.

The Bow and Arrow.

Notwithstanding the fact that the bow and arrow was the weapon of primitive man, and known to every nation, the terms for arrow have had an individual development in the various branches of the European division of the family of languages and are not descended from one Idg. ground form. The Germanic word for bow is N. Europ. taking its name from the form of the same, the Greeks, on the other hand, deriving their name τόξον 'yew' from the material of which the bow was made.

As the spear so also was the bow used both for war and the chase, and certainly served in this double capacity among the Germanic tribes, although the statement is frequently made that the bow was not employed among

¹ Chart. Th. 51627.

² Chart. Th. 55812, and s. San Marte, p. 139.

them as a weapon of war. In answer to this cf. Caesar' for mention of arrows among the Gauls; Procop. and Agathias for mention of the non-carrying of bows among the Franks in a certain expedition, which proves conclusively, however, that they had been or were at the time common among the soldiery.

For reference to the use of bows among the Alemannen and Goths cf. Ammian Marc.⁴ and Jordanes⁵, while Greg. of Tours⁵ describes the Frankish troops as armed with swords and arrows. Furthermore on the Tiberian Cameo of the Paris library the bow is represented among the weapons of the conquered Germans, as also on the Antonine Column.

Turning to the laws the Lex Salica⁷ contains the amount of wergeld to be paid for the injury of the shooting finger, which corresponds to the English law of Aedelbirht⁸ and of Alfred. In the Capit. of Charlemagne from the year 813⁹ the bow with two cords and twelve arrows is ordered as part of the equipment of every Frankish foot soldier, while bows with arrows and quivers are ordered likewise for the cavalry in the Epist. from the year 784.¹⁰ The

arrow strange to say is not mentioned in the laws of Canute. The Beowulf, however, and other poems give abundant evidence of the use of bow and arrow as weapon of war among the Anglo-Saxons long before the Norman Conquest. For instance the lines in Beowulf beginning 3114 — Nu sceal gled fretan

.... wigena strengel,

pone-pe oft gebad isern scure,

ponne stræla storm, strengum gebæded,
scoc ofer scild-weall, sceft nytte heold,

fever-gearwum fus flane full-eode, leaves no room for doubt as to their use in battle, or compare l. 1433 where mention of flan-bogan occurs, together with the here-stræl, again at 1744, while at 2437 appears the form horn-bogan, which Schulz (Höf. Leben II, 17) describes as 'a wooden bow covered with a layer of horn here ticker there thinner in order to give it greater strength for casting the arrow'. The horn-bogan of the Anglo-Saxons may, however, be named from the curved ends of the bows in comparison to straight ends, horn weapons not otherwise occurring among this people (cf. in this connection horns of a saddle). In other poems occur such expressions as flanes flyht (By. 71), flan-geweorc (Cri. 613), draca ne fleogeo (Fins. 3) etc. with several similar expressions from the Judith, Elene, Exodus and others.

At the battle of Hastings, moreover, arrows were employed on the English side, though few in number¹, while the battle was won by the Normans through their superior archery.²

¹ S. Bay. Tap., where a single archer only is represented on the Eng. side. Also copied in Jähns Trutzwaff., Taf. XXXIX, fig. 4.

² Cf. Köhler, Entw. d. Kriegsw. Bd. I, p. 1 ff.

Poisoned arrows were known to the Anglo-Saxons as to all Idg. peoples from the earliest period, cf. An. (1331) Lactad gares ord earh attre genzel in gedufan in fæges ferd, and in reference to the sword Hrunting in B. 1459 ecg was iren ater-tanum fah showing the use of poisoned weapons.

Important evidence, for the use of bow and arrow, for other than hunting purposes, later than the 8th cent., is offered by the representations of such in the MSS., when carried by warriors. Cf. Cott. MS., Cleop. C. VIII, Claud. B. IV, Tiberius C. VI all in British Museum, the Prudentius MS. of the Tenison library, and the illus. of the 24th Ps. representing a bowman and a quiver for arrows in the centre (Anton Springer, Die Psalt.-Illus im früh. M.-A., Tafel II und IV), and the VII Psalm of Harleian 603. Cf. also the ivory figures of two archers forming part of the cover decoration of the prayer book of Charles le Chauve, each holding a leash of barbed arrows and the figure of a warrior from the Stuttgart Psalter² provided with coat of mail, helmet, and bow.

Owing to the decaying of the wood no trace of bows have been found in the graves with the exception of eight preserved in good condition in the tree coffins near Oberflacht, and some few found in the moors. Although these graves date from a slightly later period, the contents

¹ Cf. Rigveds VI, 75, 15, where two kinds of arrows are distinguished, bronze and those smeared with poison. — Pliny, Nat. Hist XXVI, § 76, 27, mentions poisoned hunting arrows. The Lex Bajuvariorum, Tit. III, 'si quis cum toxicata sigitta alicui sanguinam fuderit cum sol. XII componat', and the Lex Salica XIX, 'si quis alterum cum sagitta toxicata percutere voluerit, solidis LXII culpabilis judicetur'.

^{*} Weiß, Kostümkunde II, fig. 268.

agree so exactly with those of the Merovingian period that the long bows here preserved may be regarded as typical for the German peoples of the continent and probably for the Anglo-Saxons. These bows were of yew, seven feet long, curving very slightly, strongest in the middle, and tapering gradually to the ends where the bow string was made fast. The finds from the Nydam moor were not so uniform, the bows varying in size from four to eight feet, and either quite plain or ornamented, they had sharp metal points at the corners and dated approximately from the third cent., Roman coins pointing to some such date having been discovered with them. These bows are often made from one piece of wood, others are of several pieces, but in every instance heavier and stouter toward the centre.

The arrows discovered with the afore-mentioned bows (three for each) were completely dried out as might be expected. The shafts were about 2 ft. long, somewhat stronger at the top than at the bottom, and with kitts for the feathering. Remarkable is the fact that the metal arrow points had completely disappeared, although the small clamps used to attach them to the shaft were still present, and only a brownish red coloring was seen where the points should have been. Some of these arrows attained a length of 3½ ft., while a quiver found with them about 2 ft. long points to much smaller arrows.

The arrow heads may be divided into 3 classes:

- Round and smooth with a spike which was driven into the wood of shaft.
- 2. Leaf shaped with a cusp to fit over the shaft.
- 3. Those with barbed hooks.3

¹ Cf. Lind., Merov. Altertumer, fig. 46.

^{*} For other divisions s. Lind., p. 154.

Number 1 prevailed among the Romans, while 2 and 3 are the prevailing forms found in German graves, which make it extremely difficult to distinguish between these and the light spear heads (darod).1 Although John Y. Akermann denies the existence of arrows among the Angle-Saxons for the purpose of war9, and identifies all heads resembling arrow points as belonging to a light spear, the fact remains nevertheless that certain discoveries of arrow points, although in very few instances authentic, have been made. Thus for instance in Invent. Sepulchrale a find of arrow heads containing both the barbed and triangular forms, the latter approaching somewhat the bolt shape, from Chessel in Kent is described. Nenia Brit. contains an iron arrow head from Lancashire, while Bateman' gives an account of an arrow head discovered in Derbyshire. Their extreme rarity may be due in part not to their scarcity among the Anglo-Saxons but to their rapid decomposition and, on account of small size, entire disintegration in a moist soil.

The arrows were carried in a quiver, which was probably slung over the shoulder after the manner represented in fig. 114 of Montelius (Urkultur Schwedens).

The highest pitch of excellence in archery was attained in England under Norman rule, as was demonstrated by the supremacy of English archers in the hundred years' war with France, a skilled archer being able to shoot 600 yards.

¹ Cf. Lind., figs. 47 and 48, Cochet, La Norm. Sout., Pl. XV, fig. 9.

² Arch. 30, p. 171.

^{*} Pl. XIX, fig. 7.

Ten Years' Diggings, p. 126.

Owing to this great skill with the bow archers were retained as regular troops in England until 1627, and to this day archery has remained a favorite sport of the English nobility. For further development in Middle Ages cf. Dillon.¹

Arcubalista.

The arcubalista, OE. arbaleste, was introduced into England from France after 1000. It was known among the Chinese, however, as early as 1200 B. C., appeared - later among the Greeks, and was known to the Romans in the 4th cent. A. D. under the name arcubalista or bow hurling machine from Lat. arcus and Gr. βάλλειν. Cf. the column from a Roman grave at Polignac sur Loir, in the museum at Puy, for a Roman cross-bow and quiver2, and also Veg. Fustibalos arcuballistas et fundas describere superfluum puto, quae praesens usus agnoscit pointing to general use of same at this period. Ammian. Marc.4 and Jordanes ascribe the carrying of cross-bows to the Goths, and then follows silence until the 10th cent. when it again appears in an MS. of Louis IV. (937), and toward the end of the cent. in a bible from St. Germaine now in the Nat. Lib. at Paris. It was in use during the Crusades, and during the 12th cent. appears to have come into general use again. For the illustrations from the Chron. of

⁵ De re Get. c. 5.

⁶ S. Jähns, Trutzwaff., Taf. XL, fig. 11.

Math. Paris, in the 13th cent., showing numerous crossbows, cf. Strutt.¹

The cross-bow consisted of a very strong bow, originally of wood, afterwards made of steel or iron, fastened in the centre to a wooden shaft. It possessed in addition a lever, the aim of the whole being to increase the force of the shot, and was known as an arbalestre with crows (footlever). In the 12th and 13th centuries this cross-bow was strung with the hand, and the artificial means of spanning came first in the 14th cent.²

The projectiles used were bolts — catapulta — so heavy that only a few could be carried upon the battle field. These were carried in a quiver, and both quiver and cross-bow were carried slung over the shoulder by means of a strap. The cross-bow was not so true as the bow, and the bolts were shorter and less accurately made than the arrows, but when they struck they penetrated every thing. Cf. Lampr. Alex. 2262

die Armborst unde di phîle tâten ime vil grôsen schaden.

At the most eight shots only to the minute were possible, and furthermore the thick strings when once dampened could not be used as was the case with the Genoese bowmen at Crecy. On the other hand in sieges where the bolts could be supplied promptly without the necessity of carrying, and some one was near to help span the bow they could be used on the walls with deadly effect against the enemy attacking from below.

¹ Angleterre Ancienne, p. 25.

² For the further development s. Wendelin Boeheim, «Bogen und Armbrust» (Z. f. hist. Waffenkunde 7. Dresden 1898).

The axe though not primarily a weapon of war has served as such among all nations in their early stage of development since the Pre-historic Age. From the primitive wedge-shaped stone axe of the Stone Age¹ developed the battle axe of the Bronze Age, a variation of which was the celt, used for close fighting and for throwing, the chief weapon of the Celtic tribes², which was in turn superseded by the iron war axes at an early period of the Christian era. Later these became the favorite weapon of the northern tribes especially among the Franks and the Scandinavians.

That the axe was not a common war weapon of the Greeks and Romans is a well known fact, war axes being mentioned but twice in the entire Iliad⁵, once where Pisandros is described as carrying a battle axe beneath his shield, and a second time in the battle about the ships.⁴ On the other hand among the Franks of the 5th, 6th, and 7th centuries, the chief historians bear testimony to its frequency. Thus Sid. Apol. describing the war like appearance of the Franks says excussisse citas vastum per inane bipennes, et plagae praescisse locum Pan. Majorian, while in Epist. XX the throwing axes appear under the title securibus missilibus dextrae refertae. Procop. in the 6th cent., and Agathias⁵ in the 7th assign πέλεκος and πέλεκος ἀμφιστόμος as the chief weapons of the Franks. Greg. of Tours also ⁶ employs both the terms bipennis and

¹ Jähns, Trutzwaff., Taf. III.

² Jähns, Taf. II.

⁸ Bk. XIII, l. 611.

⁴ Bk. XV, l. 711.

⁵ Lib. II, c. 5.

⁶ II, c. 27.

securis, and enumerates sword, axe, and spear as the chief weapons of the ordinary soldiery at the time of Clovis. Flodoardus and Hinemar¹ mention the francisca, while lsid.² at the beginning of the 7th cent. remarks that the bipennis was called by the Spainards, i. e. Goths, francisca.

In the case of the battle axe archaeological research has corroborated history, the Frankish grave-finds being rich in franciscas found together with the spear and shield. The difficulty, however, is to reconcile the kind of axe found with the terms bipennis and ἀμφιστόμος of the historians, both of which undoubtedly convey the meaning of double-axe, while all those discovered in the graves are single.

The three principal types of axe met with in the grave-finds are: No. I the genuine francisca or throwing-axe, which although varying in size and weight is the lightest and simplest of all axe forms, with a comparatively short handle, and blade broadening out to a flat quarter of a circle with the peculiarity that the middle of the blade does not coincide with the middle of the axe head, this position of the blade probably strengthening the force of the blow when hurled. No. 2 much more seldom found in the graves of the Rhine Franks, is a slender axe with slightly curved or straight blade, the middle of which is horizontal to the centre of the axe head. In fig. 91 is a still further evolu-

¹ Hist. Remens I, 13, and Vita St. Remigii.

^{*} Orig. XVIII, c. 6.

⁴ Cf. Veg. V, 15. — Bipennis est securis habens utraque parts latissimum et acutissimum ferrum.

Lind., Merov. Altert., figs. 84 and 85.

^{*} Id., figs. 87 and 91.

tion of this blade, which form serves as connecting link between the francisca and the broad-axe. No. 3, the war or broad-axe¹, has the widely extended blade characteristic of these axes, which was retained even into the Middle Ages. This type is often found together with the francisca in the same grave.

Calling to mind the description of the bipennis given above, and the frequency with which it is employed by the M. Lat. writers it must strike even the most casual observer as curious that out of the hundreds of Merovingian graves opened not a single double axe in the true sense of the word has as yet been discovered. Why is it, and how can it be accounted for? Lindenschmidt² offers the suggestion that the double axe forms may at one time have been prevalent, but that at the time of the Merovingians they were either no longer or very rarely used, and so it came about that the term bipennis at first applied by the Romans to the double Asiatic battle axes may have lost its significance, and have been applied to any axe. This explanation is very plausible, especially considering the change of meaning which framea has undergone, but notwithstanding that fact the description for instance of Veg.³ quoted above is so exact, that it scarcely leaves room for doubt that such an axe must have existed at the time of writing. Roach Smith, Akermann, and Rigollot agree with Lindenschmidt that the bipennis of the historians is not an actuality.

¹ Lind., Merov. Alter., figs. 92—94.

² Id., p. 197.

^{*} S. p. 57.

⁴ Arch. XXXV, p. 223-231.

and Abbé Cochet 1, on the other hand, have attempted to prove its existence on the basis of a certain find made at Parfondeval, identifying a double axe found there, of very solid and weighty proportions, with one vertical blade shaped like a francisca, and another smaller and of horizontal form², with the πέλεκος αμφιστόμος of Agathias. On a Grecian urn in the British Museum, Theseus is armed with a double axe, not very dissimilar from a double francisca, and axe No. 13 of Pl. XVI illustrating the paper on the Scythian Tumulus near Asterabad's is likewise a double axe resembling the one from Parfondeval. It must be added, nevertheless, that this is the only specimen extant in France, Germany, or England answering in any way to that description, and there is, moreover, a suspicion of its being a carpenter's tool, it bearing a strong resemblance to the carpenter's axes of the Romans. Having been found in a warrior's grave is evidence for its use as a weapon of war, which does not prove beyond question, however, that double axes or even this double axe was in use as a weapon among the Franks.

Though agreeing in so many details with the Frankish graves, the Anglo-Saxon interments differ widely in this instance for out of many hundreds of graves opened only 8 axes in all have been recovered, while in the Rhine Frankish region the proportion of finds is about one axe for every fifth warrior's grave. These 8 axes, however, though so few in number offer an almost exact correspondence to the Continental forms, the taper axe⁴ found in

¹ La Norm. Sout., p. 232.

Arch. XXXV, p. 229 for cut.

Arch. XXX.

^{*} Pag. Sax., Pl. XXIII.

the river Thames strongly resembling the francisca though not identical, while the Kentish axes from Coombe and Richborough¹ closely resemble fig. 6 from Selzen and fig. 4 from Livonia.² A small iron axe from Colchester³ corresponds to the axes taken from the graves of Frankish youths. Cf. the axe from Little Wilbraham⁴, from Faversham and from Beachdown⁵, which together with two from Ozingell, Kent complete the list.

In the MSS. axes appear in the Cott. MS. Cleop. C. VIII and Harl. 603, double axes appearing twice in the later⁶, but this MS., not being earlier than the close of the 11th cent., has no weight as evidence of their use in England at an early period.

For the later period also the Bayeux tapestry must be taken into consideration, there every man on the English side is represented with a battle axe, and furthermore the historians and poets, who have later described this battle, without exception, assign the battle axe to the English as characteristic weapon. Compare for instance Wm. of Malmesbury's description of the English army at Hastings pedites omnes cum bipennibus, conserta ante

se scutorum testudine, impenetrabilem cuneum faciunt¹. In the Gesta Guilielmi Ducis Normannorum³ is found jactant Angli cuspides ac diversorum generum tela, saevissimas quasque secures et lignis imposita saxa. Wace³ writes

> Geldones Engleiz haches portoient Egisarmes ki bein tranchoiant,

the terme egisarmes, occurring again in the Statutes of Wm. of Scotland (1165—1214)⁴, has the very unusual meaning of 'axe': Et qui minus habet, quam 40 solidos, habent gysarum, quod dicitur Hand axe. Also Extr. de la Chron. de la Norm. contains the statement

Et sitost comme les Anglois les virent fuir Ils commencèrent à poursuivir Chasquun la hache à son col.

The axe is wanting altogether on the Norman side. The axe here carried is in all probability the Danish battle axe with moderately long handle, the favorite weapon of the Norsemen, which under Canute became the weapon of the ordinary Anglo-Saxon soldier, and is not as is usually supposed the retention of the old Continental axe owing to insular isolation and the conservatism thereby engendered, long after the Continental Germans, had ceased to carry it. This theory of conservatism has hitherto found much favour, but has been upset by the scarcity of axes in the grave-finds, proving that it was never, as the francisca with the Franks, the weapon of every Anglo-Saxon warrior. It remained, however, in

Gesta Regum Anglorum, c. 241, p. 414.

² p. 201.

 ^{12 927.}

⁴ Cap. 28, § 4.

England after the Conquest, for in the 15th cent. Fishart (Gargantua) speaks of the throwing of the *English Beihel*, which eventually developed into the *helbard*, and remained in use until late in the Middle Ages.

The Lidere or Sling.

The sling was well known to the Anglo-Saxons, although very rarely mentioned in the literature, owing to its use being confined to the lower classes. Reference is made to it in Sal. 27, otherwise it is found only in the glossaries.

Among the Franks the assurance of Agathias 1 that in the year 553 no slings were carried by the Frankish army proves conclusively that it was not unusual for warriors to carry such. Furthermore a Capit. of Charl. No. X² appoints secures, taretros, fundibulas for those men qui exinde bene sciant jactare, indicating clearly that slingers formed a certain part of the Frankish army at In all probability the same usage existed that time. among the Anglo-Saxons at this period, but the direct proof for this comes from a later period, the sling being in use among them as late as 1066. For a representation of this weapon s. Westwood³, the plate being taken from the Great Psalt. of Bologna (executed by A.-S. artists in the Abbey of St. Bertin between 989 and 1008) where David appears unarmed except for the sling in his hand.

The slings may be divided into two classes, the simple more primitive type made of a leather band

¹ II, c. 5.

² Ed. Baluze, p. 509.

³ Minatures and Ornaments of A.-S. and Ir. MSS., Pl. 38.

or strap with an open pocket in the middle for the projectile such as is represented in the above mentioned Psalter, and on the border of the Bayeux tapestry¹, and the staff-sling, or stæf-livere, a later development of For a description of this cf. Veg.², who the same. describes the staff as four ft. long, in the middle of which is a leather sling (funda), which weapon is handled with both hands, and throws stones like the onager. According to San Marte the Greeks named the ballista (a machine for hurling stones) onager, and the Romans manganum. In the OE. Glosses, moreover, ballista is several times glossed by stæf-liðere OE. Gl. 34428442, Hpt. Gl. 42326, and Ep. 186, so that it may be concluded that the stæf-liðere was an instrument for hurling stones with considerable more force than the simple sling.4

The projectiles used, OE. gescot, have been discovered in several places in Europe⁵, and were either stones, lapides missiles, or leaden balls, which were carried by the slinger in a hanging pocket. Leaden projectiles with Etruscan, Greek, and Roman inscriptions have been found, the Roman ones bearing usually the mark of the legion upon them. The Romans first employed slings in the Punic Wars cf. Jähns. That small darts were sometimes shot appears also from the report of Treball (Claud. c. VIII), that the German battle field was found covered with small

⁶ Taf. XI, fig. 6, for a Roman alinger.

lances after the battle, as also the use of the word pila: gesceot WW. 14310, pila having reference to something pointed, a stick with pointed head. Egg-shaped stones are also to be seen in the Museum at Mainz.1

The War club.

Whether the War club was in use among the Anglo-Saxons or not rests upon the authority of two Aelfrc. glosses WW. 14086, 14310, no mention occurring elsewhere, nor are any pictorial representations of the same at hand earlier than the 11th cent. The real solution of the matter depends then on the interpretation of the Lat. words cautegia, clava, tentona, which have been variously described by writers of the period. Thus Isid.2 writes of the clava as follows — Clava est, qualis fuit Herculis, dicta, quod sit Clavis ferreis in vicem religata, et est cubito semis facta in longitudine. Cf. the cateia - Hacc est cateia quam Horatius cajam dicit . . . est enim genus gallici teli ex materia quam maxime lenta, quae jacta quidem non longe propter gravitatem evolat; sed quo pervenit, vi nimia perfringit. Further Hujus meminit Virgilius, dicens: Teutonico ritu soliti torquere catejas. Unde et eos Hispani et Galli teutonos vocant.

Important is the remark concerning the skill in throwing Quod si ab artifice mittatur, rursus venit ad cum qui misit, which recalls the bomerang of the Australians. Compare also Ammian Marc.⁴, who reports that

^{&#}x27; For the use of slings at the battle of Hastings compare the passage quoted from the Gesta Gulielmi Ducis Norm. at p. 81.

⁴ Orig. XVIII, 7.

² Aen, VII, 740.

⁴ XXI, 7.

the barbari (Goths) ingentes clavas in nostros conjicientes ambustas, destroyed the left wing of the Roman army with such clubs. The above mentioned glosses read as follows: — Cautegia. i. telum: gesceot WW. 140³⁶; clava, vel cateia, vel teutona: anes cynes gesceot WW. 143¹⁰, which in the light of the above passages point at least to the anes cynes gesceot as being some sort of a war club for hurling at the enemy. In this connection cf. the hammer of Thor Mjolner, which always returned to his hand after being thrown.

The clava may have been among the Anglo-Saxons, and certainly was among the Franks, a strong heavy wooden club with a decorated handle of gold or silver. Cf. also the reproduction of the Bayeux tapestry for the representation of such a club in the hand of Bishop Odo, brother of Wm. the Conqueror, and for further use especially in MHG. poetry s. San Marte.

War-machines.

War-machines among the Anglo-Saxons are, as in the case of the war club, largely a matter of conjecture, no A.-S. term for, such being preserved except the single word ram, for, in the description of the storming of a town in king Alfred's translation of Orosius³, the Lat. word ballista

¹ Cf. Monach, San Gallensis I, 34.

² Waffenkunde, 196 ff.

^{*} pa gegaderade Regulus ealle pa scyttan pe on pam færelde wæron, pe hy mon mid flanum ofercome, ac ponne hy mon sloh odde scead. Ponne glad hit on pam scillum swylche hit wære smide īren. Pa het he mid pam palistar mid pam hy weallas bræcan. Ponne hy on fæstenne fuhton pæt hire mon mid pam pwirer onwurpe. Or. 4, 6, p. 399.

is simply turned into palistar, which would lead naturally to the conclusion that an Anglo-Saxon word for the same was lacking. The basis for the conjecture that such existed is the Lat. word phalarica, which occurs in the Hpt. Gl. (425¹³), and has usually the meaning of an arrow, or burning arrow shot from a machine. Cf. Gloss. San germ., No. 501 falarica, genus arcae grandis aut genus teli. Gloss. of MS. R. (Hpt. Gl.) falarica, lancea magna, telum mulieris. Greg. of Tours gives the meaning of lance, while Isid. Orig. 2 describes falarica as fallows: falarica est telum ingens, torno factum, habens ferrum cubitale et rotunditatem de plumbo in modum sphaerae in ipsa summitate. Dicitur etiam et ignem habere affixum. Hoc autem telo pugnatur de turribus, quas Phalas dici manifestum est . . . Phalis (i. e. turris lignea) igitur dicta est Phalarica, sicut a muro muralis. Later the name of the object hurled was transferred to the machine, which hurled it, the meaning of the same being identical with mangana.

The ram, the favorite siege machine of the Romans, was used frequently in connection with the taratrum, a machine for breaking down walls. There were three different kinds of ram in use among the Romans, the first suspended, the second running upon rollers, and the third carried by the men, who worked it, often consisting of a mere wooden beam with a bronze or iron ram's head at one end for battering down the walls of the besieged town. No description of such is to be found in the A.-S. literature, the word ram (usually referring to the animal) being found only in the glossaries, a few times

¹ IV, 35.

² Orig. XVIII, 7.

among lists of war-equipment, but with no further notice, which would enable an idea to be formed as to which of the three methods of working the ram was employed by the Anglo-Saxons.

The use of stones in war is also several times mentioned.¹ This does not, however, necessarily imply the use of war-machines, it being possible that the stones were thrown down from the wall, but it suggests nevertheless the possibility of the existence of such machines for hurling stones in sieges among the old English inhabitants of the island.

III. The Weapons of Defence.

The Shield.

Taking up in this second division the protective armour, the shield will first be discussed as the oldest weapon of defence, the general introduction of helmet and coat of mail among the Germanic tribes taking place at a considerably later period, and under foreign influence.

Old as is the shield, however, not one of the European names for the same can be traced in the old Indian or Sanscrit, and there is a possibility of its being regarded as an Ureuropean weapon owing to this singular absence of the word in OI., it not once occurring in the Rigveda. Among the Greeks the Homeric shield is described almost without exception as round, while among the Romans six different types existed, the best known of which the

¹ Or. 4, 10, p. 416, 428, and obolisci: Stanes Hpt.-Gl. 44629.

scutum or long shield had the form of a half or third cylinder. This Roman long shield of wooden plates, covered first with linen and above this leather, bound with an iron band around the edge, was used by the heavy infantry, while the lighter round shield or parma, borrowed from the Greeks, was the form chiefly used by the light infantry and cavalry. Later followed the introduction of oval, oblong, and six-sided shields, the form of which perhaps served to distinguish the different divisions of troops. From the Greeks also came the halfmoon-shaped shield, the pelta. To the metal shields belonged the clypeus, a small oval brass or bronze shield, while the cetra and ancile were small oval shields covered with leather. This leather covering was of oxenhide, often seven layers thick, over which frequently a metal plate was nailed, and in the middle a richly ornamented knob of metal (the umbo), adorned at times with the emblem of the eagle, wolf, or half-moon.

According to Tacitus¹ the shield was well known to the Germanic tribes before the Roman invasion, being either of basket-work or wood, of enormous size, and painted different colors to distinguish the various tribes.² Finding these great unwieldy shields too clumsy in their conflicts with the Romans, smaller shields from 3 to 4 ft. long gradually replaced the basket-work affairs, and in the Merovingian period the round or slightly oval shape adopted from the Roman bronze shield, so valuable for its lightness, became the universal form among Franks, Alemannen, and Anglo-Saxons.

¹ Annales II, 14, Germ. VI and XLIII.

² Cf. Caesar, B. G. II, 33, and Hottenroth, Taf. 13, No. 3.

At this period on the Continent as in England the chief material used for these shields was linden-wood, often covered with leather as among the Romans, with a metal bound edge to insure greater strength, together with an iron umbo in the centre, and an iron bar beneath, which served as handle. Scarcely a vestige of wood or leather has been discovered in the grave-finds, which makes all the more valuable the testimony of such writers as Greg. of Tours and Paul. Diac. concerning the material of Frankish shields. According to the former these were of wood, the soldiers of Sigebert having made use of their shields to swim across the Rhone, as did Leo and Attalus in their flight across the Mosel, while Paul, Diac.² relates that the army of Childebert dying of hunger, consumed even their clothing and shields, which could refer only to the leather covering of the latter. From the writers such as Sidon. Apol., Agathias, Procop. 3 it may be learned that the shield together with the spear formed part of the equipment of every Frankish warrior.

An examination of the Capitularies quoted at p. 32 further proves that not only the footsoldiers but also the horsemen were provided with shields, while the Lex Rip. assigns a value of 2 solidi to shield and lance together, showing how common a possession they must have been at that time. Furthermore a glance at the laws concerning the punishment for loss of shield shows in what dishonor it was held for a warrior to have lost his shield, the loss

¹ IV, 30 and III, 15.

² III, 31

³ S. p. 19ff.

^{*} St quis weregeldum solvere debet scutum et lanceam pro duodus solidis tribuat — tit. XXXVI, No. 11, ed. Baluze, p. 37.

being at first punished by a fine of 15 sol.¹, which later fell to 3², as the shield gradually lost its earlier importance as chief weapon of defence through the introduction of protective armour. The Anglo-Saxon laws agree substantially with those of the Franks, as early as the time of Aedelstan a law for the punishment of dishonest wheelwrights occurring³ and from the laws of Canute⁴ it is seen that shield and spear were part of the ordinary equipment of every Anglo-Saxon warrior, even the lesser thanes, and those under the rank of thane, who had no sword to render, being equiped with both spear and shield.

A glance at the wills⁵ is sufficient to show that in almost every instance the number of spears and shields bequeathed is double that of the swords, coats of mail, and helms pointing clearly to the rarity of the latter in comparison to the former.

In the Glossaries the Lat. words for shield seem to be used absolutely without reference to the distinction between the various kinds of shields, the Lat. scutum pelta, parma, etc. being glossed indifferently by scyld, bord etc., so that no conclusion as to the shape of the Anglo-Saxon shield may be drawn from the use of the Latin terms. Two words for shield, nowhere else recorded with this meaning have also been found in the Glossaries, del translating pelta, and tude, tud: parma. The word lind is poetic only, found frequently in Beowulf and other poems

¹ Lex. Sal. tit. 33 de conviciis.

⁵ Chart. Th., p. 596, 573, 505, etc.

together with rand or hilde-rand — more frequent in Beowulf than scyld —, and bord, bordwade, pointing clearly to the material of which the shield was made. That this was only in very rare instances of metal may be inferred from the passage in B. 23371, where Beowulf orders an iron shield that will withstand the terrible fire of the dragon, this being so unusual that special mention is made of the same. No specimens of metal shields have been found in A. S. interments, although of rather frequent occurrence in Scandinavia.

The Anglo-Saxon MSS, are rich in the representation of shields, but are absolutely valueless for reconstructive purposes before the 9th or 10th centuries, the majority of these MSS, being not earlier than the 10th century. In Harl. 603 (11th century) the Anglo-Saxon warrior is represented armed with angon or spear, and round shield, often colored yellows, the horsemen as well as foot soldiers being so armed.5 At p. 57, moreover, the sharppointed umbo or boss exactly corresponds to some of the Kentish grave-finds, while the ornamentation of the horseman s shield, mentioned above, appears to be along radiating lines diverging from the centre and sloping toward the edge. Exactly the same characteristics are observable in Aelfric's Heptateuch⁴, in the Psalt, Illus, im früheren Mittelalter⁵, and in the illus. from old Irish and A.-S. MSS. by J. O. Westwood — Comment. on Psalms by Cassio

Anton Springer, Taf. IX, III, and II.

dorus¹, from the Utrecht Psalt.² (9th century), from the Salisbury Psalt.³ (10th century), from the Great Psalt. of Bologna⁴ (corresponding closely to Cott. Tib. C. VI, Psalt. of the 10th century), and Cott. Psalt. Tiber. C. VI.⁵ Cf. further a drawing from the Stuttgart Psalt.⁶ with round shield and helmet (about 950), and the representation from the Psycomachia of Prudentius (Paris, Nat.-Lib.) of two warriors wearing Phrygian caps and carrying the A.-S. round shield with sharp-pointed boss.⁷ The shields from the Bayeux tapestry prove nothing as to English equipment, being in every case a representation of the pointed long shield of the Normans.

Very far from clear is the history of Anglo-Saxon shield-ornamentation, which is largely a matter of conjecture, the only sources of information being isolated passages in the poems, and reports of other than A.-S. writers concerning the similar shields of the Germans of the Continent, the shields themselves having come down in such a state of preservation, that only the (iron) umbos and handles have remained, and precious stones if used for their decoration have long since perished. Judging from a Celtic shield in the British Museum⁸, of bronze with a slightly oval boss decorated with three pointed oval pieces of coral, and two small studs of the same material near by, from the few Anglo-Saxon bosses of the precious

⁸ S. Hor. Fer., Pl. XIV.

metals discovered in the grave-finds, and from the descriptions of MHG, poetry, it may be surmised that the principal decoration of the Anglo-Saxon shield was the button upon the shield boss, and the nails used to fasten this boss to the shield. The rand-beag may also, in exceptional cases, have been of gold or other metal set with stones, although there is no direct proof from the gravefinds, and the few passages from the poets regarding shield-ornamentation do not specify the mode of decoration. The geolo-rand of B. 438 may be taken as a reference to a golden band encircling the shield rather than to the vellow color of the linden-wood, the usual interpretation of the expression, while the pryd-bord stenan (El. 151) is an exactly parallel case to the Stain-bord of the Hildebrands Lied, which may have reference to a shield with both rim and boss adorned with precious stones of some description. Furthermore the fatte scyldas of B. (333) undoubtedly point to golden ornamentation, while bord bearht (B. 231), and bord-wadu beorhtan (B. 1243) refer either to a shield glittering with gems, or what is much more likely to a decoration of some sort with gold and silver, probably boss and shield-rand. In this connection of, Or. (6, 25 492), who mentions anne gyldenne scyld. That the decoration was also at times in lines diverging from the centre is clear from the shield of the horsemen from the Harl. MS., perhaps painted, perhaps adorned with metal discs resembling those found in the interments at Great Driffeld (s. p. 78). For richly adorned Frankish shields cf. the description of Sid. Apoll. of the enow, white round shields

Olypeis laevam partem adumbrantibus, quorum lux in orbibus nivea, fulva in umbonibus, ita censum prodebat et atudium. Epist. XX.

with gold bosses of certain Frankish or Gothic youths in the triumphal procession of Sigismer, and the gold shield presented to Charlemagne by the Pope, and deposited with him in the grave. From a much later period cf. the shield of Brunhilde of alrôtem gold einen schildesrant mit stälhertem spangen michel unde breit, and vers. 37 man sach ouch dâ zebrochen vil manege buckel starc, vil der edelen steine gefellet ûf daz gras.

The supposition is not unlikely that the German tribes, after the fashion of the Greeks and Romans, may have adorned their shields at this early period with devices such as the eagle, wolf, or boar²: cf. Wand. 98, where a shield wall adorned with dragons, the war emblem of the West-Saxons, would do away with the difficulty of the passage, not a single direct proof, however, can be adduced to support the theory, the sole instance of a shield (other than Roman), from this period in England, bearing such an emblem is the bronze shield (mentioned at p. 72) upon which the figure of a boar was nailed, and which is unmistakably of Celtic origin. The bearing of family crests upon the shield arose certainly not before the 12th century.³

From the grave-finds together with the MSS. has it been possible to reconstruct the Anglo-Saxon shield with a considerable degree of certainty, although wood and leather have completely disappeared, the iron boss and handle, together with a few nails alone remaining. As already stated in connection with the MSS, the usual shield

¹ Nib. B. 414.

² Cf. Tac. (Germ. 43) for the various colored shields distinguishing the different tribes.

³ For a full discussion of which and the later development in the age of Chivalry s. San Marte, Waffenkunde, p. 103.

was round, made of linden-wood, covered with oxhide¹, and about 18 inches in diameter, being not longer than the length of the extended arm. In the centre was a large hollow iron boss, back of which the wood was cut away to make room for the hand between the boss and the iron handle, which extended across the hollow of the boss. The buttons, which were fastened to the boss at its apex, were sometimes tinned or plated with silver and gold, as were also the nails used to fasten this to the wood of the shield, which was additionally strengthened by a metal band extending around the edge.² In the graves the position of the shield boss varied greatly, being found on the breast, on the right arm, upon the knees, and beneath the head.

These umbos or bosses vary considerably in form, the four divisions, however, given by Lindenschmidt³ form the ground types to which most of the others conform, subject to more or less variation. The first three only are found in Saxon graves, No. 173 being the most frequent in Anglo-Saxon interments. Fig. 175, distinguished by its conical shape (a height of 4 inches being sometimes attained), and extremely narrow rim, is much more unusual, though found in great numbers in Kentish graves, while the fourth type No. 176 is found only in West-Frankish and Burgundian interments. For a very similar

¹ S. p. 70, note 3.

³ Merov. Altert., figs. 173—176.

umbo to the Kentish ones cf. Mestorf.1 The umbo, usually of iron and not exceeding six inches in diameter, was made fast to the shield by means of 4 or 5 rivets driven through the rim into the wood beneath. Such an umbo with the rivets still in place was found at Gilton, the 3 iron rivets, with flat round heads nearly 2 inches broad, having part of the wood of the shield still adhering to them, which from the length of the rivets appeared to have been half an inch thick. A round hollow iron cylinder an inch and a half in diameter and about 5 inches long was found beneath, bound with some string not unlike our pack thread, which has been identified as the handle. The use of these iron bars, always found with the umbos, was for a long time uncertain, until the discovery of a skeleton at Brighthampton, whose left hand was found encircling such an iron cross piece within an umbo, removed all further doubt as to their purpose.2 For a very unusual specimen with a hide covering over the umbo as well as the shield proper s. Arch. Jour.3 Also for an enormous hemispherical umbo seven inches across from Kingston Down s. Invent. Sepul.4

Once only have remains been recovered by Goddard Johnson⁵, enough of which remained to show the form of the shield to have been circular, with laths of wood converging from the extremity to the umbo. These laths were fastened to the body of the shield, probably of wood,

¹ Die vaterl. Altert. Schles.-Holst., fig. 709.

³ XI, p. 98.

⁴ Pl. XV, fig. 19.

⁵ Collec. Antiq., Vol. II, p. 237.

with twine or pack thread so well preserved that it could be unwound to the extent of a yard or more. The sketch of the shield remarkably resembles that carried by the horseman in the Harl. MSS.¹, with lines radiating in the same manner from the centre. An interesting find in a grave mound by Gokstad in southern Norway of an entire ship decorated with 32 shields on each side shows the Viking shield also to have been round.² This ship of the dead hung with shields recalls the funeral pyre of Beowulf (3139) helmum behongen, hilde-bordum beorhtum byrnum, swa he bena was, a survival of which heathen custom may perhaps be traced in the custom of hanging the shield of the dead warrior in the church, which arose in the Middle Ages under christian influence.

The ornamented umbos are rare, but such bosses plated with silver, together with the nails remaining in the broad rim, have been found at L. Wilbraham, while from Ash comes a fine specimen exceeding six inches in diameter, ornamented at the top with a thin plate of silver on a ground of mixed metal, composed of copper and calamine, riveted to the iron point. Five studs of the same metal around the rim are thinly plated with silver. This umbo has a concavity continuing to a point, and does not exceed \$\frac{1}{10}\$ of an inch in thickness. In the British Museum is an umbo with an enormous silver button, together with a very beautifully chased button of the finest workmanship, excavated at Barrington, Cambridge-shire, of gilded bronze attached to the umbo by three nails. The workmanship of this button recalls the finely chased

[!] Lind., fig. 226.

² Montelius, fig. 168,

^a De Baye, p. 35.

fibulae of the Anglo-Saxons, for on the bronze can be traced the head of a swan, and in the neighbouring compartment lies what may possibly be the letter S.

A most unusual find at Great Driffeld, Kent¹ was of an umbo not unusual in itself, but found together with. 3 iron discs to be placed on the shield to strengthen it. This is a very rare find, such discs not having been discovered at all on the Continent, and only at one other place in England.

The best preserved specimen of a rim is that from the shield found in the Torsberger Moor. The wood is practically intact, and the boss and randbeag of bronze are partially preserved. Although few traces of this rim have been found in Anglo-Saxon and Frankish graves, that most of the shields were so strengthened may be inferred from the frequent use of the word rand for shield, and the phrase from Gn. Ex. (94) scyld (sceal) gebunden leoht lindenbord.

In battle the shield was carried at arm's length, the bearer thereby breaking the force of the weapon hurled against him, even if it penetrated or broke the shield (cf. clypeos rotare of Sid. Apoll., Panegyr., Major.). Furthermore in case of need the umbo was used as a kind of defensive or striking weapon against the head and breast of the opponent. When not in use the shield was probably slung at the back by a strap over the shoulder, a conclusion drawn from the figure from the Harl. MS.³

¹ Pag. Sax., Pl. IX.

² S. Mesforf, Vaterländ. Altert., Taf. 45, fig. 513, and Taf. 44, fig. 545.

³ Cf. Arch. XIX, p. 77.

The number of shield umbos found in the various interments varies greatly being poorest in W.-France, where from the great cemetaries of Londonières and Envermeu from 860 graves only 4 umbos were recovered, while from the Anglo-Saxon gravefields of Gilton, Kingston Town, and Sibertswold from 532 graves 58 such bosses were unearthed, 18 being found at Gilton alone. In Germany also the proportion varies, from Fridolfing only 8 to 10 being found while at Nordendorf from 500 graves 40 such were brought to light.

/ The Helmet.

The basis for this and the following sketch of the coat of mail is the Leipziger Diss. of Hans Lehmann, Brünne und Helm im Angelsächsischen Beowulfliede, which deals with the main points in question. Certain matters of detail have been altered perhaps in a few instances investigation of the original MSS., however, in the British Museum and a comparison with other Anglo-Saxon poems and Glossaries have led, practically to the same results as those stated in the above mentioned Diss.

Previous to the Carolingian period it appears to be almost an impossible task to ascertain with any degree of certainty the appearance of the Anglo-Saxon helm. It may, however, be stated unqualifiedly that, like the byrnie, its origin was not Germanic¹, non loricam Germano non galeam, and paucis loricae, vix uni alterive cassis aut galeae, but was of foreign origin, and it was long before the freedom loving barbarians hampered their movements by encasing their limbs in steel, or covered their heads with metal.

¹ Tac. Ann. II, 14, and Germ. VI.

As with the coat of mail so with the helmet, the chief sources of information for this early period are the laws dealing with the *heriot* etc., and a few notices from contemporaneous Continental historians.

In the Salic law the helm is not even mentioned, but in the Ripuarian a worth of 6 sol is set upon it against 12 for the coat of mail. From the year 813 Cap. IX², concerning the arming of troops, demands that the upper classes shall come armed with loricas and galeas beside the usual equipment. Ine's Law 54 towards the end of the 7th century reads as follows: gif him mon gilt, ponne mot he gesellan on para hyndenna gehwelcere monnan and byrnan and sweord on pæt wer-gild, gif he pyrfe, omitting the helm, which is not mentioned until the beginning of the 10th century in Anhang VII 2¹⁰. In the laws of Canute⁴, the Earl had 4 helmets to pay, likewise the king's thane, but the middle thane had neither helm nor coat of mail to render, showing that they were costly, and exclusively the possession of people of rank. The helmet is several times mentioned in wills together with the sword and byrnie⁵, in the will of Archbishop Aelfric (1006) the very unusual number of 60 helms and 60 coats of mail being bequeathed by him to his royal lord together with his best ship. Greg. of Tours mentions the lorica and galea as worn by the Frankish warriors under

Childebert in 590, and in another chapter assigns the helm to the regular equipment of Frankish nobles.²

Another source of information is the description of Anuerin, a Gaelic bard, who as eyewitness of the battle against the Saxons at Cattrae wrote the following: 300 warriors in gilded armour, three armour clad troops with three leaders, who wore golden necklaces. Armed were they with knives in white sheaths: they wore four-cornered helmets. Some had spears and shields, the latter from cleft wood. Their leader carried a rounded shield: he was equipped with scale armour, carried a death-dealing spear, and wore the skin of a wild beast. These 300 warriors are to be regarded as picked troops, which fact, combined with the laws of England and the Continent, leads to the conclusion that in the 8th century, the helm was worn only by the highest class of warriors, even as late as the beginning of the 10th century it belonged still to the comparatively rare and costly equipment, and only in the 11th did it begin to be more general.

The seal rings of Alaric and Childeric represent the warriors with body armour, but without helmets⁵, also the metal figure found in the tomb of Queen Thyra⁴, while on the Xantener and Kranenburger⁵, as well as on the English ivory casket of the 8th century, figures both with and without helmets are represented. On the other hand the French minatures of the Carolingian period together with the Ashburnham Pentateuch point to the almost

¹ IV, 42; V, 23.

Weiß, Kostümkunde, fig. 199.

Lind., Merov. Altert., figs. 203, 204.

universal use of helmets for warriors of rank. The great difficulty, however, is the genuineness of the representation i. e. whether they represent the helmets really worn by the people in question, or whether they are only conventional or barbaric representations of Roman originals as is the case with the whole of the defensive armour in general. In the Codex Aureus the warriors are armed with spear and helmet or some kind of head protection, while their leader Saul appears in a four-cornered helmet 1 resembling that of one of the body guards of Charles le Chauve, minus the crest², which is in all probability the four-cornered helmet of the Franks.⁸ In the Utrecht Psalter (written in England or by A.-S. monks) are seen everywhere round shield and spear, but the helm seems to point to a leader or warrior of wealth as the rank and file are not so represented.4 In Harl. 603 at p. 13 is the first appearance in this MS. of a four-cornered helm with crest, which bears a strong resemblance to that of the bodyguard of Charles le Chauve. At 57 appears another warrior so equipped, and in Aelfric's Heptateuch⁵ similar figures.

Much more frequent is the head covering known as the Phrygian cap. In the French Codices its occurrence is not frequent, but it is seen in the Utrecht Psalter⁶,

⁶ Rahn, Taf. IV.

in the Stuttgart¹, and Salisbury Psalter² (10th century), where it is worn by four of the figures, apparently without other warlike equipment being here perhaps merely a leather cap. Such a helmet or cap is worn by Goliath in the Great. Psalt. of Bologna⁸, and the horseman, mentioned at p. 77 from the Harl. MS., is provided with the same kind of cap or helmet. In the MS. of the Psycomachia of Prudentius (10th century) a warrior appears with the usual round shield, spear, and this same cap or helmet.⁵ — Judging from its use by other than warriors it may be suspected that this cap though represented in many MSS. with the color of metal is, nevertheless, only a strong leather cap, perhaps strengthened with metal, worn by many of the Anglo-Saxon men, and, when colored, represents only the delight in color of the artist not that the caps themselves were of metal.

Toward the 10th century are discovered in some of the MSS. the representation of simple conical metal helmets one of which is seen on the head of a figure from the ivory casket from Xanten⁶, likewise from the Salisbury Psalt.⁷, from Harl. 603 p. 68, and from the Stuttgart Psalt.⁸ the figure of an archer with exactly the same kind of helmet as that on the Xantener casket. The art of the Carolingian period was, however, so strongly in-

fluenced by the Roman-Byzantine art that conclusions from the representations of the MSS. alone, without further verification from grave-finds, chronicles, Anglo-Saxon poems, etc., cannot be relied upon.

Turning now to the grave-finds it is but natural to expect that, since helmets were at least everywhere known, and to a certain extent worn by the German tribes both of the Continent and in England at the time of the Carolingians, at least some trace of such should be found in the graves of an earlier period than that of the Merovingian epoch, and in England, in some few instances, such remains have been brought to light. In the Frankish graves of the Continent, however, not a single authentic example has been found (all those unearthed being of foreign manufacture), and only in England and from a later period in Scandinavia are certain proofs at hand. For a specimen of the conical helm corresponding in all respects to that of the helm represented on the Xantener Casket cf. Smith 1 for a reproduction of what appears to be the framework of a helmet dug up at Leckhampton Hill near the skull of a skeleton. The metal is thinbronze, and the question as to Saxon manufacture immediately arises. As iron was used exclusively by the Saxons in the manufacture of their arms, the bronze would seem to speak rather for Roman or Celtic origin, but with the scarcity of specimens at hand, two from all England, it is impossible to speak with certainty. Setting aside, however, the question of origin, it proves the ancient use of helmets by Anglo-Saxon warriors, and the later development of the same in the 10th and 11th centuries

¹ Coll. Antiq. II, 36 or Ten Years' Diggings by Bateman.

may be traced from such a form as this. The helmet is formed of a frame work of crossed metal bands of bronze united and held at the top by a button, and underneath by a circular head band to which, it is stated, was attached a complete chin chain, which was destroyed in the process of excavation.

The second specimen discovered by Bateman at Bently Grange is so rare, so unusual, and of such value for corroborating certain passages in Beowulf that a full description is thought not out of place. Bateman² describes the discovery as follows: The helmet consists of a skeleton formed of iron bands, radiating from the crown of the head, and riveted to a circle of the same metal which encompassed the brow: from the impression on the metal it is evident that the outside was covered with plates of horn disposed diagonally so as to produce a herring bone pattern, the ends of these plates were secured beneath with strips of horn corresponding to the iron frame work and attached to it by ornamental rivets of silver at intervals of about an inch and a half from each other; on the bottom of the front rib, which projects so as to form a nasal, is a small silver cross slightly ornamented round the edges by a beaded moulding, and on the crown of the helmet is an elliptical bronze plate supporting the figure of an animal carved in iron, with bronze eyes, now much corroded but perfectly distinct as the presentation of a wild boar. Also many fragments, some more or less ornamented with silver, which have been riveted to the helmet in some manner not now understood. There are also some small buckles of iron which probably served to fasten it

¹ Lind., Merov. Altert., fig. 195.

² Ten Years' Diggings, p. 31.

upon the head. This is the famous Eber-helm, the framework of which was probably covered at one time with horn, felt, or leather, most likely the latter and well known to the OE. Epic poems. Comparing this helmet with the following passages from Beowulf, an idea of the frequent mention of the Anglo-Saxon Eber-helm may be obtained: — thus from

B. 1111 swin eal-gylden, eofer iren-heard; 303—305 Eofor-lic scionon:

El. 76 eofor cumble bepeaht;

El. 259 grim helm manig, ænlic eofor cumbul;

B. 2152 Het pa in beran eafor heafod-segn, heafosteapne helm 1 . . .

For a similar helm, from the Viking period in Scandinavia, from a figure on four bronze plates found in a stone mound by Bjørnhofde at Öland cf. Montelius², and the name Hildiswin applied to a helmet in the Snorre Edda³, where after the death of the leader Adil occurs the following line: Þá tók Aðils konungr af honum dauðum hjálminn Hildisvin ok hest hans Hrafn.

The framework of the English helmet, though differing from the later ones formed of one piece of metal, or as in Scandinavia of several metal plates welded together, forms a most interesting link between the leather helmet of the earliest period, and the entire metal helm of the

¹ For the OHG. epurhelm, eparhelm s. Grimm, Myth. 195.

² Fig. 144.

³ Ed. Jónsson, Skaldskaparmál, p. 108.

following, in this instance the spaces between the iron ribs being probably filled in with horn or leather, which later gave way to metal plates. This fragment shows plainly also that the connection of the boar with Freyr, the sword-god, had been forgotten in England, and was used only as a protective talisman, otherwise the christian emblem of the cross would not have occurred side by side with the heathen symbol of the Norse god of the sword.

A third specimen showing a still greater advance in the evolution of the helmet is the metal helmet with brass ribs, and iron plates, which at one time belonged to the Rhine Collec. of antiquities.1 The origin and place of finding of this helmet is unknown, and owing to the fact of its being one of but three extant specimens of this class, it is impossible to identify it with certainty. Its similarity to the above mentioned helmets, and its likeness to the art of metal working of the Merovingian period allows it, however, to be assigned with a fair degree of probability to this period. The helmet is formed of six bronze ribs between which are fastened flat plates of strong iron, the ribs run together forming a point at the top, and are closed with a round plate, the button of which has been broken off. The iron plates are held fast by strong bronze nails, and the six ribs are held fast at the bottom by a strong band of iron, covered with a highly ornamented border of bronze, upon which are engraved the figures of two animals. Cf. B. 1448—1455.

befongen frea-wrasnum, swa hine fyrn-dagum workte wæpna smið, wundrum teode, besette swin-licum, pæt hine spöðan no brond ne beado-mecas bitan nemeahton, which description tallies with the helm in question. The frea-wrasn is the diadem worn only by kings and princes, and may perhaps apply to the engraved rim of some such massive helmet as the above. That the helm is unusual may be seen by comparison with the English specimens, which are of much lighter construction. The verb besettan may point to the fact that the boar was engraved upon the metal rim as in the case of the above mentioned helm. On the other hand it may also be taken to mean a boar made from other metal and nailed to the rim of the helmet as in the case of the Celtic shield. With this furthermore cf. the bronze helm from a figure of Wodan von Ultima and Vendel covered likewise with iron plates, and dating from the late Iron Age.2

Of the ornamentation of the helmets, apart from the figure of the boar, the only source of information is contained in the Anglo-Saxon poems, and in the wills and records. That the helmets of kings and princes were of precious metal is certain from such expressions as gold fah (B. 2811), gylden grima (El. 125), se hearda helm hyrsted golde fætum befeallen (B. 2255), scire helmas (Jud. 193), the brun fagne helm (B. 2615), and brune helmas (Jud. 318) being perhaps of ordinary metal, but the preceding refer undoubtedly to gold or gilded helmets. A reference is made from a much later period to gilt helmets by Wm.

of Malmesbury¹ where he mentions Godwin's gift to Hardi-Canute of a ship having on board eighty soldiers with gilt helmets. Cf. further

B. 1030 — ymb pæs helmes hrof heafod-beorge wirum bewunden wala (walan) utan heold,

pæt him fela lafe frecne ne-meahton scur heard scettan, where an arrangement of spirals, coils, etc. as on the fibulae are perhaps to be thought of, although exactly how this wire was arranged has not been ascertained.2 An interesting comparison from the MHG. poetry may here be made from Wigalois 5556: where sin helm was von gesteine und von golde geworchet, or from Eneit 8749: Camilles helm vil schöne was, Laterbran alse ein glas, gezieret wol mit steinen, which seems to have been common among the highest class of warriors at this period. The words puf, cresta (?), and camb point, moreover, to some sort of ornamentation at the top of the helmet probably a tuft of feathers or of horse hair, to which may be compared the following from Ulrich v. Lichtenstein: Dar umb von federn was ein Kranz 170,25; and Ein rusch von pfans vedern guot fuort af dem helm der hochgemuot to which is added Din rûsch was wol ellen hôch Gebunden ûf dem helm sin Mit einer risin guot sîdîn 259, 27.

The helmets of less skillful workmanship were often damaged in fight: helm oft gescær B. 1526; guð-helm toglad B. 2487, and the servants after every battle must repair

these damages: feormynd swefað þa-þe beado-griman by-wan sceoldon B. 2257, and keep rust away; otherwise the helmet became eald and omig B. 2763.

The origin of the ribbed helmet is to be traced back to the early Germanic period, the first appearance of such a form being that worn by a German body guard in the Roman service on the Trajan Column¹, consisting of two ribs bent at right angles to each other above a band for the head, the spaces between are not yet filled in, but important for the archeologist is the metal or leather band, which passes under the chin, and serves to hold the helmet in place. The sculptures from the Xantener and Kranenberger caskets, and from an Italian casket belonging to the 9th and 10th centuries show still greater similarity to the frame work of the grave-finds, even to the button at the top. From the minatures of the 9th and 10th centuries this form appears principally in the Stuttgart Psalt.4, worn also by two cavalry men.⁵ Although these helmets are painted blue it is not necessary to conclude that the spaces between the ribs are filled with metal, in comparison with the Phrygian caps 6 showing that they also are painted the same color. In regard to form the Eber-helm, the one represented on the Trajan column, and those of the Psalter are half spherical, while the sculpture and the third helm described on p. 87 more nearly approach the conical, the latter becoming the more frequent in the

10th century.¹ This helm composed of several pieces set together in contrast to the one piece helmets of Greeks, Romans, and Etruscans lasted up until the 12th century. Heavy metal helmets have been found, one from Beitsch, and another from Selsdorf being found in Hor. Fer.² No trace, however, of the four-cornered helmet has anywhere been discovered outside of the MSS.

The long pointed helm composed of one piece of metal is found in the Copenhagen Museum³, showing great similarity with certain East Slavic helms⁴, which Lehmann believes to be the home of this helm, reaching England through the medium of commercial intercourse between the north Germanic peoples and the Slavs. The heato-steap helm (B. 1245, 2153) perhaps refers to some such head-covering. The very heavy helms appear, in the representations, at least later than the ribbed forms. Those of conical shaped being found in the MSS. from the 11th cent. on, and are the prevailing type up until the middle of the 12th.⁵

No representations of cheek protectors occur in the minatures or sculptures of this period, appearing first in the 11th and 12th centuries although even then very seldom seen.⁶ Two rings found attached to the bronze

ribbed helmet may have served for some such purpose of attachment. That they were known at an earlier period than the above representation is, however, certain from the hleor-beran or hleor-beorg of Beowulf (303) and Gen. (444) where a reference to such a protection is as follows: hæleð helm on heafod asette and pone full hearde geband. For reference to a chin protector cf. Ex. 175.

The nasal or nose protector was known to the Anglo-Saxons at an early period, as is proven by the nose piece bearing the cross on the Eber-helm, but whether extensively used or not before the 10th century is doubtful as there is no proof either for or against, unless the passage in the Lex Rip.¹ cum directo be taken to refer to such a nose piece. San Marte² translates the Lat. with gerade aus, and understands under directum 'the nose protector, that which projects forward and protects the nose'. In the MHG. period this was often richly adorned with precious stones.³ From the 10th cent. on the nasal is often found on minatures and on seals, occurs also once in the 8th century on an English ivory casket⁴, and was not replaced by the visor until towards the end of the 12th century.⁵

The words grima, grimma, and grim-helm found in Beowulf, Elene, and other Anglo-Saxon poems have led to much confusion, owing to the false interpretation of the word as visor. In Icelandic the word means 'a mask,

that which conceals', Grimr being a by-name of Wodan from the fact of his going disguised, but in this case such an interpretation is out of the question as the visor was not introduced until the end of the 12th cent., the first representation being found in Herrad v. Landsperg's Hort. Delic.¹, in 1180. This is followed in 1190 by the seal of Eudes de Bourgogne.² The nasal gradually developed into the barbiere, which came into use about the beginning of the 13th cent., forming the transition to the Topf- or Kübelhelm.

The Coat of Mail.

Body armour together with the helmet came into use among the Germanic tribes at a later period than the shield and weapons of attack⁸, and was not as in the case of these a native product. What few specimens the Barbarians possessed, before the coming of the Romans, were imported from the East, or had found their way hither from Roman or Celtic territory, and not until the Merovingian period did protective armour become at all general through the long continued contact with the Romans.

The Roman mail consisted of the lorica squamata or scale armour, which was formed of four-cornered pieces of metal overlapping each other, or of metal scales bound together with the under sides rounded.⁴ This fitted closely

¹ Pub. by Engelhardt, Taf. III.

² Demay, Costume etc., p. 131.

³ Tacitus, Germ. VI, reports the Germans as: pancis loricae vix uni alterive cassis aut galeae — Annales II, 14 non loricam Germano non galeam.

⁴ Cf. Lindenschmidt, Tracht u. Bewaff. des röm. Heeres z. d. Kaiserzeit, Taf. XII.

to the body, reached to the hips with a short sleeve for the protection of the shoulder, and not infrequently a leather doublet was worn over this. The second type was the *lorica hamata* or chain mail, which consisted of a net, made of finely woven iron rings, worn either under or over a doublet.¹ Remains of such a ring byrnie found in the Torsberger Moor has its rows of rings simply bent together, the ends being beaten out and then fastened together.²

For the Merovingian period the reports of the various historians are both valuable and interesting. Compare for instance Agathias⁸, who describes the Frankish warriors on an expedition to Italy in 552 as wearing neither coat of mail nor greaves, but having their legs and thighs defended by bands of linen or leather. Again Paulus Diac. represents the Heruler, at the beginning of the 6th century, with bodies unprotected in battle, and Widukind⁵ says of the war garments of the Saxons, who in 531 assisted the Franks against the people of Thuringia, vestierant sagis, which points distinctly to an absence of the byrne. Sidon. Apoll. does not ascribe the coat of mail to the Goths, but in a letter describing a battle he says: Alii caesim atque punctim foraminatos circulos loricarum digitis lives centibus metiuntur, probably here of Roman origin. The Germans had an inborn love for freedom of movement, and the byfine made its way but slowly, it being not even mentioned in the Lex Salica (5th century), appearing

first in the Ripuarian law¹ with the high value of 12 sol. Greg. of Tours² in his enumeration of the war-equipment of an ordinary soldier, at the time of Clovis, makes no mention of either body armour or helm, which, added to the fact that no certain trace of armour has been found in any of the Merovingian graves, leads to the conclusion that in the 5th century and beginning of the 6th the coat of mail was the property only of kings and famous warriors.³

In three instances only has any trace of the lorica hamata been discovered in the grave-finds, the first by Cochet in Eaulenthal France⁴, the second by Bateman at Bently Grange in Derbyshire together with the Eber helmet, which consisted of a mass of chain work formed of large quantities of links of two descriptions attached to each other by small rings half an inch in diameter amalgamated together from rust. There were present, however, traces of cloth, which make very probable the supposition that the links constituted a kind of quilted cuirass by being sewn within or upon a doublet of strong cloth.⁵ The byrne discovered in Jutland in 1850⁶, now in the Copenhagen Museum, cannot be adduced as evidence for this period, since the date of its manufacture is uncertain.

At the time of the Carolingians the byrne became more general. From a Capit. of Charlemagne from the

¹ Tit. 36, c. XI. Si quis weregeldum solvere debet, bruniam bonam pro XII solidis tribuat.

³ Lib. II, c. 27.

homo de duodecim Mansus bruniam habeat, which points to a much more frequent use of the same than in the preceding period, due to the rapid evolution of weapons and war tactics at this time. That they were becoming objects of trade is shown from another Cap.¹, and their sale in foreign lands is likewise forbidden. Cf. further Carol. M. L. VI, c. VI², where it is forbidden to merchants to sell weapons or body armour to the Slavs and Avari, which is a point against the theory that the Germans obtained their protective armour from the Slavs, and does away with the idea of the greater skill in metal working, which the old Slavs are supposed to have possessed over the Germans. Cf. also the Cap. from the year 813 requiring loricas and galeas for the leaders and nobles.

With reference to the Minatures of this period it must be said that the conservative clinging to Roman and Greek representations by the monks, and the tendency to conventional rather than accurate drawing renders the conclusions as to the form of the byrnie based on such representations alone extremely liable to error. For instance the Bible of Charles le Chauve represents Roman armour³, also the figure of Emperor Lothair⁴, and a warrior from

¹ Carol. M. L. VI, c. 223, ed. Baluze p. 961: ut armillae et bruniae non dentur negotiatoribus; Capit. from the year 779, No. XX, Baluze .p. 198: ut nullus (brunias) foras nostro regno vendere uon praesumat

a Brussels MS.¹, while the figure of an Egyptian from the Ashburnham Pentateuch² is a not very accurate imitation of the same.

The simplest and most primitive equipment is that of the warriors of the Prudentius MS., who are provided only with a sort of coat, with feet and legs entirely unprotected (usually bare).8 This representation of warriors with short military cloak, tunic, helmet, spear, and shield without protective body armour is the form most frequently met with in all the MSS. Cf. Alcuins Lib. de Offc. Divin. — Sicut soluit habere milites tunicas lineas sic aptas membris ut expedite sint dirigendo jaculo, tenendo clypeam, librando gladium etc.4 In the Utrecht Psalt., the Harl. MS, the Aelfc. MS, and the Anglo-Saxon Calendar⁵ the same costume prevails, which combined with the testimony of the wills, the charters, and the failure of any trace of byrnie in the grave-finds, leads to the inevitable conclusion that up until the 10th century at least, and in all probability the 11th, the coat of mail was a sign of rank, wealth, and influence of the possessor. That old traditions have been adhered to in the representations of armour in the Codices may be seen by comparing the figure of one of Charles the Bald's standard bearers with a figure from a Munich Evangelium⁷ (11th century) with comparatively little difference in the two representations. According to Lin-

denschmidt1 the oldest battle shirt or coat of mail was of leather, represented on a metal plate from Munich, of Byzantine origin, strengthened by bands of leather lattice work, metal being not yet employed. Leather armour of this sort was probably most frequently worn by the ordinary warriors between the 5th and 8th centuries, which having naturally moulded and completely disappeared, would account, in part at least, for the entire absence of body armour in the graves of German warriors. This explains also the complete disappearance of the horn armour of the Quadi described by Ammian as: Loricae ex cornibus rasis et levigatis, plumarum specie linteis indumentis innexae. The handing down of valuable armour as a precious heir-loom contributed also its share to the singular absence of anything pointing to the use of armour by the Merovingian warriors, for being the possession most highly valued by the chief, it was as a matter of course passed on to the nearest male relative as a legacy to be kept in the family.

Scale armour is shown both on the seal ring of Childeric and of Alaric³, though exactly how constructed is difficult to decide. The simplest type of scale armour may be seen in the illustrations of the Stuttgart Psalter⁴, consisting of scales overlapping one another, reaching to a little below the hips, and with short sleeves. This same sort of armour is worn also by the warriors in the Psalter Aureum.⁵ Differing from this is the coat of mail of the

⁵ Rahn, Taf. XV.

warrior from the Xantener casket¹, and the horseman from the Kranenberger chest, which reaches only to the Comparing with these the figure of Saul and another leader from the Psalter Aureum², a distinct advance is made upon the preceeding, not only do the sleeves reach below the bend of the arm, thereby allowing free play of the whole arm, but according to the artist's representation the byrnie appears to be slit both back and front, in fact so clearly is it shown that it would seem almost as if the warrior in question had on breeches of scale armour which is, however, impossible as these were not introduced until the 11th century. Corresponding almost exactly to this is the figure from the Xantener chest 8, where it may be observed that the sleeves are not yet firmly fastened to the byrnie, an unprotected place being still left on the shoulder. The figure from the grave of Queen Thyra mentioned above (10th century) shows likewise the slit in the byrnie, which being used by horsemen fell on both sides of the saddle protecting the thighs. The above mentioned coats of mail are all descendents of the Roman lorica squamata, the lorica hamata although much earlier mentioned occurring in none of the MSS. of the period, probably on account of the difficulty of representation. The chain mail of the Waltharilied is called lorica hamata (v. 911), and a much earlier mention occurs in Hildebrandslied: Gurtun sih iro suert ana, helidôs ubar hringâ, dô siê tô dero hiltju ritun. The Beowulf epic, however, offers the main evidence for the use of chain mail at this period.

¹ Lind., Merov. Altert., figs. 203 and 225.

² Rahn, Pls. X and IX.

³ Lind., fig. 204.

The frequent mention of the byrnie in the Beowulf and other poems leaves no room for doubt that it was known at an early period among the Anglo-Saxons, and not only the lorica squamata, but the lorica hamata or chain mail is frequently referred to. Of the thirteen words employed to designate the coat of mail in Beowulf byrne occurs most frequently to which are applied the various epithets of har, hringed, gebrogden, hond-locen, beorht, and sid, to which may be added the numerous compounds such as gat, heato, here, isern and iren byrne.

Of the countless circumlocutions of these words $w\bar{x}d$, $gew\bar{x}d$ with its compounds here, hilde, $g\bar{u}\bar{c}$, $br\bar{c}ost$, and $eorl-w\bar{x}d$; hrxgl together with its compounds, and $ser\bar{c}e$ are among the most important and frequent. Such expressions as heavo-reaf (B. 401), beadu-scruda (453), fyrd-hom (1504), hilde-sceorp (2155), here-pād (2258) occur only once in Beowulf, although found in other poems. Cf. further the byrn-homa of Jud. (192). All of the above mentioned words refer as a rule in simplex to clothing in general, but in the poems are used with reference to the coat of mail.

The serče is also used to designate the battle-shirt, a word which is used in the Glossaries to translate armi lausia WW. 267 43, dalmatica, vestis (Haupt. Z. Bd. IX, 483), and colobium WW. 715. This use in the sense of byrne is confined, however, to Beowulf and to the single reference hilde-serče from the Elene (234), otherwise it refers to the ordinary garment. In ON. serkr is principally a woman's garment, but was used both by men and women, being often adorned with gold embroidery. It was cut out

¹ S. Rigsmol.

above and seems to have had no other opening, being slipped over the head. The later byrnie which developed from the primitive breast covering of skin or bark of trees, resembles this garment closely, and took its name therefrom. Comparing the illustrations of the Stuttgart Psalter, the Psalt. Aureum, and the drawings of two shirts of chain mail, and the figure of a king from the Aelfric MS.2 the likeness is immediately recognized, a shirt-like garment being in each instance represented, with this difference, however, that whereas in the minatures it is strongly to be suspected that the rings are sewn upon cloth or leather (uncertain on account of inaccuracy of drawings), in the poems the majority of references point with absolute certainty to chain mail. Cf. for instance the expressions from Beowulf such as: breostnet broden (1548), hring utan ymbbearh (1503), byrnan hring (2260), guð-byrne scan heard hondlocen; hring-iren scir song in searwum (321), hringde byrnan (2615), hringed byrne (1245); from the Elene writene wæl-hlencan (24), brogden byrne (257); Byrhtnoð hring locan (149); further from Beowulf here-byrne hondum gebroden sid ond searo fah (1443), wið laðum lic-syrce min, heard hond-locen (550), locene leodo-syrcan (1505), beado hrægl broden on breostum læg golde gegyrwed (552). wæl-hlenca (slaughter links), the ringed shirt, the battle garment hard hand-woven were certainly all formed from iron links bent together by hand and pressed into one another (cf. specimens of chain mail found in England and Scandinavia referred to at p. 95), and the wearing of the same during the swimming contest (B. 550) with Breca speaks for a very light, close-fitting, shirt-like gar-

¹ Weinhold, Altnord. Leben, 162, 172, 173.

² Claud., IV. B.

ment. From the resemblance of this closely-woven shirt to a net arose then the term hring-net so widely used with reference to this class of armour. Cf. the following expressions from B. with reference to the clang of the same as the warriors walked byrnan hringdon (327), syrcan hrysedon (226), byrne sang (By. 284), further the mention of net as hring-net (1889, 2754), as here-net hearde (1553), as the work of a skillful smith searo-net seowed smides or-pancum (406). For its general use among the warriors of the Anglo-Saxon poems cf. B. 237, 1889, 2623, Jud. 17, 39, with reference to the general custom of the period, however, cf. statement at p. 107 in regard to the Epic poems. A general term for warriors is byrnum werede (2529), nevertheless the corselets were of great value, highly prized, and famous ones were attributed to the workmanship of celebrated smiths. Cf. B. 406 above and 455 where Beowulf's byrnie is said to be Welandes geweorc.

The ordinary byrnie was formed of iron rings welded together from whence arose the epithet græg B. 334, Jud. 328, but those of kings and princes as in the case of helmets, shields, and swords were much more elaborate, being in all probability gilded cf. B. 322, 405, and 3140, for although the byrnie of Beowulf (1444) is described as searo-fah, nevertheless the fact remains that the links were of iron (671), and searo-fah refers probably to a gilding over of the same. Cf. König Rother er trucc ein brunien gulden (1100, 2696), and Nibel. Brunhild trug eine brüne von golt (407).

In Beowulf brëost-net and brëost-gewædu point to a simple breast-protection, while the side-byrne, serče, beado-

¹ Cf. figures on Xantener casket.

hrægl, gap-gewædu etc. refer to the long wide garments of the Psalters and the Aelfric MS. These were of great value cf. B. 1291, 1444, Jud. 338, Sal. 453, and some may have been of great weight as in the case of the Frankish armour cf. Greg. of Tours¹, who describes the drowning of a follower of Duke Gunthram on account of the great weight of his armour, but the Anglo-Saxon ring net must have been light.2 The armour of the (Longobards) Lombards was also light, cf. Paulus Diac.³ for the discovery of a ring net shirt under the other garments of the wouldbe murderer of king Liutprand. That it was not only light and close fitting, but also closely woven so as to be impenetrable is likewise to be inferred from the story of the swimming contest in Beowulf, also contest with Grendel's mother 1511, 1527, and By. 144, from this arose then the myth of impenetrable armour. Nevertheless the sword often pierced the byrnie, and after every battle the armour had to be repaired (B. 2256, 1442). B. 2866 ff. shows that the byrnie varied in quality as well as in length, size, and weight, the most excellent from far and near being there presented.

Next to Beowulf is the death of Byrthnoð of most importance for terms referring to the byrne, followed by the Elene, while in the otherwise warlike Exodus the byrne is not once mentioned only general terms for war equipment being employed.⁵

Although all Continental representations from the earlier period are of scale armour, the Roman lorica

¹ Ut erat loricae pondere adgravatus VI, 26.

³ VI, 37.

⁴ Saxo Gram. II, 79.

⁵ Cf. Exod. 157, 194, 219.

squamata, and the Anglo-Saxon illustrations of the Aelfric MS. cannot be identified positively with chain mail, one pictorial representation is, nevertheless, extant, which bears out the numerous references of the Anglo-Saxon literature to the woven chain or link mail i. e. that of an English ivory casket dating from the 8th century1, representing the storming of a fortress. The drawing is crude but two of the warriors are clad in what appears to be chain mail scale armour on account of weight having a wider opening at the wrist in order to give free play to the hand, or what was still more usual in the early period before the 11th century extending only to the elbow. In the above representation, however, the sleeve extends close fitting quite to the wrist, and still allows the hand free play, pointing probably to chain mail. This garment in one case extends nearly to the knee, and may be supposed to be the sid serče of Beowulf, the other protects only the breast, hips, and arms, but the artist may have neglected to fill in other parts. The other warriors wear short close fitting doublets or coats, most likely of leather, or of some stiff material with long sleeves (the later wams), and beneath some sort of a folded under-garment, the nature of which it is almost impossible to decide.

In the Aelfric MS.² are represented two coats of mail resembling shirts, of a blue color probably with iron rings sewn upon them, and with sleeves extending only to the elbow. This with a representation of a king³, wearing a battle shirt resembling the two above constitutes the only representation of body armour adorned or made of metal

¹ Essenwein, Taf. XXIII, fig. 2.

² S. p. 101, note 2.

^{*} S. J. Strutt, Pl. XIV.

throughout the whole of the Aelfric MS., although many warriors and battles are there depicted. From the Great Psalter of Bologna¹ toward the end of 10th or beginning of 11th century occurs another representation of scale armour, where Goliath is represented fully armed in a shirt upon which are sewn metal scales. This extends almost to the knee, but the sleeves are short. At p. 74 of the Harl. MS. is found the first and only example of a coat of mail. This is apparently long and heavy, made of links or of pieces of metal sewn upon leather. This garment covers the arms to a little below the elbow, and encases the legs almost to the knee. The figure wears a pointed cap or helmet, carries a spear in the left hand, while the right rests upon a round shield somewhat approaching the oval. Very similar to the battle shirt of the Aelfric MS.

Considering the prevalence of the scale rather than chain armour on the Continent, and, according to Beowulf, the frequency of the chain mail in England, the question naturally arises why was its use there so wide spread, and from whence did it come? Three ways are possible:

— first from the Celts, who had received it from the Romans, and passed it on to the Saxon invaders; 2nd from Rome itself as late as the Carolingian period or perhaps earlier in the Merovingian; third from the East through the medium of the Slavs.² On the Sassanidanian monuments chain mail is found together with scale armour; the Persian warriors passed it from them to the Arabs, and a certain chain mail byrnie of this latter people shows a great similarity to the Roman find of the Nydamer

¹ Westwood, Pl. 38.

² Weinhold, Altnord. Leben, p. 209.

Moor.¹ The relation of the Germ. Brünne to OBulg. bronja proves nothing in regard to Eastern origin as the Slavic word is borrowed from the Germanic.

In the laws of the Anglo-Saxons the coat of mail is first mentioned in the laws of Ine at the end of the 7th century³, where one found guilty of murder shall be allowed to pay to each of the Hynden a man, a byrnie and a sword as wergeld. No mention of the same occurs in Alfred's laws, and it does not make its appearance again before the beginning of the 10th century (Ges. Schmidt, Anhang VII, 2, § 10). Law. IX reads: And gif ceorlisc man gepco, pæt he hæbbe V hida landes to cynges ut-ware, and hine man ofslea, forgilde man hine mit twam pusend pryensa, which is immediately followed by § 10 And peak he gepeo, pæt he hæbbe helm and byrnan and goldefæted sweord, gif he pæt land nafað, he bip ceorl swa peah oðer he bip sipcund that is to say that the possession of these weapons gives him great prestige among the freemen of the land, where they are rare and in the possession only of the wealthy. Dating Beowulf approximately in the 8th century the apparent contradiction which it offers to the above statement cannot fail to strike the reader. There the byrne and helm are the common possessions of every warrior, swords and byrnies accompany the dead Viking as the tide bears him out upon the flood (B. 39), a countless number are given by Weohstan to his son (B. 2624), and the funeral pyre of Beowulf is hung with bright byrnies, helms, and shields, which bears a strong resemblance to the description of Walhalla³, where the beams of the

¹ Montelius, fig. 137.

² Ges. Lieberm., p. 114 [54].

³ Grimnismol 9.

great hall of Odin are of spears, shields serves as shingles for the roof, and on the benches the byrnies are laid. The prevailing use of byrnie and sword (weapons) in the Anglo-Saxon epics, especially Beowulf about corresponds to that indicated by the laws of the 11th century, which may be completely reconciled, however, by reference to the fact previously stated that the Beowulf warriors are choosen troops, heroes every one, and furthermore that this universal equipment with sword, helmet, and chain mail at a period when according to the laws it must be assigned, exclusively to those of the highest rank, may be due to the epic love of pomp, display, and exaggeration.

In England as on the Continent the general use of stiff metal body armour spread slowly, and not until the time of Canute the Dane did it become frequent. At this period the heriot of an earl consisted among other things of 4 byrnies, 4 swords, and 4 helmets, then followed the king's thane with two of each of the above, while the middle-thane had no weapons to render, and no man under the rank of thane possessed either byrnie or sword. The head-forester, although provided with sword, spear, and shield, had no byrnie. Under Wm. the Conqueror the laws in regard to arms remain practically the same as under Canute. From c. 20, § 2, it is learned that every vassal must be armed with byrnie (or hauberk), helm, shield, lance, and sword, while the villains were without these weapons. Under Henry I4 the number of lances

¹ Cf. Laws of Canute. — Ges. Lieberm., p. 358 [71].

² S. sword.

³ Laws of Wm. Ges. Lieberm., p. 506 [20].

⁴ Ges. Schmidt, Anhang XXI, 14.

required is doubled (for the tournament, Fr. iufluence), but the requirements remain otherwise unchanged.

The Anglo-Saxon wills and charters bear out the statement of the scarcity and value of the byrnie even as late as the 11th century. In 1006 Aelfric bequeathed to his lord his best sailing ship, 60 helms, and 60 coats of mail showing his great wealth. About 970 Bishop Theorcred left swords, shields, and spears, but no byrnie. In 1008 Aedelred preparing for war commanded that ships should be built over all England i. e. from 310 hides one long ship; and from 8 hides, a helmet and corselet showing value of the latter even in the 11th cent. In 1030 Wulfsige leaves two coats of mail², while in 1038 Aedelstan son of Aedelred II bequeaths a silver hilted sword together with a coat of mail to his father as a treasured possession.³

The Healsbeorg.

In the Aelfric glossaries lorica and thorace are translated by both byrne and healsbeorg. Gradually the simple breast-covering had widened out, become larger, and in Beowulf it is called on account of its size the side byrne. These new shirt shaped forms, called in Lat. tunica ahena, and by Saxo Grammat. vestes, are known in Beowulf as serče, syrče. This form was the stiff foldless coat, which extended almost to the knee⁴, with short wide sleeves, and covered with metal scales or rings — possibly a ring net? So is to be understood then the passage dominus loricatus super et tunicatus as a warrior wearing a narrow

¹ S. Chart. Th. 549.

² Chart. Th. 556.

³ Chart. Th. 557.

⁴ S. MS. Claud. B. IV.

breastplate and over this the wide tunica ahena. The OHG. glossaries translate a few times lorica with halsperg¹, also Isid. The original meaning is not al-berc as Besly believes, followed by Benecke⁸, but refers to a collum tegens⁴ the Fr. form being borrowed from the Germ. Certain, however, is the fact that the healsbearg in various countries refers to a different piece of armour, the origin of which is a much disputed question. San Marte⁵ treats it as a collar, which gradually lengthened until it formed a second protection over the first (the byrnie). That seems unlikely, however, and the healsbearg was probably evolved from the byrne by the lengthening of the latter at the top to a sort of hood, which covered the back of the head, and partly protected cheek and chin. Lehmann sees the intermediate stage between byrne and healsbearg in the figure from the Stuttgart Psalter, where a cloth appears to be wound about the back of the head, cheeks, and chin, but is not as yet firmly fastened to the byrnie. In the Lucan MS. in St. Gall⁸, from the end of 9th or beginning of 10th century, the protecting hood is found well under way. These warriors have a widening of the byrnie at the hand, which is not the case on the Bayeux tapestry.

Wace describes the hauberks or healsbeorge of the heavily armed troops at Hastings as short and small

Corz haubers orent è jutis

E helmes de sor lor vestis.

These shirts of mail with short sleeves were of woven chain mail, with hoods of the same material, and of the same structure on one side as on the other. The seal of Wm. the Conqueror¹, a minature², and the figures of the 12th cent. warriors painted upon the roof of the church at Brauweiler all show the short-sleeved hauberk. In the 11th century, however, the long-sleeved hauberk was known on the Continent together with hand greaves or gauntle ts3, seen on a knight from the beginning of the 11th century from the Evangelium Book of Henry II, 1010. In the 12th century this seems to be apparently the prevailing form.4 At this period also the healsbearg was for more in use than the byrnie.⁵ Later representations of the byrnie are very difficult to find, although still worn, owing to the fact that they were made smaller and more close fitting, were cut out at the neck, and worn under the healsbearg. References to such a use are frequent in the MHG. poets — cf. for instance Rosengart. 2266

durch halsberg und durch ringe er mich gar sere sluog;

Biterof 1075

durch schilt und ringe er in schluog daz die prunne mail gewan;

in Wigalois 7371 occurs the following:

Ein brune het er an geleit über einen wîzzen halsperch. Daz was heidenischez werch von breiten blechen hurnin (mit Edelsteinen besetzt), and certainly not intended to be worn under a steel shirt.¹

Greaves.

Metal greaves in the Old English period may be regarded as among the rarest of all war equipment. No trace of such has been found in the grave-finds, the pictorial representations are few, and reference to such in the A.-S. glossaries is rare.

As in the case of the byrnie so are greaves once mentioned in the Rip. Law.²: Si quis weregeldum solvere debet, bain bergas bonas pro sex solidis tribuat, a very high value when compared to that of the shield or even of the sword and exactly equal to that of the helmet. For a long time also they were worn only on the side, not protected by the shield.

The glossaries contain the Lat. word ocrea variously translated by bān-beorg, scinhosa, bān-rift, and sceanc gebeorg. Heyne³ refers the ocrea to the leather protectors worn by the Roman cavalry, the word being also once glossed by leper hosa in an A.-S. glossary, and in that case would refer to some sort of protection for the legs other than metal, perhaps to the bands of cloth, linen, or leather terminating a little below the knee, either in close rolls or

¹ For further development in the Middle Ages consult San Marte, Waffenkunde, p. 33 ff., and the excellent article on the «Body Armour anciently worn in England» by Sam. Rush. Meyrick in Arch. XIX, p. 120.

² Tit. 36, c. 11.

³ K. u. Kleidung, p. 286.

crossing each other sandal-wise, so frequently represented in the MSS.¹ Ocrea is further translated by boot (WW. 598⁴¹), which would lead to the inference that ocrea in the earlier period referred in all probability to some sort of a leather protection for the limbs.

The first representation of metal greaves is from a Saxon Reliquary after 8902, which represents a Dane and two of his companions with thin plates of metal attached to the front of the stockings, and reaching from instep to knee. At the beginning of the 11th century an advance is made upon the Danish greaves fastened to stockings. and they are here represented as extending from knee to instep and completely protecting the foot as well.3 That they only gradually superseded the leather boots and bandaged legs of the previous period, however, is shown by the representations of the MSS., where as late as the 12th century an English warrior appears with the bandaged legs of the OE. period. In the Middle Ages, however, they became an important part of the equipment of the knight, were made of iron or steel plates extending to the knee, where they joined the iron breeches (caliga) formed of iron or steel rings, which protected the limbs. Cf. Walthar 335: Ingentes ocreis suras complectitur aureis, and Herz. Ernst 4667: . . . von bainbergen und sarwete gut gerete.

Meaning. s. geatwe.

Etymology. Cognates to OE. geatwe, getawe are: Goth. tewa f. 'Ordnung' (from which is derived the verb gatewjan), OHG. gazawa, MHG. gezawe, gezouwe f. n. 'tools, military equipment', ON. gotvar 'military equipment'.

That *geatwe* and *getawa* are originally one and the same word with different accentuation in Germ. is certain. In Germ. following the rule for the accent of Nominal Composita the first syllable bears the chief accent, nevertheless compounds with the open prefixes ga-fra-bi-have very early given up this accentuation, and through analogy with the Verbal Composita have the accent on the root syllable, which in the Verbal Composita always bears the chief accent (cf. Bülbring § 68, § 72). Traces of the old accentuation are retained in the words *geatwe* and *frætwe*— *getawa* having undergone the later accent shifting from prefix to stem vowel (cf. also the compound *gunp-gatèwôs). Kluge (KZ. 26 75) sets down the Goth. forms as *gátēwôs and gatéwôs, which give respectively geatwe and getawa. Cf. also Kluge in Pauls Grundr. I, p. 391 ff.

The rare form here-geatewa or -geatowe Sal. 52 perhaps points to an older form before final dropping of the vowel (cf. also geatawum B. 395), but it is more likely that the e or o is simply a new transition vowel developed between a cons. and w followed by a vowel after a short accented

•

syllable, the vowel being originally u, but was weakened later to o, a, e (cf. Bülbring § 452).

The oldest references for getawa are found in Beowulf in composition with wig and gao, the Germ. form of which would be *gunp-gatèwos. The syncopation of the long vowel in gatèwos > geatwe is to say the least striking, but parallel cases are found in OE., one of which is sinew < Goth. sineva, which appears in nom. as sinu, seonu with elision of long e. Cf., however, Uhlenbeck (Goth. Wb. p. 146), who connects OE. geatewe, geatwe, ON. getvar with a lost Goth. *gataws 'ready, prepared' from the verb taujan 'to make, to do', which appears in OCSlav. as the loan word gotovů.

Reaf.

Forms. sg. réaf nom. pl. réaf n. (a).

In general reaf has the meaning 'vestimentum: robe, garment', here and there the meaning 'coat of mail' (he wolde pes bearnes beagas gefeccan, reaf and hringas and gerenod swurd By. 161; and Aeltheres laf... ealles unscende weelinges reaf to habbanne Wald. 2°0), and belongs rather to a treatment of Anglo-Saxon garments, than to that of weapons (s. Diss. mentioned at beginning of Chap. on 'Body Armour'). In the compounds, however, the usual meaning is that of 'war-garment, arms', and a second meaning that of 'booty, prey, plunder' belongs also to the department of arms.

reaf-lac n. rapina: pillage, plunder.

sg. nom. preda: reaflac WW. 1434.

sg. dat.! s. under rēaf WW. 23345; to reaf-lace Ps. 6110.

sg, acc. in rapinam: on reaflac WW. 421 29.

Etymology. Reaf is derived from the sg. pret. stem of the str. verb. reofan, ON. rjufa 'to break, to tear to pieces'. Cognate to OE. reaf are OHG. roub, ON. val-rauf 'spoils taken from the slain', ODu. roof, OSax. nod-rof rapine', OFrs. raf 'robbery, booty' from a Germ. *rauba. Cf. Goth. biraubon berauben (subst. not recorded), and the verbs ON. raufa, OE. reafian, OSax. robon, OHG. roubon which are denominative formations from the subst. Radi-

cally related are: Lit. rapèti 'kümmern, to trouble', rupas 'rough'. Poln. rupic 'to bite', Lat. rumpo 'to tear, to break to pieces', OI. rúpyati to the rt. *rup — Schwundstufe to Idg. *reup — (Hochstufe) 'to break, to tear to pieces' (Fick. I 526). The verb OE. rēafian further appears in ME. as reven pp. reft, NE. reave pp. reft usually with the prefix be-. For the relation of It. roba, Fr. robe 'dress, garment' to OE. rēaf, OHG. roub s. Kluge, Etym. Wb. p. 311.

Searu.

Forms. searu, seoru n. (wa). (S. Sievers 103, Anm. 1, for eo 150⁸.)

References. 1. lorica; armatura, arma: wargear, armour, equipment, arms.

sg. nom. searo hwit solap Reim. 67; garas stodon sæmanna searo, samol ætgædere B. 329.

sg. acc. beran beorht searo Exod. 219.

pl. dat. commentis: searuum uel ordoncum Er. 278; id.: seorwum Corp. 545; yripeon: here-searum Ep. Er. 1100; yryseon: ~ Corp. 2175; Guðbyrne scan heard hond-locen, hring-iren scir, song in searwum B. 323; gebide ge on beorge byrnum werede, secgas on searwum B. 2530; secg on searwum B. 249, 2700; he on searwum bad B. 2568; (arms) gescah ða on searwum sige-eadig bil B. 1557; ond þa siðfrome searwum gearwe wigend wæron B. 1813.

2. machina: machine, engine of war.

sg. nom. ballista, catapulta, uel machina belli, : searu WW. 1928; ballista: stæfliðere, oððe searu, i. machina belli WW. 357²¹.

sg. acc. machinam: searwe Bd. Gl. 73.

3. machinatio, dolus, insidiae: ambuscade, deception, waylaying, battle.

For references s. Grein, Sprachschatz II, p. 434 and Bosworth Toller.

4. ars, artificium, accuratio, diligentia: cunning in a good sense, skill, art.

for references s. Grein and B. T. as above.

Compounds. 1. For numerous compounds with searo as first member of the compound cf. Grein, Sprachschatz II, 435—436, and B. T. Dic., those given here being confined to those compounds directly connected with warequipment.

searo-hæbbend armaturam habens, armatus.

nom. pl. searu-hæbbende An. 1528.

gen. pl. in hendum a leng searo-hæbbendra sar prowian, An. 1468; siex hun[dred]a searo-hæbbendra Phar. 6; hwæt syndon ge searo-hæbbendra B. 237.

searo-net n. lorica affabre facta, s. net. searo-pīl n. s. pīl.

2. Searo as second member of the compound. beadu-searo n. apparatus bellicus.

acc. pl. purh pa (brimu) hie heora beado-searo wægon Exod. 572.

fyrd-searu n. the same as beadu-searo.

acc. sg. guð-gewædu, fyrd-searo fuslic B. 2618.

acc. pl. fyrd-searu fuslicu B. 232.

gað-searo armatura bellica.

acc. guð-searo geatolic B. 215.

nom. pl. byrnan hringdon, guðsearo gumena B. 328; guðsearo gullon An. 127.

Etymology. A general Germ. term. Cognates to OE. searu are: OSax. OHG. saro, Goth. sarwa n. pl.

'Rüstung'. Cf. MHG. sarwat, sarewat, and ON. sorve 'a necklace from a string of pearls or stones (also armour)'. The Germ. form is *sarwo-, probably to be connected with Idg. *sero- 'to string, to put in a row' (s. Fick, Vgl. Wb. I, 562). Related are Lat. serere, Gr. elgen 'to fasten together, to make fast', to which OIr. sreth 'a row', and the unrecorded Skt. *sarat 'thread'. OPr. sarwis, Lit. Pol. ssarwat 'armour' are Goth. loan words.

Wæpen.

Forms. wæpen, wepen n. (a).

nom. pl. wēpen, wēpeno, wēpno (s. Sievers Gramm. 2442).

The word occurs so frequently that only a certain member of references have been selected for each case.

Meaning. arma: weapons, everything belonging to the war-equipment of a warrior.

Etymology. To OE. $w\bar{e}pen$, ME. $w\bar{e}pen$, NE. weapon, correspond: Goth. wepn, OFrs. wepen, OSax. wapan, Du. wapen, ON. vapn, Dan. vaaben, Swed. vapen all from a Germ. form *wepna- (webna-) from Idg.* webna- beside OHG. wafan, waffan, NHG. waffen, NHG. waffe from Germ.* wefna — from Idg. wepna—. The Germ. stem according to Kaufmann (PBB. XII, 527) is wef: web, the Cons. of the stem showing West-Germ. Cons. lengthening before n. The West-Germ. gemm. of b is found in the upper German dialects, the p of OE. wepen, ON. vapn, M. Frank. wapen etc. being traced back to a common Germ. assimilation of b n > pp, n being retained, however, in the cases with the accent on the stem vowel, and pp after the long sonant being simplified to p. Similar is the case of f f f f

which is simplified after the long sonant in the same manner as p. Cf. Swiss. waffv, Swab. wofv (Kluge, Beitr. IX, p. 159). Kaufmann and Kluge admit the possibility of relationship with Gr. δπλον, supposing the double Idg. root (Kluge, Etym. Wb. 411) wop: wêb. Wether this is to be connected with Skt. root vap 'to sow, to strew' is uncertain.

II. Weapons of Attack.

1. The Spear.

æsc-tir m. glory in war.

sg. nom. Sigor eft ahwearf of nordmonna nidgeteone esctir wera Gen. 2069.

æsć-pracu f. spear violence, battle.

sg. dat. æt æsc-præce Gen. 2153.

æsć-wiga m. warrior.

pl. nom. wæron æsc-wigan El. 259.

2. with æsc as second element of compound.

daroð-æsć (?) m. s. daroð.

Etymology. A term for spear common to the Germ. dialects. Refer to P. B. B. XXVI, p. 295, Kluge, Etym. Wb. p. 99, Murray New English Dic.

Æt-gar.

Forms. 1. ætgār, ategār m (a).

- 2. ætgæru, ætgero, st. m. [?] (u) Sievers § 273, Anm. 4.
- 3. æt-gære, ætgare (æt-gære, -gare Sweet. Stud. Dic.) n.

References. 1. ætgar, ategar.

sg. nom. falarica i. theca gladii, teli genus, uel aste grandis (MS. R. hasta), uel lancea magna: ætgar WW. 235¹⁵; falarica: fyrdwerod, feohtgegyrdan, ætgar, uel genus teli WW. 399³¹.

nom. acc. pl. ansatas: ategaras OE. Gl. II, 502; ansatas (hastas): spreotas, ~ WW. 343 35.

gen. pl. falarica: ategara OE. Gl. I, 5023; phalarica (gl. i. hasta): ~ Hpt. Gl. 425¹⁴.

dat. pl. falarica, i. genus teli: ategarum OE. Gl. I, 786; anscuta (for ansata): titegarum (?) misreading for ategarum (?) cf. Leo's Glossar, p. 400° and 555 59.

2. ætgæru, ætgero.

sg. nom. framea: ætgæru WW. 23¹⁵; framea: ~, ætgaru Ep. Er. ⁴⁴⁰; ~ Corp. 922; falarica: ætgero Corp. 839; falarica: ægtero [for ætgero] WW. 21²².

3. ætgære, ætgare.

sg. nom. falarica: ætgare OE. Gl. 8^{512} ; framea: sweord, oððe \sim WW. 404^{15} ; (sg. nom.?) ansatae: ætgære WW. 6^{3} , Corp. 167.

Meaning. falarica, ansata, framea: spear, lance. Here framea is used with the meaning 'spear' except above framea, sweord, odde ætgare: where it is equivalent to either sword or spear. Falarica has also the meaning of 'spear' cf. falarica: spere WW. 142¹¹, wigspere WW. 143¹⁴ etc. Ansata also has the meaning of 'spear, lance', cf. ansatas: speru WW. 516².

San Marte, Waffenkunde p. 151, attempts to prove that OHG. azgēr has the meaning of 'sword', referring it to the sharp short Asiatic sword. He cites the passage from Wigalois 10671: "Starchin sper von angeran man fuorte mit den fürsten dan wol swein sech fuoder ode mēr. Gabilot und ategēr truogen die sariande". "The last named weapons" says San Marte "stand here in contrast to the strong spears of the princes, neither gabilot nor atigēr being knightly weapons: it is striking, however, that the squires should be provided with two light spears." By referring to gār, however, it will be seen that there are two classes, the heavy and the light (cf. WW. 235¹⁵—falarica i. theca gladii, teli genus, uel aste grandis, uel lancea magna), so that here the ategēr may be presumed to be the heavy lance, the gabilot the lighter one.

Etymology. The Compound ætgar appears in all the Germ. dialects, Goth. excepted, cognate forms being: OHG. azigēr, azgēr; OFris. etgēr; ON. atgeirr; MHG. atigēr; and in OFr. as loan word from the Norse agier or algeir (cf. Rol., Bartsch, Chres., p. 37 l. 34 for the unusual form atgiers).

Grimm (Gramm. II, 717) regards the word as compounded of the prep. and prefix Idg. ad-, Lat. ad- 'to', Norse, Goth., OSax. at-, OHG. az- 'to, by'. NE. at-, OE. æt-, + gār. æt is here used in ætgār only as an intensive. Cf. also Lt. compound ad-duco etc.

Darob.

Forms. daroð, -eð, -að, deareþ, deoreþ m. (a). (For "jüngere Vokalwechsel" s. Sievers A.-S. Gramm. § 129, for explanation of forms such as dareðum, dareða. For deareð with u uml. cf. Sievers A.-S. Gramm. § 103, Anm. 2).

References. sg. nom. daroð sceal on handa Gn. (C.) 21.

sg. acc. forlet pa drenga sum daroð of handa By. 149; (he) daroð acwehte By. 255.

pl. nom. daropas wæron weo pære wihte and se wudu searwum fæste gebunden Ridls. 574.

pl. gen. part of a loom — purh darota gedrep An. 1444, remains of an army — dreorig darota laf Aedelst. 54.

pl. dat. dareoum lacan B. 2848.

Compounds. 1. With daros as first member of compound.

daroð-æsć (?) m. spear ash, spear.

pl. nom. flugon daroð æsc, hildenædran El. 140.

daroo-hæbbende m. warrior, javelin bearing.

sg. nom. pa reordode rices hyrde wið pære fæmnan fæder frecne mode daraðhæbbende Jul. 68.

daroo-lacende javelin-brandishing, warrior.

pl. nom. and of burgsalum beornpreat monig farað fold wegum folca prypum, eoredcystum of estum gefysde dareðlacende Pan. 53; feðan-trymedon eoredcestum, pæt on ælfylce deareð lacende El. 37.

pl. gen. hwæt pær eallra wæs . . . dareð lacendra [reading of Zupitza lacende] deadra gefeallan El. 651.

daroð-sceaft m. spear-shaft, spear.

pl. dat. under deoreosceaftum Gen. 1984.

Meaning. A light throwing spear or javelin — from the references apparently synonymous to the lighter sort of gar.

Etymology. Cognates to OE. daroð are found in all the Germanic branches except the Goth. — OHG. tart 'lance', MHG. dard, MLat. dardus (Germanic loan word); ON. darraðr m. 'spear bearer' [dørr m. 'spear']; Swed. dart

'a dagger'. From MLat. dardus come OFr., Prov. dart; It., Span. dardo, and from the OFr. form is taken ME. dart, appearing in Chancer, while the OE. form. has been lost (cf. the verb 'to dart'). The word appears also in Slav. Hung. as darda 'a throwing spear, an arrow' a Germanic loan word, probably from the OSax. (s. Pauls. Grdr. p. 361). It appears in Russ. as drot < *durotu; in Rouman. as darda from MLat. dardus. It is related to the OE. verb derian 'to injure, destroy'.

The attempt of Sarrazin PBB. XI, p. 173 to classify daroo as a Norse loan word is refuted by Sievers at p. 356 of the same Vol.

Franca.

Form. franca m. (an).

References. Sg. nom. pa stod his franca Homl. Skt. I 3266.

sg. dat. mid his francan By. 77.

sg. acc. he let his francan wadan purh dæs hysses hals By. 140.

nom. acc. pl. francan wæron hlude Gen. 1982; ond twegen francan Chart. Th. 516¹⁹ (a later copy of this will p. 518 reads frangen).

Meaning. A spear, lance, or javelin, corresponding to the gar.

Etymology. Müllenhoff (Z. f. d. A. VII 19ff.) states that the name of the battle axe of the Franks, the francisca, is derived from the name of the people, and furthermore that not only this weapon, but the franca of the Anglo-Saxons, and the Norse frakka (loan word), frakki are of like origin.

Grimm (G. d. d. Spr. 512 ff.) makes a similar statement, connecting the name of the people with an adjective derived from the root of the Goth. adj. freis, NHG. frei meaning 'a free born man'. Grimm's supposition, however, that framea is a corruption of Germ. franca arising from a misunderstanding on the part of the Romans of the German word is hardly tenable.

Kluge, Etym. Wb. p. 122, on the other hand, derives the name of the people from a Germ. *franko meaning 'a spear', from whence OE. franca. This is, however, not generally accepted, and it is possible to say with a fair degree of certainty that the name of the people has given the name to the weapon. Concerning the origin of this name, however, there is still considerable controversy. Cf. Grimm (G. d. d. Spr. 513—517) and Fick (Vgl. Wb. I 484).

The Norse word frakka f. found only once in the Rigsmol 32 is probably an OE. loan word, while the masc. frakki 'a kind of weapon' found in the compounds hrae-frakki 'a corpse fluke, the blade of a sword' (Gisla Saga 7), and akkeris fluke 'an anchor fluke' in the Forn-søgur 996, points to early borrowing direct from the WGerm., both borrowings, however, occurring at a period before nk was assimilated to kk, which development was already completed in the Viking Age (cf. Noreen aisl. Gramm. § 207²).

Gād.

Forms. gad, gaad f. (5). (Grein, Sprachschatz Bd. I, p. 366, gives the form as gadu f., mod. E. goad, however, speaks for ā.)

References. sg. nom. stiga: gaad WW. 49^{1} ; \sim Corp. 1937; stimulus: ga[d] WW 105^{5} ; stimulus: gad WW. 313^{38} ; cuspis: \sim WW. 275^{34} , 369^{14} .

sg. acc. hafað guð-mæcga gierde lange, gyldene gade Sal. 91.

Meaning. 1. mucro: a point of an instrument.

- 2. cuspis: a spear or arrow head.
- 3. stimulus, stiga: sting, prick, goad.

Compound.

gad-isen n. stimulus: goad.

aculeus: sticel, uel gadisene, WW. 1056; cum stimulo: mid gadisene WW. 9019.

Etymology. OE. gād, ME. gād, NE. goad identical with Langobard. gaida 'spear', from Germ. *gaidō, Idg. *ghai-tā, is related to OE. gār, and is derived from the same root *ghi or *ghai. S. gār.

Radically related are: OHG. gart 'rod, staff, twig', Goth. gazds (s. Pauls Grdr. p. 324), ON. gaddr 'a goad' from a Germ. base *gazda- probably identical with Lat. hasta from Idg. *ghazdhâ. The NE. goad 'an instrument with a sharp point for driving cattle', is not identical with ME., NE. gad, which is a loan word from ON. gaddr. According to Uhlenbeck (PBB. XIX. p. 519 ff.) Mod. Eng. yard in yard stick < OE. jerd (gyrd) corresponding to OHG. gerta, garte 'rod, twig', MHG., NHG. gerte is to be separated from Germ. *gazda. Cf., however, Kluge, Etym. Wb. p. 142, who sets the Germ. base for jerd as *gazdjô.

Gafeluc.

Forms. gafeluc nom. pl., gavelucas m. (a).

References. sg. dat. Jaculo (i. sagitta): fla, zafe... wivere OE. Gl. 1¹¹⁰³ reading of MS. R. flan or flane, gaveluce, of Hpt. Gl. 432⁴ fla(nc), vi(d)bere, gaveluca.

nom. acc. pl. hastilia: gafelucas WW. 1436; catapultas:

 \sim , sagittas Hpt. Gl. 405¹⁴; catapultas : arewan, \sim OE. Gl. 1⁴²³⁸.

pl. dat. hi scuton pa mid gafelucum Hom. Skt. II, 32¹¹⁶ Meaning. hastilia: a light spear, a dart, a javelin, a hunting spear. This kind of dart was carried in a quiver, and the skill in throwing it was known in MHG. as the Swanc. It was not a knightly weapon, and was used chiefly for hunting.

Etymology. Gafeluc is a very rarely recorded late OE. word of Celtic origin, most likely taken from Cymr. gaflach meaning 'a spear'.

The form gauelot occurring in a late ME. glossar missile: ance a shafte and a shetel and a gauelot WW. 59628, shows not the OE. but the Fr. form, which was in Norm. Fr. of the 12th century gavelot, Central Fr. javelot, but had no influence whatever upon the OE. form. Thurneysen (s. Keltoromanisches p. 63) traces the related French javelot, gavelot, glavelot, gavrelot; It. giavelotto to a *gavl-el-ot, derived from a vulg. Lt. form such as *gabal-ellus, the Celtic origin of which is probably Celt. *gabalu 'forked branch, a fork (Stokes II. Bd., Ficks, Idg. Wb. p. 105), derivatives of which are Ir. gabul, gobul f.; NIr. gabhal; Gael. gobhall; Cymr. gafl; Bret. gavl, gaol all fem. The Ir. pl. of gabhal is gabhla once glossed with sleagha pl. 'a throwing spear' (s. Oclery, Rev. Celt. IV, 428). Finally says Thurneysen the Eng. form gaflac, gafeloc could correspond to the Celt. adj. *gabalācos; Bret. *gavlōc 'forked'. Cf. NIr. gabhlach; Gael. gobhlach; Cymr. gaflog 'forked'. To gafeluc are related the NE. words gaff 'a light fishing spear', OFr. gaffe, from Ir. gaf, gafa 'a hook', and gable 'the peak of a house top', Low Lt. gabulum 'a gable'. The gaveluc itself has remained in NE. in dialect but not in

the literary language; cf. the gavelack of the north of England recorded in 'Tour to the Caves' 1781 (E. D. S. 1, 5, 6, 23, p. 6) with the meaning of 'iron crow'. Again in a gloss of the Provincialisms of East Yorkshire in 1788 (see above p. 28) occurs the form geavlac 'an iron crow for raising stones', and from the West Riding of Yorkshire gavelock 'a strong iron bar used as a lever' (see above p. 88) from a list of ancient words communicated by Robert Willan in 1811 to Vol. XVII of the Archaeologia.

Related to gaveluc and from the same root are the German Giebel 'gable', and Gabel 'fork'. Related to the former is Gr. κεφαλή, Got. gibla, OHG. gibil 'giebel' and gëbal 'Kopf' with Ablaut to ON. gafl 'gable', which are derived from a ground form *Idg. g'heblo- 'gable, head' (see Fick I, 415), which Franck (Etym. Woordenbock p. 290) connects with a possible Idg. root *g'hebh- vertex, top. In Ablaut to gëbal etc. is OHG. gabala 'fork', Celt. gabalu (Ir. gabul), NHG. gabel. Some connect it with OI. gábhastis (s. Uhlenbeck, ai. Wb. p. 77) from the Idg. root *ghabh 'fassen, to seize'?

For the relation in meaning of head, gable, fork it may be conjectured that the primitive meaning of 'vertex, top' gave rise to the sense of 'gable', a gable being originally formed by two pieces of timber crossed at the top, which later developed the meaning of 'forked, a fork' (see Murray NED. under gable).

sg. gen. pegnas on da tid pearle gelyste gargewinnes Jud. 308.

sg. acc. grim gargewinn An. 958.

gār-wudu m. spear-shaft, spear.

sg. acc. ponne hie to guve garwudu rærdon Exod. 325.

Meaning. 1. A heavy spear for throwing in contrast to the lighter darop or javelin. The use of the compound

gar-bēam points to a heavy weapon (Exod. 246), while gares fliht (El. 117, B. 1766) bears evidence that it was used for throwing, cf. also gyllende gāras M. C. 14. From the Gaungun-Hrolf Saga the inference may be drawn that, like the framea of Tacitus, the gār or æt-gār was used in Scandinavia not only for throwing but for thrusting. (See Gaungan Hrolf's Saga, cap. 18.) "Sōti hafði atgeirr at wega med, ok gerði ymist, hann hjō eðr lugði" (hewed struck or thrust), and also "Sōti hjō til Hrōlfs...ok søkk atgeriun i jørð hina allt upp at høndum honum" proving that the heavy gār or atgar was grasped with both hands when giving a blow, with which compare By. (138) he mid gāre stang wlancne wicing...

2. Beside this heavy weapon there must have been a lighter $g\bar{a}r$, inasmuch as the word is frequently employed to translate M.-Lat. spicula a very light kind of throwing spear or dart ("Spiculae sunt sagittae vel lanceae brevis ab spicarum specie nuncupatae" Isidorus Origines 18, 8°). This spicula corresponds to Lt. cuspis, and made up in sharpness what it lacked in weight (cf. Nonius Lt. gaesum = telum tenerum).

Etymology. The word gar with its cognate forms is found in all the Germanic dialects cf. OHG. ger, ker; MHG. ger; ON. geirr; OSax. ger meaning 'spear', all pointing to a Germ. *gaiza-.

Schrader (Real. Lex. under Spiess) suggests, however, Celtic borrowing from OGall. *gaiso-n (s. Stokes in Vol. II of Ficks Idg. Wb. p. 104); cf. Gall. gaiso-n, gaiso-s, Ir. gae, gai, ghai Cymr. gwaew, Corn. gew meaning 'a spear', which passed over into Lat. as gaesum as early as the time of Virgil (Aeneas lib. VIII, p. 662), and into Gr. as γαῖσος (vgl. Kluge, Etym. Wb. p. 141), and the article entitled

Gaesaetae in Ersch u. Grubers Encyclopädie I. Sec., Bd. 52 p. 160). According to Schrader this word was borrowed very early by the Germans appearing in Gothic as second element in compound proper names such as Chario-gaisus, Lanio-gaisus, which Grimm (Gramm. 2, 46 No. 511) connects with a verb Goth. geisan: gais appearing only in the compound Goth. us-geisnan 'schlagen, stoßen', which Uhlenbeck (Goth. Wb. p. 161) connects with us-gaisjan 'to terrify', related to Lit. žeidžiu 'verwunde', which, however, is related not to OE. gar but to gast, NE. ghost. Although the Germ. forms may be of Celtic origin, nevertheless there is a strong probability that Germ. *gaiza- and Celtic gaiso-n are radically related, being descended from a common *ghaiso-, corresponding to which is Skt. hēśas 'a shot', (s. Uhlenbeck, Ai. Wb. p. 362; Fick, Idg. Wb. I 433), Gr. yaios 'a shepherd's staff'. Hêšas is perhaps to be connected with a orist stem hes: hinoti from the OI. root hi- 'to drive, set in motion, hurl'. Cf. also OI. hetis f. 'shot, weapon', and Langobard. gaida f. 'a spear'.

Gar has no connection with Goth. gairu spear 2. Cor. 12⁷, as that would have given an ON. form garr not geirr, in ON. every Germ. ai becoming ā before a Germ. r (see Kahles Altisl. Elementarbuch § 93).

Skeat (Etym. Dic.) derives the modern English verb to gore 'to pierce or stab deeply' from OE. gār. Murray (NE. Dic.) regards this as extremely doubtful, although the coincidence in form and meaning is striking, citing the early ME. form gorre with short o (several times recorded), as proof against it (s. Alex. 3645 pare was many of Perses gorred; Coverdale Esek. 23 gorre), inasmuch as ME. ŏ in a closed syllable could not give NE. gōre. As direct derivative of OE. gār Murray (NE. Dic.) gives ME.

gare (northern form) 'a spear', NE. gare 'a light spear'; now obsolete. Closely connected is NE. gore 'a triangular piece of cloth' from OE. gara; MDu. ghere; OHG. gēro; MHG. gehre; ON. geire; NHG. gehren* all with reference to shape of spear head. Cf. Fr. gyron.

Mægen-wudu.

The wood of strength, mighty spear i. e. kenning for spear occurring in B. l. 236. Cf. glēo·bēam 'joy wood' used for the harp.

Pīl.

Forms. pil nom. pl. pilas m. (a). pilu (?) WW. 126⁸¹. Meaning. 1. pil has in Anglo-Saxon the meaning of 'a stick with a point, a spike, a stake, prickle'.

pl. nom. and acc. pilas Lehdm. I, 3041 (= prickles).

pl. dat. mid iscnum pilum Homl. Sk. I 5 388; acutissimis sudibus: mid scearpum pilum Bd. 1, 2; on pam pilum Homl. Sk. I 5 389 (= spikes).

Compounds.

hilde-pil m. a dart, bolt, javelin.

nom. pl. hu me of hrife fleogað hyldepilas Ridls. 186.

dat. pl. and purh hest hrino hildepilum lað gewinnum Ridls, 1628.

orpan c-pil m. cunning point.

sg. nom. me purh hrycg wrecen hongap under an orponcpil Ridls. 2212.

searo-pil m. pointed instrument.

pl. gen. min heafod is homere gepuren, searo-pila wund Ridls. 91¹.

^{*} Gehren (Grimms Wb.) = Die Heraldik bezeichnet einen Schild, der in Dreiecke geteilt ist, welche in der Mitte zusammenstoßen, als 'gegeret' (frz. gironné, span. gironado).

wæl-pil m. a death arrow.

pl. dat. awrecen wælpilum Guð. 1127.

dægmæls-pilu f. (?) (according to Pogatscher a mistake for dægmæls pil m.) gnomon: dægmæls pilu WW. 126³¹ the style of a dial, horlogii gnomon.

Etymology. A Latin loan word (s. Pogatscher, § 143, 284), from *pilum* 'a spear', which has gone over from the Lat. o dec. to the OE. a dec.

Cognates are ON. pila, Du. pijl, OHG., MHG. pfil, NHG. Pfeil 'arrow', which in German has completely supplanted the old Germanic word (Goth. arhwazna) for the same. Schrader (Real. Lex., p. 787) suggests that pilum, from Idg. *(s)peudo-m (cf. heoru and (s)ceran), may be identical with Germ. *speuto- from which OHG. spioz, NHG. Spieß 'spear', in this case Idg. eu = Lat. ī (cf. Lat. liber with Gr. è-λεύθ-ερος s. Brug. Grdr. I², 1, 107).

NE. pile has the meaning of 'a large stake driven into the earth to support foundations' etc., the meaning of javelin having been lost.

Sceaft.

Forms. sceaft, scept, sceft m. (a).

References and Meanings. 1. the shaft of a spear Lat. contus. nom. sg. contus spereleas sceft WW. 1437; hasta, quiris: sceaft Aelfc. Gl. 3183 = asta (quiris): sceaft WW. 14219; \sim ib. 33236; his sceaft ætstod ætforan him Skt. Homl. I 1253; se sceaft tobærst By. 136.

dat. sg. on sceafte Gn. (Ex.) 203. (an ordinary rod =)

acc. sg. and dippat ysopan sceaft on pam blode Prs. Exod. 1222.

2. A spear.

nom. sg. cuspis : sceaft WW. 143¹⁸; huius cuspidis, haec cuspis : pes sceft Aelfc. Gr. 56⁴; sceaft reafere Gn. Ex. 130.

nom. sg. sceft nytte heold B. 3118.

Compounds.

here-sceaft m. spear or battle shaft.

gen. pl. here-sceafta heap B. 335.

wxl-sceaft m. spear or deadly shaft.

acc. pl. lætað hilde-bord her onbidian, wudu wælsceaft as B. 398.

Flurnamen.

at Sceaftesberi G. B. 1026 (A. D. 958) now Shaftesbury in Dorset; of dam pade sceaftrihte on alr...1331 (A. D. 739); innan sceaftes hangran 629 (A. D. 909).

Etymology. Of the three forms scæpt, sceaft, sceft, scæpt is the oldest. It occurs in the Ep. Er. glosses where frequently -pt is found for-ft (s. Sievers, § 193¹) and OE. æ from WGerm. a has not yet become ea under influence of preceding palatal consonants sc (Sievers, A.-S. Gramm., § 75, Bülbring, AE. Elementarbuch, § 152). Sceft (Aelfc. Gloss.) shows the later WS. palatal Umlaut (s. Bülbring, § 314) where every ea of whatever origin is umlauted by preceding \dot{g} or sc to e.

The cognate forms are: OHG. scaft; OSax. skaft 'a spear'; MHG. scaft 'shaft of a lance'; ON. skaft 'shaft';

Dan. skaft; Swed. skaft 'a handle'; NHG. schaft; NE. shaft either 'the spear shaft or the spear itself'.

Skeat derives sceaft from either 1. the Idg. rt. *skap 'to support' or with Kluge (Et. Wb. 331) 2. from the pp. of the verb 'to shave, to trim', Idg. *skabho 'to hack' answering with rt. variation of b and p, (cf. Uhlenbeck, Goth. Wb., p. 60, under ga-skapjan) to *skapo 'to cut, to dig', with the original meaning of 'something cut, trimmed, smoothed'.

Cf. OHG. scaben, Goth. skaban, OE. sceafan, scafan, NE. to shave.

Closely related are Gr. oximprov 'staff', Dor. oximprov 'staff (sceptre)', Lat. scapus 'shaft, stem', Alban. škop 'stick, staff', MDu. schacht 'long shaft', OSlav. skoba 'clasp, buckle', Lit. skaptas 'a curved knife-like sword, all of which Prellwitz (Et. Gr. Wb., p. 288) refers to the rt. *skap or skabh 'to prop, to make firm' (s. Fick, Vgl. Wb. I, 142); hence 'support', then 'prop, staff, pole'. Cf., however, Kluge 'something smoothed, shaved = pole, shaft'.

١

Sceaft-lo (?).

Form. nom. sg. (?) pl. scæpt-loan prob. m. (an).

References. nom. acc. pl. hastilia telorum: scæpt-loan Ep. 489, Er. 1005; ~ Corp. 1005.

pl. dat. amentis: scept-loum Ep. 106, Er. 156; ~ Corp. 156. Meaning. The strap attached to the shaft of a missile probably to draw it back when thrown (B. T.).

Cf. Isid. Origin. XVIII c. 7, who describes the amentum as follows: — "Hasta est contus cum ferro. Lancea est hasta, amentum habens in medio; dicta autem lancea, quia aequa lance i. e. aequali amento ponderata vibratur. Amentum vinculum est jaculorum hastilium,

quod mediis hastis aptatur. Cuspis, hastile amentatum, a cespite dicta quod est virgultum."

The Etymology is not clear; cf. loh-sceaft 'a bolt, bar'.

Gaderode mē kigelas and stupan sceaftas and lõhsceaftas Shrn. 1636, and Carceria sunt in cacumine arboris trocliae, quasi flicteria, per quas funes trahuntur: mæst lon WW. 19980.

Sceaft-riht(e) in a straight line.

of dæm pade sceafrihte on alr . . . G. B. 1331 (A. D. 739).

sceaft-tog (?) the strap attached to the shaft of a missile B. T.

ammentum: scep-tog WW. 5²⁶; amentum (ammentum): scep-tog Corp. 145.

Etymology. Not clear.

Is tog- perhaps to be connected with the pp. togen from the OE. verb teon 'to draw, pull' with the idea of something (a strap) by which the spear when thrown may be drawn back?

For proper names cf. Sper-dena. Cf. also Rel. Antiq. 269 where for characteristics of different counties "shild and sper" is given for Hervordschir.

Meaning. ansata, contus, hasta, lancea, falarica: a spear for hunting or war — used both for hurling and thrusting (s. Part. I under spear).

Etymology. A general Germ. term is the word spere being found in the majority of the Germ. dialects, but as in the case of most of the weapon names, it is not recorded in Goth. Originally a cons. stem belonging to the -iz class it has passed over in OE. into the i dec. with short stem

vowel (cf. Sievers, A.-S. Gramm., § 262, 2634, 288). u-Umlaut fails in the plural owing to the adoption of the unumlauted sg. form spere in the plural (s. Sievers, A.-S. Gramm., § 104). Corresponding forms in other Germ. dialects are: OHG. sper; OFrs. sper, spiri; MLG. sper; Du. speer; ON. spjör; Dan. spaer; NHG. speer all meaning 'spear'; Lat. sparum, sparus 'a peasant weapon'. ME. spēre with open e giving NE. spear.

It is derived from a Germ. *spar-is 'spear', which Skeat (Etym. Dic.) connects with an Idg. root *spar 'to quiver' (cf. Fick, Idg. Wb. I, p. 149 *spher — 'tremble, quiver, struggle') (?). For the W. European common form Fick (Wb. I, 572) gives spero — m. n. 'a weapon, spear' (?), which stands in Ablaut to Lat. sparus. S. Grimm, Gramm. 2⁵⁷ No. 575, for a lost Goth. strong verb *spairan: spar: spērum: spaurans = 'quaerere, investigare' — 'hasta = vestigium in corpore relinquens vulnerans'. This *spar would be then the form from which Germ. *spar-is is taken, the verb, however, is only a conjecture.

Schrader (Real. Lexicon, p. 785), suggests a connection between OHG. spere-boum, MHG. sperboum, NHG. Speirling (Sperberbaum) deriving spere-boum from the Idg. *spero-(Lat. sorbus) which he thinks may have been originally a tree name, which later developed the meaning of 'weapon, spear', the latter taking its name from the wood of which the shaft was made cf. OSax. esc; OHG. aska; Gr. δόρυ etc.

Closely allied to this and adopted by Schrader is the attempt of Lidén PBB. XV, 518 ff. to connect Lat. sorbu-s with OHG. swërt, Dn. zwaert, OSax, OFrs., swërd, OE. sweord etc., explaining it as one of the weapon-names, which has its origin in an ancient tree name or term applied to wood. This is accepted neither by Kluge nor Osthoff

(s. Osthoff, Etym. Parerga I, 92 ff.), and the author himself afterwards recalled the explanation.

Sprēot.

Form. sprēot m. (a).

References. nom. sg. palus: spreot OE. Gl. 30¹; contus: ~ WW. 139³⁸.

nom. and acc. pl. contos: spreotas WW. 533²⁵; contos: speru oððe spreotas WW. 365⁷, 375¹⁴; trudes uel amites: spreotas WW. 143⁸; trudes: ~ WW. 166¹⁵; ~ ib. 183⁴; ~ ib. 289²⁰; ansatas (hastas is omitted): ~ ætgaras WW. 343⁸⁵.

dat. pl. contis: spreotum WW. 14²²; spreotum Ep.²¹¹; spreutum Er. ⁵²⁷; spreotum Corp. ⁵²⁷.

Compounds.

eofor-sprēot m. boar spear.

venabula: eoborspreot WW. 52 **; venabula(um): eborspreot Ep. Er. 105*; Corp. 2089 eoborspreot.

Meaning. 1. Contus: pole, spear.

2. Trudes: pole, sprit belonging to a ship.

Flurnamen. on spreot emre G. B. 938 (A. D. 956).

Etymology. Derived from the pres. stem of a st. verb of the second Ablaut class, Germ. sprcutan, which appears in OE. as spratan (s. Sievers 385, Anm. 1) with Schwundstufe in present, instead of the regular sprēctan. The corresponding forms in other Germ. dialects are: Du. spriet, sprit, in compound Bugspriet (part of a ship), Dan. sprēd, Swed. spröt also 'part of a ship', MHG. sprêt 'a pole or tree', also 'a spar', Grimm connects this word with OHG. spicz, ON. spjot 'a spear' from Germ. *spēuta-as does Kluge (Etym. Wb. 371). Cognates in other languages outside the Germanic are uncertain.

OE. sprēot gives NE. sprit usually found in the compound bow-sprit 'a spar set diagonally to extend a fore-and-aft sail'.

The development in meaning seems to have been 'a sprout, a branch of a tree' later 'a pole', and in OE. the name of the pole used for the spear shaft was employed occasionally to designate the whole spear.

Piox (?).

Form. sg. nom.? pl. dat. pioxum.

Reference. ferratis venabulis: isernum barsperum, pioxum Hpt. Gl. 42368.

Meaning. a hunting spear.

Etymology. piox or peox corresponds to OHG. dehsala 'a short handled axe, hatchet', MHG. dehsel, NHG. deichsel 'a hatchet', ON. pexla 'an adze' from a Germ. root *pehs to Idg. *teks (cf. Fick, Wb. I, 441). Related forms are OSlav. tesati 'to hew', Lit. taszýti 'to hew with an axe', Skr. táksati 'hewn, planned', taksā 'carpenter', OCSlav. tesla 'axe', Gr. τέκτων 'carpenter', Lat. texō 'I weave, build, etc.' (s. Uhlenbeck, Ai. Wb., p. 107). In the sense of spear Anglo-Saxon only, but in form and with the general meaning of 'a sharp cutting instrument' related to the above mentioned words. For further Etym. cf. Kluge, Wb. 'under Deichsel' p. 74.

Wæl-steng.

Form. wæl-steng m. (i).

Reference. sg. dat. feower scoldon on pæm wælstenge. weorcum geferian to pæm gold-sele Grendles heafod B. 1638.

Meaning. shaft of spear, spear.

Etymology. From Germ. *stang-is formed on the pret. stem of the strong verb *stingan: stang 'to prick, to sting'.

Cognates are: OHG. stanga, NHG. Stange, Du. stang, ON. stong, Swed. stång (cf. Goth. us-stiggan 'ausstechen'). The provincial NE. stang 'a pole, a stake' shows Scandinavian influence from the inflected forms of ON. stong, gen. stangar (cf. ME. stange Sir Gawain and the Green Kinght V, 1614), the form from OE. stong being lost, while NE. sting stands in Ablaut to stang.

All to Idg. *stengh: stangh 'to prick' (Fick I, 569), a weakened form of which is probably *steig- (Fick I, 144) to which is related OI. téjati 'is sharp'; Russ. stegáti, stegnúti 'to stitch, to whip'; Lat. in-stigare 'to spur on, incite'; Goth. stiks; OHG. stich 'point' (s. Uhlenbeck, Ai. Wb., p. 116).

From the original meaning of 'thrusting, sticking, pricking' has developed the idea of 'a pole thrust or stuck into the ground', then 'the pole itself'.

Wigar.

Form. wigār m. (wiggār B. T.).

Reference. lancea: wigar WW. 14312.

Directly following this gloss is the following: amentum: wegures, gewiðspere WW. 143¹³, which is either a corruption of wigares (wīg-gāras) or a form borrowed directly from the Norman French wigres of the Chanson de Roland 1. 2075. According to Baist (Var. über Rol.) this wigre, which is found only in the Chanson de Roland, occurring everywhere else as givre, guivre (s. wifel), is in turn borrowed possibly from A.-S. wīgār, but with more probability from ON. vǐgr.

For the Meaning and Etymology of wigar cf. gar. It may also have the meaning arrow, but that of spear is the more probable.

2. The Sword and its Attachments.

Bil.

Forms. bil, bill n. (ja).

wig-bill n. battle-blade, sword.

sg. nom. wig-bil ongan wanian B. 1607.

stān-bill n. stone-working implement, an axe.

mastellus: stanbill WW. 447 83.

twi-bill n. bipennis: a two-edged axe.

sg. nom. bipennis: twybill WW. 143³⁰; id.: twibill WW. 361⁶; bipennis: twybile [-bil, MS. W.] Aelfr. Gr. 56⁹.

sg. acc. he nam sum twibil and mid dan pry men to deade of sloh Prs. Gūdl. 12.

nom. pl. bipennes, secures: æcsa, twibilles (-as?) Hpt. Gl. 459²; bipennae: twibille Cant. Ps. 73⁶; id. VPs. 73⁶.

twi-bille adj. (?). According to B, T. 'the double gloss bipennis: twibille uel stanzx WW. 141²⁷ seems to render the double character of the Latin word as adj. and noun — the noun being rendered by twybill in the glosses

given above under twi-bill', cf. also bipennis, securis: twilafte ex, uel twibille WW. 194 36.

In two ME. Gl. of the 15th cent. the word occurs: bisacuta, an^{ce}: a twybyl WW. 568²¹; hic bipennis: A^c twybyle WW. 654², and it has remained in dialect to the present day with the meaning of 'mattock, axe', being an implement resembling a pick axe, but having, instead of points, flat terminations, one of which is horizontal, the other perpendicular (s. Halliwell's Dic. II, p. 897).

wudu-bill n. falcis: scythe, sickle. falces, falcis (falx, falcis): wudubil, syōi, riftr Ep. 430, uuidubil Er. 834; falcastrum: wudubil, siōe, riftras Corp. 836; falcastrum i. ferramentum curuum a similitudine falcis vocatum: wudubil, uel foddur WW. 235 5.

2. bil(1) as first member of compound.

bill-geslieht n. sword-clash, battle.

sg. gen. gylpan neðorfte beorn blandenfeax billgeslihtes Aeðelst. 45.

bill-hete m. sword-hate, warfare.

sg. dat. py læs ic lungre scyle ablended in burgum æfter bill-hete An. 78.

bill-swæp n. sword-track.

pl. nom. praca wæs on ore...bilswaðu blodige, beadu mægnes ræs Exod. 329.

Meaning. In prose bill has usually the meaning of 'scythe' or 'sickle' cf. falcastrum: sipe WW. 334⁵, 400¹², 477²², also falcis: wudubil(l), sive, riftras WW. 21¹⁹. Marra refers probably to an iron mattock or axe similar to a pickaxe for rooting out weeds etc. Twibill: bipennis refers undoubtedly to an axe, and only in poetry is bill found in the sense of 'sword'. In ME. bill referred to a kind of pike or halberd, with a two-edged blade, carried by the

English infantry. Later it became the usual weapon of watchmen, cf. the term billman, and Shakespere 'Much Ado About Nothing' III, 3, 44. 'Have a care that your bills be not stoln'. These were used by the Constables of the watch until the 18th century.

The term bill is still applied in certain parts of England to a bill-hook, and is also used poetically for sword.

Etymology. Bill with the meaning 'axe' is found in many of the German dialects: OE. bil(l), ME. bil, bylle, NE. bill, Du. bijl, OHG., MHG. bill, bil n., NHG. bille f. (influenced by f. Beil), Dan. biil, Swed. bila.

Two derivations are given for bil, the one pointing to a Celtic, the other to a Germanic origin. According to Kluge-Lutz (Etym. Wb., p. 18) and Skeat (Etym. Dic.) bil belongs perhaps to Germ. *bilja, Sct. bhilyo, Idg. *bhilyofor Idg. bhidlyofor momentum the Idg. root bheid- 'spalten, split' (Fick, Vgl. Wb. I, 88). Here belongs also Skt. bhidati 'spaltet, schlitzt' to OI. bhid- 'spalten' (s. Uhlenbeck, Ai. Wb., p. 201), radically related to Lat. findere 'spalten', Goth. beitan (in ON. used also for a cutting weapon, for example 'Iarn-bitr' = a sword).

Compare, however, Uhlenbeck (PBB. 26 568), who derives OE. bile 'bill of a bird' and OE. bil(l) 'sword' not from Idg. *bhidlyo-, but from the Celt. rt. *bei-, bi- 'schlagen to strike', here belong perhaps also OCSl. bija, OSl. biti 'schlagen' (s. Stokes II, 164), Ir. biail 'Beil' f. gen. bila, Cymr. bwyell f., OCorn. bahell, NBret. bouchal, bouhal, and cf. OHG. bihal, bial, NHG. Beil f., OE. bill 'which' according to Grimm, is closely related to bill, according to Murray (N. E. D.), is from an entirely different rt., while Kluge separates OHG. bihal entirely from Ir. biail, though grant-

ing as probable the radical relationship of OHG. beil and bille.

Brand.

Forms. brand, brond m. (a).

References. 1. titio, torris: fire brand.

sg. nom. titio: brond WW. 50⁴¹; titio uel torris: brand WW. 127⁸; torris: ~ WW. 266⁸⁷; and nan brand nolde byrnan Hom. Skt. II 26⁸⁹⁹.

Compounds.

brand-hat adj. ardent (love, hate).

sg. nom. brandhata nið weollon gewitte An. 768; born in breostum, brondhat lufu Gūð. 937.

brand-hord m. ardens thesaurus: a treasure exciting ardent desire.

sg. nom. brondhord geblowen breostum inforgrowen Reim. 46.

brand-isen n. a tripod, firedog, grate.

sg. nom. andena, uel tripes: brandisen WW. 1279; an[dena]: brandisen WW. 32981.

brand-rad f. rida, -e m. firedog, grate.

sg. nom. andeda: brand-rod WW. 5³⁸; andena: brand red WW. 349²³; ardeda: brand-rida WW. 266²⁶.

Meaning. Connected with brinnan, bærnan 'to burn', hence original meaning of 'fire-brand, a bright flame', from which the secondary meaning 'sword' is derived from its shining appearance.

Etymology. To OE. brand, ME. brand, NE. brand cognates are: ON. brandr 'a fire-brand, a sword-blade', OHG. brant, MHG. brant 'a brand, a sword', Du. brand 'burning fuel', ODu. brand 'a sword', Dan., Swed. brand 'a fire-brand, fire'. From OHG. is borrowed the It. brando, Port. bran, OFr. bran 'sword-blade'. Related is also the It. verb brandir, Span. blandir, Fr. brandir from which, most likely, NE. brandish 'to swing a sword', then 'to swing or shake anything' (cf. Skeat C. Etym. Dic.).

The word brand is in Ablaut to brennen from the root *brën-, Idg. bhren, which in the other Idg. languages is not found with the meaning 'to burn'.

In NE. brand has the meaning of 'fire brand', in poetical language 'sword', and is also found in the compounds brand- or brant-fox, a kind of Swedish fox, Swed. brand-räf, brand-goose, brand-gås, brent-goose. At first the name was probably given owing to redness or browness of color. Compare also the word red-start (red-tail) sometimes called the branttail.

as adj. he wæg mid hine twiecge handseax geættred Bd. 2, 9, p. 898; sweord twiecge: gladii ancipites Ps. Surt. 1496.

Meaning. edge, edge of sword, and used poetically for the sword itself.

Etymology. A Germ. word. Cognate forms are: OHG. ekka 'point, sword-blade', MHG. ecke 'point, edge, sword-blade', NHG. Ecke 'corner, edge', OSax. eggja 'blade, sword', ON. egg 'point', Swed. agg, Dan. eg, Du. egge, ME. eğğe, NE. edge, Goth. *agja is not preserved. The Germ. root *ag, Idg. *ăk 'sharp' appears in other than Germ. languages also with the meaning of 'sharpness, something pointed'. Cf. Lat. acies, Gr. àxíç 'point', Lat. acus 'needle', OI. áśri-s 'side, edge, blade, corner', áṣṭrā 'thorn', Armen. aseln 'needle', Lit. asɛtrùs 'sharp', all from the same Idg. root (s. Fick, Vgl. Wb. I, 349, and Osthoff, Etym. Parerga, p. 192).

Fętel.

Forms. fetel, fetels m. (a).

References.

pl. dat. sweordum and fetelum Boet. 2510.

derived — fetelsian 'to belt, adorned with a belt'. fetelsade pp. tueye suerde fetelsade Chart. Th. 505 82.

Compound.

fetel-hilt n. capulus balteo instructus: a belted hilt. s. hilt.

Meaning. cingulum, balteus: a girdle, a sword-belt.

Etymology. N.- and WGerm. Cognates being MHG. vezzel, OHG. fezzil 'strap for fastening the sword', then also 'strap, fetter', ON. fetell 'band, chain, sword-belt' from the Germ. root *fat probably with the meaning 'to hold together'. A masc. nom. instr. formed from a verb with the suffix (i)la Germ. *fatila- (s. Kluge, Stammbildungslehre, § 90). Related to NHG. fass, OHG. vas (from Idg. *podo-), Eng. vat, and the verb fassen 'to hold'.

According to Kluge (Etym. Wb. p. 110) not to be connected with the Germ. word for fetter, MHG. vezzer, OHG. fezzera, OE. feter, NE. fetter. Cf. further Kluge, PBB. 6¹¹⁰.

Heoru.

Forms. heoru, heoro, hioro m. (u).

pl. instr. fuhton pearle heardum heoru-wæpnum Jud. 263. heoru-weallende adj. boiling fiercely.

lig-egesan wæg hatne for horde, hioro-weallende middelnihtum B. 2781.

heoru-wearh m. bloodthirsty wolf (?).

sg. nom. (Grendel) heoro-wearh hetelic B. 1267.

heoru-word n. a fierce word.

pl. gen. yrre ne læt þe æfre gewealdan heah in hreþre, heoro-worda grund wylme bismitan Fæd. lar. 84.

heoru-wulf m. sword-wolf, warrior.

pl. nom. hare heora-wulfas hilde gretton Exod. 181. Meaning. A poetical word for sword in both OE. and ON.

Etymology. heoru is found in Goth. and Icel. or ON. though wanting in WGerm. Compare Goth. haírus m. 'a sword', ON. hjorr, OSax. hëru (in compound), identical with OI. çárus m. f. 'shot, spear, arrow', Idg. kérus f. 'Geschoß' (s. Fick, Vgl. Wb. I, 43). The original meaning of this word is probably 'Rohr, Rohrstab' cf. OI. çarás 'Rohr, Pfeil' also çáryas m. 'arrow', çáryā f. 'reed, arrow' (Uhlenbeck, Ai., Wb. 304). According to Fick it is to be connected with OI. çrnáti 'zerbricht' (s. Uhlenbeck 315), to which belongs Gr. κεραυνός 'Donnerkeil, Blitz', as explained by Luft in Kuhn's Zeitschr. 36¹⁴⁵. Noreen, Aisl. Gramm., § 256, connects hiorr with skera 'to cut', which derivation would connect it with OE. sceran, NE. shear, NHG. scheren.

Hæft.

Forms. hæft, hæfte n. (a).

References. 1. Capulus manubrium: hilt, handle.

sg. nom. manubrium: hæft Aelfc. Gl. 318⁸; id. WW. 332³⁸; id.: hæft and helfe WW. 142²¹; nim öæt seax de öæt hæfte sie fealo hryderes horn Lchdm. II, 272¹¹.

Compound.

hæft-mēče m. ensis capulo preditus: sword with hilt sg. dat. wæs pæm hæft-mece Hrunting nama B. 1457.

- 2. hæft m. captivus s. B. T. and Grein, Sprachschatz II, p. 19.
- 3. hæft m. vinculum: bond fetter s. B. T. and Grein II, p. 20.

Etymology. Cognates to OE. hæft, ME. heft, haft, NE. haft 'a handle' are: OHG. hefti, MHG. hefte 'handle, heft', NHG. heft, ON. hepti, Du. heft 'handle'. Related to these is Goth. hafts 'bound', Lat. captus 'captured' from hafjan 'heben, to raise', capio 'to take, to grasp' from the Idg. rt. *kap- with the original meaning of 'bending, making crooked', from which have developed the meanings 'to raise, to seize, to grasp' (s. Fick, Vgl. Wb. 387). Connected with OE. hebban 'to lift' (s. Skeat, C. Etym. Dic.) with the idea of 'grasping, something to grasp', then 'hilt, handle'.

Hilt.

Forms. hilt pl. hiltas, hilt m. n. (i), helt n. (Cons. s. stem), hilte f. (jon).

(For helt s. Sievers, A.-S. Gramm., § 288, Anm. 1, for hilt § 267, Anm. 1, also Kluge, Stammbildungslehre, § 84b).

2. hilte as first member of the compound.

hilte-cumbor n. an ensign with hilt.

sg. acc. forgeaf pa Beowulfe bearn Healfdenes . . . hroden hilt[e]-cumbor B. 1022. derived:

hilting.

sg. acc. macheram i. gladium: mece, hiltinge OE. Gl. 1⁷⁵⁸; id.: hiltine (probably for hiltine) Hpt. Gl. 424⁸⁰ hence Hall's supposition hiltine 'a sword'.

hiltian.

hilted pp. capulo instructus: provided with a hilt.

sg. acc. pæt oft wæpen abæd his mondryhtne, maðm in healle, goldhilted sweord Ridls. 56 14.

Meaning. capulus: hilt, handle.

Etymology. To OE. hilt, helt n. m. belong MDu. helt, hilt m., ON. hjalt n. 'sword-hilt'; to OE. hilte f. belong OSax. hilta, MLG. hilte, MDu. helte, hilte, OHG. helsa, MHG. hclze, f.

OE. hilt, helt m. n. are derived from Germ. *helt-iz, -az a neuter s-stem, while hilte f. is from Germ. *hilt-jon the origin of which is not clear.

Compare the Romance words: It. elsa, elso (from OHG. helza showing early borrowing), OFr. helt m., helte f., MFr. heut, heu, heute are probably later borrowings from

ON. hjalt n., OE. hilte f. Compare also the derived verb enheldin (Chanson de Roland) 'to adorn with a hilt'.

The masc form hilt remained in ME., cf. Laym. 1559, dat. hilte, Gawain 1594 hult. In early NE. arose a very favorite expression "by these hilts" Henry IV — 2, IV, 230 and later in Byron 'Don Juan' XI, 57, in general, however, the meaning has remained unchanged to the present day.

tren-heard adj. hard as iron.

sg. nom. eofer iren-heard B. 1112.

Meaning. Ferrum, gladius: iron, sword. Originally the material of which the sword blade was made, it became finally a term applied to the entire sword, and was so used in the OE. poetry. Cf. æsc 'spear'.

Etymology. The Germ. word for iron is either one of the usual borrowings from the Celtic or a borrowing of meaning only, which has extended to all of the Germ. dialects. It appears in three different forms (s. Pauls Grdr., 325) cf. Goth. eisarn, OSax., OHG. isarn, isan (Goth. *eisan), MHG. isern, isen, NHG. Eisen, ON. isarn, járn, jarn (Goth. eisan), Dan., Swed. jern, Du. yser, ijzer (MHG. isern, isen), OE. isern, isen, iren. According to Stokes (Fick, Vgl. Wb. II, 25) the OE. forms are probably borrowed from Gall. eisarno < Urcelt. *eisarno, eiserno, OIr. iarn. Thurneysen (Kelto-Rom. p. 36) sets, however, an isarno for the Celt. ground form (cf. Johnson, Bezz. Beitr. 18, 17 ff., Much, Z. f. d. Altertum 42, 164 ff., and Schrader, Real Lex. u. eisen). Much endeavors to bring the word into relationship with OI. iṣirás 'frisch, blühend, kräftig' to iṣ- f. 'Er-

quickung, Kraft' with the original meaning of 'the strong' cf. Dor. ἰαρός 'heilig, kräftig'.

In ME. two forms are extant tren Chaucer (C. T.502), and yeen (isen) Ayenbete of Inwyt 139⁸¹, the former of which has given NE. iron. On the other hand compare the German Eisen, which has preserved the second form.

Lāf.

pl. instr. heowon heaðo-linda hamora lafum eaforan ead weardes Aeðelst. 6.

For compounds with laf s. Grein, Sprachschatz, p. 152.

Etymology. Cognates to OE. lāf are: OHG. leiba, leipa f., Goth. laiba f. 'Überbleibsel, remnant, remainder', OFrs. lāwe, OSax. lēba, ON. leif. Formed on the pret. stem of the verb which appears in Goth. as leiban in bileiban, OHG. bi-līban, OE. be-līfan, from a Germ. form such as *laibō-. To an Idg. rt. *leip- 'to smear, to adhere, to stick' (Fick, Vgl. Wb. 121), which Wood (Jour. of Germ. Phil. I, 453 [1897]) supposes had the original meaning 'to flow'. Cf. OI. limpáti 'smeared', Gr. λῖπαρής 'anhaltend, beharrlich' (Uhlenbeck, Ai. Wb. 262), and OSlav. līpnati. Lit. lipti 'to remain stuck, to adhere'.

Lēoma.

Form. leoma m. (an).

References. 1. lumen, splendor: gleam, light. For examples s. B. T. Dic. and Grein, Sprachschatz II, p. 178.

2. gladius: sword-blade, sword, a poetical term.

sg. nom. lixte se leoma B. 1570.

Compounds. *lēoma* as second member of the compound.

beadu-lēoma m. ensis : sword.

sg. nom. pæt se beado-leoma bitan nolde B. 1523.

hilde-lēoma m. gladius: sword.

sg. acc. ponne him Hun Lafing hilde-leoman, billa selest, on bearme dyde B. 1143.

pl. nom. wide sprungon hilde-leoman (flames from the dragon's mouth) B. 2583.

sweord-lēoma m. ensium corruscatio: the gleam of swords.

sg. nom. swurd-leoma stod swylce eal Finns-buruh fyrenu wære Finn. 35.

Meaning. A kenning for sword chiefly found in Beowulf. The original meaning was that of 'light-beam, a shining light'.

Etymology. lēoma stands in Ablaut to Goth. lauhmuni (lauhmōni) f. 'lightning, flame' written either au or au (s. under lauhatjan Uhlenbeck, Goth. Wb. 89). Cognates to OE. lēoma are: ON. ljöme and OSax. liomo 'beam, light' to which is related Lat. lūmen, all belonging to an Idg. rt. *leuk- 'to shine', to which is related Skt. lókati 'erblickt', locanam 'Auge, eye'.

pl. nom. ond Hear[dr]ede hilde-meceas under bord-hreoðan to bonan wurdon B. 2202.

sige-mēče m. victorious sword.

acc. swapeð sige-méce mid pære swiðran hond Cri. 1531. Meaning. a long two-edged sword.

Etymology. Although tracea blein most of the Germ. dialects, the origin of the word is not clear, the contested point being that of borrowing — namely whether the Germ. form is to be regarded as a loan word from Finnish *miekka*, or the Slav. and Finn. words as loan words from the Germ.

Bremer (PBB. XI, 4ff.) regards Goth. mēkeis recorded only in the Acc. form mēki (Eph. VI), as a possible loan word from the Finn., giving as reasons the skillfulness of the Finns at that time in the making of weapons; the fact that in Idg. no related word has as yet been found; the appearance of the word miči as Finn. loan word in Slavic; and finally the various wanderings, which the word appears to have made as loan word in the various Germ. dialects. He cites here as example for the latter OE. mēče, which according to the laws of sound change must be derived from *moki rather than from *maki, which would have given mæče, and when compared to Goth. mēkeis, ON. mækir, OSax., māki can only be explained as Stammabstufung $\bar{e}: \bar{o}$, or as Goth. loan word borrowed before the emigration to England. Uhlenbeck explains the \bar{e} of OE. $m\bar{e}\bar{c}e$, however, as an Anglian or Kent. form for WS. \bar{z} , which does away with the theory of Goth. borrowing for the OE.

Furthermore it is by no means certain, as Bremer states, that the Slav. miči is a Finn. loan word, on the contrary it is much more probable that both miekka and miči are very early Germ. loan words in Finn. and Slav. Of this opinion is Miklosich (D. W. Ak. XVI, 112b, 1867), who treats OSlav. miči as Germ. in origin; Kluge follows Mik. (Pauls Grund.² I, 361), as does Uhlenbeck (Goth. Wb.) giving Finn. miekka and OSlav. mici as Germ. loan words. Schrader (Sprachvgl. u. Urgesch. 324) speaks against a Finn. origin for the word, and Thomsen (Got. Sprogklasses Indflyd. på den finske 43, 134) gives miekka as loan word from Goth. mēkeis, which together with niekla, neula, nål (Goth. nēpla) shows very old borrowing, all later Goth. loan words with \bar{e} , ON., OHG. \bar{a} , appearing in Finn. as aa (\bar{a}). Hirt (PBB. 23 341) derives OSlav. mici from the Goth., Goth. \bar{e} becoming i in Slav. Cf. further Liv. møk, Lap. miekke, and Krim Goth. mycha, all meaning 'sword, knife'.

The root is uncertain, s. Fick, Vgl. Wb. I, 511. Graßmann, K. Z. XII, 166.

-Mæl.

• Form. *mæl* n. (a).

References. 1. measure, time, point of time, occasion.

2. mark, token, ornament.

See B. T. and Grein, Sprachschatz II, p. 221.

3. sword $(-m\bar{z}l \text{ in compound, and only used poetically})$. $broden-m\bar{z}l$ n. inlaid sword.

sg. nom. sweord ær gemealt, forbarn broden-mæl B. 1616; pæt hildebil forbarn, broyden-mæl B. 1667; heardecy cwacap, beofup broyden-mæl El. 758.

 $gr\bar{x}g-m\bar{x}l$ adj. grey-colored.

sg. nom. sweord Biowulfes gomol ond græg-mæl B. 2682.

 $hring-m\bar{x}l$ adj. adorned with rings.

sg. acc. he gefeng pa fetel-hilt, hring-mæl gebrægd B. 1564.

scēaden-mēl adj. with divided (branching) ornaments or patterns.

sg. nom. pæt hit sceaden-mæl scyran moste B. 1939. wunden-mæl adj. a sword with twisted ornaments, damascened.

sg. nom. wearp da wunden-mæl wrættum gebunden yrre oretta B. 1531.

- māled adj.

hring-mæled adj. adorned with rings.

pl. acc. handum brugdon hæleð of scæðum hringmæled sweord, ecgum dihtig Gen. 1992.

scir-mæled adj. with bright ornaments.

pl. acc. mundum brugdon scealcas of sceaðum scirmæled swyrd Jud. 230.

Etymology. Identical with OHG., MHG. māl 'Zeitpunkt', Goth. mēl 'time', which is connected with the Idg. root *mē 'to measure', Lat. mētīri (s. Kluge, Etym. Wb., p. 257). The above words are a poetic kenning for 'sword', -māl being understood first as 'mark, token, ornament', then as 'sword with such ornaments'. The words are used as substantives or adjectives.

References.

sg. nom. vagina: scæð Aelfc. Gl. 318³ [MS. F. sceð, J. sceað]; vagina: sceað WW. 142³⁰; item 332³⁷; clasendis: sweordes ~ WW. 140³⁵.

sg. dat. mægð scearpne mece... of sceaðe abræd Jud. 78; sweord of scæðe atugon Ps. Th. 36¹⁴; of sceaðe Cant. Ps. 36¹⁴; þa Byrhtnoð bræd bill of sceðe By. 162.

pl. dat. handum brugdon hæleð of scæðum hringmæled sweord Gen. 1992; mundum brugdon scealcas of sceaðum scirmæled swyrd Jud. 230.

Meaning. vagina, clasendis: the sword scabbard, sheath.

Etymology. Cognate forms to OE. scēað, scēð, ME. schethe (Wycl. John XVIII 2), NE. sheath are: OHG. sceida, MHG., NHG. scheide 'sheath', OSax. scēðja, scēdja, ON. skeiðer (pl.) 'sheath', Dan. skede, Swed. skida 'husk, pod', Du. scheede. All from a Germ. type *skaiðō-, *skaiðjō, cf. Goth. skaidan 'to separate', from an Idg. rt. with t. In Idg. *skhait- is found together with *skhaid- 'spalten, trenuen, split, separate'. Here in all probability

the media of the end syllable has developed from the corresponding tenuis under conditions as yet not completely explained (cf. Brugm. Grdr. I², p. 630).

From *skhaid-, *skhid- are derived Lat. scindo, Gr. oxico 'spalte', Lit. skëdžu 'scheide', OI. chinád-mi. From *skhait-: Goth. skaidan, OE. scēadan, OHG. skeidan accented on the end syllable, while OE. scēāp is derived from a form with accent on the vowel of the stem — both forms appearing in OSax. side by side scēðja and scēdja. From the derivation it is evident that the meaning is 'a separating wall' i. e. that which separates and protects the body of the warrior from the sword.

Scenn (?).

A single reference from Beowulf 1694 in the dat. plur. swa wæs on pæm scennum sciran goldes purh run-stafas rihte gemearcod.

The nom. sg. is probably scenn or scenne.

Neither Etymology nor Meaning is clear, but scenn in the passage above quoted refers most likely to a plate of metal on the handle of a sword.

pl. acc. hæfdon handseax on heora handum Bd. 5, 13, p. 440.

hype(hup)-seax n. hip-knife, short sword.

sg. nom. pugio, vel clunabulum : lytel sweord, vel hypesex WW. 143².

sg. acc. ponne he gewyrceð to wera hilde helm oppe hupseax Crä. 64.

læce-seax n. surgical knife.

sg. acc. hyt ponne his læce-seax under his cladum Past. 187²⁵.

nægel-seax n. nail-knife.

novaculum: næglsex WW. 142 23; novacula: næglsex WW. 336 28.

mete-seax n. knife, dagger.

pl. dat. and hie ne mid heora metseacsum ofsticedon inne on heora gemotærne Or. 5, 12, 244, 18.

scear-sex n. a rasor.

rasorium: scearsex WW. 142²²; novacula: scærsaex VPs. 51⁴; machera acuta: scyrseax scearp Bl. Gl. 56⁵.

pēoh-seax n. — thigh knife, a short sword carried
on the thigh.

semispatium (for semispatha): peoh-saex Corp. 1832; senspatium: peohseax WW. 5326; cf. also Ps. Th. 444 gyrd pin sweord ofer pin peoh.

wæl-seax slaughter sword, war knife, dagger.

sg. inst. pa-gen sylf cyning wællseax[e] gebræd B. 2703. Flurnamen.

Seax in Flurnamen has the meaning of Lat. saxum not Germ. knife.

Cf. zerest on seaxea seað of seaxe seaðe on pone holan zesc G. B. 596 (A. D. 901); ponon on seaxa broc G. B. 1003 (A. D. 957). See Middendorff p. 116.

Meaning. 1. machaera: a short one-edged sword.

2. culter, cultellus: a knife.

Etymology. The term seax is Germ. with the meaning 'sword' or 'knife'. Cognates are: OHG., MHG. sahs 'a short knifelike sword'; in NHG. it appears in the compound Mcsser < OHG. maz-, mezzi-sahs, OFrs. sax, ON. sax, 'a short sword', in Swed., Dan. sax, which in the sg. refers to 'a large carving knife', in the pl. to 'scissors'. Radically related to Lat. saxum 'a stone, a sharp edged cliff' from Idg. *saksa- m. 'Schärfe (Stein), Eisenspitze eines Geschosses, Schneide des Pfeils' etc. (Fick, Vgl. Wb. I, 560), to the rt. *sek: sok 'to cut'. Found also in Lat. secare, securis, sica, etc.

Related are also the following words in Slav. (cf. Kuhns Z. 16²⁰⁷, Hpt. Z. 6⁴⁹⁰): — Lith. sỹkis 'blow', OSlav. sěšti 'to strike', sèkyra 'axe', sěčivo (Mikl. 974), Serv. sjèkiva 'axe', NSlav. sekera 'axe', cf. Lat. sica. See Solmsen Kuhns Z. 34^{1f.}, Brugmann Grundr. I, p. 504.

For relationship to OCSlav. kosa 'sickle' (rt. kes-), OI. cas- 'to cut' cf. J. Schmidt (K. Z. XXV, p. 127).

Sečě.

Form. sečý f. (jō).

References.

sg. acc. ac wit on niht sculon secge ofersittan B. 684.

pl. instr. secgum ofslegene him on swade feollon ædelinga bearn Gen. 2001.

Meaning. ensis: sword.

Compounds.

sečģ-plega m. battle.

dat. zt pam secgplegan An. 1353.

Etymology. Sečý is derived from the same root as OE. sage, sagu, Engl. saw, OHG. sēga, saga, MHG. sēge, sage, NHG. Säge, Du. saag, ON. sog, Swed. såg 'a saw' from Germ. *sagō f. (ō), while sečý is from *sagjō f. (jō) with i-Umlaut. Both belong to the Germ. base sag- with accent on the end syllable, from the stem accented form of which, sáh-, is derived OE. seax, OHG. sahs both forms belonging to the Idg. root *sek-: sok- 'to cut'.

In the NE. the f. form with the meaning sword has disappeared, the masc. only being retained meaning 'rushes, sedge (sword-like grass)'.

Sweord.

Forms. sweord, swurd, swyrd, swerd, swurd, sword n. (a).

gen. pl. sweorda once swordana (Rush. MS.).

nom. acc. pl. sweord, swiord (Cant. Ps.), swurd, swyrd, once suordas (Lind.), once sworde (Rush), and suerde Chart. Th. 505²⁰, 512¹⁹ etc.

Flurnamen.

Sweord in 'Flurnamen' is identical with ecg, gara, ord, etc.

Sweord-hlineas now Swarling (Kent.) G. B. 321 (A. D. 805); sweord-lingas (P. N.) G. B. 811 (A. D. 946); on sweord-leage G. B. 451 (A. D. 847); on sweordes stan G. B. 55 (A. D. 883); ninan swyrd-æceras G. B. 479 (A. D. 1050) cf. gar-æcer.

Meaning. gladius, ensis, spata, machera, framea: the large two-edged iron sword, frequently with ornamental hilt. Sica—litel swurd odde handsex.

Etymology. Sweord is the general Germ. term for sword though failing in Goth., with related forms, but with a different meaning that of 'boring', in Slav. The cognates are OHG., MHG. swert, NHG. Schwert, OFrs. swerd, swird, OS. swerd, Du. swaard, ON. sverð, Swed. sward, Dan. swærd. The Slav. has the rt. *vert- 'boring' in OSlav. vritete 'Bohrer (gimlet)', Slav. svridlu < *sverd.

From a Germ. type *swerda-, which Heyne, in the ed. of Grimm's Wb. (1898), states is entirely unexplained. Earlier in his Beowulf Gloss. (Paderborn 1863) he connected it with a W. Europ. *svero- 'tonen, schwirren' (Fick, Vgl. Wb. 1, 579), to Skt. svárati 'tont, erschallt', which Uhlenbeck (Ai. Wb. 355) derives from svár 'Licht und Sonne' to Idg. rt. *sau- 'tonen, leuchten'. Skeat indicates a rt. *swar 'to hurt, wound' connected with 'schmerzen', OHG. sueran while Schrader, Real Lex. under Schwert and Speirling makes the attempt to bring it together with Lat. sorbus 'Sperberbaum' < *sverdhos assigning the original meaning to sword of 'wooden weapon'. In this connection cf. Skt. svárus m. 'a long wooden stick', derivation also not clear. Heyne rejects all of these explanations, and prefers to offer no theory as to its derivation beyond the Germ. type *swerda.

Stæf-sweord.

nom. sg. dolones: stæf-sweord WW. 14321.

A compound of stæf and sweord 'a staff sword, a kind

¹ S. Osthoff, Etym. Parerga I, 92 ff., and spere, p. 151.

of pike with broad blade attached to a shaft' (s. Part. I, p. 45). This word occurring only in the Glossaries is to be connected with OHG. stapa-suert: framea (Schmeller, Z. J. 807), where lance is not meant but a kind of stæf-sweord (Germ. Stabschwert) s. Graff (VI, 612). Compare furthermore sica: stabeswert Steinm. Sievers III, MCIX, 17.

To OE. stæf, ME. staf, NE. staff belong Du. staf, ON. stafr, Dan. stab 'starr', Swed. staf, OHG. stap, stab, NHG. Stab 'a staff, a letter of the alphabet', from Germ. *staba the relation to OHG. stabën 'starr sein' allowing it to be traced to Idg. *sthāb (sthāp) 'to be firm', Skt. sthāpay 'to cause to stand' (causal to sthá from the root *sta 'to stand'), which appears in OSlav. as štabū, stabū 'stick, staff' (s. Kluge, Etym. Wb., p. 374). Cf. Goth. stabs 'a letter', and Lat. stipes 'a post', Gall. stob 'a post'.

3. Bow and Arrow.

Arblaste.

Form. arblaste (?).

Reference. mid anan arblaste ofscoten A.-S. Chron. A. D. 1079 (ed. Earle and Plummer, p. 214).

Meaning. A kind of bow mounted on a wooden rest designed to hurl arrows or other projectiles.

Etymology. A Norm. Fr. loanword in very late OE. It is derived from Lat. arcuballista, OFr. arcbaleste > arbaleste, later in 12th century arbalète, and was applied to a war-machine for hurling stones and projectiles. As the first mention of this weapon in any OE. work occurs in 1079 after the Norman Conquest, such bows were in all probability unknown in England prior to the coming of the Normans.

In Germany is does not appear to have been known before the 12th century, where the name assumed the peculiar form *Armbrust* (f. and n.), which is simply due to an adoption by the people of two German words similar in sound and easily understood, for the unfamiliar foreign word (cf. Eng. asparagus and the dialectical sparrow-grass). In this form it has been borrowed in most of the Germ. dialects: Fries. armbrerst, ermborst, Du. armbost, armborst, ON. armbrist, Dan. armbörst, Swed. armbost (showing metathesis of the r). The It. balestra, Sp. ballesta are derived directly from the Lat., while the word is found in none of the Slav. dialects.

Boga.

sg. nom. Hwi wæs se renboga to wedde gesett Aelfc. IS. 350; also ib. 362; Aelfc. Gl. 306,2; WW. 175,4.

sg. acc. God gesette ponne renbogan to wedde Aelfc. IS. 351.

scar-boga m. rainbow.

sg. acc. ponne ic scurbogan minne iewe Gen. 1540. Meaning. S. above.

Etymology. Boga 'Bogen, Biegung' is formed like a nom. agentis, from the Schwundstufe of the vb. bagan 'to bend'. To OE. boga, ME. bowe, NE. bow correspond OHG. poko, bogo, MHG. boge, NHG. bogen, Du. boog, OS. bogo, OFrs. boaye, ON. bogi, Swed. båge, Dan. bue, and in Cymr. and Ir. bwa, *bogha loanwords from the OE. The word is wanting in Goth., but Krim Goth. boga 'bow' is recorded. These forms may be traced to an Idg. *bhugnó-'gebogen', from a root *bheuk- beside *bheug- 'biegen, to bend', cf. Skt. bhujati, Lat. fugio. In Greek the bow is named not from the form, but from the material τόξον, taxus 'yew'. — Related is OIr. (fid-)boc '(tree-)bending'; cf. Falk.-Torp, Et. Ordb. I, 83.

Bogan-streng.

Form. bogan-streng m (i.). S. Sievers § 266.
Reference. anquina: bogenstreng WW. 142²⁷ (r. bogan-).
Meaning. bow-string.

Etymology. The corresponding Germ. forms from a Germ. base *strangi- are: OHG. strang, MHG. strang. strange, NHG. strang, Du. streng, ON. strengr, Dan. strang, Swed. sträng 'rope, cord'. The subst. is derived from the adj. strang 'strong, severe, violent', because of the cords being strongly or tightly twisted. Or from an Idg. rt. *stregho, *strengho- 'drehen, to turn' (s. Fick, Vgl. Wb. I, 571), cf. Lat. stringere. Retained in NE. bow-string, where, according to a frequent ME. vowel-change, e has become i before the palatal nasal group ng, ng. Cf. OE. sengan to NE. singe, ME. fringe from OFr. frenge.

Bolt.

Form. bolt m. (a).

References.

nom. acc. pl. catapultas: speru, boltas WW. 372²⁵; ib. 508¹⁴.

nom. sg. jactus: boltio Er. (3) 1178 (boltio = the M.-Lat. form for bolt).

Meaning. Catapulta, a projectile, a bolt or heavy short arrow with blunt head to be shot from the cross bow or other engine of war.

Etymology. To OE. bolt, ME.-NE. bolt correspond the W.-Germ. forms OHG. bolz, polz, ODu. bolt 'a bolt for shooting', MDu., Du. bout, ON. bolte 'a bolt in all senses', MLG. bolte, bolten = 'bolt, fetter'. A derivation from Lat. catapulta through the form *bulta has been sought, but against this is the It. form bolzone < M.-Lat. bultionem, which was probably borrowed from the Germ. M.-Lat. boltio is recorded as early as the 8th century. The further etym. is unknown as the word is not found outside the Germ. languages.

Brord.

Forms. brord, broord m. (a).

1. punctus: brord.

References.

nom. sg. punctus : brord WW. 277 ¹⁸; pun(c)tus : ~ WW. 470 ¹⁶; item Ep. 782, broord Er. 1685, brond Corp. 1685.

2. herba: brord.

herbae: ne com pær nænig grownes up, ne wæstmas, ne furðan brordas oð sumres tid Bd. lib. 4 C. 28.

Welbrord = a proper name Bd. 510, p. 414.

Meaning. 1. Cuspis, punctus: a prick, a point, a lance, a javelin.

2. Herba, the first blades or spires of grass or corn.

Etymology. Cognate forms to OE. brord are: OHG. brort, prort 'rim, the fore-part of a ship', ON. broddr 'arrow, also fore-part of anything', from a Germ. form *brozds to Idg. *bhroz-dho- 'Spitze' (Fick, Vgl. Wb. I, 94), cf. OI. bhṛṣṭiṣ f. 'Zacke, Spitze, Ecke', all from an Idg. root *bhers- 'hervorstehen, emporragen, borstig sein'. Here belong also in all probability OC. Slav. brazda, Russ. borozdá 'Furche' (s. Uhlenbeck, Ai. Wb. 205). Cf. also OE. brerd: labrum WW. 434 18 in Ablaut to brord.

Cocer.

Forms. cocer, cocur m. (a).

Cocer is the normal form, cocur and cocor being probably influenced by the M.-Lat. form. cucurum.

1. pharetra, quiver.

References.

sg. nom. faretra: cocer Aelfc. Gl. 318⁵; id.: coker WW. 142²⁴.

sg. dat. faretra: cocere Cant. Ps. 10³; faretra: cocere VPs. 10³; ~ ib. Ps. Spl. 10³.

sg. acc. nim pin gesceot, pinne cocur and pinne hogun Prs. Gen. XXVII³.

2. Framea or sword.

frameam : cocor Ps. Spl. 343; framea : cocore Ps. Spl. 2149.

Meaning. 1. Pharetra, a case for arrows, a quiver. 2. In two places perhaps a sword.

Etymology. This word appears only in N. and W.-Germ., being unrecorded in Goth. The cognates in the Germ. dialects to OE. cocer are: O.-Sax. cocare, OHG. chohhar, kochar 'a case, a quiver', MHG. kocher, kochaere 'a quiver', MLG. koker, kaker, Frs. koker, Du. koker, NLG. koker, ON kogurr, Swed. koger (n), while Dan. kogger is probably borrowed from the W.-Germ. branch. In Icel. kogurr is lost except in the compound kogur-sveinn quiverboy' of the Hbl. 135, where Harbard is called kogurseeinn by Thor, with the usual translation Lumpenkerl'. Bergmann, however, has given as his translation not Lumpenkerl', but 'boy who carries the hunter's quiver' with reference to the thunder bolts of Thor, thereby connecting it with OHG. chokhar s. Vig. (Wb. Add. 776). For the forms in the Romance languages s. Diez (Etym. Wb. 554) where the M · Lat. form cucurum of the Capitulare de Villis is given as borrowed from OHG. (cf. MGr. nobnopov), from whence is also derived OFr. courre, M. and NFr. cucerc, cuivre. Kluge takes exception to the Lat. borrowing from the Germ. (s. Pauls Grund. 337), and considers the OHG, form as a very early borrowing from such a form as *cucerum < M.-Lat. cucurum. According to his view borrowing from the OHG, must have given a M.-Lat. *cocurum. The word is retained in NHG. Köcher 'Behälter' — in Westphalia the words Inkstkuekr 'Tintenköcher', Nåtlkuekr 'Nadelköcher', being still in provincial use. In NE. on the other hand quiver from Fr. cuivre has taken the place of the OE. cocer, though in ME. the two forms coker and quiver existed side by side, koker and coker being found in both Lazm. and Piers Plow., in the latter with the meaning 'stockings'.

The Idg. root of the word is not clear, nor have related words in other than the Germ. branch of languages been discovered.

Earh.

Form. earh f. (wo).

References.

sg. nom. fugax: flugol oððe earh Aelfc. Gr. 696.

sg. acc. lætað gares ord, earh attre gemæl in gedufan in fæges ferð An. 1331.

Compounds. with earh as first member of compound.

earh-faru f. 1. sagittarum volatus: flight of arrows.

acc. ponne ic zerest him purh eargfare in onsende in breostsefan bitre geponcas Jul. 404; habbað scearp speru, utole earhfare Sal. 129.

- pl. dat. wio sceppendra eglum earhfarum Cri. 762.
- 2. exercitus sagittariorum. (ON. herör or örvabod 'Heerpfeil' oder 'Pfeilgebot'.)

acc. pa se casere heht ongean gramum guðgelæcan under earhfære ofstum myclum bannan to beadwe El. 44.

Arwe.

Forms. arwe, arewe f. (on). References.

sg. dat. framea: arwan OE. Gl. 371.

nom. acc. pl. catapultas: arewan, garelucas OE. Gl. 1⁴²⁵⁸; sagittas: strclæ and arwen Cant. Ps. 77⁹; sagittae: ~ Cant. Ps. 56⁵, 76¹⁸; Swa pæt on pære rode pe stod bufon pan weofode sticodon on mænige arewan Chron. A. D. 1083 (Earle and Plummer, p. 215).

instr. and scotedon adunweard mid arewan Chron. A. D. 1083 (p. 215).

Flurnamen. Sc here gewende pa zefter pam fram Lundene mid heora scipum into Arwan Chron. 1016 (ed. Earle, Plummer, p. 150¹⁵). The name of a river in several counties called so either from its swiftness or straightness.

Meaning. A slender pointed missile shot from a bow, usually feathered and barbed, Lat. sagitta.

Etymology. In OE. existed two cognate forms carh and arwe < *arhwon w. f., akin to ON. ör, pl. örvar < *arhwa st. f., Goth. arhwazna f. from arhw- (cf. hlaiwazna 'grave' from hlaiw) probably 'the thing belonging to the bow', Lat. arcus 'bow'.

Earh is the older form and Noreen (Urg. L. 180) regards *earwe (not recorded) as a newly formed Nom. to the Casus obliqui earwes, earwe etc. after the manner of certain s-stems (cf. dōgor, salor). Compare also Sievers (PBB. IX **3**2) where he treats horh, horg gen. horwes, hores (a similar case to earh) simply as an example of Gramm. Wechsel in the declension. Kluge (in Pauls Grund. I, 786) also agrees that arwe is a newly constructed form taken from the declension, but does not consider it a purely Eng. devel-

opment, but due rather to the influence of ON. örvar nom. pl. to ör (cf. Sweet. HES. 281). Kluge-Lutz regard it as due to Norse influence, and Koeppel (Archiv 10429 ff.) grants the probability of this as very strong, though by no means certain, owing to want of references for *earwe, and the very late appearance of the word in OE. The later development in ME. is from the wk. form arwe, arewe, NE. arrow. In OE. the ordinary terms were strāl and flā, flan of which the former disappeared after 1200, the latter occurred, however, in Scotch after 1500, but the ordinary prose word after 1000 was arwe, arewe.

The Idg. ground form is árq- 'Geschoß' (s. Fick, Vgl. Wb. I, 355) from which Lat. arcus 'bow', belonging possibly to the rt. *ark- 'tönen, jubeln, singen' (Fick I, 170) with reference to the singing sound of the bow string, and the sound of the arrow in flight.

Fla, Flan.

Forms. 1. fla, flaa gen. flan f. (on).

 - pl. dat. 2. spiculis: flanum Ep. Er. 937, Corp. 1894;

wæs Romana fela mid flanum ofscotod Or. 20614; Þæt hie mon mid flanum ofercome Or. 1746; mid flanum ofscotod Prs. Exod. XIX¹⁸; ~ Ps. Th. 10²; and (het) hentan his mid flanum Hom. Skt. I, 5⁴²⁴; Þone þe ic gefyrn het mid flanum acwellan Homl. Skt. I, 5⁴⁵⁰.

Meaning. sagitta: an arrow.

Compounds. 1. flan as first member of the compound.

flān-boga m. see boga (p. 199).

flan-geweorc n. apparatus jaculatorius: arrows.

sg. acc. ponne gargetrum ofer scildhreadan sceotend sendað, flacor flangeweorc Cri. 676.

pl. gen. ic lafe geseah minum hlaforde, pær hæleð druncon, para flan[geweorca] on flet beran Ridls. 57 12.

flan-hred adj. arrow-equipped (?).

sg. nom. ponne flanhred dæg nydgrapum nimeð Reim. 72.

flān-pracu f. sagittarum impetus: attack or force of arrows.

sg. nom. pres pe him ingesone hat heortan neah hilde-scurum flacor flanpracu Gud. 1117.

dat. (acc.) wið flanþræce Jul. 384.

2. fla, flan as second member of compound.

gað-flā f. (-flān m. f.) sagitta bellica: war-arrow.

pl. gen. guðflana gegrind Gen. 2063.

Etymology. The st. m. a-stem and f. o-stem flan only is descended from the old Germ. period. The cognates in N. and W.-Germ. are: OHG. flein, ON. fleinn. In MHG. and NHG. it has been replaced by the Lat. loanword pil 'Pfeil', it being retained only in the proper name Fleiner.

The wk. form fla is a later development from the st. m. flan, in the same manner as in late OE. (Aelfric) a

wk. f. ta was formed from the st. m. tan 'branch' (s. Sievers, A.-S. Gramm. § 278, Anm. 2). Fla moreover appears principally in the glossaries.

An attempt to connect flan with Lit. pliënas 'Stahl' has been made, but the further etymology of the word is not clear.

Fødder.

Forms. födder, föddur n. (a).

References. coriti: boge-fodder WW. 14319; theca: fodder ib. 14320.

falcastrum, i. ferramentum curuum, a similitudine falcis uocatum: wudubil uel foddur WW. 2356.

Cf. bibliotheca i. librorum repositio : boc-hord uel fodder WW. 194 13.

Meaning. It is necessary here in the case of fodder to distinguish between two etymologically separate words, which have fallen together in OHG, and OE, owing to identity of form. The first meaning is that of 'fodder, feed'; the second that of 'feeding case, holder, quiver' to Goth. fodr n. 'Scheide, case'.

Etymology. The word as it here stands is a new nom, formed from the casus obliqui forms, to the old, nom, fodor 'food for cattle', related to OE, foda wm. 'food'. This shows gemm, before the liquid r in the gen, dat. etc. cf. foddres, foddre (s. Koeppel in Archiv 104⁵⁶) after which is modelled the new nom, foddor or foddor with shortened vowel. The ME, double o in foodyr points to a retention of the long vowel in nom., but the shortened forms such as fodre, foddre finally superseded all other forms. Cognate forms are OHG, fuotar 'fodder for cattle, pabulum', MHG, vuoter, Du, voeder, ON, foor from a Germ.

*foorom. Related also to Goth. fodjan, which is probably derived from the Idg. rt. pat- (s. Fick, Vgl. Wb. I, 471) 'to nourish', an extension of the rt. pa- in Lat. pasco 'weide, füttere', panis 'bead', pabulum 'fodder'. NE. fodder 'food for cattle'.

Fodder meaning 'case, holder' stands in direct relationship to Goth. fodr n. 'case', OHG. fuotar 'dress-lining'. Uhlenbeck (Goth. Wb. 47) distinguishes between this fuotar and fuotar meaning 'nourishment, food' (cf. also Murray, NED. fodder).

This fodr is derived from Idg. patrom n. 'Behälter, Gefäß' to páti 'schützt'. All from a rt. pā- 'hüten, schützen' (Fick, Vgl. Wb. I, 471) to which is related Gr. πῶμα 'Deckel', Sct. go-pā 'Hirt'. The Germ. form with its double meaning has been taken up in the Romance languages (s. Kluge, Wb.), cf. Prov., OFr. fuerre 'case' corresponding to Goth. fōdr, NFr. feurre 'fodder' from which comes NFr. fourreau 'case, lining' and Span., Fr. fourrage, NE. forrage.

Hilde-nædre.

Form. hilde-nædre f. (on).

References.

nom. pl. daroðæsc flugon, hildenædran El. 141.

pl. acc. hie da fromlice leton ford fleogan flana scuras, hilde-nædran of hornbogan, strælas stedehearde Jud: 222; on pæt fæge folc flana scuras . . . hettend heorugrimme, hildenædran ford onsendan El. 119.

Meaning. vipera pugnae: war-adder = a kenning for arrow or light throwing spear. Compare ram and wifel.

Onga.

Forms. onga, anga m. (an).

References. 1. Sagitta.

sg. nom. me of bosme fare pætren onga Ridls. 244. ;
2. a prick, a point.

nom. aquilius (aculeus): onga Leyd. 233 = Glogger 64, 12, p. 91; aquilium (aculeus): anga Ep. Er. 43, ~: onga Corp. 192; aquilium: onga WW. 350⁸.

dat. aculeo: angan Cant. H. 917.

Meaning. A prick, a sting, a point, an arrow point. Etymology. The meaning of arrow point is OE. only (once recorded), while the form is found in most of the Germ. dialects. The cognate forms are: OHG. ango, MHG. ange 'Hülse, Stachel', ON. angi 'a spine, a prickle'. In Lat. it appears as ancus, uncus 'gekrümmt, widerhakig', Gr. ἀγκών, ὅγκος 'Bug', all from an Idg. *onkos 'Haken, Wölbung', Ved. ankás, Zend. aka- 'Haken'.

Closely related is NE. angle 'fish hook' from OE. angul, Lat. angulus, OHG. angul 'Stachel, Fischangel', Du. angel, ON. öngull from which Önguls-ey 'Anglesey' is derived, all from a rt. *ank- 'to bend' (Fick, Vgl. Wb. I 8).

Stræl, Stræle.

Forms. 1. strēl, strēl, strēl, nom. acc. pl. strēlas, strēlas, strēlas, strēle, strēle, strēla, strielae m. f. (a, ō).

2. stræle f. (ōn).

(str \bar{e} le wk. f. is a later form recorded only in the nom. sg., the st. f. σ -stem being the original, from which the newly formed st. m.)

Compounds. 1. stræl as first member of the compound.

stræl-bora m. See B. T.

2. stræl as second member of the compound.

here-stræl m. sagitta: battle arrow.

sg. nom. pæt him on aldre stod here-stræl hearda B. 1435.

 $w \approx l - str \bar{\varkappa} l$ m. f. sagitta mortifera: deadly arrow.

pl. instr. awrecen wælstrælum Gad. 1260.

wæpen-stræl m. sagitta.

nom. pl. synd me manna bearn mihtigum toðum wæpenstrælas þa me wundedon [arma et sagitta] Ps. 56⁵.

Meaning.

sagitta: an iron arrow head together with the shaft. The meaning 'sunbeam' which the word has in some Germanic dialects is derived from the old idea that the sun's rays were the arrows of the sun god.

Etymology. strāl is common to the W.-Germ.

languages appearing in OHG. and OSax. as strala a f. o-stem, MHG. stral, strale 'arrow, flash of lightning' from whence it was borrowed in Slavic (see Pauls Grundriss I, 360), OSl. strela, NSl. strijela, Russ. strela 'an arrow' (cf. the proper name Strelitze), Serv. strijela, Poln. strsala. In Du. it appears as straal 'arrow'. To be connected probably with Goth. straujan, NHG. streuen, Idg. *stera- from the Idg. rt. *str- 'ausbreiten, streuen', cf. Lat. sternere and Skt. strnoti 'streut, bestreut', OSl. prostira, OE. streowian. Compare also the OHG. words donarstrala 'Blitzstrahl', and NHG. Strahlkeil (Pfeilstein) 'Belemnite'.

Person (Wz. w. u. Wz. var. p. [9]) suggests a possible radical relationship between OE. stræl f. and OI. srkás m. 'lance, shot'. The rt. is *sr-ē in OI. sar-, sárati 'eilt, strömt', and the fact is wellknown that Idg. *sr- becomes in Germanic, as well as in Slavic, str- (s. Brugmann, Grund. I, §§ 578, 584) so that it is possible according to the laws of sound change. The first explanation, however, is held by most authorities to be the correct one, the latter being more or less based on relationship in meaning.

Wifel, Wifer, Wiber.

Forms. wifel, wifer, wiver, wiber (Sievers, Ags. Gramm., § 191) Gl.

References.

sg. dat. spiculo: wifele Hpt. Gl. 432¹³; iaculo (i. sagitta): fla, zafe..., wivere OE. Gl. 1¹¹⁰³, reading of Hpt. Gl. 432⁴ vi(d)bere.

gen. pl. sagittarum: wifera Hpt. Gl. 405¹⁵. Meaning. A projectile, an arrow, a dart.

Etymology. Leo (OE. Glossar) connects the Aldhelm glossary words wifel, wifer with Lat. vibrare, as does Pogatscher (Lit. Blatt für germ. u. rom. Phil. XXII, 160), who derives OFr. guivre f. 'arrow' from OE. wifer. With this he connects further wibete, vibete 'arrow', which Wace 8133 mentions as an English word. Pogatscher sets OE. wifel, wifer in the same class with NHG. schweben, schweifen, OE., NE. swift; they belong to the group without initial s-, like Lat. vibrare, OE. wafian, OHG. wiff 'rotation, quick motion', their original meaning being 'something swung, slung'. Cf. also NE. swivel from swif- 'a link turning on a pin or neck'.

For the derivation, which regards wifel, wifer as borrowed from the Fr. givre (guivre) 'an arrow', which Diez (Etym. Wb. 596) connects with Lat. vipera < viviparus s. Baist (Var. über Rol.).

In ME. wifte appears Pr. P. 526 as bipennis: battle axe, in Robert Manning's Hist. of Eng. (ed. by Furnivall, London 1887) occurs the pl. form wiftes.

4. Miscellaneous.

Æx.

Forms. ex, ex, axe (merc.), acase (Rush.), acas, acasa (Lind.) f. (jō).

References.

hand-ex a hand axe.

dextralis, i. dextre abilis: handæx WW. 22122.

Stan-ex. According to WW. the use of this compound for translating bipennis points either to the use of stone axes by the Anglo-Saxons (cf. WW. 141²⁷), or that they believed that the axes of stone found in different parts of England, and usually ascribed to the Celtic population of the island, were really the Roman weapons designated by that name.

bipennis: stanæx Aelfc. Gl. 318¹⁷; bipennis: twibille uel stanæx WW. 141²⁷; ~ 334¹.

tapor-zz f. a small axe.

sg. nom. swa feorr swa mæg an taper-æx beon geworpen ut of dam scipe upon pæt land Chart. Th. 31780.

sg. acc. and par beo an mann stande on pan scipe and habbe ane taper-ex on his hande Chron. A. D. 1031 (p. 158).

Cf. Icel. tapar-ex, borrowed from the OE.

æxfaru f. apparatus.

aparatu: exfaru WW. 622 = Corp. 186.

Meaning. 1. A workman's tool. 2. A weapon of war. The latter with widely extended blade remained in use even into the Middle Ages — cf. Laym. 2263 wi-eax; Barbour's Bruce XII, 20, where ane braid ax in swerdys bryth is mentioned, and the Destruc. of Troy. 1588 Armurers and arowsmythes with axes of werre. In the glosses it is impossible to distinguish between 1 and 2, bipennis and securis being used indiscriminately for both. For discussion of bipennis s. Part. I, p. 58 ff.

Etymology. The term ex with its allied forms is confined to the continent of Europe, notwithstanding the fact that the tool or weapon itself dates back to the Idg. period. In W.-Germ. the related forms are: OSax. accus, MDu. akes, Du. aaks, OHG. ackus, MHG. ackes, NHG. ax or axt with inorganic t, Goth. aqisi (Vollstufe in suffix syllable beside OHG. Schwundstufe, s. Streitberg § 80), in N.-Germ.: ON. ex gen. axar, Swed. yxa, — all from an Idg. *agesia f. Axt (agsia) (Fick, Vgl. Wb. I, 349). Radically related are Lat. ascia (ac-scia), Gr. after axe. According to Diez (Etym. Wb. 5), Fr. hache is not to be connected with ascia, an Ablative form axada existed, however, in OSpan., which has given NSpan. axada 'spade, hoe', although the forms to be expected axa or axa are not extant. Cf. also OPort. enxada.

Lidere.

Forms. litere, lytre, litre f. (on). References.

sg. gen. fundibali: liperan OE. Gl. 1 695; fundibulae (?): liperan WW. 404 28 (gen. or pl.).

sg. dat. swa micelre brædo swa mon mæge mid liðeran geworpan Bd. 4, 18, 30425; of blacere liðran Sal. 27.

Meaning. Funda; the simple hand-sling of woven work or leather, frequently with a kind of pocket in the middle used for hurling small stones.

Etymology. Being a weapon only of the ordinary soldier, various expressions common to the people have been applied to it in the different Germ. languages, arising from the motion used to hurl the stones, or from the material of which the *livere* or sling is made. For example in OHG. slinga indicates the motion, while the OE. lipere is so called from the material. In ME. lipere still occurs, cf. Rob. 394, pl. dat. liiperen where it is equiv. to slings, but gradually the OE. word gave way to the W.-Germ. slinga, NE. sling.

The wk. subst. f. is formed from OE. leter 'leather' (cp. adj. literen) to which correspond Du. Leder, ON. letr, Dan. læder, Swed. läder, NHG. Leder, NE. leather from a Germ. base letra- 'tanned skin of an animal'. Root unknown.

Stæflidere.

Forms. stæfliðere, stæfliðe, stæfliðera (?), stæblidrae, steblidrae f. (ōn).

References.

sg. nom. ballista: stæfliðe' (Ms. R. reads stæfliðeran) OE. Gl. 1³⁴⁴²; stæfliðere Hpt. Gl. 423²⁵ = OE. Gl. 1⁷³⁵; ballista: stæfliðera (?) Hpt. Gl. 487²¹; id.: stæblidrae Ep. 136; stæblidrae Er. 136; stæfliðre Corp. 263; fundibalum: ~WW. 338⁸; idem Aelfc. Gl. 318⁷ = WW. 142³²; (f)undibalum: stæfliðere WW. 550².

sg. dat. fundibulo: stæfliðeran Hpt. Gl. 527^{12} ; \sim ib. OE. Gl. 1^{5026} .

Meaning. A weapon for casting stones; a kind of leather sling fastened to a staff in order to increase the force in hurling. Cf. Part. I, p. 62.

Etymology. A compound of stæf and liðere, s. stæf-sweord. In ME. it is found together with stæf-slinge, cf. fustibulum: a stafslynge WW. 585³⁰.

Ram.

For ram consult Jordan "Die altenglischen Säugetiernamen", p. 153. The Lat. term aries is used with reference both to the war-machine and the animal. Cf. derscad done weall mid ramum Past. 1616, where the meaning is clear, but in most cases the word occurs in Glossaries where it is impossible to distinguish between the two. In Aelfc. Gl. 3197 it follows an enumeration of weapons, and in OE. Gl. 13444 is in a list with ballista, so that probably the war-machine is meant. In Aelfc. Gr. 124 occurs the following 'aries: byd ram betwux sceapum and ram to weal-geweorce', which can scarcely be regarded as ballista, and may refer to some sort of a machine used in building.

*Scot.

Form. *scot, pl. dat. scotum n. (a).

Very rarely found with the meaning 'jaculum: a

missile used for throwing, a shot'. More frequently used to denote 'rapid movement, a rush, a dart', and 'contribution, tax, tribute'. For references for the latter consult B. T., and cf. NE. scot-free 'exempt from tax', then 'exempt from anything'.

Reference.

pl. dat. mid scotum, ge mid stana torfungum (Cotton MS. gesceotum) Or. 3, 9, 134, 15.

Compounds.

gesceot 8. gesceot.

scot-spere s. spere.

Derived.

scotung f. (ō) a shot, a missile.

pl. nom. acc. jacula: scotunge VPs. 54²²; ipsi sunt jacula: hi synt scotunge odde flana Ps. Lamb. 54²² (quoted from B. T.); jacula tua: pine Scotunge Ps. Surt. II, p. 190¹⁵ (id.); ~ ib. VHy. 6²³.

pl. dat. jactibus...uacuis: mid idelum gescotum OE. Gl. 49²; pær forwearp micel Alexandres heres for geætredum gescotum Or. 134, 84.

Meaning. 1. jaculum: a missile used for throwing (usually a small stone), sometimes perhaps a small javelin.

2. Clava, a war club (?).

Compound.

gescot-feoht f. pugna: battle, war.

sg. dat. eft gewurdon on gescot-feohta scearpe garas Ps. 54²¹; zt gescot-feohta Ps. 75³.

Etymology. Both *scot and jescot are neuters formed on the pp. stem scoten, jescoten of the verb scēotan 'to shoot'. Scyte on the pret. pl. stem scuton with i Umlaut.

The related words in other Germ. dialects are: OHG. scoz, gescoz, MHG. schoz, geschoz 'a missile', OSax. gescot 'a throwing spear (?)', MLG. geschot, Du. gescot = pijlen, Ndrhein. geschoysz, Rhein. geschoz, geschuz 'sagitta, jaculum:

arrow, missile', NHG. Schoß, Geschoß 'a bolt, a missile', then 'a weapon of any sort to be shot', ON. skotr, OFries. gescot, ODu. schut 'an arrow, a dart', Du. schot 'a shot', ME. schot, shot, NE. shot, all from a Germ. base *skut- to *skeutan 'shoot'.

Cf. further Kluge, Etym. Wb., p. 352.

Séytel.

Forms. scytel, scutel, sciutil m. (a).

For in instead of y cf. Bülbring, § 511 and § 302.

References. 1. a dart, missile, arrow.

jaculum: sciutil Er. (3) 1177; sagitta: sciutil Er. (3) 1179; sagittis parvulorum: scytelum cilda Ps. 637.

2. the tongue of a balance.

momentum: scytel Ep. Er. 632, \sim : scytel Corp. 1325; id.: scutil WW. 4779.

Compound.

scytelfinger m. Index-finger.

index uel salutaris: scytelfinger WW. 30644.

Etymology.

A masc. nom. instr. formed on the pret. pl. stem scut, Germ. *skut- of the vb. scēotan 'to shoot' with the suffix -ila (s. Kluge, Stammbild., § 90). For the further Etym. cf. gescot.

A related word is OE. scytels, scyttel, scytel, 'bar of a door': NE. shuttle 'a weaver's instrument for shooting the thread of the woof between the threads of the warp in weaving'.

III. Weapons of Defence.

1. The Shield.

bord-paca, peaca m. (an). bord-thatch.

nom. sg. testudo: borohaca vel sceldreda, vel faerucæ Ep. 997; ~: brodthaca vel sceldhreða vel fænucæ Er. 997; ~: bordðeaca Corp. 1999. Covering of a shield.

Meaning. The original meaning is board, from which is derived the meaning of shield, that which is made from a wooden board.

Etymology. Corresponding words to OE. bord in other Germ. dialects are: Goth. -baúrd in fōtubaúrd 'footstool', OSax. bord, OHG. bort, port in Ablaut to brēt, MDu. bert (cf. Stokes in K. Z. 35, p. 157), Du. bord, boord with meaning of 'shield, board', ON. borð, Dan. bord, Swed. bord. For the NHG. borrowing from the LG. in Steuerbord and Backbord, for OIr. bord (OE. loanword), and for Fr. bord. from the LG. cf. Skeat., Etym. Dic., Kluge, Etym. Wb. 53, 57, Murray NED. under board, and Diez, Etym. Wb., p. 59, for the Fr. forms.

Camp-wudu.

A poetical expression probably for shield, it may, however, refer to a spear as the term 'battle wood' leaves it indefinite. The quotation from El. 51 is as follows. Fonne rand dynede campwudu clynede. Similar expressions are xsc-holt = `spear', beadu-lēoma = `sword', and hring-īsen = 'coat of mail', also mxgen-wudu = `spear' B. 236.

Derivative.

linden adj. of lime wood.

sg. nom. leoht linden bord Gn. (Ex.) 95.

Meaning. Clipeus: a shield made of linden wood,

which wood was most frequently employed on account of its lightness and impenetrability.

Etymology. Cognate forms, with the meaning 'shield' are OHG. linta, MHG. linde, ON. lind. Cf. Swed., Dan. lind 'linden wood', NHG., Du. linde, ME. lind, lynd, NE. lind, linden 'the linden tree'. The further etymology is not definitely settled. Cf., however, Schrader, Real. Lex., p. 503, for relationship with the Slav. branch, Uhlenbeck, PBB. 26³⁰², and Kluge, Etym. Wb., p. 249, who conjectures relationship with Lit. lentà 'board', Gr. ἐλάτη (from *lnta) 'Fichte, Weißtanne'.

pl. gen. nu ic gumena gehwæne pyssa burgleoda biddan wylle, randwiggendra...Jud. 188; cneowmaga, randwiggendra rim Exod. 435.

Meaning. margo, clipeus: the shield rim, which, with the boss, served to strengthen and hold the shield together, so that the whole shield came finally to be named from one of its most important parts.

Etymology. Cognate forms to OE. rand in Germ. dialects are: OHG. rant, MHG. rant, ON. rand st. f., Swed. rand, but strange to say fails to appear in OSax., and is not recorded in Goth.

In the Romance languages it appears as Germ. loanword Sp., Ptg. randa, renda 'lace border on a dress', It. a randa 'with difficulty, near', the exact meaning of which is 'near to the edge or brim', OFr., Prov. randar 'to adorn', NProv. randa 'Streichholz, um den Inhalt eines Gefäßes dem Rande gleich zu machen' (Diez, Etym. Wb.), from which is derived the verb rander 'dem Rande gleichstreichen' from which Fr. randir 'andringen, to press forward', Prov., Fr. randon 'force', vb. randoner, randonar 'antreiben, anrennen', with reference perhaps to the force of a river full to the brim (s. Skeat, Etym. Dic.), or to the charge of warriors with shields held before them, with reference to the OHG. rant, sciltrant. Cf. NE. at random,

used as subst., 'done or said at hazard', the older meaning of which was 'force, impetuosity'.

The Germ. ground form is *randa- (Idg. *ram-tâ), which according to Kluge is in Ablaut to *rind-, NHG. Rinde from a root *rem, *ram 'aufhören, Ende', the m of which has become n before d. Related is NE. rim, and from the same ground form OHG. ramft 'Einfassung, Rand, Rinde'.

Relationship to Goth. rimis 'rest, quiet', OI. ram- 'to cease, to rest' has been suggested (s. Kluge, Etym. Wb., p. 318).

In NE. one meaning only, that of 'edge or bank of a river' has been retained in dialect; cf. a reed-rand on our rivers and broads = a reed-grown river bank (Vocab. of East Anglia EDS. 2075).

Rand-bēag.

Forms. randbēag, -bēah, bēġ, -bēh m. (a).

For bēh s. Sievers (Ags. Gramm., § 1082, Bülbring, § 317), and for bēġ Bülbring (§ 107, 108, 193).

scieldere m. id.

gescieldnes f. protection.

scieldung f. id.

Meaning. scutum, clipeus: shield.

Etymology. The OE. name scield is of Germ. origin. OE. scild, scyld, sceld, ME. shēlde, schēlde, NE. shield, OHG. scilt, skilt, MHG. schilt, NHG. Schild, OSax. scild, NFrs. schild, OFrs. skēld, schild, schield, Du. Schild, ON. skjoldr, Dan. skiöld, Swed. sköld, Goth. skildus, with the original meaning of 'board', are derived from Germ. *skeldus to which Lit. skiltès 'abgeschnittene Scheibe', skeliù, skélti 'cleave', Gr. παλλω scrape, dig [OI. kalá f. 'a small portion']; probably to the Idg. rt. *skel- 'to cleave, divide', from which the transition to shield is 'that which is made from cut

wood, from peeled off bast or from hide flayed from an animal' (s. Kögel, Idg. Forsch 4⁸¹⁹). Cf. Goth. skil-ja 'but-cher', ON. skilja, skilda 'to separate, divide', OE. scylian 'to separate' (s. Persson, p. 38, No. 14, p. 62, No. 6).

Grimm (G. Spr. 222, 333) on the other hand connects Goth. skildus with a form *skidlus, *skidilus formed on the lost stem "*skid-earlier *skud-". The latter is Schwundstufe to the rt. *skey- (s. Persson, p. 45, No. 4) 'bedecken, cover', from which Gr. σxῦ-τος 'skin, hide', Lat. scatum 'a leather covered shield'.

Schrader (Real. Lex. u. Schild), however, while suggesting the possibility of the connection of scatum with cro-toc, derives it rather from a form *skoito-m in Ablaut to *skeito-, from which latter are derived Ir. sciath, OSlav. štitū, likewise OHG. scit, and ON. skið 'log, piece of wood', from an Idg. rt. *sqit- (*sqeito-, *sqoito-) or *sqid-. Cf. Lat. scindo (*sq(h)id) beside OHG. sceidan (sq(h)it)- with the original meaning of 'cleaving', then 'cleft wood', then 'shield'. Cf. further Persson (p. 43, No. 10, p. 176, No. 28), who regards the roots *ski-d, *sku-d as derived from *ski- 'to cleave' (p. 112, No. 22), *sku 'to separate, to hew' (p. 133, No. 26), which in turn are derived from *sek-, *s(e)ka 'to cleave, to cut' (cf. Burg, K. Z. XXIX, 358 ff.). Thus Scatum shows a parallel development in meaning to skildus.

Targa.

Form. targa m. (an).

References.

sg. nom. ignitus clipeus: ferentarga WW. 84 89.

sg. dat. parma i. scuto: tar... OE. Gl. 1^{726} = Hpt. Gl. 424 targa(n).

nom. acc. pl. pet is erest minum hlaforde . . . two

targan Cod. Th. 516³², in a later copy of will (970) read tueye targen ib. 518⁴.

gen. pl. peltarum: targena OE. Gl. 12958.

Derived: getarged pp.

nom. pl. scutati : getargede OE. Gl. 1²²⁵⁹ = Hpt. Gl. 459 from a vb. targian.

Meaning. A round shield smaller than the scyld, with the original meaning of 'rim, rim of shield', which finally came to refer to the whole shield in the same way as rand, which is a parallel development.

Etymology. Cognates to OE. targa¹, ME. targe, target, NE. targe (obsolete), target are: OHG. zarga, MHG. zarge f. 'rim, ring, the sides of something enclosing a space, a frame', NHG. zarge 'the rim of a sieve', ON. targa 'shield'. Radically related is further OI. darh-, dṛhyati 'macht fest, befestigt', Lit. dâržas, Let. dáras 'garden, an enclosed space', Gr. δράσσομαι 'fasse an', to the Idg. rt. *der-ĝh 'fassen, festhalten' (s. Brugmann, Grundr. I, p. 463, Persson, p. 27, Uhlenbeck, OI. Wb., 129). The meaning of shield then has developed from 'rim, band', originally 'that which held something fast'.

In the Romance languages the word appears as Germ. loanword in It., Span. targa, OFr. targe originally 'a large shield', Span., Port. darga from OHG. zarga beside Span. adarga, adaraga of Arabic origin (cf. Arabic addaragah). This word has wandered back again to the Germ., and has been taken up in OHG. as tartsche, ODu. tartsche, and in ME. targe as a Fr. loanword is found in Rob. of Gloucester (361) and Chaucer (C. T. 473). The diminutive suffix -et in NE. target 'a small shield, a mark to fire at' is also

¹ For absence of breaking s. Bülbring, § 132 c.

of Fr. origin, and the NE. pronunciation of target with g is probably due to an OFr. form targuete beside targete, otherwise the pronunciation of the g would be as in pageant, and most other French loanwords.

The form targaid recorded in Ir. and Gael., is probably a loanword from some such form as ME. targat.

Tud (?).

tud m. n. tudu f. (?).

References. parmā (Abl., to Aldhelm Laud. Virg. 71, 85): tude OE. Gl. 15025, Hpt. Gl. 5219.

pl. gen. scutorum: tudenarda OE. Gl. 1747. tudenarda is according to Napier perhaps corrupted from tudena, randa in which case tude above might be dat. sg. f. and tudena the unrecorded gen. pl. of tud m. n. or tudu f.

Meaning. With the meaning parma, scutum: 'shield', tud (?) occurs only in the two glosses mentioned above. Middendorf, however, gives tud¹ st. m., tudde wk. f. with the meaning 'Höcker, Wulst', and regards it as related to Dan. tot 'Haarbüschel, Zotte', OHG. zotta, zata, zota f., zotto m., MHG. zote, zotte m. f. 'Haarzotte, Flausch' from *toddon. Cf. ON. todde m. 'Büschel, Gewicht für Wolle' from whence NE. tod 'a bush, a measure of wool'. Cf. Kluge, Etym. Wb., p. 438, and Skeat, Conc. Etym. Dic. under tod.

The relation in meaning is not clear.

¹ Flurnamen. to tudes leghe G. B. 1033 (A. D. 958); an tuddan ham G. B. 480 (A. D. 854).

 $w\bar{x}g$ -pel. tabulatum marinum, navis: ship.

sg. acc. lædan weras on wægpel and heora wif somed Gen. 1358.

sg. dat. ofer sid wæter secan wolde on wægpele eft Gen. 1446; of wægpele 1496; hie da gebrohton æt brimes næsse on wægpele wigan unslawne An. 1711.

Flurnamen. In the composition tel brycg G. B. 50 (A. D. 680), be pael brycge G. B. 869 (A. D. 948) is mentioned together with stanbrycg and eortbrycg. Cf. also the proper name Delbrück.

Meaning. 1. A wooden plank, a shield.

2. A thin plate of metal.

Etymology. To OE. ***el are related: OHG. **dili m., MHG. dil m., MDu. dele, Du. deel, ON. **pile 'board, deal' from Germ. ***pēlas, **pilis n. 'board'. Allied to **el are further OE. **pille, NE. **thill 'the shaft of a cart', OHG. dilla f., MHG. dille, NHG. diele f. 'board, board wall', ON. **pilja 'rowing-bench', Fin. **teljo 'ship's bench' from Germ. **piljan 'that which is made of board'.

Radically related are OPr. talus 'floor covered with planks', OSlav. tilo n., NSlav. tlo 'floor', Lit. tilé 'boards at the bottom of a boat'. To the Celt. family belong OIr. talam 'the ground, the earth', Cymr., Corn. tal 'brow'. Related are also Lat. tellus 'the earth', Gr. tylia, Skt. talam n. 'surface, plane'; perhaps to Idg. rt. *tel-, tla 'to raise, lift, carry' s. Uhlenbeck (Ai. Wb., p. 110 and 114).

thel remained until the end of the 16th century, when it was supplanted by Du. deel (NE. deal), which is identical with OE. tel.

2. The Helm.

Bucc (?).

Forms. bucc, bua, buuc m. (!)

References. buccula: bucc Ep. 120; bua Er. 338; buuc Corp. 338.

Meaning and Etymology. Sweet explains this word recorded only in the above mentioned glosses as 'beaver of a helmet', deriving it from Lat. buccula, diminutive from bucca 'the cheek', with the meaning of 'beaver or cheek piece of helmet' as used by Livy, and places it in his Dic. without a question mark.

For another explanation s. Jour. of Germ. Phil. (I, 332 f.) where Schlutter offers the following suggestion: "As the Corp. Gloss. plainly reads buuc, and as in the Er. (3) (C. G. L. V, 3182) we find patera field well bucula calicis, one might be inclined to think we had to do here with buc, 'bulky vessel, pitcher'. But we meet C. G. L. IV, 31445, with buccula, bucca in a glossary where there is no idea of Old English interpretation; again we find IV, 27, 3, buccula bacca, and IV, 489, 32, bucula uacca diminutiue = V, 27229 (Er. 2), bacula uacca diminutiuae, wherewith cp. IV, 21240 bucala: uaccula. Hence it would appear that neither a pitcher nor a beaver, but a cow, is meant. Read then bucula: uacca, following the traces of Erfurt."

With reference to the second explanation cf. the gloss vacca, vel buccula: buch R. A. Wright I, p. 97, from a Welsh Gloss of the end of the 12th or the beginning of the 13th century from MS. Cott. Vespas. A. XIV, fol. 7 r⁰.

Byge.

Form. byge m. (i).

References.

nom. sg. conus: helmes byge WW. 143 28; sinus: byge Corp. 1874.

Meaning. A corner, a bend or curve, apex of a helmet.

Etymology. Formed from the weak grade of bagan intr. 'to bend, stoop, swerve' with the suffix -iz.

Camb.

Forms. 1. camb m. (a).

2. cambe f. (on).

References.

sg. nom. crista: helmes camb WW. 143²⁷; id.: cambihte, camb on hætte oððe on helme WW. 373¹³; (pecten: camb WW. 282⁵, 336¹⁷, Corp. 1564, Ep. 825).

sg. dat. crista: cambe OE. Gl. 1⁵⁰¹⁹ = Hpt. Gl. 521; item OE. Gl. 2⁴¹⁶.

Cf. further cristas i. comas: combas on fugele, uel loccas WW. 215⁸⁴.

and the ME. Gloss: hec crista, est crinis vel quod eminet super galeam et super capita quorundam animalium: the cokcome WW. 703²³.

cambiht = crested.

crista: cambihte WW. 51215; cf. above WW. 37313.

Meaning. 1. A comb, a crest. The form of the Anglo-Saxon leather cap or helmet with ridged edge having a strong resemblance to a cock's comb.

2. honeycomb.

Etymology. Related forms in other Germ. dialects are: OHG. kamb, champ, MHG. kam, kamp, NHG. kamm, ON. kambr, Dan. kam, Swed. kam, kamm 'the ridge of a mountain, crest'. Cf. Skt. jámbhas m., OSlav. zqbŭ 'tooth'. Lit. žâmbas 'edge, corner', Lett. zūbs 'tooth', Gr. γόμφος to Idg. *gombho-s to rt. *gembho 'to tear, to bite'. Retained in NE. with the meaning of comb, cf. also cock's comb.

Čin-berg.

Form. cinberg f. (ō).

Reference.

sg. acc. grimhelm gespeon cyning, cinberge Exod. 175.

Meaning. The part of the helmet covering or protecting the chin.

Etymology. A compound of two Anglo-Saxon words cinn. Goth. kinnus. NE. chin, and berg or beorg from the infin. stem of the verb beorgan 'to protect, conceal'.

[Cræsta (?)]

(This word is given by Somner, Lye, and Bosworth-Toller, but without references. I have been unable to find it in any of the OE. Glossaries, it occurring first in a weapon list of the 15th century as hic conus: a crest WW. 786 to where crest is undoubtedly identical with Laterista 'a crest, a cock's comb', but whether it existed in OE. is questionable, for ME. creste, crest Chaucer (C. T. 15314), NE. crest comes from OFr. creste 'a tuft, a comb', making the supposition of an OE. cræsta unnecessary.

Eofor-cumbol.

The word cumbol (cumbor) belongs under the head of war banners and pennants rather than under helm. Nevertheless the compound cofor-cumbul (cofur-cumbol), of El. 76 and 259, refers distinctly to a boar emblem used on the helmet, which through a figure of speech (part for the whole) is transferred to the helmet itself. In OSax. kumbal has the meaning of a 'heavenly sign or token', which is retained in OE., but with the more specific meaning later of 'war banner, pennant, war emblem'. A similar compound to the above is found in the Norse Fornaldor Sögur, where her-kuml refers to 'a badge worn on the helmet'. The compounds with cumbol such as cumbul-gebrec 'battle', cumbol-gehnast (Ædelst. 49), cumbul-wiga 'warrior' Jud. 12, 243, 259, are numerous.

Cf. further hroden hilte cumbor 'banner with a staff' of B. 1022.

Grima.

Form. grima m. (an).

Reference.

sg. nom. larbula: egisgrima Ep.-Er. 569, Corp. 1168; masca: grima Corp. 1279; mascus: ~ Corp. 1280 = marcus: ~ of Ep.-Er. 643; musca (masca?): egisgrima Corp. 1351. Compounds.

beadu-grima. larva bellica, cassis.

pl. acc. feormend swefað, þa-ðe beado-griman bywan sceoldon B. 2257.

Meaning. 1. Cassis: helmet.

2. masca: a mask.

Etymology. Cognates to OE. grima are: OHG. grimo 'mask, helm', ON. grima 'mask, covering, a kind of hood used for a head covering', Dan. grime 'a horse's halter'. From the meaning 'mask' has arisen the mistake of regarding grima as a 'helm with a visor', which is, however, an impossibility for the OE. period as the visor was certainly not introduced, at the earliest, before the 12th century, and in all probability later in the 13th. (Cf. the simple nasal of the helmets on the Bayeux Tapestry as late as 1066.) The ON. grimu-maðr 'a disguised man', also the name of Odin Grimr, Grimnir = 'der Verlarvte' (Grm. 46, and Pauls Grd. III, 335), points to some sort of a head covering used to disguise a person. So grima may be taken to refer to a helmet used in the sense simply of 'a head covering', not that of 'helmet visor'.

Schade connects the word further with OHG. grinan 'den Mund verziehen', which is related to NE. grin, NHG. greinen to the Germ. rt. *gri, Idg. *ghri (s. Kluge, Etym. Wb.).

The connection in meaning is probably from the distortion of the mouth produced by a grin making the person appear other than usual, from whence the Norse meaning of 'disguise, a covering for the head used as a disguise', and finally the OE. grima 'head covering, helm'. Cf. Du. grijus 'a mask, a grin', where both meanings exist side by side.

In the Romance languages the Span. grima 'terror, fear', Port. ~ 'dislike' are borrowed from the German. It is possible that Fr. grimace, Span. grimaso, NE. grimace 'a distortion of the countenance', are related to grima, but the etym. is not certain (cf. Diez, Wb., 456, and Skeat, Etym. Wb.).

Heafod-beorg.

A kenning for helm, the head-protection. Ymb pæs helmes hrof heafodbeorge wirum bewunden walan utan heold B. 1030. Cf. healsbeorg, brēostbeorg, bangebeorg, scancgebeorg.

leper-helm m. leather helmet.

sg. nom. galea: leperhelm WW. 1421.

Meaning.

galea, cassis: A helmet either of leather or of metal.

Etymology. Cognates to OE. helm are: OHG., OSax., OFrs. helm, Du. helm, helmet, ON. hjālmr, Dan. hielm, Swed. hjelm, M. and NHG. helm, Goth. helms to a Germ. *helm-az m. from the vb. helan 'to cover', from an Idg. rt. *kel- 'to cover, protect, conceal'. Cf. OI. çár-man- 'Schirm, Schutzdach, Decke'; from the same rt. also Lat. cēlare.

The Germ. word appears very early in Slav. as loanword (s. Schrader, Real. Lex., p. 366, and Kluge, P. Gdr., 361). According to Uhlenbeck OSlav. slěmů is a borrowing from the OHG. helm (*Germ. helma·), not from Goth. hilms (s. Uhlenbeck, Archiv f. Slav. Phil. 15 491, and Hirt, PBB. 23 *38). The OSlav. form, and Lit. ssálmas are in all probability, however, not borrowed directly from the OHG., but have come through the medium of OPr. kelmis 'a hat', which became *chelmů, šelmů > OSlav. šlěmů (cf. Grimm, Gd. d. Spr. 121, and Berneker V, 474).

The Germ. word appears also to have wandered westward and appears as loanword in It., Span., Port. elmo, Prov. elm, OFr. heaume (s. Diez, Wb. 121); cf also MLat. helmus in the Reichenauer Glossar.

From Fr. healm, heaume is formed a diminutive with the suffix -et, which appears in Span. and Port. as almete for elmete, and in Fr. as armet 'Pickelhaube'.

In ME. and NE. appear both helm from OE. helm and helmet with the Fr. diminutive suffix -et, the former of which in NE. is confined chiefly to poetry.

Hleorberge (?).

hlēor-berge f. (ōn), hlēor-bere f. (ōn) [?]. Reference.

ac. pl. hleor-bergan (?) B. 304 reading of Heyne.

sg. dat. eofor-līc scinon ofer hlēorberan gehroden golde fah and fÿrheard ferh wearde hēold Grein.

Meaning and Etymology. This much contested passage reads in the MS. hleorberan, which was emended by Gering (Z. Z. 12¹²⁸) to hleor-bergan, which was adopted by Heyne in his Glossar, and is explained by him as having reference to 'der Teil des Helmes, der über die Wangen herabreichend sie einschließt und schützt' i. e. 'Wangenberge'.

Bugge (Z. Z. 4¹²⁵ ff.) reads 'of hlēor beran' and regards lic-scionen as dat. sg. to līc-scione (adj. 'schön gestaltet') with reference to Beowulf, while he translates ferhwearde as a compound meaning 'Lebensschutz'. Grein retains the reading of the MS., but regards hlēorbere as referring perhaps to the 'visor of a helm'. Cf. grīma where the reasons against such a translation are given.

As regards the formation of the compound it is composed of hlēor 'cheek' OSax. hlēor, Du. lier, ON. hlūr to Germ. hleura- (cf. NE. leer) and berge a subst. from the vb. 'beorgan' 'to protect' (for form berge without breaking s. Sievers, § 43, 3. 164, 1), or bere from beran 'to bear', with the meaning in either case of 'a helm with some sort of protection for the cheeks, but not for the entire countenance' (s. Part I, p. 92).

Wala (?).

wala m. (an), wale f. (on) [?].

Reference.

nom. or acc. pl. ymb pæs helmes hrof heafod-berge wirum bewunden walan utan heold B. 1031.

Meaning. According to Sievers 'a rounded elevation or projection on the helmet to which the crest was fastened' (s. PBB: XII³⁶⁹).

Etymology. Wala m., wale f. is perhaps a weak variant of the strong fem. walu 'weal, mark of a blow'. To this OE. walu correspond Goth. walus 'stick, staff', ON. volr, Swed. val 'a round staff', OFrs. walu (in walubera 'a pilgrim'). The word occurs four times in the glosses with the meaning 'mark of a blow upon the flesh, a ridge': — vibex: walu, vibices: wala Hpt. Gl. 48759; vibice: wale Hpt. Gl. 516¹⁶; vibices: wala Hpt. Gl. 510⁴¹; asperae invectionis mastigias: sliðra wala swipa Hpt. Gl. 527 26 — from which is derived the meaning of 'round projection or elevation'. walu is from Germ *walu — 'a round staff' probably connected with the root *wel, which is found beside root *yer with the meaning 'to turn, to wind' (cf. Persson 318). Of similar origin is Fr. gaule (waule) 'a large pole' (Diez, Wb. 594). Cf. also OI. válati 'wendet sich, dreht sich', Lat. vol-v-o, OSlav. valiti 'to roll'. ME. wale, NE. wale, weal 'the mark of a blow'.

Compound.

wyrt-wale wk. f. wyrtwalu st. f. root. wyrt-wala m. See Sweet Stud. Dic. and Bosw.-Toll.

Wig-hafola.

The war head' in B. 2661 is a poetical kenning for helmet. Grein will change heafola into neafola reading wig-neafolan 'umbonem bellicum i. e. clypeum: shield', but Heyne retains heafola citing as parallel to wigheafolan bær the expressions: — wæpen beran 291, hring-net beran 2754, and scyldas bæran 2850.

3. Body Armour.

Breost-beorg.

Forms. breost-beorg f. (5) or -jebeorh n. (a).

References. propugnaculum: breostgebeorh WW.

pl. nom. acc. byrnan hringdon B. 327; IIII helmas and IIII byrnan Ges. Lieberm., p. 358 [71a]; and læddon to öære beorhtan byrig Bethuliam . . . hare byrnan Jud. 328.

pl. gen. and he becwæð his laford . . . LX healma and LX beornena Chart. Th. 549^{18} .

instr. pl. billum ond byrnum B. 40; hwæt syndon ge searo-hæbbendra, byrnum werede B. 238; gebide ge on beorge byrnum werede B. 2529; ad on eorðan . . . helm[um] behongen, . . . beorhtum byrnum B. 3140.

Compounds. 1. byrne as second member of the compound.

gað-byrne f. lorica bellica: corslet.

sg. nom. guð-byrne scan B. 321.

here-byrne f. idem.

sg. nom. here-byrne hondum gebroden B. 1443.

heapo-byrne f. idem.

sg. nom. nemne him heaðo-byrne helpe gefremede B. 1552.

sg. acc. ponne he gewyrceð to wera hilde . . . heapubyrnan Crä. 64.

*ren-byrne f. lorica ferrea.

sg. acc. nam on Ongendio irenbyrnan B. 2986.

isern-byrne f. idem.

sg. acc. pa he him of dyde isern-byrnan B. 671.

Worthy of note is the form heals-brynige, to gloss thoraca OE. Gl. 2⁴¹⁸, being from ON. brynja not OE. byrne, and corresponding to ME. brunie.

2. byrne as first member of the compound.

byrn-ham m. s. ham.

byrn-wiga m. bellator loricatus.

sg. nom. pæt se byrn-wiga bugan sceolde B. 2918.

voc. eala byrnwiga! Wand. 94.

pl. gen. byrnwigena brego Jud. 39.

byrn-wigend m. idem.

pl. nom. ealle his weagesiðas, bealde byrnwiggende Jud. 17.

pl. gen. swa hire weoruda helm byrnwiggendra beboden hæfde El. 224.

pl. instr. and pa gehlodon hildesercum, . . . byrnwigendum, werum and wifum wæghengestas El. 235.

Meaning. lorica, thorax: corslet, coat of mail.

Etymology. The Germanic branch is represented by OE. byrne, ME. brunie, brynie, brinie, brenie (for the dialectical differences cf. Morsbach, ME. Gramm., § 127), NE. byrnie, brinie, brynie, Goth. brunjō, OHG. brunja, brunna, MHG. brünne, NHG. brünne, MLG. bronnie, bronige, ON. brynja, brynja hringr, Dan. brynie, Swed. brynja. OSlav. brŭnja (s. Pauls Grundriß, p. 361) is to be regarded as a loan word from the Germ. Berneker (V, 419) attributes also OPr. brunjos, Lett. brúnas to Germ. borrowing. Prellwitz looks upon OSlav. brunja as borrowed from MHG. brunje, bronigen, while Uhlenbeck (Archiv f. Slav. Phil. 15483) regards it as borrowed from OHG. brunja, and Hirt (PBB. · 23 847) from Goth. brunjo. However, the fact remains that the Slav. word is Germ. in origin, and has to do with a wellknown list of loan words, for in the names of weapons, and in war tactics the Germanic example was followed by the Balto-Slavs.

Grimm (Gramm. III 443) connects the word with the vb. brinnan 'leuchten, glänzen', on account of the metalic gleam of the byrne; Weinhold (Aldnord. Leb. 209) regards the Germ. word as borrowed from the Slav. (cf. Kluge in Grundriß 361), but at present the probability is in favour of bringing it together with OIr. bruinne 'breast'. Leo (Fer. Schrift. 157) is in favour of Celt. borrowing and brings forward various proofs from the different Celtic dialects. To the Celt. branch belongs Gael. bran-nunch or bran-nouch 'the byrnie or coat of mail', from OCymr. broun or bruin 'the breast, the body', also originally 'the breast covering'. In Welsh and Gael. the meaning of bron or broun is confined to the 'female breast', which accounts for the entire absence in Welsh of such derived forms as brannunch or bruineadach, and the very unusual

appearance of such in Bret. — here the corresponding words are formed from a derived form from bron- meaning 'the breast, the body of man in general' breunid, from which then 'the covering for that part of the body' breunidad. Stokes also (cf. Fick, Vgl. Wb. II, 184) points to Celt. origin for Goth. brunjô, OHG. brunna, and endeavours to connect them with the Urcelt. rt. *brend 'schwellen, sich erheben'.

The Romance forms OFr. broigne, brunie, Prov. bronha, MLat. brugna (in a charter of 813) 'armour, coat of mail', are Germ. loan words (s. Diez, Etym. Wb. 534).

The development from ME. into NE. shows various dialectical differences and Norse influence (s. Murray NED.). The most frequent forms are: NE. byrnie, which comes from a ME. form byrny, byrnie (cf. Barbour's Bruce II, 352 byrnys, and Douglas, Aen. XII 95), also used by Morris in "Sigurd the Wolsung"; NE. brinie, brynie, with r metathesis, from ME. brinie, brynie (Hav. 1775 brinie); all these forms, as also the ME. dialectic variants brunie, bruni, brenie, breni, point to Icel. brynja, Dan. brynie (cp. Björkman Scand. Loan Words in ME., p. 183). NE. byrnie cannot be directly derived from OE. by rne with r metathesis, which would have given ME. burn, birn, but is to be regarded as a mixed form derived from the OE. form with metathesis, and the ending of the Scand. form. The ME. form with u belongs to the SW. Mittelland (cf. Laym. 1553 brunie, 6718 burne). The word is now obsolete, being used only as an archaismus.

Ham, hom.

Forms. ham, hom m. (a), and hama, homa m. (an). In simplex hom, homa (s. Stroebe, Altengl. Kleidern.,

10₅₉. 73) is a kind of under garment worn chiefly by the men in the house without any other upper garment. The form was that of a long jacket without sleeves (later with sleeves), from whence the compounds byrn-, fyrd-hom etc. with reference to a battle garment, a protecting coat or jacket, in the poets synonymous with byrne.

Compounds. ham, hama as second member of the compound.

byrn-ham m. lorica.

acc. pl. berað linde forð, ... and byrnhomas Jud. 192. fyrd-ham m. idem.

sg. acc. heo pone fyrd-hom ourh-fon nemihte B. 1504. scir-ham adj. clad in bright armour.

pl. nom. pæt wil-cuman Wedera leodum scapan scirhame to scipe foron B. 1895.

byrn-hama m. lorica.

sg. acc. deahle ladra fela dinne byrnhomon billum heowun Wald. 1 17.

gold-hama m. lorica aurea.

dat. næs på friegendra under goldhoman gad in burgum feorran geferede El. 991.

græg-hama adj. grey-colored.

gylleð græghama, guðwudu hlynneð Fin. 7.

Etymology. Cf. Stroebe, Die Altenglischen Kleidernamen, p. 74.

Healsbeorg.

Forms. halsbearg, halsbearh, healsbearh f. (ō), healsberga m. (an) [?].

For halsbearh cf. Bülbring, § 134, Sievers 214¹, for healsberga Sievers, § 164¹. The forms with r breaking are in the majority.

References.

sg. nom. thoraca i. lorica: halsbearh OE. Gl. 1⁵⁰²¹; thorace (gl. lorica): healsbearh Hpt. Gl. 521⁴; lorica i. galea: healsberga OE. Gl. 1⁷²⁵; ~—: halsberga Hpt. Gl. 423¹⁰.

sg. acc. loricam (inextricabilem): unoferwinnendlice halsbearga (for a in f. acc. cf. Sievers, AS. Gramm., § 253, Anm. 2, or nom.?) OE. Gl. 1⁷⁵⁹; item Hpt. Gl. 424 a (adds, however, inexpugnabilem to inextricabilem above).

Meaning. lorica, thorax: a piece of protective armour for the neck and throat, which developed later into the hauberk.

Etymology. A compound word formed from Germ. hals 'neck' and subst. beorg from the vb. beorgan, Goth. bairgan 'to protect, to cover'. To OE. heals-beorg correspond OHG. halsberg, -berga, -perga¹, MHG. halsberc m., halsberge f., ON. halsbiörg f., Du. halsbarch. It appears further as Germ. loan word in It. usbergo, osbergo, Prov. ausberc, OFr. halberc, hauberc, NFr. haubert. The OFr. form was taken up in ME. before the time of Chaucer (cf. C. T. 2433) from which developed NE. hauberk 'a coat of ringed mail'.

Hlenča.

Forms. hlenča m (an). hlenče f. (ōn) [?]. References.

pl. acc. Moyses behead...frecan arisan, habban heora hlencan...bcran beorht searo Exod. 218.

Compound.

wæl-hlenča, -e m. f. (?). A coat of mail, or possibly fetters.

¹ Cf. Steinm.-Sievers, Ahd. Glossen III, 632, 17 lorica: halsp-ch, 637, 43 torax: halsberga, 682, 65 thorax: halsberga.

acc. cyning cinberge...wiges on wenum, wælhlencan sceoc, het his herecista healdan georne fæst fyrdgetrum Ex. 176.

pl. nom. garas lixton, writene wælhlencan; wordum ond bordum hofon herecombol El. 24.

Meaning. The linked battle garment, a shirt or coat of chain mail. Dietr. (H. Z. X, 424 f.) regards hlenca as well as wæl-hlenca or hlence as the chains with which the conquered in battle were bound. Grein, Zupitza, and others regard both passages, however, as referring to a kind of shirt woven from iron links, and synonymous to such expressions as hring-locene syrče Jerem. 464, hringsren B. 322, wæl-net Exod. 302, all of which can refer only to a garment of chain mail.

Etymology. hlenča, hlenče with the meaning 'ringmail' is confined to the OE. Cognates in the other Germ. dialects have the meaning 'link, fetter, hip' etc. Cf. ON. hlekkr < *hlenkr 'a chain', Dan. lænke, Swed. länk (from whence NE. link-, OE. hlenča, -e, would have given NE. linch). OHG. lanca, hlanca (lancha, hlancha) 'hip, loin, bend', MHG. lanke and gelenke 'the slender supple part of the body between hip and breast', being, as it were, the joint of the whole body, NHG. Gelenk joint of every kind'. Cf. Lit. lènkti 'to bend', and MHG. lenken 'to bend, to turn' denominative to MHG. lanke (Kluge, Etym. Wb., p. 246). From OHG. hlanca is also derived Fr. flanc 'side', which has been re-borrowed in German as 'Flanke', in NE. as flank 'the side'. The Germ. forms are derived from Germ. *hlankō, *hlankjōn- to Idg. *klong-, *kleng- (cf. Fick, Wb. II, p. 395) 'umfassen'. Cf. further, Lat. clingere Skt. crikhalā f., crikhala- m. or n. 'chain, fetter' (Uhlenbeck, AI. Wb., p. 315).

Hrægl.

Form. hræġl n. (a).

In simplex hrægl has usually the meaning of 'garment in general' i. e. vestimentum. In Beowulf, however, it has in several instances the secondary meaning 'armour, byrnie'.

pl. gen. onsend Higelace, gif mec hild nime, beaduscruda betst, pæt mine breost wereð, hrægla selest B. 454.

sg. gen. bruc visses beages, Beowulf leofa, hyse, mid hæle, ond pisses hrægles neot, peo[d]-gestreona B. 1217.

sg. nom. him wæs ful boren...ond wunden gold estum geeawed, earm-[h]reade twa, hrægl ond hringas B. 1195.

1217 and 1195 may refer to a valuable garment rather than to a corslet, but the latter is more probable.

Compounds.

beado-hrægi n. lorica.

sg. nom. beado-hrægl broden on breostum læg B. 552. fyrd-hrægl n. idem.

sg. acc. helm oft gescær, fæges fyrd-hrægl B. 1527.

For Etymology and later development cf. Stroebe, Altenglische Kleidernamen, p. 75.

Hring.

Form. hring m. (a).

References. 1. Annulus aureus: hring, s. Grein, Sprachschatz II, 106.

- 2. vinculum: chain, idem.
- 3. annulus loricae, hamus.

sg. nom. hring utan ymb-bearh, pæt heo pone fyrd-hom durh-fon ne-mihte, locen leodo-syrcan lapan fingrum B. 1503;

ne mæg byrnan hring æfter wig-fruman wide feran hæleðum behealfe B. 2260.

pl. dat. hamis, circulis lorice: hringum OE. Gl. 5050.

Compounds. With hring as first member of the compound.

hring-tren n. lorica.

sg. nom. guð-byrne scan heard hondlocen, hring-iren scir B. 322.

hring-loca m. (an) hami loricae nexi: a coat of ringed-mail.

pl. acc. he wæs on breostum wund purh da hringlocan By. 145.

hring-net n. s. net.

Derivations.

hringed adj. made of rings or links.

sg. nom. pær on bence wæs...hringed byrne B. 1245.

sg. acc. ond his magum ætbær . . . hringde byrnan B. 2615.

 $hring-m\bar{x}l$, $-m\bar{x}led$ adj. capulus annulo instructus: hilt adorned with rings.

sg. acc. he gefeng pa fetel-hilt...hring-mæl gebrægd B. 1564.

pl. acc. handum brugdon hæleð of scæðum hringmæled sweord Gen. 1992.

Etymology. To OE. hring correspond OHG. hring, MHG., NHG. ring, ON. hringr, Dan., Swed., Du., LG. ring, OSax. hring.

Radically related possibly to Gr. xpixoc 'ring', CSlav. kragŭ 'circle', kraglŭ 'round' to Germ. *hringa-, Idg. *krengho-'to turn, revolve' (Fick, Vgl. Wb. II, 394) from the root *(s)ker, (s)kr-i 'to turn, to move hither and thither' (Persson 106 12, 165 12).

Nett.

Form. net n. (ja).

Compounds.

breost-nett n. lorica.

sg. nom. him on eaxle læg breost-net broden B. 1548.

pl. nom. pape for geoguðe gyt ne mihton under bordhreoðan breostnet wera wið flane feond folmum werigean Exod. 236.

here-nett n. idem.

sg. nom. nemne him heavo-byrne helpe gefremede, herenet hearde B. 1553.

hring-nett n. idem.

sg. acc. hring-net beran, brogdne beadusercean B. 2754. pl. acc. hring-net bæron, locene leodosyrcan B. 1889.

searo-nett n. lorica affabre facta.

sg. nom. on him byrne scan, searo-net seowed smipes orpancum B. 406.

wæl-nett n. lorica.

pl. egesan stodon, weredon wælnet, pa se woma cwom Ex. 202.

Meaning. A battle garment made of woven iron rings, a coat of mail.

Etymology. Net alone had not the meaning of coat of mail in the OE. poems, but only in compound. Net in simplex is common to most of the Germ. languages and corresponds to OHG. nezi, nezzi, MHG. nezze, netze, NHG. netz, OFrs., NFrs., OSax., Du., ON. net. Swed. nät, Dan. net, Goth. nati from Germ. *natja-. According to Uhlenbeck (Goth. Wb. 115) nati is derived from an Idg. rt. *ned-, nedh-, OI. nadh-, nah- with the meaning 'binden, knüpfen, flechten', in Ablaut to which is the Idg. rt. *năd

'nähen, stricken' from which Kluge (Etym. Wb., p. 282) derives the various forms.

Pād.

Forms. pad, paad f. (ō).

In simplex pād has the meaning of 'body garment', cf. Stroebe, Altengl. Kleidern., p. 48. In compound with here, however, it has the meaning of 'battle garment, coat of armour'.

here-pād f. vestis militaris, lorica.

sg. nom. seo herepad, sio æt hilde gebad ofer borda gebræc bite irena B. 2258.

For Etymology cf. Heyne, Körperpflege und Kleidung, p. 255, and Stroebe, l. c.

Sceorp.

Form. sceorp n. (a).

In simplex sceorp 'ornatus, vestitus' has the meaning of 'garment', in compound with fyrd, gūð, heoru, hild, sige it refers to 'war-ornament, battle-garment, armour'.

Compounds.

fyrd-sceorp n. armour.

acc. freolic fyrdsceorp hwilum folcwigan wicge wegað Ridls. 15¹³.

gað-sceorp n. war-garment.

sg. acc. and læddon to öære beorhtan byrig...hare byrnan, guösceorp gumena golde gefrætewod Jud. 329.

heoru-sceorp n. armour.

sg. acc. pa pu me gesealdest sweord ond byrnan, helm ond heorosceorp Hö. 73.

hilde-sceorp n. idem.

sg. acc. me dis hilde-secorp Hrodgar sealde B. 2155. sige-sceorp. adornment of victory, triumphal apparel.

sg. nom. gold geriseð on guman sweorde, sellic sige-sceorp Gn. Ex. 127.

For Etym. s. Diss. by Stroebe, p. 79.

Sérad.

Forms. sérad, séraud n. (cons. st.).

In simplex scrad = habitus, vestitus, vestimentum, clamis, colobium, 'a garment, a mantel, or some sort of undergarment'. In compound with $ga\bar{\sigma}$ etc. = 'a battle garment', byrne, lorica.

beadu-scrud. vestimentum bellicum, lorica.

pl. gen. beadu-scruda B. 453 (for citation s. hrægl). byrdu-scrud (?).

sg. nom. urum sceal sweord ond helm, byrne ond byrduscrud bam gemæne B.2660. For the various readings here suggested cf. Heyne's Beow. Glossar 118, Bugge, Tidskr. VIII, 58, and Zach. Z. IV, 216. Heyne is of the opinion that byrdu is a mistake for bord, which would give the meaning of 'an especially richly adorned shield with decorated umbo and rand-bēag'. Bugge, proposes the reading bywdu-scrūd (from vb. bywan) 'a richly adorned garment', which is nearer to the original meaning of scrūd. Ettmüller and Thorpe suggest beadu-scrūd 'lorica, byrne' supporting the reading by reference to B. l. 453 above. This reading apparently has much in its favour as it makes a better parallel to byrne. Holthausen, in his new Beowulf edition, has bord ond beaduscrud bam gemæne.

guð-scrud. vestitus bellicus.

sg. nom. pær wæs on corle eðgesyne brogden byrne... geatolic guðscrud El. 258.

For Etymology s. Diss. by Stroebe, p. 81.

Serče.

Forms. serče, syrče f. (jon).

References for meaning 'lorica'.

sg. nom. æt pæm ade wæs ep-gesyne swat-fah syrce B. 1111.

pl. nom. acc. hwanon ferigeað ge fætte scyldas, græge syrcan B. 334; syrcan hrysedon B. 226.

Compounds. serče as second member of the compound.

beado-serče f. tunica bellica, lorica.

sg. acc. hring-net beran, brogdne beadu-sercean B. 2755. Cf. ON. bøð-serkr.

1

heoru-serče f. idem.

sg. acc. oretta . . . heard under helme, hioro-sercean bær under stan-cleofu B. 2539.

here-serče f. idem.

sg. acc. sæ-deor monig hilde-tuxum here-syrcan bræc B. 1511.

hilde-serče f. idem.

pl. dat. and pa gehlodon hilde-sercum, . . . werum ond wifum wæghengestas El. 234.

leodo-serče f. lorica hamata: chain mail (lit. limb shirt).

sg. acc. pæt heo pone fyrd-hom öurh-fon ne-mihte, locene leodo-syrcan lapan fingrum B. 1505.

pl. acc. hring-net bæron, locene leoðo-syrcan B. 1890. lic-serče f. lorica corpus tegens.

nom. pær me wið laðum līc-syrce min heard handlocen helpe gefremede B. 550.

Meaning. A kind of shirt worn by men and women, which, however, in Beowulf, and in compound with beadu etc. in the Elene also, refers to the shirtlike coat

long and wide worn by the men in battle, and frequently woven from iron links (s. Part I, p. 100).

Etymology. A Lat. loan word for which cf. Pogatscher, §§ 129, 269, 279, and Diss. by Stroebe, p. 60, Sarrazin (PBB. XI, 173 ff.) cites serče as a Norse loan word in Beowulf, which is refuted by Sievers (PBB. XI, 354).

Wæd, Wæde.

Forms. wād f. (i), wāde n. (ja).

In simplex wæd and gewæd have the meaning of 'dress, garment' the Lat. lemma being indumentum. For references s. Stroebe, Altenglische Kleidernamen, p. 82. In compound, however, with here, gað etc., wæd has the meaning of 'battle garment': vestis bellica.

Compounds.

here- $w\bar{x}d$ f. vestis militaris.

inst. pl. pa wæs on sande sæ-geap naca hladen herewædum B. 1897.

Cf. ON. here-vaðir.

 $heaðo-w\bar{x}d$ f. vestis bellica.

inst. pl. ne hyrde ic cymlicor ceol gegyrwan hilde-wæpnum ond heaðo-wædum B. 39.

gewæde n.

brēost-gewāde n. lorica: breast garment, byrnie.

pl. nom. gehwearf pa in Francna...fæðm...feorh cyninges, breost-gewædu ond se beah somod B. 1212.

pl. acc. no dy zr suna sinum syllan wolde, hwatum Heorowearde...breost-gewzdu B. 2162.

eorl-gewæde n. vestitus virilis: armour.

pl. dat. gyrede hine Beowulf corl-gewædum B. 1442. guð-gewæde n. vestitus bellicus.

nom. acc. pl. syrcan hrysedon, guð-gewædo B. 227; ond his magum ætbær brun-fagne helm...guð-gewædu, fyrdsearu fuslic B. 2617; ac hy scamiende scyldas bæran, guð-gewædu B. 2851; þæt he genunga guð-gewædu wraðe forwurpe B. 2871.

pl. gen. geaf him da mid Geatum gud-gewæda æghwæs unrim B. 2623.

For Etymology s. Diss. given above p. 84.

4. Greaves.

Ban-beorg.

Forms. ban-beorg, -berg f. (5), -gebeorg, -geberg n. (a). References. ocreos (ocreas): banberge, scan(c)gebeorg WW. 535°; ocreis: baangeberg WW. 35°2° = Corp. 1426; ocreis: banbeorgum WW. 459°3.

Meaning and Etymology. Protection for the legs or greaves is the name applied to the protective armour of thin plates of metal, which reaching to the foot were made fast there. Cf. OHG. beinberga (Steinm.-Sievers III, 632, 6, ocrea: peinperga, 637, 44, ocree: beinberga), MHG. beinberge. Cf. also Walt. 335: Ingentes ocreis suras complectitur aureis, and San Marte, p. 42.

Ban-rift.

Form. bān-rift f.

References. tibialis: ban-rift WW. 277 37; id.: baan-rift Ep. 1031, baan-ryft Er. 2025; id.: baan-rist Corp. 2025.

Cf. tibarii: pein-reftā Steinm.-Sievers I, 665¹⁵.

Meaning. Bān-rift refers to the bandages so frequently worn by warriors. For further discussion and Etymology s. above mentioned Diss. by Stroebe p. 12. Also Heyne, Haus-Altertümer, III, p. 253.

Scin-hosa (?).

Forms. scin-hosu f. (ō) [?], '-hosa m. (an) [?], -hose f. (ōn) [?]; nom. pl. [?] -hosa, dat. pl. scinhosum.

Cf. Sievers, Ags. Gramm., § 278, Anm. 1.

References. casus obliquus (?). ocreis: scinhose Hpt. Gl. 521⁵; item OE. Gl. 1⁵⁰²² (MS. R. reads hosum). pl. dat. ocreis: of scinhosum OE. Gl. 2⁴¹⁹.

nom. m. (?). caliga and ocrea: hosa Aelfc. Gl. 31414

= WW. 327²⁹; = ib. 547¹⁰. Cf. ocreae, uel tibiales: *leper-hosa* WW. 125³¹.

Meaning. Hose for the shins, greaves. At an early period a metal plate appears to have been attached to the stocking, reaching only to the knee, and protecting only the front of the leg. Later in the age of Chivalry they increased in size, were made of iron or steel rings, and belonged to the full equipment of a knight. They were at first used only for the right leg, which was unprotected by the shield.

Scin-hosa (?) is a compound of scinu shin and hosa, a kind of stocking or covering for the leg. In some cases of metal, the NE greaves. Cf. Stroebe Diss. for hosa in simplex p. 37. Cf. also MHG. sin isen hosen Wigalois 295¹¹.

Sceanc-gebeorg.

The neut. sceanc-yebeory is synonymous with bān-beōrg 'greaves, shank protection'. It is recorded only once as ocreos (ocreas): banberge, scan(c)ġebeorg WW. 5359.

Corrections.

Page 4, line 10: read 'Psalms' for 'Psalmes'.

Page 48, line 9 from bottom: read 'takes' instead of 'is N. Europ. taking'.

Page 49, line 1 and 2 from top: cancel the words 'Caesar for mention of arrows among the Gauls;' and note 1.

Page 50, line 8: read isern-scure, instead of isern scure.

Page 50, line 15: read II, 171 instead of II, 17.

Page 50, line 16: read 'thicker' instead of 'ticker'.

Page 50, line 23: cancel the words 'draca ne fleogeo (Fins. 3)'.

Page 118, line 4: cancel 'sg. instr.'.

Preface.

The following treatise on the modern dialect of Kendal was originally written as a dissertation for the Honours School of English language and literature of the Victoria University. It has since been enlarged and rearranged.

I am indebted to Mr. H. C. Wyld, Professor of the English language at the University of Liverpool, for the idea of writing a treatise which would outline as accurately as possible the phonological features of this dialect. I may add that I owe much in the arrangement and general system of the work to Mr. Wyld; as well as one or two etymologies, and help in the phonetic exposition.

The phonetic transcription used, is partly based on Sweet's Broad Romic. When necessary I have used his Organic Symbols.

There is no doubt that the native element in this dialect is of Northern, rather than of Midland origin. In several cases it is only possible to trace back the dialect forms to a distinctly Northumbrian type.

In giving the Old and Middle English forms of the modern words, I have therefore, as far as possible, adduced, for the former the old Northumbrian, for the latter, northern forms from such texts as Cursor Mundi, Havelok

IV Preface.

the Dane, and the Towneley Plays, and Glossaries like the Catholicon, and Levins. The broad features of the dialect, when compared with the Midland dialects of Lancashire, South Yorkshire, and Cheshire, show it to be decidedly Northern.

From the 15th century onwards, borrowings from the literary language have taken place, especially during the 17th and 18th centuries.

The Scandinavian element, which seems to be mostly E. Scandinavian in origin, amounts to about one eighth of the whole. The words borrowed have evidently been taken direct from the Danish population, and not from the literary language; one or two words however, such as $f_{\ell}l$ sb. fell, and $f_{\bar{\psi}\partial}s$ sb. waterfall, seem to be of Western origin, as they do not occur at all in E. Scandinavian. The Romance element amounts to one eleventh of the total number of words. There are very few words from this source that are not also in use in Polite English. Only about a dozen words are of undoubted Celtic origin — i. e. about one hundredth of the entire vocabulary.

I must here express my indebtedness to the Rev. J. Sephton, M. A., Honorary Reader in Icelandic, for valuable help in dealing with the Scandinavian element, and for the loan of books otherwise inaccessible.

I am moreover indebted to Mr. Amos Graveson for a list of Bird Names in use in Kendal, which I have incorporated in my own list, but have distinguished forms strictly belonging to Kendal by the addition of the letter K.

Gateacre, Liverpool 1905.

Chapter I.

Pronunciation.

§ 1. The dialect of whose phonological position I propose to treat in the following work, is spoken in the country lying around Kendal in S. Westmoreland. According to Ellis's classification, it belongs to the West-Northern division, corresponding to D. 31 variety 111.

Its boundary lines include on the north side Tebay (Tibə) and Staveley (Stēvli), but neither Shap (Jap) nor Orton (Ōtn). To the west it is bounded by the country close to Lake Windermere and by the towns of Windermere and Bowness, which, from the dialectologist's point of view, are of no interest. To the south on the Cartmel side it does not extend much farther than Whitbarrow (Hwitbarro), but on the other bank of the Kent it reaches to Kirby-Lonsdale (Kərbi-Lənzdi). To the east it is bounded by the mountain country between the Grayrigg (Grērig)-Tebay (Tibə) valley and the Garsdale (Gazdi) and Hawes (Hōz) valleys in Yorkshire. In the town of Kendal itself the dialect is less pure and reliable than outside, though as a rule the actual sounds in use are identical.

§ 2. I have obtained almost all my information as to this dialect from Mr. Roger Capstick, a farmer by occupation, now resident in the neighbourhood of Liverpool. Mr. Capstick is a native of the Kendal district, having

been born at Low Park Farm, some six miles north of Sedbergh (Sedber), in 1849. Until three years ago he resided at Low Park, never having been further away from Kendal than Penrith (Piprop) and Appleby (Aplbi). Mrs. Capstick was born just outside Sedbergh, her father being a native of Coatley (Kōtli) in the vicinity and she has likewise remained in the Kendal district, until the family came to Liverpool. Mr. Capstick has preserved the dialect as spoken in his youth admirably, and has only to a slight extent been influenced by the speech of the people from other parts.

Vowels.

§ 3. The Kendal dialect contains eleven simple vowel sounds.

Note. The classification used is that of Dr. Henry Sweet.

Wide Wide Round

Front Back Back

High *
$$f = i$$
 (§ 4) * $1 = v$ (§ 8) * $10 = u$ (§ 11)

Front Mixed

Mid **** $f = e$ (§ 5 and 6) * $f = v$ (§ 7)

Back

**** $f = a$ (§ 9 and 10)

Back

Low * $f = v$ (§ 12)

**** $f = v$ (§ 13)

Narrow

High **** $f = i$ (§ 14 and 15) Mid * $f = v$ (§ 16)

Round

Mid *** $f = v$ (§ 17).

Note. Of these * occurs only short, ** only long, and *** both long and short.

There are also the following diphthongs:

- a) with u (1°) as second element u (§ 18), u (§ 19), u (§ 20), u (§ 21).
- b) with *i* (f) as second element *ai* (§ 22), *ei* (§ 33), *oi* (§ 24).
- c) with ϑ (1) as second element $\bar{\imath}\vartheta$ $\bar{\varrho}\vartheta$ (§ 24), $\bar{u}\vartheta$ (§ 25).
- § 4. i (f) is the high-front-wide as in Polite English spin. It occurs in all positions, both stressed and unstressed though occasionally i (f see § 14) takes its place. Examples: bind vb. bind, fi sb. fish, hwik adj. living, gimlok sb. gimlet, hindor adj. hinder, back, gildort sb. hairnoose, sikl sb. sickle, spiyk sb. chaffinch.
- § 5. e (f) is the mid-front wide as in Polite English hen. Examples: deg vb. water, eg sb. egg, eks vb. ask, elm sb. elm, men sb. men, sebm num. seven, spelk sb. rib of a basket, wepm sb. weapon.
- § 6. \$\overline{e}\$ ((*)) is the long form of \$\overline{e}\$. It resembles French wide \$\overline{e}\$, but probably has the lips less open. In one or two words, it becomes \$\overline{e}i\$ ((*)) the mid-front-narrow raised followed by the high-front-narrow. This diphthongisation is not found before consonants (e.g. kei sb. key, nektei sb. necktie, \$\overline{e}i\$ interj. eh?) Examples: \$d\overline{e}\$ sb. day, \$d\overline{e}l\$ sb. dale, \$gr\overline{e}l\$ adj. grey, \$h\overline{e}l\$ sb. hail, \$l\overline{e}l\$ vb. seek, \$sl\overline{e}l\$ vb. slay.
- § 7. $\mathfrak{d}(1)$ is the mid-mixed-wide as in the Scotch bird (bord) and occurs only before r. Occasionally in the word mori (adj. merry) \mathfrak{d} is advanced to \mathfrak{d} . This probably is Ellis's $e^{\mathfrak{d}}$ (see § 76 and Ellis E. E. Pron. V 80 721*). Examples: bord sb. bird, bork sb. birch, dort sb. dirt, gort adj. great, hord vb. hoard up, or \mathfrak{d} sb. earth, work vb. work.
- § 8. n (1.) is the high-back-wide slightly advanced, and occurs after r. Occasionally it is heard after

- r alone, as in *rodl* sb. riddle, and *ron* vb. run, but more usually after a consonant followed by r. Examples: brok vb. break, brost vb. burst, tronl sb. wheel of wheelbarrow, prost vb. thrust.
- § 9. a (J-) is the mid-back-wide slightly lowered, and occurs in all positions, except before r + consonant, where it undergoes half-lengthening to J-• e. g. hard, mark, park. r is often dropped in this combination and then J-• becomes \bar{a} (J-•). In the combination are a is always J-, but in ar it fluctuates between J- and J-•. Examples: aks sb. axe, bad adj. bad, fader sb. father, laf vb. laugh, man sb. man, sap sb. song, spare sb. sparrow, tar sb. tar.
- § 10. \bar{a} (J++) is the lengthened form of a. It is deeper than Polite English \bar{a} (J+), but the deepness is not so marked as in Swedish \bar{a} (J+). Occasionally it is slightly advanced to J+++, but this pronunciation is not common. Examples: $\bar{a}ld$ adj. old, $d\bar{a}b$ vb. daub, $kr\bar{a}l$ vb. crawl, $m\bar{a}$ vb. mow, $s\bar{a}$ vb. sow, $sp\bar{a}r$ vb. spare.
- § 11. ψ (10) is the high-back-wide with underrounding, but this underrounding is not so clear as in Swedish \check{u} (1). Examples: $b\psi l$ sb. bull, $gr\psi nd$ sb. ground, $kr\psi dz$ sb. curds, $m\psi d$ sb. mud, $m\psi d\partial r$ sb. mother, $st\psi f$ sb. stuff, $w\psi ml$ sb. auger, $w\psi r\bar{p}$ sb. worth.
- § 12. o (3) the mid-back-wide-round only occurs in syllables which have not the main stress. In studied speech it passes into ψ (13) the high-back-wide. Examples: wino vb. winnow, hwar $\delta \psi$ ko $fr\bar{\psi}$ where they come from.
- § 13. 2 (J) is the low-back-wide-rounded as in Polite English not. In one or two words it is narrowed to J. e. g. 2f, 2n. Examples: b2rn p. p. born, b2rp sb. broth,

holin sb. holly, horn sb. horn, jok sb. yoke, korn sb. corn, kroft sb. croft, podif sb. porridge.

- § 14. i (f) is the high-front-narrow as in French ici. It only occurs in a few words. Him (him) when stressed often has i (f), otherwise it has i. In hil (hill) the narrow vowel is common, but not invariable. In the following words i is always narrow. Examples: ibmin sb. evening, klim vb. climb, klin adj. clean, lik vb. leak, fip sb. sheep.
- § 15. \bar{i} (I•) is the lengthened form of i. It is often slightly lowered in unstudied speech, becoming ([-). This sound has been identified as a diphthong by Ellis (E. E. Pron. V. p. 538) viz. ei ([I), but the sound I have always heard, is quite free from diphthongisation. Examples: friz vb. freeze, gis sb. pl. geese, \bar{i} sb. eye, li sb. lie mendacium, lil sb. light, rik sb. smoke, stwin prep. between.
- § 16. a (]-) is the mid-back-narrow slightly lowered. Examples: bakl sb. good condition, frand sb. friend, rad up vb. tidy, ran burly, thickset man, rast vb. rest.
- § 17. σ (]-+) is the mid-back-narrow-round with lowering. Examples: $b\bar{\sigma}$ sb. ball, $d\bar{\sigma}n$ sb. dawn, $g\bar{\sigma}st$ sb. ghost, $l\bar{\sigma}m$ sb. loam, $p\bar{\sigma}msand\bar{\sigma}$ sb. Palm-Sunday, $sk\bar{\sigma}d$ vb. scald, $st\bar{\sigma}k$ sb. stalk, $w\bar{\sigma}$ sb. wall.

Diphthongs with u (12) as second element.

§ 18. iu (f 1°) is the high-front-wide followed by a very tense u (f 1°). After j, (as in kuujiur) it passes into the high-mixed-wide-round. In studied speech it usually becomes i-u (f 1). It occurs before consonants, vowels, and in final positions. Examples: biuk sb. book,

diuər sb. door, kliu sb. clew, kriuk sb. crook, siu vb. sew, tiun sb. tune.

- § 19. eu (fi) is the mid-front-wide followed by a very tense eu, as in the preceding diphthong. In studied speech it passes into eu or eu. Sometimes eu is heard with a distinctly vocalic second element. It is a rare sound and only occurs in final positions. Examples: eu vb. pret. knew, eu vb. pret. threw, eu vb. chew.
- § 20. uu (112) is the high-back-wide followed by a very tense uu. Examples: bruu sb. brow, guus sb. goose, huuf sb. hoof, kuu sb. cow, puu sb. pull, suu sb. sow, suu sb. shoe, suuder sb. shoulder.
- § 21. au (Jî:) is the mid-back-wide followed by a very tense u. The first element is at times raised to 1-, or even 1, producing a sound, which is very difficult to distinguish from uu. Examples: dauli adj. sad, melancholy, dauter sb. daughter, gauk sb. simpleton, kaui sb. hornless cow, maus sb. mouth, rauk vb. poke the fire.

Diphthongs with i (f) as second element.

- § 22. ai (J-f) is the mid-back-wide-lowered followed by the high-front-wide. Examples: aivi sb. ivy, bai vb. buy, haid vb. hide, kai sb. pl. cows, nain num. nine, sail vb. strain.
- § 23. ei ([-1]). The mid-front-narrow-raised followed by the high-front-narrow. This diphthong is very rarely heard and occurs only finally. See § 6.
- § 24. si (f) is the low-back-wide-round followed by the high-front-wide and sounds the same as Polite English si. It does not occur in words of Gmc. origin. Examples: bsil vb. boil, msidsr vb. perplex, worry, nsiz sb. noise, tsi sb. toy.

Diphthongs with a (1) as second element.

§ 25. \$\bar{e}\$ ([\bar{e}]), \$\bar{i}\$ ([\bar{e}]) are used in the Kendal dialect indifferently. In unstudied speech the first is the more usual. The first element is at times altered to the mid-front-wide raised position giving [\bar{e}]. The second element is often retracted to \bar{g}. In no one word have I ever known the same vowel (i. e. \bar{e} \text{ or }\bar{e}) to be maintained all along consistently. Examples: \$bi\text{pin}\$ sb. bone, \$dri\text{piv}\$ vb. pret. (he) drove, \$fi\text{ps}\$ sb. face, \$gri\text{pn}\$ vb. groan, \$hi\text{pr}\$ sb. hare, \$li\text{p}\$ sb. barn, \$li\text{p}\$ adj. loath, \$ni\text{pm}\$ sb. name.

§ 26. 49 (11) is the high-back-wide-round followed by the mid-mixed-wide. As in is and es at times the second element becomes J. In a few words I have heard J for 1, e.g. boat, koam, soal. Examples: kūst sb. coat, lūsn sb. lane, rūsd sb. road, skūsr vb. scour, snūsr vb. snore, sūsl sb. (boot-) sole.

Consonants.

§ 27. The Kendal dialect contains twenty-six consonants.

		Stop	Open Cons.	Side	Nasal	Trill
Back {	$\left\{ \begin{array}{l} \text{Voiceless} \\ \text{Voiced} \end{array} \right.$	\boldsymbol{k}	•			_
	Voiced	g			\boldsymbol{v}	
Front {	$\left\{ \begin{array}{l} \text{Voiceless} \\ \text{Voiced} \end{array} \right.$		_	_		
	Voiced	_	$oldsymbol{j}$			
Almoolom	$\left\{ \begin{array}{l} \text{Voiceless} \\ \text{Voiced} \end{array} \right.$	t	_			
MIVOULAL	Voiced	\boldsymbol{d}		l	n	r
Point- Alveolar {	∫ Voiceless	ŧ				-
	Voiced	¢				r
Teeth	{ Voiceless Voiced		Þ	-		
	Voiced	_	ð			

		Stop	Open Cons.	Side	Nasal	Trill
Blade-	∫ Voiceless	-	8		_	_
Point	Voiced		z			
Diada	∫ Voiceless	<i>(t)</i>	ſ			
KINDA 4	{ Voiced	(d)	. 3		_	
T:-	∫ Voiceless	p			_	
Lip	Voiced	b	ð		m	_
T in tooth	∫ Voiceless		f		-	
Lip teeth {	Voiced		$oldsymbol{v}$			
Lip with	∫ Voiceless		10			
back mo- dification	Voiced		hw	_		

In addition to the above consonants, the stress h exists in Kendal, but does not occur in cases where original stress has been lost — as Hez-to sin im? Tel or a want or.

The consonants m, n and l can become vocalic, and are then treated as vowels. Their vocalic nature is indicated in the following manner -m, n, l.

§ 28. The consonants k, g, v, t, d, l, n, j, δ , f, v, s, z, f, and w are pronounced exactly as in Polite English, though v seems to be partly unvoiced before unstressed t in the pret. livt = lived.

r the alveolar trill is as a rule more strongly trilled than in Southern English, especially when initial. Before v (see § 8) the trill is usually less noticeable. It never occurs after t, d.

r the point alveolar trill, takes the place of the ordinary alveolar trill after t and d.

t and d the point alveolar stops occur only before the trill belonging to the same series e.g. mater, fader, striem.

z the blade open-voiced only occurs medially and finally mostly after d the blade stop voiced, forming the affricate dz. \int forms a similar affricate with t.

the lip-open voiced, only occurs in the word secont; num. seventy, and is sounded like the South-German w.

hw the lip-open-voiceless with modification, is sounded as in Scotch, but never passes into $\chi + w$ i.e. back-open-voiceless + lip-open with back-modification. When unstressed it becomes w. It only occurs initially.

Chapter II.

The Kendal vowels and their OE. equivalents.

i.

- § 29. Kendal i has the following origins.
- 1) ME. i from OE. i, Scand. i and OFr. i has remained, except before m and $n + \cos$ and ld. This i (I) was originally narrow (HES. § 412) in OE., and maintained its character throughout the ME. period. In the sixteenth century it was still i (I) (Ellis EE. Pron. III, 881 ff.), but was widened to i (I) during the seventeenth.

Examples:

- bilhiuk sb. billhook. OE. bill, ME. bill. CM. 31.
- flik sb. flitch. OE. flicce, ME. flykke. Pr. P. 167. flyke Cath. 135. flick Lev. 120, 17.
- glisk vb. shine forth. Cf. OE. glisian, ME. glisien, also ME. glist en.
- hilt sb. hilt, handle. OE. hilt, ME. hylt. Pr. P. 240.
- kit sb. milking-pail. No OE. known, ME. kit. Lev. 148, 43. kyt Bruce XVIII. 168. ODu. kitte = 'tub' (OE.

cyte may be related according to Skeat, Etym. Dict. p. 317).

lig vb. lie. Northumb. licza Cook 132, ME. li, lig CM. 3778, 2944. lig Townl 18/326.

pik sb. pitch. OE. pic, ME. pik. CM. 11885.

sikl sb. sickle. OE. sicol, ME. sykyl. Pr. P. 455.

sini sb. sinew. OE. sinu, ME. sinu. CM. 3941.

skift vb. shift, remove. OE. sciftan, ME. scift. CM. 4440.

slip vb. slip. OE. slipan, ME. slipped (pp.). Gaw. 244.

twits bok sb. earwig. Cf. OE. anzel-twicca WW. 320, 32,

OE. *twiccan, ME. twicchen. Low Germ. twikken (Skeat, Etym. Dict. p. 671).

widi sb. bent ozier, withy. OE. wibiz, ME. wythe. Pr. P. 531. hwik adj. living. Northumb. cwic Cook 33, ME. cwic CM. 8738.

Note. lim sb. limb owes its shortness to a b inserted after m in the oblique cases in ME. In sini sb. sinew, i instead of *ai (ME. \bar{i}) is due to following ME. u. In widi sb. bent ozier, withy OE. ij has hindered the lengthening of i (Morsb. ME. Gram. § 64).

- § 30. 2) Kendal *i* corresponds to Scand. *i* in the following words:
- gildərt sb. hairnoose. ME. gildert PS. 1X, 31. Aasen gildra 215 (Björkman 154). ON. gildra.
- klip vb. clip shear, ON. OSwed. klippa, Dan. klippe (Björkman p. 246).
- § 31. 3) Kendal *i* corresponds to OFr. *i* in the following words:
- fit sb. vetch a plant. ME. fetche WW. 664, 24.
- gimlek sb. gimlet. ME. gymlocke Lev. 158, 39. Cf. OFr. gimbelet.

pisimer sb. ant. ME. pissemire Mand. 301. OFr. pisser. twilt sb. quilt. OFr. cuilte, coulte.

Note. In hwin sb. gorse i represents Celtic i. Cf. Welsh chwyn = 'weeds'.

§ 32. 4) OE. i before m, n + the stops b, t, d, has always remained short in Kendal.

These short forms are to be explained, as being made, either from compounds, or from the analogy of words which have l, r, or n, in the following syllable. E. g. ME. limber, childer, wildernesse, hindern (Kaluza § 217c), cf. Kendal blinderz sb. blinkers, hinder adj. hinder, back; hinder vb. hinder, winistrie sb. a long straw. OE. i before nc, nz has remained short not only in Kendal but throughout the ME. dialects (Kaluza § 217a).

Examples:

- blind adj. blind. Northumb. blind Cook 22, ME. blind CM. 184.
- blinke CM. (Fairf.) 1964 = 'glance' noun. This word goes back to a hypothetical OE. *blincan, for which cf. Du. blinken = 'shine, smile'. The OE. blīcan is probably cognate.
- kink sb. blow. Cf. OE. cincung WW. 171, 39. Kinke Townl. 'I double up', 'I tie myself in a knot'. Cf. MDu. kinken 'pant, gasp' (see Skeat, Etym. Dict. 137).
- kipkof sb. whooping-cough for OE. *cinc-cōh. Cf. Du. kinkhoest, ODu. kiech-hoest, cf. Du. kinken, and OE. cincung above.
- klipk sb. blow, stroke. Cf. Du. klink 'a blow', klinken vb. 'clink, sound', and Dan. klinge. Most probably native.
- frink vb. shrink. OE. (for)-scrincan, ME. schrynkyn Pr. P. 449.

- Pr. P. 496. Cf. OE. tinclian, ODu. tintelen (see Skeat, Etym. Dict. p. 644).
- wind vb. wind. Northumb. winda Lind. 95. ME. wind CM. 245, 78.
- winlstrie sb. long straw. For OE. (Northumb.) *windelstrē cf. OE. windel, ME. windel = 'basket', OE. windwian 'winnow' and Scott, 'Old Mortality' Chap. VII: bare, nothing but windlestraes, and sandy laverocks.

Note. i in the following words corresponds to Scand. i + nasal cons.

klink sb. lump of rock. Dan. klinte, ON. klettr, Norw. klett.

spiyk sb. chaffinch. Cf. Swed. gulspink, Norw. gulspikke, Dan. spinke = 'a kind of sparrow' (Molbech, Dial. Lex.) (See Björkman p. 255).

These two words are clearly of Danish and not of Norwegian origin. For Norw. gulspikke see Aasen p. 261—262.

§ 33. 5) OE. e has become i in Kendal in a few words. In Northumbrian e probably remained, even after the fronted consonants j, sc (see Bülbring § 290, but cf. also § 296), but was raised to i in the ME. period before the thirteenth century, for CM. has such forms as i and kist for Northumb. i and cest. i here was probably wide, ME. i being wide before i, i, i, i, and i (HEES. 649).

Examples:

- git vb. get. Cf. Northumb. onzeta.
- jit adv. yet. Northumb. zet Cook 100, ME. yit CM. 2591, yett CM. 553.
- klik vb. snatch away. Cf. ME. clekis Alex Sk. 282 = 'plucks', also cleke sb. Alex Sk. 2163.
- kist sb. chest. Northumb. cest, ME. kist CM. 21018 and 5617.
- stidi adj. steady. For OE. *stediz cf. OE. steding line, stede, stadol.

stidl vb. walk lazily or crookedly. ME. stedill = 'make stand still' Alex Sk. 3977. Halliwell steddle. For OE. *stedelian for *stadolojan cf. stapol and stidi above. wile sb. willow. OE. weliz, ME. wilwe. Pr. P. 528.

Note. In gider vb. gather and tygider adv. together OE. & has become i via ME. e (cf. gederes Gaw. 421 and 777). This shows that & had become e quite early in the ME. period, if it is not even older and hence the change & < e is older than e < i. Stidi sb. anvil goes back to Scand. *stebi, cf. ON. stebi, Norw. sted Aasen p. 747. ME. stebi CM. 23237. Stythy Cath. 865 stidye Lev. 97. 7.

§ 34. OE. e before n + cons., ME. e has become i in Kendal in the words bipk sb. bench and stripkl vb. sprinkle. It is highly probable that both these words are not native to the dialect but are borrowed from some other northern dialect. e + n generally remains in the Kendal dialect. bipk in all probability comes from a nominative *benc with gen. and dat. bences, bence which would give ME. benk (see Bruce 7. 238) and *benche. Modern Kendal bipk or bipk, bipf (with simplification of nif to nf). All three forms exist in the dialect, though possibly bipf is a later borrowing from polite English. Unfortunately in stripkl we have no e form in the modern dialect although such forms as strenkelen Pr. P. 479, strenkild Alex Sk. 3676, and strenkling CM. 28580, really exist in ME.

§ 35. In the words dip sb. noise, ME. dinge Cath. 100, flip vb. fling, ME. flingen Alis 1111, hip vb. hang; i is generally believed to represent Scand. e (cf. ON. dengia, flengia, hengia), but Björkman (p. 207) thinks it highly improbable that e should have become i in ME., seeing that there are so few traces of it to be found. For ding he conjectures a Scand. *dinga, cf. OSwed. diunga

= *dingwan. Murray (NED. see fing), likewise doubts the probability of the change en < in.

§ 36. OE. y was unrounded to i (I) in the ME. period and was widened to i (I) in the 17th century (Ellis, EE. Pron. III p. 881 ff.) and has remained so in Kendal till the present day.

Examples:

biznes sb. business. ME. bisinesse Pr. P. 37; cf. OE. bysig. brig sb. bridge. Cf. OE. brycg, ME. brig. CM. 8945. mit/ adv. much. OE. myčel, ME. miche. Alex Sk. 5602. plyustilt sb. plough handle. OE. stylte.

filf sb. shelf. OE. scylf (Bl. Homs 27), ME. schelf Pr. P. 448.

Note. In kinlin sb. fuel i has its origin in Scand. y. Cf. OIc. kyndill = 'torch', OSwed. kyndill messe (Ihre) both derived from OE. candel, itself from Lat. candela. Cf. ME. kindling CM. 19389, Alex Sk. 3292.

OE. \bar{y} has become i in wif vb. wish, piml sb. thimble.

§ 37. OE. \bar{x} (WGmc. \bar{a}) has become i in the words ivar adv. ever, iv(a)ri adj. every, nivar adv. never, and fipard sb. shepherd; representing ONorthumbrian \bar{x} fre, * \bar{x} ferild. \bar{x} in the ME. period and was raised to \bar{x} (14) before the sixteenth century, and then shortened to \bar{x} (14) and widened to \bar{x} (15) in the seventeenth century.

§ 38. OE. * has become *i in Kendal in the words fifti num. fifty, fiftin num. fifteen, and stif adj. stiff. Here *was shortened to *i (I) in the ME. period and widened to *i (I) in the seventeenth century.

§ 39. Words of uncertain origin.

fidz vb. fidget, fike vb. laugh heartily, jilp vb. yelp, mizl vb. drizzle, peniwig sb. small round cake (ME. whig

= whey), pigin sb. small wooden bowl with handle to it, stiff sb. potato-row, swin vb. make (ones way) as swinin > w\bar{\rho} up. swindz vb. singe, twidi vb. pass the thumb or fingers over one another.

t/jtj sb. cat.

ę.

Kendal e has the following origins.

§ 40. OE. e (f) both with and without nasal combinations has in most cases remained short during the ME. period till the present day, in Kendal. In sled sb. sledge from ME. slede, OE. "sleda; e instead of io is due to early shortening probably arising from a compound in which sled was the first member.

Examples:

gby adv. straight, direct (e. g. liuk gby jonds). Northumb. efne Cook 45. glsr sb. alder tree. OE. ellarn.

fell vb. get ready, put in order for OE. *fetlian, ME. fetlen (see Wall p. 79), cf. OE. fetel = 'belt, girdle'.

jest sb. yeast. Northumb. *zest, ME. jest. Cath. 426.

neb sb. (duck)bill. OE. nebb, ME. neb. Alex Sk. 807.

stęd sb. sledge, for OE. *sleda, ME. slęde. Pr. P. 458. Cf. MDu. slede, slide, OHG. slite, ON. slede. (Stratm.-Brad. 555.)

spęłk sb. basket-rib. OE, spelc = 'splint', ME, spelke. Pr. P. 468.

stręk adj. adv. straight. OE. strec, ME. strek. Prk. Cons. 2623. hwęder pron. which whether (e.g. ęder en em hwede ôqu will)

Northumbrian hweder Lind 56. ME. qveper CM. 8733.

hwelp sb. puppy. Northumb. hwelp Lind. 55, ME. qvelpe CM. 18645.

hwem! vb. upset. ME. quelm CM. 24862, whelmyn Pr. P. 54.

Note. hedž sb. hedge (OE. heze B. T. II 525) is in all probability a laonword from either polite English or a Midland dialect.

§ 41. ę in the following words represents a Scand. e: dęg vb. water. Norw. deggja Aasen p. 103, ON. deggua = *degguja = Prim. Norse *dauujan.

ebm sb. object. ON. efni, ME. efne. CM. 335.

eg on vb. incite. ON. eggia, ME. eggyn. Pr. P. 136.

eldin sb. fuel. Norw. elding Aasen 132, ON. elding, ME. eyldinge. CM. 3164.

fel sb. fell, hill. ON. fell, (Wall p. 99).

- kensbak sb. 'mark by which anything can be recognised at a distance'. By popular etymology for *kenspak, cf. Norw. kjennespak Aasen 358, Swed. kännspak, cf. ON. spakr = 'wise' (see Björkman p. 220 and Wall p. 108).
- klęg sb. gadfly. Norw. klęgg Aasen 363, ON. kleggi (Björkman p. 284).
- melder sb. 'a quantity of corn to be ground'. Norw. melder Aasen p. 493. Olc. melder (Björkman p. 284).
- [eg] skęl sb. eggshell. ON. skel, ME. skelle York. Plays II, 65 (see Björkman 124).
- stęg sb. gander. Norw. stegg Aasen p. 747, ON. steggr, ME. steg. Cath. 367, Lev. 53, 25.
- § 42. OE. a (J) and æ (l) became e (l) perhaps already in the OE. period (cf. the Mercian e-forms, where e = l or [, see Bülbring § 91). This was widened to e (l) in the ME. period (see HES. § 650) and has remained so ever since.

Examples:

- bęk sb. brook. OE. bæc, ME. becc. CM. Gött. 8946 (see Björkman p. 144).
- efter prep. after. OE. æfter Lind. 2, ME. efter CM. 493.

esp sb. aspen. OE. æspe, ME. espe. Cath. 117.

esp sb. ash(-tree). OE. æsc, ME. esche. Cath. 117.

gem sb. game. Cf. OE. gæmnian, ME. game. CM. 10564.

gev vb. pret. gave. OE. gæf, ME. gaf. CM. 17136.

(kāt-)hek sb. 'tailboard of a cart'. OE. hæcc, ME. hek.

Towne 126/305.

helter sb. halter. OE. hælfter, ME. helter. Cath. 182.

hesp sb. hasp. OE. hesp, ME. hespe. Cath. 188.

hev vb. have. OE. *ic hafa, ME. haf. CM. 430 etc.

hezi sb. hazel. OE. hæsel, ME. hesyl. Pr. P. 288.

jęt sb. gate. Northumb. zæt Lind. 31, ME. gate Towne 53/40, CM. 1264, Cath. 425.

sęk sb. sack. OE. sæc, ME. sek. CM. 4859.

skel sb. scale. OE. sceale, ME. scale. Cath. 320.

welter vb. stagger about. Cf. OE. wealtan, MHG. walzen. welter is for OE. *wæltrian, cf. ME. weltrand Bruce III, 719.

west vb. wash. OE. wascan, ME. wesche. CM. 27547, also wasch CM. 15219.

Note. In kest vb. cast ON. a has become c. Cf. ON. kasta.

§ 43. OE. e + n + consonant has remained inKendal in the following words:

bend vb. bend. OE. bendan, ME bende. Pr. P. 30.

benk sb. bench. (See however § 34.)

end sb. end. OE. ende.

send vb. send. OE. sendan.

In glent vb. look up, and men's sb. kindness, hospitality, e is of Scand. origin representing orig. e. For the former cf. ME. glenten, Swed glänta (Björkman 241), for the latter ME. menske, Trist. 2118, ON. menska = 'humanity', OSwed. mæn'ska = 'goodness', ODan. meniske, menske 'kindness, goodwill' (Björkman 139.)

In tent sb. tent e represents OFr. e, cf. OFr. tente.

§ 44. OE. a + nasal + consonant has become

e in Kendal in a few words. In such positions a other-wise remains unaltered; e. g. land sb. 'land', rank adj. 'rank, close together', tanz sb. 'tongs'.

Examples:

- biley vb. belong. OE. *belangian, cf. langian. MDu. belangen = concern.
- fend vb. provide for (anything). OE. fandian, ME. to fande = conari, niti. Cath. 122.
- Pepk vb. thank. OE. (WS.) dancian, Northumb. donciga. Cook 198. ME. thank CM. 5302.
- đện adv. then. Northumb. Jonne Cook 195, ME. pan CM. 67, pen CM. 300.
- § 45. OE. (Northumb.) \bar{e} and \bar{z} . (*) were levelled under \bar{e} in the ME. period and shortened later to e, which sound they still possess.

Examples:

I. Northumb. ē (WGmc. a).

blęder sb. bladder. Northumb. *blēder, ME. bleddyr. Cath. 34. bręp sb. breath. Northumb. *brēp, ME. breep. CM. Trin. 3573. neber sb. neighbour. Northumb. nehzibur Lind. 67, ME. neghbur CM. 6479.

wepm sb. weapon. Northumb. wepen Lind. 94, ME. wepen CM. 7172.

II. Northum. \bar{x} (WGmc. *ai—i).

help sb. health. OE. *hælp, ME. helthe. Pr. P. 235.

- § 46. In sębm num. seven, sebenti num. seventy, and alębm num. eleven, OE. eo was simplified to e in the ME. period. Cf. ME. seuen CM. 508, seuenti CM. 1486, and elleuen CM. 4088.
- § 47. OE. ā has become e in the word eks vb. ask. Cf. āsciza Cook 13, ME. ask CM. 595. The change in this case is probably later than with bek etc.

§ 48. In gezlin sb. gosling e may represent either Scand. & or OE. ē shortened. Wall cfs. OIc. géslingr. It is however quite as reasonable to derive it from a hypothetical OE. *zēs-ling (for *zōs-ling cf. zōs). Cf. ME. geslyng WW. 63817 and 701. 8.

§ 49. kef sb. cowparsnip (Heraclium spondylium) in all probability goes back to a Northumb. *čēsč (WS. čȳsč) for Gmc. *kunskiz corresponding to Idg. *gnt-ki-s. *gnt is the Schwund-stufe to Idg. *genut, *gonat seen in Gk. *γόνοτ γόνατος 'knee', Goth. knuss-jan from *knussus Idg. *gnuttos.

For Idg. tk = Gmc. *sk cf. Idg. *dnt-ko (Latin *dents Sk. *ô-δοντς) with Gmc. *tunskoz, OE. tusc, Mod. Engl. tusk. (I am indebted to Mr. Wyld for this etymology.)

§ 50. Scand. ei in kęk vb. 'tip up (a cart)' and rens vb. rinse, became & ([+]), which form it usually takes in Kendal, (see § 53) before it was shortened to e. For these two words, cf. Norw. keika Aasen 548 and reinska 592, the latter of which comes directly from the Scandinavian and not through OFr. rincer as Polite English 'rince' does (see Skeat, Etym. Dict. p. 511).

ē.

Kendal ē has the following origins:

§ 51. OE. z + z, $\bar{z} + z$, e + z have become \bar{e} . Here diphthongisation does not seem to have taken place as in most originally open syllables in ME. When z did not follow, \bar{z} etc. usually becomes iz.

Examples:

I. OE. x + z.

dē sb. day. Northumb. dæz Cook 36, ME. dai CM. 390. fēn adj. glad. Cf. Northumb. zefazen Cook 78, ME. fain CM. 1387.

hệl sb. hail. OE. hæzl, ME. hail. CM. 22692. tệl sb. tail. OE. *tæzl, ME. tayle. Cath. 377.

II. OE. $\bar{x} + \bar{z}$.

grē adj. grey. OE. græg, ME. grai. CM. 8288.

hē sb. hay. Northumb. hēz Cook 118, ME. hai CM. 3317.

klē sb. clay. OE. clæz B. T. I. 157, ME. clai CM. 402.

hwē sb. whey. OE. hwæz, ME. whig, whay Lev. 118. 46.

III. OE. e + g.

rēn sb. rain. Northumb. rezn Cook 162, ME. rain CM. 1768. wē adv. away. OE. onwez, ME. awai. CM. 297.

Note. In $f \nmid \bar{f} | \bar{f} |$ sb. flail \bar{f} represents OFr. ae for older a + g.

§ 52. In a few loanwords from Literary English of the 18th century, \bar{e} has supplanted older $\bar{e}o$, which would ultimately give rise to io. Some of the other local dialects, apparently less, affected by the Literary English, keep a diphthong in all cases. Of these, the most important for our purpose is the dialect of Dent (Ellis's D. 31. 111, 7) which has words like dial and bliiez (dale and blaze) where Kendal has del and blez representing older dæl and *blæsian. Wēstrol sb. vagabond is also a loanword from 18th century Literary English. The true dialect form appears in wiost vb. waste (cf. OFr. vaster gvaster).

Note. In men vh. mean from Northumb. *mæna, e instead of normal is is due to an 18th century borrowing from Literary English.

In $sl\bar{e}$ vb. slay from OE. (Northumb.) slāha, *slax became slæx in ME. and was subsequently lengthened to slæx and raised to slē, probably in the 18^{th} century. But perhaps slē may be simply a borrowing from Literary English. (I am indebted to Mr. H. C. Wyld for this explanation of $sl\bar{e}$.)

Examples:

I. OE. a, æ.

- blēr vb. roar (of animals). OE. *blarian, ME. blāren, cf. MDu. blaeren.
- glęz vb. glaze, make shine. OE. *zlasian, cf. OE. zlæs, ME. glas. CM. 10093.
- rēdər adv. rather. Northumb. hraður Cook 117, ME. raper CM. 26566.
- snēk sb. snake. OE. snaca, ME. snake. Pr. P. 461, Alis 5972.

 II. Scand. a.
- dēzd adj. dazed. Cf. ON. dasaor C. and V. 96.
- mēzd adj. confused. Cf. Norw. masa = 'be busy at any thing' 482. OIc. masa chatter, prattle, ME. (southern) masedliche. AR. 272.
- Note. Ofr. a, ae, and ai appear as \bar{e} in the words $\bar{e}d\bar{g}$ sb. age, $g\bar{e}$ adj. well dressed, shown fine, $r\bar{e}d\bar{g}$ sb. rage, and $t/\bar{e}n$ sb. chain.
- § 53. Scand. ei and ey have become \bar{e} in Kendal except where shortening has taken place, as in kek and rens (see § 50). Both these diphthongs probably became \bar{e} as early as the 16th century. There is only one case of \bar{e} representing older ey.

Examples:

- blęk adj. golden yellow (of butter). ON. bleikr, ME. bleike. Hav. 470.
- bētin sb. food by the way. ON. beit, ME. baite. CM. 16931. $f_{\bar{e}}$ vb. scare. ON. fleyia.
- grēn sb. prong of a hay fork. ON. græin, ME. gren. Alis 654. grēdlį adj. proper, decent, honest, etc. ON. greiða.

lęk vb. play. ON. leika.

lęt vb. seek. ON. leita.

skēts sb. 'badly or untidily dressed person'. Cf. ON. skeika = 'go astray'.

slęk vb. smear. ON. slæikia.

slēr vb. walk slowly. Cf. ON. slīor for *slær.

snēp vb. snub check, cut short. Cf. ON. sneypa, ME. snaip. wēk adj. weak. Cf. ON. veikr, ME. weyke. Pr. P. 520.

7.

§ 54. Kendal a has the following origins.

ME. i from OE. e etc. + Scand. i has become a before r in Kendal by metathesis, which probably took place before the 14^{th} century. In the 16^{th} century we get three forms from the above mentioned e and i, viz. -i (f), e (f), and e (f) the first of which has given Kendal e, the second Kendal e, and the third Kendal e.

The first of these, i probably became e (f) in the 17th century, whereas the 16th century e had by then developed into e (f). In the 18th century this e passed into e (f) by the intermediate stage of f, which is heard occasionally even now, in the word f adj. merry. This sound I take to be Ellis's e^{o} (see E. E. Pron. V. pp. 80* and 721).

Examples:

bord sb. bird. Northumb. bridd (late).

gərn vb. complain, grin. OE. grinnian, ME. grennen.

gəs] sb. gristle. OE. gristel, ME. girstelle. Cath. 157. gristle Lev. 147. 81.

kərsn vb. christen. OE. cristnian, ME. crysten.

Note. In dort sb. dirt o represents Scand. i, cf. ON. dritr, ME. drit, MDu. drijt. forl vb. slide represents a Scand. *skrilla. Cf. Swed. Dial. skrilla (Wall 119).

§ 55. ME. i from OE. e, i, y, and also from Scand. y has become s in Kendal before r. This

i (I) was widened and lowered to g (I) in the 16th century and was treated in the same manner as i from metathesis.

Examples:

I. OE. c, i + r.

bork ab. birch. OE. beorc, ME. birk. Cath. 32. forst adj. first. OE. fyrest, ME. first. CM. 8.

smork vb. smirk. OE (WS.) smearcian B. T. IV. 887, Northumb. *smerciza, ME. smirken (Cath. 356, quoted from Stratmann-Bradley).

H. OE. y.

borlor sb. 'waiter at a sheep-clipping'. OE. byrle, byrele, ME. brillare. Pr. P. 51. Cf. beran.

ster vb. stir. OE, styrian, ME, stir. CM, 4662.

tform sb. churn (for older *korn). OE. cyren, ME. kyrne. Cath. 204.

work vb. work. Northumb. wyrca Lind. 99, ME. wirk CM. 1753.

Note. hard up vb. hoard up probably comes from OE. hyrdian, Gmc. hurdjan, cf. gylden and gold Bülbring § 164, Anm. 1). garþ sb. girth, is probably of Scand. origin. The OE. form gyrd has d (hence ME. gürd). There is a ME. girthe in Pr. P. 190 which is from a Scand. source, (cf. ON. gjorþ and gerþ) from which our word is descended (Björkman p. 182). In ber sb. whirr, bang, etc. a represents WScand. y. Cf. ON. byrr, Norw. byr (Aasen 94) = favourable wind. ODan. ber fair wind, ME. byr Towne 3,371 = rush birr Alex Sk. 711, bir CM. 24866 breeze (Björkman p. 205).

§ 56. In der pron. 'those' we have ME, pir, per from ON. peir. gart adj. 'great' from 3reat, ME. gret owes its form to early shortening to *gret previous to metathesis. *Gret would become *girt. In karliu sb. curlew a represents ME. o (corlieu) from OFr. on (courlieu). The origin of herp! vb. limp is uncertain.

8.

§ 57. Kendal v (which only occurs after r) has the following origins.

ME. e from OE. and OFr. e and ON. y has become x after r in a few words. φ (f) here probably remained till the 17th century, passing into φ (1) in the 18th and being in all probability raised to x (1) in the early 19th.

Examples:

I. OE. e.

brek vb. break. Northumb. breca Lind. 12, ME. brek CM. 872.

strets vb. strut. OE. streccan, ME. strek. CM. 940.

tren! sb. 'wheel of wheel-barrow'. OE. trendel, ME. trendyl Pr. P. 502 from *trindan, *trand, *trundon. See Skeat, Etym. Dict. p. 666.

II. OFr. e.

drus vb. dress. OFr. dresser, ME. dressen.

pres vb. press, persuade. OFr. presser.

treml vb. tremble. OFr. trembler.

III. Scand. ý.

prest vb. thrust. Sc. prysta, ME threst. CM. 22683.

§ 58. ME. i from OE. i (ie) has become v in Kendal after r in a few words. Here i (f) was probably lowered to e (f) in the 17th century, passing into v later.

Examples:

brem sb. brim. OE. brim = 'surge', ME. brym, brim 'margin of lake' (see Skeat, Etym. Dict. p. 77).

bremstn sb. brimstone. OE. *brinstan, ME. brinstan. CM. 12842.

9 9 9

granstn sb. grindstone for OE. *zrind-stän. Cf. OE. zrindel = 'gnashing', ME. grindstone. Cath. 165. grynestone Lev. 168. 18.

red! sb. riddle for OE. *hriddel. Cf. hridder WW. 141. 12.

tsz-rem 'case used in making cheese'. OE. rima, ME.
rim. Pr. P. 434.

Note. * in prent vb. print corresponds to ME. i, OFr. ei (empreinter).

§ 59. Words of uncertain origin. brekin-ket! sb. 'kettle used for boiling milk in cheesemaking'. redstjek sb. 'stake to which cattle are fastened in the stall'.

a.

Kendal a has the following origins.

§ 60. OE. a both with and without the nasal combinations has remained a (J-). In the case of the combinations m, n + cons. lengthening has never taken place, at least in this dialect. Scand. and OFr. a underwent a similar fate. Even in the words which have 5 (14) and 2 (1) in Polite English, the Kendal forms have a, which goes back to those x-forms which existed by the side of 5 in the 17th century (see Ellis EE. Pron. IV, pp. 1001—1018). Cf. want, hant. In a few words æ has remained short, where it would otherwise have become io owing to the forms used being taken either 1) from the short ME. genitives and datives of l- and rstems, as ladl sb. ladle. Cf. ME. hladles: OE. hlædel. fader sb. father, ME. fader, OE. fæder, or 2) from the compounds as sam sb. shame, cf. samfist adj. shamefaced, ME. shamfasst.

Note. In ask sb. newt, halide sb. holiday, and swap vb. exchange. OE. ā was shortened already in the ME. period (cf. ME. halidai and swappen [from swap]). In fat adj. fat, last vb. last,

mad adj. mad, rat/ vb. eructate, Northumb. & ([*) was retracted and shortened to a (]**) in the ME. period (see Morsbach, ME. Gram. § 66). In a few words Northumb. o and y became ME. e and were levelled under OFr. and Scand. e which became & ([*]) before r in the 17th century and remained as such during the 18th becoming a (]) in the 19th. (E. g. warld sb. world, wasn vb. grow worse, parlif adj. dangerous, sare vb. serve, feed (animals), skart adj. with the skin knocked off, tarn sb. tarn, ME. terne (Allit. Poems Morris B. 1041), OIc. tiorn, Norw. tjorn, tjodn, war vb. waste, cf. ON. veria, wards sb. weekdays ON. hverr.)

Examples:

are sb. arrow. OE. earg.

as-buərd sb. 'box for keeping ashes in' for *ask-buərd Northumb. asca Cook 12, ME. asken n. pl. Hav. 2841, aske Pr. P. 443.

bat sb. batch. OE. *bæcc, ME. bacche. Pr. P. 21. Cf. Swed. bak.

dast vb. stun, for OE. *dastlian, ME. *dastelen.

daft adj. foolish. OE. zedæft, ME. deft. Pr. P. 116.

fals adj. fallow. OE. fealo, ME. falou. CM. 1265.

hag vb. cut, for OE. *haccian. ME. hacken, hakken. Pr. P. 221. Cf. MDu., MLG., MHG. hacken.

hagl vb. bungle spoil, for ME. *hackelen. Cf. Du. hackelen = mangle stammer.

laf vb. laugh. Northumb. hlæhha Cook 115.

lafter sb. laughter. OE. hleahtor.

lafter sb. brood for OE. *leahtor. Cf. leczan (see Wall 109). mīslark sb. mealchest. OE. earc.

parek sb. paddock. OE. pearruc, ME. parrok. Pr. P. 884. ratn sb. rat. OE. rætt, ME. raton. Cath. 300.

snaf! vb. act queerly. ME. snaffle Lev., ODu. snabel (Hexham),
MDu. snavel = 'horses' muzzle. Cf. NHG. Schnabel.
Also Engl. sniff.

- stak sb. stack. OE. *stacc, cf. Swed. stack, ON. stakkr; is probably related to styuk = OE. *stōcc. The Ablaut relationship is Idg. *stoghnó: *stōghnó. (I am indebted to Mr. Wyld for this etymology.)
- fade sb. shadow. OE. sceadu, ME. schade. CM. 20883. bak sb. thatch. OE. baca.
- walf adj. tasteless, saltless. Cf. Lonsdale walla-ish Peacock 91. ME. walhwe Pr. P. 515.
- makeli adv. partly. Cf. Northumb. zemæcca Cook 88, OE. zemæc, ME. makly Pr. P. 322.
- § 61. In the words given below a is of Scandinavian origin.
- adl vb. earn. ME. addlenn (Orm), ON. oblask.
- asl-tiup sb. molar tooth. ME axyl-toothe Cath. Dan. axel-tand (see Björkman 200).
- blader vb. chatter. ON. bladra.
- brakn sb. bracken, fern. ME. brakyn WW. 644. 17, brake Pr. P. 47. Cf. Swed. bräken, ON. berkni = *brukni (NED. I. 1044). Björkman thinks it may be cognate with Swed. dial. brake = reed, brakel ugly bushes, nettles, thistles etc. (see p. 232).
- gab sb. gab garrulity. ME. gabbyn (vb.) Pr. P. 183, cf. ON. gabb = mockery, gabbas vb. mock. Perhaps this word is native (Björkman p. 246).
- gadfii sb. gadfly. ME. gad Cath. 147, Pr. P. 184, Lev. 7. 30. Cf. ON. gaddr, Norw. gadd. Assen 204.
- haver-trīed sb. oatcake. ME. havyr Cath. 179, ON. hafri, Dan. havre, OLG. haboro (cited by Wall see Björkman 213).
- kafl vb. entangle. Cf. Norw. kavla Aasen 107, kavla sb. cylinder ib.
- rag sb. hoarfrost. Swed. dial. raggja mist seamist, Dan. rog, raag small rain (Wall p. 114).

sakles adj. innocent. ON. saklauss, Norw. saklaus (Aasen). staker vb. stagger. ME. stakeryn Pr. P. 471, ON. stakkra.

Note. bask vb. bask. ME. baske (Palgrave) basken (Gawaine) according to Skeat. (Etym. Dict. see bask) is from ON. babask or perhaps bakask. Björkman however (pp. 136 and 202) derives it from Scand. baska shown in Norw. baska = splash in water (Aasen 43) and NE. dial. bask = beat severely (see EDD. I. 177).

§ 62. In the following words a is of OFr. origin.

alsks vb. vinegar.

badžer sb. small corndealer. OFr. bladier (see Skeat, Etym. Dict. p. 47).

frap vb. plutter. OFr. frapper.

karen sb. carrion. OFr. caroigne.

sakstn sb. sexton.

tart sb. tart.

Note. In the words brat = apron, krag sb. crag, las sb. lass, plad sb. plaid, a is of Celtic origin.

§ 63. OE. a before m, n + the stops p, b, t, d, has always remained short in Kendal, even where Polite English has now \bar{s} from 16^{th} century au.

Examples:

bulstay sb. dragonfly. Cf. OE. stingan.

gandrin sb. gander (rare). OE. zan(d)ra.

han! sb. handle.

kram! vb. crawl. ME. crampelen, crampe Pr. P. 100, OE. crampiht.

ray adj. wrong. OE. wrong, ME. wrang. Iw. 3134.

rayk adj. close together. OE. ranc, cf. rinc. ME. rank 16040.

survay sh. bootlace. Northumb. pwong Cook 197.

waykl adj. weak, lax, flabby. OE. wancol.

Note. In ans sb. 'awn of barley' a represents orig. Scand. a. Cf. ON. ogn gen. agnar. For hank sb. hank cf. ME. hank tie up.

CM. 16044, Swed. hanka. tan is also of Scand. origin. Cf. ON. tange 'spit'. The etymology of ranl bok = 'piece of word from which chain is suspended in the chimney for pots etc.' is uncertain Wall cfs. Dan. dial. raan (p. 115). In antez conj. 'in case' a represents a byform *anters by the side of the usual ME. aunters CM. 454 (from OFr. aventure). hant vb. haunt and ramp vb. trample represent OFr. hanter and ramper ME. hanten Plowman's Crede 771, rampand CM. 7104 'ramping, climbing'.

§ 64. Words of uncertain origin.

bad adj. bad.

dżanek adj. honest.

frats vb. quarrel.

danst sb. neerdoweel.

klam vb. starve.

lagin sb. stave of a cask.

 $la \int k \bar{o} m$ sb. large comb. Cf. Mid.-Yks. lash = 'comb out'.

lalp sb. long, tiresome journey after anything.

maf! sb. act foolishly.

santer vb. saunter.

slas vb. clip a hedge.

taglt sb. scamp, scoundrel.

tsats sb. small potatoes.

wamp sb. wasp.

ā.

§ 65. Kendal ā is probably in most cases a development from older ō, itself coming from 16 c or ME. au. In the case of hwār adv. where; ME. ā (CM. 1243 quār) seems to have persisted till the present day. gā vb. 'go' and hwā pron. who (cf. Northumb. zaað Cook 92 and hwā Cook 19), seem also to have kept ā throughout. In spār vb. spare we may have quite late lengthening of a before r. In the words dāb vb. 'daub', sās vb. scold and dāāndis Hirst, Anglist. Forschungen. 16.

sb. jaundice, an older \bar{s} (\bar{s}) sound has been unrounded and raised to \bar{a} (\bar{s}).

OE. e + r in a few words has become $\bar{a} + r$ in Kendal, through 16^{th} c. $\approx 17^{th}$ c. \approx and 18^{th} c. \bar{a} . OFr. e + r has developed in precisely the same manner.

Examples:

I. OE. \tilde{a} and $\tilde{a} + \tilde{a}$.

ā vb. owe. Northumb. āza Cook 6, ME. āgh CM. 1168. ān adj. own. Northumb. āzen, ME. āghen. CM. 124. dra vb. draw. Northumb. draza Cook 41, ME. draw CM. 222.

hā in kathā sb. haw-thorn. OE. hazu, ME. hag. CM. 9886.
nā vb. gnaw. Northumb. znaza, ME. gnāghe. Hamp. Ps.
CXVIII 40*.

sā sb. saw. OE. sagu, ME. sagh. CM. 27376.

II. OE. a + h.

sā vb. pret. saw. Northumb. saeh Cook 169, ME. sāgh CM. 886, saug Horn 125, 167.

III. OE. \tilde{a} and $\tilde{a} + w$.

bla vb. blow. Northumb. inblawa Lind. 57.

krā sb. crow. OE. crāwe B. T. I, 169.

kok-krā sb. cock-crow. Cf. OE. crāwan, B. T. I, 169.

mā vb. mow. OE. māwan.

nā vb. know. OE. cnāwan.

ra sb. row. OE. raw and ræw.

taz tastiks 'pieces of bark used for tying twig of a broom together'. Cf. OE. zetāwe.

prā vb. throw. Northumb. *prāwa WS. prāwan.

§ 66. Scand. á appears as a in the following words: la adj. low. ON. lágr, ME. lagh. CM. 18166. wam! vb. roll about. ME. wamlin 'feel sick', 'nauseo' Pr. P. 515. Cf. Swed. dial. vamla = 'belch', Dan. vamle vb. 'nauseate loathe' (see Wall p. 126).

§ 67. OE. a+l+d appears as a in all adj. old. Northumb. āld Cook 8, ME. āld CM. 117. hald sb. hold. See hold § 83.

fald sb. yard. OE. fal(o)d, sheep-fold B. T. I, 270. kāld adj. cold. Northumb. cāld Cook 27, ME. cald CM. 3563.

Note. OFr. ā has become ā in kām adj. calm, and pām sb. 'palm' (of hand), krāl vb. crawl represents Dan. kravle, ON. krafla vb. 'paw'.

§ 68. OE. e + r has become a in fader adv. further.

hard vb. pret. heard. Northumb. herde Cook 114. hap sb. hearth.

larn vb. learn. Northumb. leorniza Cook 131. tar sb. tar. OE. teoro, teru, ME. terre. Pr. P. 489.

§ 69. Words of uncertain origin: drap vb. drawl.

flats vb. coax, flatter.

mander vb. maunder.

mapment sb. nonsense.

trap vb. 'wander, trapes'.

ų.

Kendal 4 has the following origins.

§ 70. 1) OE., Scand. and Celtic u and also OFr. ou have remained short in Kendal in all positions even before the combinations m, n + consonant, where we would expect u from ME. u. In such cases u is due to the fact that the forms in question are either borrowed from compounds, wh. of necessity had a short vowel in

the first member, or are simply formed by analogy. OE. u was probably the high-back-narrow-round (1) (see HES. § 412). In the ME. period both wide and narrow u existed side by side (HES. § 661). The Kendal wide form (*1) is no doubt of ME. date, the underrounding taking place about the 17th century (HES. § 793).

Examples:

OE. u.

byte sb. butter. OE. butere.

kym vb. come. OE. cuman.

mud. sb. mud. ME. mud Pr. P. 347, cf. MLG. modde, mudde. In all probability native.

Note. stut vb. stutter (ME. stotin Pr. P. 477 'titubo' stute Palsgr. stutte Cath. 376) is probably native although no OE. forms are known. It is the Schwund-stufe to an iu, au, u, grade and has cognates in OIc. stauta = 'push', stytta = 'shorten' from *stutjan, MHG. stozen (stiez).

§ 71. 2) Scand. u appears as u in the following words: bul sb. bull. ME. bull CM. 10386. Cf. Dan. bul, ON. buli. bulk sb. bulk. Cf. ON. bulk = 'heap', ODan. bulk = 'flaw in a vessel' (see Björkman p. 231).

byr sb. bure. ME. bure Cath. 48, bur Pr. P. 516. Cf. Swed. burre, Dan. borre.

gyst sb. gust. ME. gust. Cf. Ic. gustr (cf. gjosa), Swed. Dial. gust = 'flash from an oven' (Rietz) (see Skeat, Etym. Dict. p. 249).

mul sb. dust (from peats).

Note. Hul in pigul 'pigsty' is probably of Scandinavian origin, no OE. forms being known although there is an OLG. (bi)-hullian. It is the same word as ME. hule sb. 'hut shelter' Rel. I, 224, hul Lev. 185, 19. Cf. ON. hylja, ODan. hylle (see Björkman p. 243). Bush bush is probably of Scand. origin or perhaps Latin origin, cf. ME. busk CM. 3743, Dan. busk, Swed. buske. Björkman p. 187.

§ 72. 3) OFr. o, ou, u have become u in Kendal in the words

hut sb. hut. Cf. OFr. hotte from OHG. hutta.

kupl sb. couple. ME. couple, OFr. couple, cople.

muni sb. money. ME. monie, OFr. monoie.

supe sb. supper. ME. soper Fl. and Bl. 23, super Hav. 1762, OFr. super.

Note. y in the words fun sb. fun, krydz sb. curds, ryb vb. rub, put vb. put, is probably of Celtic origin. Cf. OIr. foun = delight (Skeat p. 223), OIr. cruth (Skeat p. 114), Gael rub, Gael put (Skeat p. 480).

§ 73. 4) OE. u before nasal + cons. has remained in Kendal in the words

bun(d) p. p. bound. OE. zebunden.

grund sb. ground. OE. grund.

pund sb. pound. OE. pund.

tum! vb. tumble. Cf. ME. tomblyng = juggling CM. Trin. MS. 13195, tumbel = dance CM. 13140.

Note. lump sb. lump, is perhaps native. Cf. ODu. lompe rag tatter. But cf. Norw. lump Assen p. 461, Swed. lump Rietz also Norw. lopputt, Ic. loppinn.

In bunf sb. bunch, we have probably Scand. u before n + k. Cf. ME. bunke Deb. Soul and Body, Vernon MS. Ic. bunke pile, heap Norw. bunke 'heap' (Aasen p. 90), Swed. dial. bunke (Rietz).

§ 74. 5) OE. y has become y in Kendal in the words fypn sb. cowshed and wyrm sb. worm. Here y (f) became u (f) in the ME. period (HES. § 662) via the intermediate stage of (f). This u was widened to y in the 17th century.

Note. In kruts sb. crutch u answers to i in OE. cricc (see B. T.). In this case u rests upon a ME. form with u which is Southern or Midland and hence kruts is a borrowing, but an old one. The form crycc is a by-form, corresponding to cricc and therefore does not represent OE. y from *u-i.

§ 75. 6) ME. $\bar{\rho}$ from OE. o and $\bar{\sigma}$ has become ψ in Kendal in a few words.

In the 13th century this o (3th) was overrounded to e (3th) which became e (3th) in the 16th and was shortened and widened to e (1) in the following century.

Examples:

L OE o except before $r + cons. < \varphi$

frub sb. shrub. OE. scrobsčir AS. Chron. 1094, also scrobbesbyriz AS. Chron. 1016, ME. scrob.

sb. shovel. OE. sceof(o)l.

fut vb. shoot. OE. scotian B. T. IV, 889, ME. schotien Prk. Cons.

46m sb. oven. OE. of an WW. 201, ME. ovene Pr. P. 372, oven CM. 2926.

II. OE. o before rd, $r\bar{p}$, rs < q.

dyst vb. pret. 'durst'. OE. dorsta, ME. durst. CM. 1820. wyrd sb. word. Northumb. word Cook 213.

wurp sb. worth. Northumb. word, ME. worth. CM. 1739. wusst sb. worsted (derived from the place-name Worsted),

cf. OE. Wrdestede in Kemble, Cod. Dipl. IV. Charter 785, see Skeat, Etym. Dict.).

III. OE. $\sigma < y$.

blyd sb. blood. OE. blod.

bryder sb. brother. OE. broder.

gud adj. good. OE. zod.

myder sb. mother. OE. modor.

myns sb. month. OE. monab.

ryder sb. rudder. OE. röbor.

any adv. enough. OE. genöz.

§ 76. 7) OE. a has become y in Kendal in a few words. Here the shortening dates from about the 15th or century.

Examples:

dyk sb. duck. OE. duce, ME. dooke. Pr. P. 125.

dyv sb. dove. OE. *dufa in dufe-doppa = 'pelicanus'. Cf. OS. duva, Goth. -dubo, ME. dove. CM. 1895. duu CM. 10778, dove Pr. P. 128.

hylst sb. owl. For *alet cf. OE. ale.

kyd vb. pret. could. Northumb. cūð Cook 33, ME. cuth CM. 2009.

syk(in) vb. deceive, cheat. OE. sūcan, ME. sūken.

tusl vb. tussle. Cf. ME. to-tūsen, LG. tuseln (Skeat, Etym.

Dict. p. 682). MHG. erzûsen, OHG. zirzûson.

đụ pron. thou (unstressed form of đựu). OE. bū.

§ 77. Words of uncertain origin:

bump garn sb. a coarse woollen garn.

pluk sb. 'lungs etc. of sheep used for cat's meat'.

sluts sb. slutch.

wym! sb. auger.

0.

§ 78. Kendal o (3) only occurs in the two words ko vb. come and wino vb. winnow, which usually appear as kym and winy.

J.

Kendal 2 has the following origins.

§ 79. OE. o, Scand. o, and OFr. o have remained o in Kendal in close syllables except before l + cons. and r + cons.

Examples:

I. OE. o.

brop sb. broth, soup. OE. brop, ME. brothe. Pr. P. 53. dokn sb. dock (plant). OE. docce, ME. dockan. Cath. 103 (Skeat, Etym. Dict. p. 175).

- foks sb. fox. OE. fox, ME. fox. CM. 7151.
- glop vb. stare. Cf. ME. gloppend 'frightened, dazzled'. CM. 1288 also glope 'surprise' Townl. 174/264. Cf. MDu. gleopen, OFris. glup, Norw. glopa 'gape' gluppa 'gape stare' Aasen p. 2289 and ON. glapna. Most probably native.
- hog sb. sheep. ME. hoge Alex. Sk. 4278, hog CSc. 66, hogrel Lev. 55, 38, hogger 'breeder of sheep' CM. Gott. MS. 1501.
- holin sb. holly. OE. holezn, ME. holyn. Cath. 187.
- jok sb. yoke. Northumb. zeoc Cook 91, ME. yock CM. 21267.
- loped adj. congealed (of cream and blood). ME. lopren, lopred Ps. CXVIII. 70, lopird Prk. Cons. 489.
- opņ vb. open. Northumb. zeopniza Cook 93, ME. oppen CM. 1337, open CM. 1760.
 - § 80. II. Scand. o appears as o in
- bpn pp. of laup, leap. ME. lopen Gaw. 1413, CM. 18302.
- klok-hen sb. sitting-hen. Cf. ME. cleken = 'hatch', NE. Dial. cleck and tletš (Wright, Windhill § 73), cf. ON. klekja, klakti, Goth. niuklahs, Norw. klekkja. Aasen p. 363. klok probably represents *klak (Wall p. 93/94). Björkman thinks that the forms in tš represent native words with ċċ *cleċċan (see p. 146).
- kələp sb. slice of bacon. ME. colloppe Pr. P. 88. Cf. OSwed. kollops (see Stratmann-Bradley).
- Townl. 138/677. Cf. ON. slockna, Norw. slokna. Aasen 706.
- § 81. III. OFr. o appears as o in bonj adj. pretty, kok sb. cock, promjs vb. promise. In bot vb. mend patch o goes back to ME. o from OFr. ou (bocchen: boucher). In podj

sb. porridge we have probably a ME. shortening of the OFr. σ in potage, order sb. order is in all probability a borrowing from Polite English. The real Kendal form would be worder.

§ 82. OE. o + r + cons. seems to have had two developments in Kendal.

- 1. to \bar{u} where $\delta < ME$. $\bar{\varrho}$.
- 2. to a where o has remained short.

The former development appears where in OE. d followed r, the latter where n followed. However it is possible that the second case is simply a borrowing from Polite English for a phrase exists tomus not not to-morrow night. The Furness and Cartmel dialects have uu according to Ellis, e. g. kuurn (see EE. Pron. V. on D. 31, VIIb p. 629). This is said to be old-fashioned. I have seen in specimens of another Westmoreland dialect the form 'būsrn' spelt booarn.

Examples:

IV. OE.
$$o + r n < o$$
.

born adj. born.

horn sb. horn. Northumb. horn Cook 117, ME. horn CM. 6709.

kərn sb. corn. Northumb. corn Cook 30, ME. corn CM. 2148.
mərnin sb. morning. Cf. Northumb. morgen Cook 145,
ME. morning.

Note. In storkn vb. congeal we have Scand. o, cf. ON. storkna, Norw. storkna. Assen 747 (Wall p. 119). Lord sb. lord is borrowed from Polite English. The true Kendal form would be * I_i ord (cf. Ellis V. 761 glenfarquhar leerd). In sori adj. sorry o represents a ME. shortening of \bar{o} from OE. \bar{a} . This is likewise borrowed from Polite English.

§ 83. OE. ā in hodņli adv. continually from *hālden-lic became au in the 16th century passing into ō in the

17th through the intermediate stages of Ji and Ji. Hod vb. hold instead of *hāld is due to analogy with this hodņlj. A substantive hāld 'hold' from an OE. *hāld actually occurs — though often supplanted by hod.

§ 84. OE. σ in fodor sb. fodder, and soft adj. soft was shortened to $\check{\sigma}$ in the ME. period, remained such in the 16th century, (Ellis EE. Pron. III, 881 ff.) and has undergone no further change.

o in tof adj. tough, and trof sb. trough probably goes back to a ME. form with \tilde{o} (I). OE. toh must have become $*to^u\chi$ (t) χ) in the 13th century but there was probably a derivative from it $*to\chi$. About the 15th century there must have been a $*ta\chi$ from $*t\bar{o}^u\chi$ which gave rise to 16th century taux and tau quoted by Smith (Ellis EE. Pron. III, 906). Kendal tof is to be traced back to 16th century, *tof from ME. $to\chi$.

§ 85. In bog sb. bog and bog! sb. ghost o is probably of Celtic origin. Cf. for bog OIrish bocc, for bog! Welsh bwg = 'goblin', bwgwl 'threat', bygylu 'threaten', Gael. bocan spectre (see Skeat, Etym. Dict. p. 81. 'bug-bear').

§ 86. Words of uncertain origin.

skrog sb. bushy spot, scrub. Björkman p. 132, Wall p. 118.

i

§ 87. Kendal i only occurs in the words ibmin, klin, fip and a few others, which latter sometimes appear with i (f) (see § 14) Northumb. & and ē (t and t) both became ē in the ME. period and this ē was subsequently narrowed and then raised to ā about the 15th century, shortening probably taking place in the 16th century. fip sb. sheep comes from Anglian scēp rather from Northumb. scīp (Bülbring § 154) which would become *faip in Kendal.

Examples:

ibmin sb. evening. Northumb. öfern Lind., ME. euening CM. 6385.

klia adj. clean. Northumb. cleane, ME. clene.

ī.

Kendal i has the following origins.

§ 88. OE. e in open syllables in two words will adv. well and stwin adv. prep. 'between' has become i instead of is. This e was lengthened to f ((*)) in the ME. period (cf. Morsbach § 64 under 'fakultative Dehnung') and was probably so in the Dialect of the Cursor Mundi (see Hupe p. 136*). It was narrowed and raised to setween the 14th and 16th centuries and was certainly set by the 16th (cf. bitwin Ellis III, 881). In bism sh. besom we probably have a ME. open syllable (see Luick § 539) beseme which was treated in the same way as in the two cases above (cf. bisem Miège, Ellis IV, 1003).

§ 89. OE. $\bar{e}o$ ([*]) in friz vb. freeze was monophthongized to \bar{e} ([*]) (HES. § 642) in the ME. period and became i later along with \bar{e} from older e. Northumb. e in gis sb. geese, grin adj. green, was unrounded to \bar{e} in the ME. period and subsequently treated in the same way as \bar{e} from older e. Tim vb. 'make empty, pour out' which Wall regards as probably native, is perhaps of Scand. origin. Cf. ON. toma = 'make empty' from tomr = 'empty'. The OE. tom means 'free from' for which cf. OS. tomi(g) 'frei von', OHG. zuomig = 'vacans', and the senses of ME. tēmen and ON. tōmr agree so much better than tēmen and OE. tōm that there can be little doubt of their Scand. origin (see Björkman p. 256).

§ 90. Northumb. \bar{e}_3 (from older * \bar{e}_{03} and * \bar{e}_{33}) appears as $\bar{\epsilon}$ in Kendal. This \bar{e}_3 became \bar{e} ((*) in the ME. period (but cf. Hupe p. 142* who believes that $e\bar{\epsilon}$ in CM. was wide) and was subsequently raised to $\bar{\epsilon}$, the sound it now possesses.

Stī sb. ladder has for its nearest cognate OE. stiz, which would in all probability give Kendal *stai. Wright (Windh. § 94, 158) derives this word, and also skrīk (cf. OSwed. skrīka) and tīl sb. 'tile' from original ī. It is, however, more likely that stī and tīl go back to ME. *stē, *tēl in which ē would naturally become ī in the 16th century (see also Skeat, Etym. Dict. p. 568 on sneak).

Examples:

drī adj. 'tedious long'. Northumb. drēze, ME. drēze. Alex. 2091.

sb. fly. Northumb. flēze (Dur. Bk.), ME. flei. CM. 5989. sb. eye. Northumb. ego Lind. 23, ME. ei CM. 4078. vb. lie 'mentiri'. Northumb. *lēza, ME. lei. CM. 689.

§ 91. Northumb. e + ht has become i in Kendal. The old Northumb. e was probably lengthened after loss of h to e ((*) about the 14th century and was raised to i in the 16th. The Cursor Mundi, however, has i (f) + ght, e. g. light 293, night 390, right 1618, sight 184, ie 'half long open i', according to Hupe § 72. This would undergo lengthening before the 16th century and give Kendal *ai, which is unknown in words coming from Northumb. e + ht.

Examples:

fit sb. flight. Northumb. *fleht, cf. ME. flight CM. 9215.
fritn vb. frighten. Cf. Northumb. fyrhto Lind. 31.
lit sb. light. Northumb. leht Lind. 60, cf. ME. light CM. 293.

ltt adj. light. Northumb. leht Lind. 60, cf. ME. light CM. 1781.

nt sb. night. Northumb. *neht, cf. ME. night CM. 390. rt adj. right. Northumb. reht Lind. 74, cf. ME. right CM. 1618.

hwil-rit sb. wheelright. OE. *hwelwyrhta, ME. whelwryght. Cath. 415.

st sb. sight. Northumb. *zeseht, ME. sight. CM. 184.

Note. tait for *tft is a borrowing from Polite English. Cf. ME. tIht beside biht. Although no OE. form is known it is probably native. ON. Fettr (= *pihta R) is cognate but our word can not be borrowed from it.

§ 92. Northumb. \mathscr{E} (1) and \check{e} (1) (see Lind. Dur. Rit. p. 32) were both levelled under \check{e} , in the ME. period in the forerunners of the Kendal dialect, seeing that it makes no distinction between ME. \check{e} and \check{e} (see Luick § 200) treating them indifferently as i, i, i, and \check{e} . This \check{e} (1) was raised to \check{e} (1) in the 16th century and has remained so ever since in these cases. The shortenings to i, e. g. klin adj. 'clean', ibmin sb. 'evening', date from the 16th century, the widening of i to i taking place in the 17th century (cf. Ellis, EE. Pron. IV, 1001 ff.). Where we now have e as in bleder sb. bladder, neber sb. neighbour, the shortening probably took place in the 13th century (Morsb. § 60).

Note. OE. \bar{e} in brid vb. breed, $k\bar{i}p$ vb. keep has become \bar{i} in Kendal. $F\bar{i}tiyz$ sb. pl. footprints is probably formed from $f\bar{i}t$.

Examples:

I. Northumb. \bar{x} (= Gmc. $ai \cdot i$).

brīd sb. breadth. WS. brædo, Northumb. *brædo, ME. brēde. Pr. P. 49.

rīþ sh. wreath. Northumb. *wræþ, ME. wreath. Lev. 21, 323.

II. Northumb. ē (WGm. ā).

dīd sb. deed. Northumb. dēd Lind. 17, ME. dēd CM. 1107.
mīdə sb. meadow. Northumb. *mēdu, ME. medu. CM. 4562.
nīdi sb. needle. Northumb. nēdle Lind. 67, ME. nēdle Pr. P. 3512.

rid vb. read. Northumb. rēda Lind. 74, ME. rede CM. 597.

§ 93. Scand. ei in riden adj. 'peevish, cross' (cf. ON. reiër = angry) became ξ in the ME. period and was subsequently narrowed and raised to ξ . Its usual development is to ξ . In $d\xi$ vb. die, ME. degen we may have Scand. ey ME. e3, or perhaps native *ea. Cf. *deagan, Northumb. *dega for Gmc. *daujan (see Luick § 166) which would certainly become ME. *degen, 16th century *dī.

2.

Kendal a has the following origins.

§ 94. ME. e after r from OE. æ and i has become a, in the words rast vb. rest. Northumb. ræsta Cook 161, ME. rest CM. 1079 and ranf sb. burly thickset man, cf. OE. rinc, ME. renk Gaw. 303. a in rad adj. red, and frand sb. friend represents possibly ME. ĕ from older ēa, ēo. In all these cases ę probably remained till after the 17th century and became o (1) in the 18th, beeing narrowed to a (1) during the 19th.

§ 95. ME. \ddot{u} from OE. \ddot{u} and u has passed into a in the words kad could, fad should, masl sb. mussel (cf. muscle Alex. Sk. 5469). In the first two cases, the unrounding is due to secondary stress. OE. \ddot{y} and \ddot{y} seem to have become \ddot{u} ME. period in a few words such as fat/kck sb. shuttlecock, kaslop sb. rennet bag, cf. OE. $\dot{c}\ddot{y}s$ -

lybb. The more usual development of OE. y is to i (see § 35). Here y (f) must have become u (f) at some time in the ME. period and then have been later widened and unrounded (see HES. § 798). In rad up vb. tidy we probably have Scand. y cf. Norw. rydia Aasen 621 (OIc. hrydia, see Wall § 115). OFr. o has become a via *u, in bakl sb. good condition, e. g. i gud bakl for wark.

Ō.

Kendal δ has the following origins.

§ 96. OE. and OFr. \bar{a} before l + consonant remained a (J_t) until the 16th century, when they were diphthongized into au (Ellis EE. Pron. III p. 881 ff.) which become \bar{s} (J) in the 18th century through the intermediate stages of Jf and Jf. This \bar{s} was subsequently raised to f_{t-} , its present sound.

Examples:

OE. a + l + consonant.

bok sb. rafter. Cf. OE. balc, ME. balke. CM. 1671.

hōf sb. half. Northumb. hālf Cook 110, ME. half CM. 973.

ko vb. call. WS. ceallian, Northumb. *cālliza, ME. cal(l).

smō adj. small. Cf. OE. smæl = narrow, ME. pl. smalu.

The change of sense here is due to Scand. influence.

sot sb. salt. Northumb. salt Cook 168, ME. salt CM. 2855.

- sov sb. salve (for sheep). Cf. WS. sealf, Northumb. *sālf, ME. salve. CM. 27383.
- stōk sb. stalk. Northumb. stālca, ME. stalke. CM. (Fairf.) 8036, Pr. P. 472. Cf. ME. stale = stalk, OE. stæl, stēl, Du. steel.

wok vb. walk. Northumb. *walca, WS. wealcan, ME. walke. CM. 1784.

Note. ō in bō sb. ball and skōd vb. scald represents OFr. ā before l, cf. OFr. balle (cf. OHG. palla palli), ME. balle Pr. P. 21, OFr. eschauder, *escalder, ME. scaldyn Pr. P. 442.

§ 97. Kendal σ in a few words is the result of a late borrowing from Polite English. Perhaps it dates from the 18th century. Older borrowing would give rise to $\bar{\psi}$.

Examples:

fo sb. foe.

fom sb. foam.

lof sb. loaf.

gost sb. ghost.

lom sb. loam.

strök vb. stroke.

§ 98. OE. medial $\bar{o}w$ seems to have become \bar{o} in Kendal, whereas final $\bar{o}w$ has become au. In the former case it has undergone practically no change until its lowering to \bar{o} (} \rightarrow) in the early 19th century (Luick § 114). In the latter case $\bar{o}w$ probably became ME. ρu (\uparrow) not $\bar{o}w$ (} \uparrow).

Examples are:

so vb. flow.

gro vb. grow.

Note. In $\int \bar{o}$ vb. shew, \bar{o} represents Northumb. a, cf. sceawiza Cook 166. In $d\bar{o}n$ sb. dawn cf. ME. dawening and $l\bar{o}$ sb. law, older \bar{a} has undergone rounding to \bar{o} , if these be not mere late loanwords. Very old people actually use forms like $d\bar{a}n$, $l\bar{a}$, which have otherwise died out.

§ 99. Scand. ρu has become Kendal σ in the word $g\bar{\sigma}m$ sb. goodsense. Here ME. ou was f, not f or else we should get *gaum, which is unknown in the dialect. Cf. ON. $g\rho umr$, ME. goum (see Björkman p. 70).

§ 100. Words of uncertain origin:

bol vb. roar (of cattle).

*fotor vb. thrash (barley etc.) now quite obsolete. krok vb. die (of animals).

ju.

Kendal ju has the following origins.

§ 101. OE. $\dot{e}o + w$ was monophthongized to eu in the ME. period. This eu passed into \dot{y} (II) in the 16^{th} century, undergoing diphthongisation in the latter part of the 18^{th} century (see Ellis EE. Pron. I, p. 164, 166, 171, III, p. 796, HES. § 693).

Examples:

brig vb. brew. OE. breowan
klig sb. clew. OE. cliwen and cleowe.
rig vb. rue. OE. hreowan, ME. rewe. Hav. 967.
sig vb. sew. OE. seowan.
trig adj. true. OE. setreowe.

§ 102. OE. s before the stops t, d, k and nasals m, n and when final with no consonant following, has become ju in Kendal and also is (§ 38). In Northern ME., s (}) and OFr. u (f) had probably the same sound (see Luick, Unters. § 119) perhaps for as in Modern Swedish, which sound must have retained its peculiar character throughout the 16th and 17th centuries (Luick § 119) and was only diphthongized about a century ago. The mixed sound still exists in kyujiur, udder owing to the fact that 'j' hindered diphthongisation. There is another conjecture mentioned by Luick, who thinks that s may have been overrounded to su (}) giving 16th century a. This a would give yu in Kendal from older an.

Sweet (HES. § 693) gives $\{ \}$ as the northern form of \bar{o} in the ME. period adding that OFr. $\{ \}$ was levelled under it. In some cases this iu itself has passed into \bar{p} (§ 138) both forms being preserved, e. g. kriuk kr \bar{p} k sb. crook, liuk \bar{q} pk vb. look.

Examples:

bjuk sb. book. OE. boc.

diu vb. do. OE. don.

kiyk sb. cook. OE. coc.

kriuk sb. crook. OE. *crōc, cf. Du. croec, croc = curl, ON. krókr hook.

liuk vb. look. OE. lōcian.

tiup sb. tooth. OE. top.

əniy adj. enough. OE. zenöz, ME. inoghe.

Note. In riut sb. root iu most probably Scand. ō, cf. ON. rōt.

§ 103. OFr. *ii* has become *iu* in the words blin adj. blue, stin vb. stew.

Note. iu in friut represents OFr. üi.

§ 104. In jiur sb. udder (usually kuu-jiur) we have Scand. u. Cf. ON. iugr, Norw. juver, jur. Assen 337. Swed. jufver.

eu.

§ 105. Kendal eu corresponds to ME. ēu, OE. ēow, and occurs in the preterites neu knew, preu threw and in the verb tseu chew. The usual development of ME. ēu is to iu (§ 101) which diphthong the above words often have in studied speech. This eu is probably a survival from the 18th century.

ųu.

Kendal uu has the following origins.

§ 106. OE. \bar{o} has become yu in Kendal except before the stops t, d, k, nasals m, n and in final positions, where it has become iu.

In some words we get un for ju by analogy as in mun sb. moon, blum sb. bloom, for *minn, *blium, and vice versa ju for un as in tup for *tup.

§ 107. In the obsolete form spann sb. spoon (see Ellis V 559) — now supplanted by spann, we have an representing OE. s, of which change this is practically the only example. If it be not borrowed from some other dialect, it points to the fact, that this Kendal dialect in its earlier stages had diphthongisation. Hitherto I have considered every an sound from OE. s or a, to date from about the 17th century and be the usual development of the 16th century a. Levins makes no distinction between this word and other words which go back to OE. s, as boote 178, 23 ff., spoone 168, 3 and goose 222, 18. Now the Catholicon has bute, guse etc., but spoyn = cocliar spone (A.) moyne, soyn vbc. hastely. This evidently points to a difference of pronunciation in the two types.

In such words as byus, gyus, ryuf, diphthongisation to au in all probability never took place, OE. σ simply become ME. σ^u ({)), which passed by the 16th century into u (14) and was subsequently diphthongized and widened to uu (11).

Examples:

I. OE. \tilde{o} , Gmc. \hat{o} , a + nasal + cons.

bus sb. cowstall. OE. bosig, bosig B. T. I, 117, ME. boose Lev. 222, 17, booc, boos Pr. P. 41.

funt sb. foot. OE, fot.

huuf sb. hoof. OE. hof, ME. hofe. Prk. Cons. 4179.

spum sb. loom, OE. loma, ME. loome. Pr. P. 312.

skepul ab. school. OE. scol (OFr.), ME. scole.

smųuδ adj. smooth. OE. unsmope WW. 350, 29. Cf.

smeðe = *smöði -. ME, smöthe Pr. P. 46.

styul sb. stool. OE. stöl, ME. stool. Pr. P. 476.

fyu sb. shoe. Northumb. sceö Cook 166, ME. scö CM.

12823.

II. OE. σ = Gmc. ē, WGmc. ō before nasals.
 myun sb. moon. Northumb. mōna Cook 143, ME. mōn

CM. 388.

III. ON. ō.

blyum sb. bloom. ME. blom CM. 9328.

§ 108. OE. $\bar{\sigma}_{\bar{\sigma}}$ medially has become u in Kendal, whereas finally it has become u (see § 74). The words bu sb. bough, plu sb. plough, are formed from the oblique cases $b\bar{\sigma}_{\bar{\sigma}}$, $pl\bar{\sigma}_{\bar{\sigma}}$. This $\bar{\sigma} + z$ became $u\chi$ (fc) in the ME. period, the consonant χ being lost in the 16th century (cf. Luick § 114). 16^{th} century \bar{u} here was treated in the same manner as \bar{u} from OE. $\bar{\sigma}$.

Examples:

byu sb. bough. OE. boze dat, ME. bogh. CM. 4466. bugh CM. 4721.

pluu sb. plough. OE. ploze.

syun sb. woon. OE. *swōzne, cf. swōzen, ME. suun. CM. 11722.

§ 109. OE. u + z in squ sb. sow appears as qu in Kendal. This u + z became awe in the ME. period giving rise to u in the 16th century.

Note. drum vb. drown, ME. drunen is probably from Scand. *druma not OE. druncnian (see Björkman p. 176).

§ 110. OE. u + l + cons. has become uu in a few words, by lengthening of \ddot{u} and loss of l. The lengthening probably dates from the 16^{th} century.

Examples:

pun vb. pull. OE. pullian, ME. pullyn. Pr. P. 416.
fundo sb. shoulder. OE. sculdor, MR. sculder. CM. 27931.
schuldre CM. 18416.

wys sb. wool. OE. wulle, ME. wol. CM. 111102.

Note. In jet styup ab. gatepost Scand. o + l has become qu. Cf. ON. stolpi, ME. stulpe 'post'.

§ 111. OE. a as a rule appears in Kendal as un, although in a few cases it has become au. Here, perhaps the au forms are the older in the dialect, if they be not borrowed from some other dialect more archaic in its phonology. In the dialect of Dent, a small shut in village to the SW. of Kendal every OE. a has become au. The following words in Kendal always have au: haund vb. hound, kauj sb. hornless cow, klaud sb. cloud, laus sb. louse, maup sb. mouth.

If then we have au in a few words, which cannot well be borrowed from Polite English, every OE. a must have been diphthongized to au at some time or other. According to Gill (see Ellis IV, 1249) the change i < ai took place earlier in the north than elsewhere. If this be true of i, why should it not hold good with regard to a? We should get accordingly OE. $a < 15^{th}$ century $au < 16^{th}$ century au. Here the first element may have been raised from au to au giving au au au which is practically the sound it has to-day.

Examples:

bruu sb. brow, forehead. OE. brū, ME. brues n. pl. CM. 8079.

dyuk vb. dive. OE. *ducan, ME. doukand. Alex. 4091, daked pp. CM. 23203.

druuzi adj. drowsy. OE. *drūsiz cf. drūsan, drūsian B. T. I, 215, also dreosan. No ME. forms of this word are known (see Skeat, Etym. Dict. 181).

Plays 8, ed. by Mariott Basle. fülmart. Pr. P. 182. klyut vb. patch. OE. zeclütian, ME. cloutyn. Pr. P. 84. myus sb. mouse. OE. müs, ME. müs. Hom. I, 53. syuk vb. suck. OE. sücan, ME. suken. Pr. P. pyum sb. thumb. OE. püma, ME. thumb. CM. 21244. tyu pron. thou (stressed form). OE. pü, ME. pu. CM. 8971. sbyun adv. above. OE. abüfan, ME. abouven. CM. 12207.

Note. In sprint vb. sprout in represents the 16th century a of Polite English. The word is of Frisian origin, cf. OFris. sprita. Scand. it has become in kiner vb. cower, cf. ON. kigs, Dan. kue (see Björkman p. 216). OFr. ou has become in dint sb. and vb. doubt.

au.

Kendal au has the following origins.

§ 112. OE. a has become au in Kendal in a few words instead of developing into yu (see § 111).

Examples are:

haund sb. hound.

kauj sb. hornless cow. OE. *cuiz.

klaud sb. cloud.

laus sb. louse.

mauß sb. mouth.

§ 113. In dau vb. prosper, OE. medial uz has become au. Its usual development is to uu, e. g. suu OE. suzu, ME. suwe. *Buul sb. 'handle to a pail', and *fuul sb. fowl (OE. *buzol, fuzol) are unknown in Kendal — the place of the latter being taken by bord or hen. Gaun sb. gown, from Celtic u (cf. Welsh gwn, Irish gunn, Skeat, Etym. Dict. p. 241) is no doubt a borrowing from Polite English.

In aul sb. awl and pau vb. thaw, representing OE. awle and pawian, au instead of a is due to 16th century borrowing from Polite English (cf. 17th century ## Ellis IV, p. 1003 from 16th century *aul).

laund adj. calm, windless, has probably nothing to do with Dan. luun (see Björkman p. 250), but comes rather from a hypothetical OE. *lund, ME. lund, for which cf. OE. linde, limetree, lipe soft, gentle, OIc. lindr bond, OHG. lindwurm snake, OE. linnan 'cease' all representing Gmc. *lin, *linð, Idg. *len, *lent. Cf. Lat. len-tus pliant, Lith. lentà plank, Greek ἐλάτη pine tree for *ἐλγτά (see Noreen, Abriß p. 137, Kluge, Etym. Wb. s. 'Linde').

§ 114. OE. oht became auχt in the ME. period. (Cf. Luick § 92 and Anglia XVI 453 f.) χ was probably lost after the 16th century (cf. fauχt Ellis III, 890). Raut perhaps represents *wrōhte not worhte.

Examples:

aut sb. anything. Northumb. öht Cook 153.
baut vb. pret. bought. Northumb. bóte Cook 26.
braut vb. pret brought. Northumb bróhte Cook 24.
dauter sb. daughter. Northumb. dóhter Cook 41.
naut sb. nothing. Northumb. nóht Cook 147.
raut vb. pret. wrought. Cf. Northumb. worhte Cook 218.
paut vb. pret. thought. Northumb. döhte Cook 192.

§ 115. OE. o + l + cons, was lengthened to q in the OE, period (Bülbring § 285) and became au in the 16th century (cf. Ellis III, 881 ff. gauld, bauld etc.). Where l has been retained in these words it is probably due to the influence of Polite English.

Examples:

baulsts sb. bolster. Northumb. bolster Lind. 11. baut sb. bolt. Northumb. *bolt, WS. bolt.

- gauld sb. gold. Northumb. gold Cook 107.
- maud sb. mould, earth. Northumb. *molde, WS. molde. staun pp. stölen. OE. zestölen.
- presauld sb. threshold. OE. perscold (where old = *wold)
 B. T. IV, 1056, ME. thresche walde Cath. 385.
- Note. In saudze sb. soldier au represents OFr. o + l. Baul sb. bowl is from OFr. boule. Bauld adj. bold, instead of bald is 16th century borrowing from Polite English (see § 67).
- § 116. OE. ow appears as au in Kendal in the words rau vb. row (boat), and stau vb. stow away; OE. rowan and stowian. In these cases the verbs were derived from nouns in which ow was final, cf. OE. *row, stow (see § 98).
- § 117. OE. ŏz medially has become au in bau sb. bow, faun pp. flown, OE. boza, flozen. Lau sb. flame represents Scand. og. Cf. ON. logi sb. flame, OSwed. lughi, loghi, flau adj. wild (of weather) is perhaps of Scand. origin, but its etymology is uncertain.
- § 118. Scand. ρu in most cases has become Kendal au via ME. au or ρu (Jf or Jf). In one case it became ME. ρu (Jf), Kendal \bar{o} , e.g. $g\bar{o}m$ sb. goodsense (§ 99).

Examples:

- dauli adj. melancholy sad, gloomy. ON. daufligr, Norw. dauvleg. Assen 201.
- gauk sb. simpleton. ON. gaukr, Norw. gauk. Aasen 211. Cf. OE. ‡ēac.
- jaul vb. howl. ME. żaulen (Gawaine), cf. ON. gaula, Norw. gaula. Aasen 221.
- kaup vb. exchange (rare). ME. coupe Hav. 1800, cf. ON. kaupr (Björkman p. 170).
- § 119. Vau vb. vow and kraun vb. crown are borrowed from Polite English Kruun sb. fiveshilling piece, is also a borrowing but is much older than the other two.

§ 120. Words of uncertain origin:

daup sb. hooded crow.

skrau sb. noise, uproar.

haustrau adv. topsy-turvy.

skraudli adv. huddled up topsy-turvy.

stauenli adj. small cramped (of places).

tsaup sb. rose haw.

ai.

Kendal ai has the following origins.

§ 121. OE., Scand., and OFr. I have in all cases become ai in Kendal. In the northern dialects diphthongisation must have taken place already early in the 16th century and si become ai early in the 17th, for Gill in 1620 remarks that "(ai) proi (si) Borealium est: vt in (faisr) pro (fsisr) ignis" (Ellis IV 1249) which shows that the change from si to ai is older in the north than elsewhere.

Examples:

I. OE. 7.

aid! adj. idle. Northumb. Idel Lind. 57, ME. īdel CM. 5866. baid vb. bide, wait. Northumb. bīda Lind. 9, ME. bide CM. 955.

daik sb. dike, ditch. Northumb. dic Lind. 18, ME. dike CM. Fairf. 20986, CM. 9899.

gaivəsəm adj. ravenous. OE. *zīfresom, cf. zīfre.

said sb. side. Northumb. side Lind. 78, ME. side CM. 459. saik sb. small ditch. Northumb. *sic, WS. sic.

This word is in all probability native though it is impossible to show by sound changes that it does not come from ON. sik (see Wall, p. 138**).

swain sb. pig. Northumb. swin Lind. 82, ME. swine pl. CM. 4711.

hwail adj. until. Northumb. de hvile de Lind. 56, ME. qvils CM. 1948, qvilum CM. 73.

II. Scand. 7.

sail sb. vb. sieve, strain(er). Swed. dial. sīla strain filter, Norw. sīla, cf. OHG. sīhan strain (Wall 119). skraik vb. cry, scream. Cf. Swed. skrīka.

praiv vb. thrive. ME. thrive CM. 12139. Cf. ON. prifa-sk.

The etymology of glaim vb. shine is uncertain. Rietz gives a Swed. dialect word glim = splendour. Raiv vb. tear comes from OFr. river, itself from ON. rifa.

§ 122. III. OE. i + 3 (Northumb. io) has become ai in Kendal, although some believe that the ME. i obtained from older i + 3 remained as such through the 16^{th} century and consequently would be i to-day. Unfortunately the only word in Kendal which has i and can be traced to an OE. i + 3 form most probably comes from ME. ei, e. g. sti sb. ladder, ME. stei which is for older *stēoze, Northumb. *stēz- (§ 90).

Where now we have ai, there must have been in the ME. period.

Examples:

nain num. nine. Northumb. nione Lind. 67.
tail sb. tile. Northumb. *tiola, ME. tīle. CM. 1533.
taid sb. tithe. Northumb. *tiozod, ME. tīthe. CM. Trin. 3818.

§ 123. IV. OE. t before l+d has become ai in Kendal. It was lengthened to i in the ME. period (Morsbach § 112, 1) and was diphthongized to ai at the same time as OE. t. Unfortunately there are but two examples of this development in the dialect, maild adj. mild, and waild adj. wild. *Tfaild from OE. cild is unknown, its place being taken by barn.

§ 124. OE. and Scand. \bar{y} were unrounded to \bar{z} in the ME. period, and have hence given rise to $a\bar{z}$ in this dialect, exactly as OE. \bar{z} has done.

V. Examples:

fair sb. fire. Northumb. fyr Lind. 31.

haid sb. skin, hide. OE. hyd.

haiv sb. hive. OE. hyf, ME. hyve. Cath. 187.

kai sb. pl. cows. OE. cy, ME. kij. CM. 4564.

VI. OE. \tilde{y} , ME. \tilde{y} , $\tilde{\imath}$ has become ai in bai vb. buy. Cf. ME. by test, by $\imath e \delta$. rai sb. rye. Cf. rie Pr. P. 433.

VII. Scand. \bar{y} .

skai sb. sky. ON. ský.

§ 125. OFr. ie has become ai in the words trai vb. try, and hwaist adj. quiet.

OFr. i has become ai in straiv vb. strive.

§ 126. Words of uncertain origin: pail sb. porridge stick (see Wall p. 124).

oi.

§ 127. This diphthong does not occur in words of Gmc. origin. It usually represents ANorm. oi, as in boil vb. boil, dzoi sb. joy, etc. The etymology of the words bintor vb. loiter, and moider vb. trouble, perplex, is unknown.

oi

Kendal ei has the following origins:

§ 128. Northumb. final $\bar{z}_{\bar{s}}$ appears as ei in kei sb. key. Cf. caeşum Dur. Rit. 595: Here $\bar{z}_{\bar{s}}$ became ei ([1]) in the ME. period and was subsequently raised to [-1, its present sound.

§ 129. Northum b. *ēz in *tēza has become ei in the word nek-tēi sb. necktie. The ME. form was probably *tei which remained through the 16th century giving Modern Kendal tei.

§ 130. Lei sb. scythe corresponds to ON. le, Dan. le.

įэ.

Kendal 10 has the following origins:

§ 131. Northern ME. *æ, from OE. a and ā and also from Scand. and OFr. ā, has become $\bar{\imath}$ in the Kendal dialect.

When this \bar{x} (14) developed from the older back vowels a, \bar{a} (J, J*) is uncertain, but was in all probability coeval with the rounding of OE. ā to ō in the South and Midlands ie during the 13th century (see HES. § 666). The next stage was probably the raising to \bar{e} ([*). The question of diphthongisation is more difficult to deal with. Perhaps [became \bar{x} ? ([-1]) by the 14th or 15th century and was raised to $\bar{e}_{\bar{e}}$. How the change actually took place we do not know, but already in the 17th century the E forms begin to make their appearance — e. g. nēm (Cooper) name, kēp (Cooper) cape, dēst (Cooper) date, etc. (Ellis IV, p. 1012). This diphthong seems to have survived without undergoing any alteration until about the middle of the 19th century, when the raising to po began to take place. This raising cannot well be much older, as many of the ea forms still exist being often used in unstudied speech.

OE. ea from older a before r + cons has become \bar{p} in the words $b\bar{p}rd$ sb. beard, $m\bar{p}stn$ sb. boundary stone, $m\bar{p}r$ sb. mare. Its usually remains a. Here ea must have become ME. \bar{e} .

Examples:

OE. ă.

- bjok vb. bake. WS. bacan, Northumb. *baca.
- gjəvlək sb. crowbar. OE. gafeluc B. T. II, 358, ME. gavelok Alis 1620. Cf. MHG. gabilôt.
- gist in qut a gist adv. out of the way. Cf. OE. pl. gatus ME. gate. The sg. geat has given Kendal jet.
- kjør sb. hare. OE. hare, ME. hare. Pr. P. 227.
- kīpr vb. care. Northumb. *ceariga, WS. cearian, ME. car. CM. 3212.
- hat adj. late. Northumb. læt Lind. 59, ME. late CM. 1784, lait CM. 1800.
- mind vb. pret. made. OE. macode, ME. made. CM. 1602.
- nīm sb. name. Northumb. noma Lind. 67, ME. nām CM. 266.
- sjok sb. sake. OE. sacu, ME. sake. CM. 2471. saac CM. 3120.
- snīpr sb. snare. Northumb. *snara WS. snear, ME. snare. Pr. P. 461. snare CM. 29532.
- snīsk sb. sneak. Cf. ME. snakeren in A. R. 380 and 9229 quoted from Stratmann-Bradley, p. 589; also OE. snaca. Skeat (Etym. Dict. p. 568) derives sneak from ME. snīken, OE. snīcan adding that. 'The Modern English word has kept the original sound of OE. 7.' But see § 90.
- Note. is has been monophthongized to ja initially in jaks sb. acre.
- § 132. In the following words \bar{p} represents Scand. \bar{a} , ME. \bar{a} .
- bjop pro: both. ME. bathe CM. 666, ON. bāðir.
- gipp vb. gape. ME. gapin Pr. P. 186. Cf. ON. gapa, OE. zeapian, zeap are cognate.

- lish sb. barn. ME. lathes CM. Gött. 4681, lathe Cath. 209, Norw. lade Assen 417, Swed. lada.
- rīsk vb. wander about. ME. rake Townl. 198/119. Cf. Norw. rakla = wander, Swed. dial. rakkel vagabond. Norw. reka (rak, reket) drive, ON. reka.
- skripp vb. scrape. ME. schrapin, scrapin Pr. P. 450 cf. ON. skrapa, Dan. skrabe. OE. scearpian in Cockayne A. S. Leechdoms II, 76 l. 13, is cognate. Cf. also OE. scearp.
- § 133. OFr. a, ME. ā appears as \bar{p} in the following words:

bljom vb. blame. ME. blamen, OFr. blasmer.

dismskyul sb. ladys-school (rare). ME. dame, OFr. dame. fiss sb., vb. face. OFr. face.

grīss sb. grease. ME. grece, OFr. gras.

- *īəbl* adj. able. OFr. habile. This is probably a new formation for *jabl which still exists in other dialects. Cf. jakə and jak from *iəkə, *īək.
- stīptsman sb. owner of a small farm with the land attached thereto. OFr. estat.

tīpbļ sb. table. OFr. table.

§ 134. OE. ā, Northern ME. *æ appears as io. in the following words:

bjən sb. bone. OE. bān.

brjed adj. broad. OE. brād, ME. brād. CM. 347.

drjev vb. pret. drove. OE. draf, ME. draf. CM. 20953.

grien vb. groan, bellow. OE. grānian, ME. grān. CM. 17836. Cf. OHG. grīnan = 'mutire'.

hīst adj. hot. OE. hāt, ME. hat. CM. 901.

ក្នុង adj. loathe. Northumb. lað (sb.) Lind. 60, ME. lath CM. 209.

mīst adj. most. Northumb. māst Lind. 64, ME. māst CM. 1385.

sīo adv. so. Northumb. swā Lind. 81.

sjop sb. soap. OE. sape B. T. III, 816, ME. sape Cath. 318.

slīp sb. sloe. OE. slā, ME. slā. Cath. 342.

tpo the one. OE. pæt-an, ME. tan. CM. 1553.

tīpad sb. toad. OE. *tād, cf. tādige B. T. IV, 967, ME. tādes CM. 23227.

wīp sb. woe. OE. wā, ME. wā. CM. 836, waa 2196.

hwjə pron. who. Northumb. hwā Lind. 55, ME. quā CM. 484.

əlīpan adj. alone. Northumb. *āll āna, ME. allāne CM. 1283.

Note. OE. initial a has become ja in jak sb. oak, jan pron. and num. one.

§ 135. Northumb. \bar{e} ([*) from WGmc. *a, and \bar{e} ([*) (from Gmc. *ai-i) became \bar{e} ([*) in ME. (cf. HES. § 672) and probably was widened to \bar{e} about the 16th century previous to its diphthongisation to \bar{e} in the 17th.

In the words klip sb. claw, hoof, strip sb. straw, is is due to the nominative forms *klē, stre (cf. Northumb. strē Cook 178, ME. cley Cath. 65, stree Mand. 253).

O E. \bar{e} has become $j\bar{e}$ in $nj\bar{e}d$ vb. knead, cf. OE. cnēdan. $j\bar{e}$ in hier adv. here represents OE. \bar{e} , Gmc. \bar{e} before r. In $f\bar{e}l$ vb. hide \bar{e} represents OE. $\bar{e}o$, ME. \bar{e} — cf. OE. feolan, ME. felan.

Examples:

I. Northumb. ē (WGmc. a).

drīad vb. dread. Northumb. on-dréda Cook 155, ME. dred CM. 3121.

hipr sb. hair. Northumb. *hér, ME. hair. CM. 22520. jipr sb. year. Northumb. *fér Lind. 32, ME. yēr CM. 4898. spripd vb. spread. Northumb. *sprēda, ME. sprēd. CM. 599. ðier adv. there. Northumb. ðēr Lind. 85.

II. Northumb. & (Gmc. ai-i).

- brīs sb. briar. OE. brēr, ME. brēres. CM. 2014.
- hjol vb. heal. Northumb. hæla Cook 108, ME. hele CM. 8109.
- *īpst* adj. least. Northumb. læsest Lind. 62, ME. lēst CM. 1689.
- rēs sb. race. Northumb. ræs Lind. 73, ME. rēs CM. 4325, rees CM. (Trin.) 7160.
- tēse. Cath. 380.
- tists vb. teach. Northumb. tæča Lind. 83, ME. teche CM. 12049.
- § 136. OE., Scand. and OFr. e have become \bar{p} in open syllables, where lengthening took place in ME. For wil adv. well, and stwin prep. between, both from OE. e see § 88. Here e was lengthened to \bar{e} in the 13th century (Kaluza § 213b) and was diphthongized to \bar{e} about the 17th century.

Examples:

I. OE. e and ea (a-Umlaut of e).

- frist vb. fret. Northumb. freta Lind. 30, ME. frete CM. 28320, frete Cath. 143.
- mīal sb. meal. OE. melu, ME. mēle. CM. 4680.
- stīpl vb. steal. Northumb. steala Cook 177, ME. stēle CM. 1490.
- swipr vb. swear. Northumb. sweriza Cook 182, ME. swer CM. 17493.
- tīpr vb. tire. OE. (WS.) teorian B. T. IV, 979, ME. tēren (see Skeat, Etym. Dict. p. 645).
- wir vb. wear. OE. (WS.) werian, ME. wer. CM. 9072.
- əstīpad prep. instead. Northumb. *onstēde, cf. ME. stede. CM. 640.

II. Scand. e.

nīzv sb. fist. Cf. ON. hnefi, Norw. neve (Wall p. 113). sizvz sb. sedges. Cf. ON. sef, Norw. sev (Wall p. 118).

III. OFr. e.

bīst sb. beast. OFr. beste.

bīs sb. pl. cattle.

bīek sb. beak. OFr. bec, ME. beke. Allit. Poems II, 487.

§ 137. OE. ēa (Gmc. au) was monophthongized to \bar{e} ([*) in the ME. period (HES. 677) and was treated exactly like \bar{e} from OE. e.

Examples:

- bjom sb. beam. Northumb. beam Cook 16, ME. bem CM. 9946.
- brīpd sb. bread. Northumb. brēad Cook 23, ME. brede CM. 2715.
- died adj. dead. Northumb. dead Cook 37, ME. ded CM. 57.
- frīəz vb. pret. froze. OE. frēas.
- h_iəd sb. head. Northumb. hēafud Cook 111, ME. hefd CM. 528.
- tīpd sb. lead, plumbum. Northumb. lēad, ME. lede. CM. 126454.
- tiom sb. team. Cf. Northumb. tēam Cook 184 (see B. T. IV, 973 'tēam II'), ME. tem Alis 2350.
- priop vb. threep, scold. OE. preapian B. T. IV, 1067, ME. threpe Townl. 102.

Note. OE. ea initially has become je in jeder sb. fence of dead sticks; OE. eafor.

§ 138. In a few words OE. and Scand. \bar{o} have become \bar{p} via ip. These cases are few (see § 102).

Hirst, Anglist. Forschungen. 16.

Examples:

I. OE. σ.

brīm sb. broom. OE. brom.

fied sb. flood. Northumb. flod Cook 58.

fink sb. flake (Entozoa). OE. floc.

fishiok 9b. fishhook. OE. *fisc-hoc.

fənjən sb. forenoon. OE. *fornōn.

krien vb. croon. OE. *cronian, ME. cronen, MDu. kronen and kreunen.

sīst sb. soot. OE. sōt.

II. Scand. 6.

tīpk vb. pret. took. ON. tók.

§ 139. Words of uncertain origin:

piek vb. roost.

pīst sb. peat.

rīsti adj. reesty. ME. resti Pr. P. 431.

swīəl vb. hurn, waste away of a candle. Cf. OE. swælan. tīpp sb. ram.

tīpv vb. walk in a laborious fashion.

ų́ә.

Kendal 40 has the following origins.

§ 140. ME. $\bar{\rho}$ from OE. ρ and \bar{a} and also from Scand. and OFr. $\bar{\rho}$ has become $\bar{u}\bar{\rho}$ in a few words. $\bar{\rho}$ (J+) was overrounded and narrowed to $\bar{\sigma}^u$ (J+) in the 13th century, was raised to \bar{a} (1+) in the 16th (§ 107 and Ellis III, 881 ff.) being diphthongized to $\bar{a}\bar{\rho}$ (1] in the 17th century (Ellis IV, 1001) and widened subsequently to $\bar{u}\bar{\rho}$, its present sound.

When \bar{u} commences a syllable it is usually monophthongized to w or w, e. g. $t/\bar{i}zw$ cheese-curds, k gwol sheep-hole.

Examples:

I. OE. o.

būprd sb. board. OE. bord, ME. bord. Hav. 1722.

füərd sb. ford. OE. ford, ME. ford. Alis 4343.

hūal sb. hole. OE. hol, ME. holes pl. CM. 6611.

hūp sb. hope. OE. hopu, ME. hope.

pūsk sb. bag, poke. OE. poca, ME. poke. Cath. 287, Lev. 159, 40.

skūr sb. score, twenty. OE. scor, ME. score. Pr. P. 450.

snūər vb. snore. OE. *snorian, ME. snoryn. Pr. P. 462.

LG. snoren.

sūsl sb. sole (of foot). OE. sola, ME. sole. Pr. P. 463.

II. Scand. o.

fūs sb. waterfall. Cf. ON. fors, foss, Norw. foss. Aasen 183.

III. OFr. o and o.

kūərt sb. court. OFr. cort, curt.

kūst sb. overcoat. OFr. cote.

pūpr adj. poor. OFr. povre.

rūpst vb. roast. OFr. roster. (Probably of Celtic origin, see Skeat, Etym. Dict. p. 513.)

§ 141. ME. σ from OE. σ (\mathfrak{z}) and Scand. δ has become \bar{u} before r, in a few words. Here σ became a in the 16th century passing through the intermediate stages of σ^u (\mathfrak{z}). Diphthongisation is due to the influence of r and is probably of 17th century date.

Examples:

Ι. ΟΕ. σ.

mūər sb. moor. OE. mor.

II. Scand. 6.

glūzr vb. stare. ME. gloren Alex. Sk. 4552, Norw. glora = stare Aasen, Swed. dial. glora, see Björkman p. 241.

Note, skyer vb. scour is probably of OFrench origin. Cf. OFr. eschurer, MHG. schuren.

§ 142. In the words būɔt sb. boat, lyən sb. lane, rūɔd sb. road we have ūɔ from OE. ā and ā. In the case of būɔt and rūɔd, borrowing from a southern or Midland dialect must have taken place. Lūɔn is for ME. *lone by analogy with such words as bon, ston from OE. bān, stān. The OE. word in this case is lane.

§ 143. OE. \ddot{u} before r has become \ddot{q} in the word $f\ddot{q}$ sb. furrow, OE. furh.

Chapter III.

Table of vowel-changes.

Kendal - OE. etc.

§ 144. Kendal i.

§ 209. Celtic o = 3 § 85.

§ 210. Celtic u = y § 72 Note.

Chapter V.

The Kendal consonants and their OE. equivalents.

k.

§ 211. k initially has four origins in Kendal representing 1. OE. c, α) before original back vowels, β) before original front vowels, 2. Scandinavian k, 3. OFr. c and 4. Celtic c. In Northumbrian c probably was never so far fronted as in WS., but remained at \dot{c} (fronted k), which sound was probably preserved throughout the ME. period and became subsequently the velar (see Bülbring § 493).

Examples:

§ 212. I. OE. c before orig. back vowels.

kat sb. cat.

kyd sb. cud.

kāld adj. cold.

kyu sb. cow.

korn sb. corn.

kįpr sb. care.

kobwęb sb. cobweb.

kįs sb. kiss.

kəsləp sb. rennet-bag.

II. c before orig. front vowels.

kaf sb. chaff.

kist sb. chest.

kipk sb. blow.

kit sb. milking pail (§ 34).

Note. The old forms *kork, korn have been supplanted by borrowings from Polite English, e.g. tfortf, tform (see § 55).

§ 213. Scand. k.

kęst vb. cast.

klip sb. clip, shear.

kinlin sb. firewood.

klok-hen sb. sitting-hen.

kolop sb. rasher of bacon.

§ 214. OFrench c.

kok sb. cock.

krękot sb. cricket (insect).

kraun sb. crown.

kərliu sb. curlew.

§ 215. Celtic c.

klok sb. clock (§ 85).

kril sb. bench for pig-killing.

krudz sb. curds (§ 72 Note).

§ 216. Kendal k medially and finally has four origins, e. g. 1. OE. c, cc, x, 2. Scand. k, 3. OFrench c, q, 4. Celtic k, c.

Examples are:

 \S 217. OE. c, cc, x.

aks sb. axe.

foks sb. fox.

ask sb. newt.

jak sb. oak.

bęk sb. brook.

jako sb. acre.

bjyk sb. bench.

jok sb. yoke.

bisk vb. bake.

klipk sb. blow.

dokn sb. dock.

kipk sb. flow.

daik sb. ditch.

mak vb. make.

eks vb. ask.

sīsk sb. sake.

§ 218. Scand. k.

bask vb. bask (§ 61 Note).

blęk adj. deep-yellow (of butter).

Hirst, Anglist. Forschungen. 16.

bylk sb. bulk.

gauk sb. simpleton.

kek vb. tilt up a cart (§ 50).

klok hen sb. sittinghen.

Note. In klipk 'lump of rock' yk represents older nt; cf. Dan. klinte (§ 32 Note) and also ME. clintes CM. 17590. This change of the consonant is probably confined to the Kendal dialect and those most intimately connected with it, since the Lonsdale dialects have 'clint'.

§ 219. OFrench c, q.

bjok sb. beak.

kok sb. cock.

bak! sb. good condition.

kreket sb. cricket (insect).

§ 220. Celtic c.

kbk sb. clock.

g.

§ 221. Kendal g initially has four origins, which are 1. α) OE. g before original back vowels, g) OE. g before original front vowels, 2. Scandinavian g, 3. OF rench g, and 4. Celtic g.

It is possible, that in Northumbrian $_{\mathcal{J}}$, when fronted, had a sound parallel to the fronted k (see § 361 and Bülbring, § 493). In some cases fronted $_{\mathcal{J}}$ has become $_{\mathcal{J}}$, e. g. jet, jilp in others $_{\mathcal{J}}$, (see below).

Examples are:

§ 222. I. OE. 3 before orig. back vowels.

gā vb. go.

gis sb. pl. geese.

gandrin sb. gander.

göst sb. ghost.

gauld sb. gold.

gud adj. good.

gīvlek sb. crowbar.

gum sb. gum.

gem sb. game.

guus sb. goose.

Note. In $g\bar{o}$ sb. 'gall', garn sb. 'garn', g represents g from such forms as *zalla, zarn, see Bülbring, § 492, Anm. 1.

gęzlin sb. gosling (§ 48) is probably native, representing OE. *zēsling; for which cf. ME. geslyng WW. 638, 17.

§ 223. II. OE. 3 before orig. front vowels.

gaiversom adj. ravenous. tugider adv. together.

gider vb. gather (§ 33 Note). git vb. get.

giv vb. give.

§ 224. Scandinavian g.

gab sb. talketiveness. gipp vb. gape (§ 132).
gadfit sb. gadfly. gom sb. good sense.
gildert sb. hair-noose. gust sb. gust.

 \S 225. OFrench g. $g\bar{e}$ adj. gay.

§ 226. Celtic g. gaun sb. gown.

§ 227. Kendal g medially and finally has six sources and corresponds to 1. OE. medial and final cz, 2. OE. cc, ME. ck voiced, 3. Scand. gg, 4. OFr. g, 5. OFr. c voiced, 6. Celtic g.

Examples:

§ 228. OE. c3.

brig sb. bridge. lig vb. 1) lie, 2) lay.

dog sb. dog.pig sb. pig.hog sb. sheep.rig sb. ridge.

§ 229. OE. *cc, ME. ck.

hag vb. chop, cut § 60.

hag! vb. bungle, spoil § 60.

§ 230. Scand. gg.

bag sb. bag. kleg sb. gadfly.

dęg vb. water. lęg sb. leg.

eg sb. egg. rag sb. hoar frost.

ęg(on) vb. incite, spur on. stęg sb. gander.

§ 231. OFrench g.

bargin sb. bargain.

§ 232. OFrench c.

ſuga sb. sugar (§§ 72, 310).

§ 233. Celtic g.

bog sb. bog.

bog! sb. spectre.

bog! vb. shy (of horses).

krag sb. crag.

sk.

§ 234. Kendal sk initially has three origins, corresponding to 1. OE. sc, 2. Scandinavian sk and 3. OFrench sq, sc etc.

The usual development of OE. sc and Scand. sk in Kendal has been to f, but sk has been preserved in a small number of words. These are certainly relatively older than the 'f'-forms in most cases, though some words seem always to have had f; e. g. Kendal fip (sheep), ME. scēp, scēap, OE. (Angl.) scēp. There is little doubt that in the early ME. period sk and f existed side by side, the former being used before orig. back vowels, the latter before orig. front. Then about the 15th century the two sounds were promiscuously used, as skel sb. 'scale' for *fiol of. ME. schale Pr. P. 443. filo sb. 'scree' represents ME. *schel-e and OE. *scealu for *skælu. f has usurped the place of sk in afoz sb. 'ashes', but this change may be much later; cf. as-būord 'box for keeping ashes in' for *ask-būord, with ME. aske Pr. P. 15, asken n. pl. Hav. 2841.

Ofrench sq, sc have remained sk.

Examples are:

§ 235. OE. sc and sc.

skęl sb. scale.

skrat vb. scratch.

skift vb. shift, remove.

skyer sb. a score (= twenty).

§ 236. Scandinavian sk.

skai sb. sky.

skanti adj. greedy.

skart adj. frightened.

skęl sb. shell (§ 41).

skēts sb. untidily dressed person (§ 53).

skwab sb. lowbacked long seat.

§ 237. OFrench sq, sc.

skaləp sb. piece of a garment hanging loose.

skart adj. with the skin knocked off.

skod vb. scald.

skuul sb. school.

skūər vb. scour (§ 141 Note).

§ 238. Kendal sk finally corresponds to 1. OE. sc when final, and 2. Scand. sk, but the examples are few. They are:

I. OE. sc.

frosk sb. frog. Cf. OE. forse, frox, ME. frosk, frosch. Pr. P. 180.

glisk sb. shine forth (of sun).

Note. In *ask sb. 'newt' sk represents OE. p-x-, ME. -sk-.

II. Scandinavian sk.

bask vb. bask.

y.

§ 239. Kendal y occurs only medially and finally, and corresponds to 1. OE. n_{δ} , 2. OE. nc^{*} 3. Scandinavian ng, 4. Scand. gn, 5. Scand. nk.

Examples are:

I. OE. ng.

fiper sb. finger. gap vb. go.

ray adj. wrong.

stray adj. strong.

II. OE. nc.

bepk sb. bench (§ 43).

kipk sb. choking sensation (§ 32).

pepk vb. thank (§ 44).

wankl adj. feeble (§ 63).

§ 240. I. Scandinavian ng.

din sb. noise.

hip vb. hang.

stip vb. fling.

tan sb. sting.

Note. -y- in ayz sb. pl. awns of barley, corresponds to Scand. gn. Cf. ON. qgn, gen. agnar.

II. Scand. nk.

hank sb. hank.

spiyk sb. chaffinch.

Note. yk in kliyk sb. lump of rock represents older nt. Cf. Dan. klinte (see § 32 Note).

§ 241. Kendal j, which only occurs initially has five origins corresponding to 1. OE. \dot{z} (Gmc. \dot{j}), 2. OE. \dot{z} (Gmc. g), 3. Scand. \dot{j} , 4. Scand. \dot{g} , 5. a peculiar development of \bar{z} from older \bar{e} , \bar{x} (See §§ 131 Note, 134 Note).

Examples:

I. OE. 3 (Gmc. j).

ji pron. ye.

jok sb. joke.

jīər sb. year.

jųy adj. young.

II. OE. ¿ (Gmc. g).

jala adj. yellow.

jet sb. gate.

jest sb. yeast.

jįstodį adv. yesterday.

Note. in jet adv. yet, jara sb. yarrow, $j\bar{o}k$ sb. yolk, it is uncertain whether j represents Gmc. g or j.

§ 242. I. Scand. j.

jiur sb. udder.

II Scand. g.

jaul vb. howl.

§ 243. Older Kendal $\bar{p}a$ initially has become ja, je in.

jak sb. oak.

jake sb. acre.

jans adv. once.

jan pron. and num. one.

jeder sb. fence made of dead sticks.

t.

§ 244. Kendal t initially has four origins, 1. OE. t, 2. Scand. t, 3. OFr. t, 4. OFr. cu.

Examples:

OE. t.

tastīks sb. pieces of willow bark used for besom.

tīa sb. toe.

tiets vb. teach.

tysl sb. tussle.

Note. In $t_{\bar{l}}$ the one t represents ME. t OE. t in \bar{d} æt-an. t in tait probably represents OE. \bar{d} , ME. t.

§ 245. Scand. t.

tak vb. take.

tay sb. sting.

tarn sb. tarn.

§ 246. OFr. t.

tent sb. tent.

tisbl sb. table.

tart sb. tart.

§ 247. OFr. cu.

twilt sb. quilt.

§ 248. Kendal t medially and finally has four origins, corresponding to 1. OE. t, 2. Scand. t, 3. OFr. t and 4. Celtic t.

§ 249. OE. t.

baut sb. bolt.

dyst sb. dust.

jet sb. gate.

fetl(up) vb. prepare.

paut vb. pret. thought.

Note. OE. d, when unstressed in ME., has been unvoiced in Kendal in a few participles and in the word forst adv. forward. — e. g. — kilt past. part. killed, telt past part. told. In dryut sb. drought t represents ME. hp from OE. 30 in the oblique cases drugges, drugge. drugge would give dryup.

§ 250. Scand. t.

gust sb. gust.

kęst vb. cast.

üəst sb. curds.

Note. -st-n has become -sn in kesn cast. pp. to kest vb. cast.

§ 251. OFr. t.

antez conj. in case.

bjest sb. beast.

bat sb. stroke (cf. scythe). twilt sb. quilt.

wist vb. waste.

Note. sts has become s in the n. pl. biss 'cattle'.

§ 252. Celtic t.

brat sb. apron.

§ 253. The demonstrative pronoun t' = the, perhaps represents the final t in OE. ∂xt , cf. $t\bar{t}z$ the one, OE. $\partial xt\bar{t}a$. When ∂z does actually occur, as in verse, it is borrowed from Literary English.

d.

§ 254. Kendal d initially has three origins corresponding to 1. OE. d, 2. Scand. d and 3. OFr. d.

Examples:

§ 255. OE. d.

daft adj. foolish.

 $d\bar{e}$ sb. day.

daik sb. ditch.

did sb. deed.

§ 256. Scand. d.

dauli adj. melancholy.

dēzd adj. confused.

dęg vb. water.

div sb. noise.

§ 257. OFr. d.

dāb vb. daub.

dīm sb. dame.

diss. dish.

dyut vb. doubt.

§ 258. Kendal d medially and finally has six origins, corresponding to 1. OE. d, 2. OE. p, 3. Scand. d, 4. Scand. d, 5. OFr. d, and 6. OFr. t.

Original p, σ whether OE., or Scand. became d in Kendal before r and l, and in medial positions between two vowels, which d was later advanced to the point alveolar position (§ 28) when r followed, giving d.

Examples:

I. OE. d.

aidl adj. idle.

ladį sb. ladle.

dīəd adj. dead.

maud sb. mould.

Note. In bund! sb. 'bundle' d has been inserted, probably owing to the influence of Literary English. Otherwise original d between n and l has been lost, E. g. kan!, han!, ran!bok, kin!in.

П. ОЕ. ₽.

stid! vb. walk lazily vandyke.

swad! vb. swathe.

widi sb. bent ozier.

§ 259. I. Scand. d.

ęldin sb. fuel.

padak sb. frog.

II. Scand. J.

ad; vb. earn.

rad(up) vb. tidy.

ridn adj. peevish.

stjdį sb. anvil.

§ 260. I. OFr. d.

skōd vb. scald.

med! vb. meddle.

II. OFr. t.

podi/ sb. porridge.

l.

§ 261. Kendal *l* initially has four origins, corresponding to 1. OE. *l*, 2. OE. *hl*, 3. Scand. *l*, 4. Scand. *kl*.

Examples.

I. OE. L

lay adj. long.

lig vb. lie.

lam sb. lamb.

līm adj. lame.

II. OE. hl.

laf vb. laugh.

lįad sb. load.

ladį sb. ladle.

lof sb. loaf.

§ 262. I. Scand. l.

leg sb. leg.

lęt sb. seek.

lei sb. scythe.

ħэр sb. barn.

II. Scand. hl.

laup vb. leap.

§ 263. Kendal *l* medially and finally has three origins, corresponding to — 1. OE. *l*, 2. Scand. *l*, and 3. OFr. *l*.

Examples:

OE. l.

āld adj. old.

fals adj. fallow.

baul sb. bowl.

gəsl sb. gristle.

Note. In the combination $o + l + \cos l$ has in most cases been lost, e. g. baut sb. bolt, maud sb. mould. Where it is present as in gauld gold, baulsts bolster, it is due to the influence of Literary English.

§ 264. Scand. l.

meldər sb. quantity of corn. dayli adj. gloomy.

gildərt sb. hairnoose.

§ 265. OFr. l.

alsks sb. vinegar.

skaləp sb. loose piece of a garment.

§ 266. The combinations kl, gl, have remained in Kendal throughout, the change to tl, dl, being unknown.

Examples:

I. kl.

klava sb. clover.

klim vb. climb.

klop sb. cloth.

II. gl.

glad adj. glad.

glas sb. glass.

glop vb. stare.

§ 267. Kendal *n* initially has six origins, corresponding to — 1. OE. *n*, 2. OE. *cn*, 3. OE. *zn*, and 4. OE. *hn*, 5. Scand. *n*, 6. OFr. *n*.

There was probably at one time a distinction made in the Kendal dialect in the pronunciation of n from OE. n, and n from OE. cn, the latter possibly being unvoiced. Now, however, there is no trace of any such distinction. Other, Northern dialects according to Ellis unvoiced the n from the latter source; e.g. $n\bar{a}$ from *cnāwa (Ellis spells it nhaa EE. Pron. V, p. 542). The older pronunciation must have been supplanted owing to the influence of Literary English.

Examples.

I. OE. n.

nain num. nine.

naut sb. nothing.

nębor sb. neighbour.

nid vb. need.

II. OE. cn.

nā vb. know.

nied vb. knead.

naif sb. knife.

nįsv sb. knave.

nok vb. knock.

III. OE. 3n.

na vb. gnaw.

IV. OE. hn.

nek sb. neck.

nes adj. tender, nesh.

§ 268. Scand. n.

nīsf sb. fist.

§ 269. OFr. n.

nateral sb. simpleton.

§ 270. Kendal n, medially and finally, has six sources 1. OE. n, 2. Scand. n, 3. OFr. n, 4. OE. nz, 5. OE. nd, 6. Scand. ng — the last three occurring only with secondary, or absence of stress.

Examples:

OE. n.

bend vb. bend.

born p. part. born.

§ 271. Scand. n.

apn conj. perhaps.

brakn sb. bracken.

§ 272. OFr. n.

antəz conj. in case.

§ 273. OE. n_J.

berijn sb. funeral.

huni sb. honey.

myun sb. moon.

grēn sb. prong of a fork. slekn vb. slake the thirst.

karen sb. carrion.

fitinz sb. footprints.

ibmin sb. evening.

§ 274. OE. nd.

gitn pres. part. getting.

mękin pres. part. making.

§ 275. Scand. ng.

sęlin pres. part. selling. setn pres. part. setting.

eldin sb. fuel.

r.

§ 276. Kendal r initially has six origins, corresponding to 1. OE. r, 2. OE. hr, 3. OE. wr, 4. Scand. r, 5. OFr. r, 6. Celtic r.

Examples:

I. OE. r.

ra sb. row.

rjep sb. rope.

rayk adj. close, thick.

rad adj. red.

II. OE. hr.

rig sb. ridge.

rie vb. rue.

III. OE. wr.

rait vb. write.

rip sb. wreath.

§ 277. Scand. r.

rag sb. hoarfrost.

rjsk vb. wander.

raiv vb. tear.

red up vb. tidy.

rens vb. rince.

§ 278. OFrench. r.

ramp vb. ruin, destroy.

revat sb. rivet.

rēdž sb. rage.

rozin sb. resin.

§ 279. Celtic r.

ryb vb. rub.

§ 280. Kendal r, medially and finally, corresponds to 1. OE. r, 2. Scand. r, 3. OFr. r, and 4. Celtic r.

Examples:

OE. r.

boro vb. borrow.

briv vb. bring.

bard sb. bird.

ēdər pron. either.

hors sb. horse.

§ 281. Scand. r.

ber sb. whirr, noise.

grēn sb. prong of a fork.

hare sb. harrow.

§ 282. OFr. r.

badžər sb. small corn dealer.

bargin sb. bargain.

hyrt sb. hurt.

krękst sb. cricket (insect).

§ 283. Celtic r.

krag sb. crag.

kril sb. bench for pig killing.

krydz sb. curds.

ţ.

§ 284. Kendal t occurs only when before r or s + r, and corresponds to 1. OE. t, 2. OFr. t.

Examples:

I. OE. t initially.

triu adj. true.

triup sb. truth.

trof sb. trough.

tren! sb. wheel of wheel barrow.

II. OFr. t initially.

trai vb. try.

trubl sb. trouble.

III. OE. t medially.

beter adj. better.

stray adj. strong.

welter vb. stagger about.

IV. OFr. t medially.

alter vb. alter.

mater sb. matter.

partridz sb. partridge.

ą.

§ 285. Kendal d occurs before r and s + r. Initially it corresponds to OE. d and Scand. d.

Examples:

dra vb. draw.

dri adj. tedious.

drai adj. dry.

drījam vb. dream.

d in druun vb. drown most probably represent Scand. d, not OE. d. E. g. *drugna see § 109 Note and Björkman p. 176.

§ 286. Medially d corresponds to 1. OE. intervocalic d and p, 2. Scand. d. This treatment of p is one of the leading characteristics of the Kendal dialect and of those most nearly related. (Ellis EE. Pron. V, p. 556—557, and 565 see D. 31 var 3. Nos. 6—11.) Elsewhere as in Midyorkshire [D 30 var 1] Muker, Hawes and Lower-Holker-in-Cartmel we get & [Ellis's dh]. When the change I < d took place is unknown, but is probably later than the ME. period, for in ME. a few p forms actually occur where now in Kendal we have d; e. g. ayper Hav. 2665, oper Hav. 1755. I have divided the cases where orig. OE. d and p have become d in Kendal, into three groups, according as ME. shows 1. d, 2. p, 3. d, or p. In all these cases Literary English has δ , which sound has clearly usurped the place d in several instances. Of the two types d and p the d-type seems to be Northern, the p-type Midland and Southern as a whole. It is yet highly probable that there were far more words with p, than are actually recorded. Stratmann-Bradley gives only two words which show both d and p.

Examples:

OE. d and p.

I. ME. d.

blędər sb. bladder.

hider adv. hither.

fadər sb. father.

myder sb. mother.

gidər vb. gather.

weder sb. weather.

hwider adv. whither.

II. ME. p.

ēdər pro. either.

ydər pro. other.

rydər sb. rudder.

hwēdər pro. which.

Note. jeder fence made of dead sticks, OE. eafor probably belongs here.

III. ME. d and p.

feder sb. feather.

ledar sb. leather.

§ 287. Scand. d has become d in: blader sb. noise.

§ 288. OFr. ss (scissoire) has become d through d in siderz sb. scissors from older *siderz.

§ 289. Kendal d after the cons. l, n and r represents OE. and Scand. d.

Examples:

I. OE. d.

hinder adj. hind.

myrdər sb. murder.

hinder vb. hinder.

wynder sb. wonder.

fyuder sb. shoulder.

II. Scand. d.

gildərt sb. snare.

melder sb. quantity of corn.

þ.

§ 290. Kendal p occurs initially and finally and represents 1. OE. p, 2. Scand. p. Initially it has remained unaltered. At the end of words, it represents ME. final p, usually from a final consonant but not always so.

Examples:

I. OE. p.

brop sb. broth.

tiųp sb. tooth.

diep sb. death.

wurp sb. and adj. worth.

II. Scand. p.

bjep pro. both.

ljep sb. barn.

ð.

§ 291. Kendal δ only occurs in a very few examples, and represents a ME. voicing of OE. β , when in a position of secondary stress (see HES. § 780). Initially, it represents OE. and Scand. β ; finally, OE. medial δ in such words as *smode ME. smothe (see § 107), ladere ME. lathere Hamp. Ps. LXXVII, I*.

Examples:

I. OE. p initially.

đen adv. then.

ofor adv. there.

đị adj. thy.

đựu pro. thou.

II. Scand. p initially.

đẹ pro. they.

for (for) pro. these.

III. OE. medial δ .

किंग adj. loath.

smuuð adj. smooth.

8.

§ 292. Kendals initially corresponds to 1. OE. s 2. Scand. s, 3. OFr. s, and 4. OE. sc in unstressed positions.

For sk see § 234 ff.

The change sc to s took place already in the ME. period, in the Northern dialects (Morsbach § 6, A 16).

Examples:

I. OE. s.

sā sb. saw.

sini sb. sinew.

sębm num. seven.

spara sb. sparrow.

Hirst, Anglist. Forschungen. 16.

II. Scand. s.

sail vb. strain, sb. sieve etc. stjdj sb. anvil.

slokn vb. slake. storkn vb. stiffen, congeal.

III. OFr. s.

sara vb. serve, feed.

sas vb. scold.

siyər adj. sure.

IV. OE. sc.

sal, -sl-, vb. shall.

syd, sod, vb. should.

- § 293. In medial and final positions Kendal s has the following origins —
- 1. OE. and Scand. s have remained unvoiced α) when final, except when immediately preceded by a voiced stop, β) when a voiceless stop or stops precede, or follow.
- 2. OE. rs has become s in a few words, but in other cases r remains.
- 3. When at the end of a syllable with *l* following in the next, s seems to remain unvoiced.
- 4. Medial and final sk from OE. $s\dot{c}$ and Scand. sk, as a rule are either preserved, or become f; but owing to assimilation pass into s in a few words.

Examples:

§ 294. OE. final s.

byus sb. cowstall.

hyus sb. house.

glas sb. glass.

bs sb. loss.

§ 295. Scand. final s. laus adj. loose.

Note. lyss vb. loose is probably derived from ME. los adj. loose of Scand. origin. See Stratmann-Bradley p. 405.

§ 296. OE. s before voiceless stops.

baulsta sb. bolster.

gas! sb. gristle.

fasn vb. fasten.

famfīst adj. shamefaced.

waks vb. grow.

Note. eks vb. ask, is by metathesis for *esk.

§ 297. OE. $rs \ll s$ in:

bas sb. perch (fish).

wasp vb. grow worse.

but

gers grass.

§ 298. OE. s before l.

kəsləp sb. rennet bag.

tus! sb. tussle.

§ 299. OE. sc < s by assimilation.

asbyərd sb. box for keeping ashes in, for *ask-būərd.

§ 300. Scand. $sk \ll s$ by assimilation.

mens sb. kindness. Cf. mensfyl.

rens vb. rince.

z.

§ 301. Kendal z only occurs medially and finally, and corresponds to, 1. ME. s in medial intervocalic positions from OE. s, 2. Scand. medial s, 3. OFr. medial s, 4. ME. final s in unstressed positions except when a voiceless consonant precedes, 5. OFr. unstressed s, 6. s after a voiced stop.

Examples:

§ 302. Medial ME. s.

bizm sb. besom.

glęz vb. make shine.

blęz vb. blaze.

tīzz vb. tease.

wizntli adj. wizzened.

z in hezl sb. hazel; is the usual development of original intervocalic s, cf. hesyl Pr. P. 288. gezlin sb. gosling instead of *geslin is explained owing to the fact that the syllables in this word were

divided as follows — ges-ling. Tusl sb. tussle and kaslop sb. rennet bag represent older *tusl-en and kesl-op. In these cases the intermediate vowel was lost previous to the voicing of s.

§ 303. Scand. medial s. mēzd adj. confused. dēzd adj. dazed.

§ 304. OFr. medial s. rozin sb. resin.

§ 305. ME. final s.

asaz sb. pl. ashes.

olez adv. always.

hyuzəz sb. pl. houses.

əz conj. as.

The pl. ans is probably a new formation from *an.

§ 306. OFr. final s. antəz conj. in case.

ſ.

§ 307. Kendal f initially has three origins, corresponding to 1. OE. sc, 2. Scand. sk, 3. OFr. s.

In some words \int represents Northern ME. sch (i. e. \int or some similar sound) but in other cases it must have taken the place of ME. sk, especially in words like \int also adj. shallow, \int vb. slide (see § 234). \int ag in byto \int ag piece of bread and butter, may represent OE. *sceacza, but its origin is as yet undecided. For medial $c_3 < g$ cf. *docza < dog, licza < lig etc. (§§ 227, 228).

Examples:

§ 308. OE. sc.

fadə sb. shadow.fip sb. sheep.fak vb. shake.fərt adj. short.fam sb. shame.friyk vb. shrink.filf sb. shelf.fryb sb. shrub.filə sb. scree.fyu sb. shoe.

§ 309. Scand. sk.

sale adj. shallow.

forl vb. slide.

§ 310. OFr. s.

Juga sb. sugar.

This may however be borrowed from Literary English as s in siur sure (OFr. sûr) has remained unaltered.

§ 311. Medially and finally Kendal f corresponds to 1. final OE, sc, 2. final Scand. sk, 3. final OE. c, after n, 4. Scand. k after n, 5. OFr. ge unvoiced. Iu some words OE. sc must have remained in a fronted form until it became f, in others it became sk early. In some of the latter f took the place of sk either by analogy with existing -f- forms or by borrowing from Literary English. Examples of old $-s\dot{c}$ becoming \int are, $e\int$ sb. ash ME. esche Cath. 117. fif sb. fish ME. fische CM. 2865. wef vb. wash ME. wesche CM. 27547 wasche CM. 15319. f has taken the place of older *sk- in afez sb. pl. ashes (see § 234), dif sb. dish ME. disc Lazamon 19692. Probably the Scand. words by sb. bush, raf adj. rash, had -sk in the Kendal dialect at the time of Cursor Mundi. OE. c has become f after n in the words ben f sb. bench and ran fsb. 'thickset-man'. This form with f is perhaps due to the oblique cases, *bences, *bence the nom. *benc giving bivk and bevk (§§ 34, 43). *Bence would give ME. *benche, which would become benf, with simplification of tf, to fafter n. Yet perhaps this form is merely borrowed from Literary English. But in the case of ranf this cannot be so, as the word does not occur in Literary English. Here undoubtedly the f is derived from the oblique cases *rinces, *rince, the ME. renk Gaw. 691 coming from the nom. rinc, which would give Kendal *rayk.

Buns sb. bunch from Scand. *bunki, cf. OIc. bunke pile, heap Norw. dial. bunke heap (Aasen p. 90) is probably from a ME. *bunche, with fronting of older k. In puns vb. punch, hit, ME. g(dz) has been unvoiced to ch(ts) and then simplified to s, as above.

Examples:

§ 312. Final OE. sc.

asaz sb. ashes.

kes sb. kecks.

dif sb. dish.

res sb. rush.

es sb. ash (Fraxinus).

presauld sb. threshold.

fish. fish.

wes vb. wash.

§ 313. Final Scand. sk.

buf sb. bush.

raf adj. rash.

§ 314. Final OE. c after n.

benf sb. bench.

rans sb. thickset-man.

§ 315. Scand. k after n.

bunf sb. bunch.

§ 316. OFr. ge (3).

podif sb. porridge.

p.

§ 317. Kendal p initially contains only a small number of words, of which a few are OE., one Scand., most OFr., and the remainder uncertain.

Its sources are 1. OE. p, 2. Scand. p, 3. OFr. p.

Examples:

I. OE. p.

parek sh. paddock.

plyu sb. plough.

pik sb. pitch.

puu vb. pull.

pūsk sb. bag.

II. Scand. p.

padak sb. frog.

III. OFr. p.

par sb. pair.

pę vb. pay.

pārlissadj. dangerous.

podis porridge.

Note. park sb. park may be of OFr. or of OE. origin (§ 60).

§ 318. Kendal p medially and finally corresponds to 1. OE. p, 2. Scand. p, and 3. OFr. p.

Examples:

I. OE. p.

apl sb. apple.

ripp sb. rope.

hūəp vb. hope.

fip sb. sheep.

opn vb. open.

hwelp sb. puppy.

Note. In hop! vb. hobble (used of horses) b seems to have been unvoiced (see § 78). Usually older b, whatever its origin, remains voiced.

II. Scand. p.

apņ conj. perhaps.

hap vb. wrap.

gjep vb. gape.

klip vb. shear.

kələp vb. rasher of bacon.

(jet)stuup sb. gate post (§ 110 Note).

III. OFr. p.

frap vb. splutter.

ramp vb. ruin, destroy.

kupl sb. couple.

supe sb. supper.

b.

§ 319. Kendal b initially has four sources — 1. OE. b, 2. Scand. b, 3. OFr. b, 4. Celtic b.

Examples:

I. OE. b.

bai vb. buy.

bįsk vb. bake.

barn sb. child.

bizm sb. besom.

bęk sb. brook.

blind adj. blind.

II. Scand. b.

bag sb. bag.

bask vb. bask.

blęk adj. deep yellow of butter.

brakn sb. bracken, fern.

byl sb. bull.

ber sb. whirr.

III. OFr. b.

badžər sb. small corndealer. bjək sb. beak.

barel sb. barrel.

boni adj. bonny.

bakļ sb. buckle.

IV. Celtic b.

bog sb. bog.

brat sb. apron.

§ 320. Kendal b medially and finally has seven sources. These are 1. OE. b, bb, 2. Scand. b, bb, 3. OFr. b, 4. Celtic b, 5. OE. f before n < b, 6. Scand. f before n < b, 7. Scand. pp is voiced.

Examples:

I. OE. b, bb.

nęb sb. beak.

fryb sb. shrub.

nębər sb. neighbour.

əbyut prep. about.

II. Scand. b, bb.

blab vb. let out a secret. gab sb. talkativeness. gab! vb. chatter, gabble.

III. OFr. b.

jəbļ adj. able.

tīəbļ sb. table.

trubl sb. trouble.

IV. Celtic b.

ryb vb. rub.

§ 321. OE. medial f (with the phonetic value $\ni v$; see Bülbring, AE. Elementarb. § 474) has been stopped before n in the words ebm adv. straight, just, ibmin sb. evening, sebm num. seven, slebm num. eleven, which represent OE. efne, æfnung, seofon and *elleofon. In the two last words the Kendal form must have been derived from a ME. *seune, *elleu-ne; cf. ME. seuen CM. 508 elleuen CM. 4088. The development was probably fn < bn < bm < bm. In sebmin num. seventy, m seems to have been dissimilated to n, owing to the following -t. Here b may have been preserved throughout, if this be a genuine dialect word.

§ 322. Scand. pp has probably been voiced in nab vb. seize grab at, cf. Dan. nappe.

m.

§ 323. Kendal m initially has three sources, viz. 1. OE. m, 2. Scand. m, 3. OFr. m.

Examples:

I. OE. m.

mad adj. mad.

mits adj. much.

maud sb. mould, earth.

myun sb. moon.

II. Scand. m.

melder sb. a quantity of corn.

mens sb. kindness.

męzd adj. confused.

III. OFr. m.

mater sb. matter.

medl vb. meddle.

muni sb. money.

§ 324. Medially and finally Kendal m has four sources, which are 1. OE. m, 2. Scand. m, 3. OFr. m, 4. OE. n after f < m by assimilation.

Examples:

I. OE. m.

hamer sb. hammer.

kram! vb. scramble.

hīm sb. home.

sum pro. some.

In hopen vb. upset, older im has become mi.

II. Scand. m.

blyum sb. bloom.

gom sb. good sense.

waml vb. roll about.

III. OFr. m.

bljam vb. blame.

ramp vb. ruin.

kām adj. calm.

tsimle sb. chimney.

IV. OE.
$$f + n < bm$$
,

ebm adv. straight.

ibmin sb. evening.

sębm num. seven.

Note. Scand. n has become m in cbm sb. object.

f.

§ 325. Kendal f initially has four sources, which are 1. OE. f, 2. Scand. f, 3. OFr. f, 4. Celtic f.

Examples:

I. OE. f.

fadər sb. father.

fif sb. fish.

fēn adj. glad.

fijk sb. flitch.

II. Scand. f.

fęla sb. fellow.

flę vb. scare.

fūs sb. waterfall.

Ш. OFr. f.

fies sb. face.

flēl sb. flail.

frap vb. splutter.

IV. Celtic f.

fun sb. fun.

§ 326. Medially and finally Kendal f has four sources and corresponds to 1. OE. f, 2. OE. h, g, ME. final gh, 3. Scand. f, and 4. OFr. f.

§ 327. f when final in OE. and before voiceless consonants was voiceless and has remained so in such positions till the present day, whereas medial intervocalic f is always voiced. Such words as snaft vb. act queerly, and fuft sb. shovel, by the side of ME. schovele, are due to the early loss of e between f and l, producing forms like *snaf-l-en, *schof-l-e, which would remain unvoiced. On the other hand $g\bar{l}_{2}v-l_{2}k$ sb. crowbar goes back to a ME. gavelokes, Psalm LIV, 22, where v (older f) was intervocalic. In dafl vb. stun, t has been lost between f and l. It represents OE. *dæft-lian. In f adv. off, and f, f, f, f, f, with full stress, and with lack of stress.

Examples:

daft adj. foolish.

kaf sb. chaff.

efter prep. after.

löf sb. loaf.

hof sb. half.

filf sb. shelf.

In $n\bar{i} > f$ sb. fist f represents Scand. f, in stuf sb. stuff OFr. f.

§ 328. Medial OE. h and g (with probably the phonetic values \bigcap \bigcap [HES. § 896]) became when final hw (\bigcirc) in the ME. period and later passed into f (\bigcirc). Medially they became w, giving rise to diphthongs in Modern English. The date of the change hw < f is not known, but is probably older than the 16^{th} century. Wallis in the 17^{th} gives $c\bar{o}ff$, $tr\bar{o}ff$, tuff, ruff, laff, and adds 'Inough (singulare) sat multum sonatur inuff, at inough (plurale) sat multa sonatur enow'. These two last words appear in Kendal as *muf* and *mig*, and represent ME. inogh: inoghe. They seem to be used indiscriminately.

Examples:

laf vb. laugh.
lafter sb. laughter.
lafter sb. brood.
ruf adj. rough.
tof adj. tough.
trof sb. trough.

 \boldsymbol{v} .

§ 329. Kendal v initially only occurs in words of OFr. origin; e. g.

vara adv. very.

va-laik adv. perhaps.

vau vb. vow.

§ 330. Medially and finally Kendal v represents 1. OE. medial f, 2. OE. medial f after l, 3. OE. f before r, 4. Scand. f, ME. v in medial positions and 5. OFr. v.

In 1., 2. and 3. f was medial, in ME., not final. gipvlpk sb. crowbar represents ME. gavelokes Ps. LIV, 22. In kovz sb. pl. calves, sov sb. salve we have ME. l+f+vowel owel. — e. g. peos salfe Mk. XIV, 5, calves Wicl. Num. XXIX, 32. In fvor adv. ever, fvor sb. clover, re-

presenting OE. æfre. clæfre, f became intervocalic in ME.; e. g. efere Hom. I, 9, 21, evere Hav. 424.

Examples:

I. OE. f.

aivi sb. ivy.

gjv vb. give.

draiv vb. drive.

Note. hev vb. have is derived from forms like hafa, hafat.

II. Scand. f.

raiv vb. tear.

sīzvz sb. sedges.

III. OFr. v.

revat sb. rivet.

straiv vb. strive.

hw.

§ 331. Kendal hw which only occurs initially, has five sources, which are 1. OE. hw, 2. OE. cw, 3. Scand. kv, 4. OFr. qu, 5. Celtic chw.

In unstressed positions hw always becomes w; e.g. $n\bar{\imath}$ to war wi livt = 'near to where we lived,' but hwar is-to $g\bar{a}n$? = 'where art thou going?'

Examples:

I. OE. hw.

hwā, hwīz interrog. pro. who.

hwęder pro. which.

hwęlp sb. puppy.

hwil sb. wheel.

II. OE. cw.

hwik adj. living.

III. Scand. kv.

hwai-kof sb. heifer-calf.

IV. OFr. qu.

hwajst adj. quiet.

V. Celtic chw.

hwin sb. gorse. See § 31 Note.

w.

§ 332. Kendal w initially corresponds, to 1. OE. w, 2. Scand. v, 3. Scand. hv, and 4. OFr. v.

Examples:

I. OE. w.

waild adj. wild.

wark sb. work.

wank! adj. weak, feeble, etc.

wepm sb. weapon.

II. Scand. v.

war vb. waste. See § 60.

III. Scand. hv.

wards sb. weekdays. See § 60.

IV. OFr. v.

wīzst vb. waste.

wēstral sb. wastrel.

§ 333. Medially Kendal w occurs only after k, t, d s, and represents 1. OE. w, 2. Scand. v, and 3. OFr. cu.

Examples:

1. OE. w.

swad, vb. swathe.

swain sb. pig.

swīal sb. burn away (of a candle).

dwind vb. dwindle represents ME. *dwindelen from dwinen, cf. ON. dvina. twain vb. waste away, is of uncertain origin; but cannot be for *dwain as dw seems to remain voiced in Kendal.

II. OFr. cu.

twilt sb. quilt.

This change is in all probability due to the assimilation of the velar to the preceding alveolar in the compound bed-twilt for *bed-kwilt.

h.

§ 334. The stress h in Kendal is always preserved when initial, but after consonants and in medial positions is always lost, e. g. hamor sb. hammer, but tamor the hammer, tamoriod the hammers head. In hylot sb. owl it seems to have been inserted where originally absent. It corresponds to 1. OE. h, 2. Scand. h, 3. OFr. h.

Examples:

I. OE. h.

hāld sb. hold.

hjad sb. head.

II. Scand. h.

hapk sb. hank.

hip vb. hang.

III. OFr. h.

hant vb. haunt.

hyrt sb. hurt.

tſ.

§ 335. Kendal tf when initial corresponds to 1. OE. fronted c, 2. A Norm. ch.

Examples:

I. OE. c.

tsikn sb. chicken.

tsiuz vb. choose.

tsusk vb. choke.

Note. t f sb. churn, t f church instead of *kərn and *kərk are borrowed from Polite English. t f in t f if is b. cat probably represents OE. c; cf. ME. chitte, whelp 'catulus'.

II. A Norm. ch.

tsēn sb. chain.

t/imle sb. chimney.

112 Chapter V. The Kendal consonants and their OE. equivalents.

§ 336. Medially and finally tf corresponds to 1. OE. \dot{c} , $\dot{c}\dot{c}$, 2. OE. 3 after t, 3. ME. ch from OFr. ch, c.

Examples:

I. OE. c, cc.

bat sb. batch (from *bæces, *bæce).

nt∫ pro. each.

rats vb. eructate.

II. OE. 3 after t.

ortset sb orchard. This is perhaps a loanword. See § 82.

III. ME. ch.

kats vb. catch.

ďŽ.

§ 337. Kendal dz occurs only in a few words of ANorm. origin, and represents AN. j and g.

Examples:

I. Initial d z = ANorm. j.

džakdā sb. jackdaw.

džamilannek sb. heron.

džust adv. just.

II. Medial $d\ddot{z} = ANorm. \ \dot{g}$.

ēdž sb. age.

rēdž sb. rage.

Note. In $bad\check{\jmath} ar$ it represents OFr. di, e. g. bladier. In $partrid\check{\jmath}$ it represents Polite English $d\check{\jmath}$.

Chapter VI.

Table of consonant-changes.

Kendal — OE. etc.

§ 338. Kendal k.

Kendal k = 1. OE. c before original back vowels § 211, 1.

= 2. OE. c before original front vowels § 211, II.

= 3. OE. cc, x, medially § 216.

Chapter VIII.

Outlines of the Accidence of the Kendal Dialect.

§ 430. The Kendal dialect has preserved relatively few of the older inflections, its condition in this respect being similar to that of Polite English.

Nouns.

§ 431. These have a singular and plural, the latter being marked usually by the termination z. Modern Kendal has practically speaking but two cases, the nominative and the genitive. The former has also the functions of the older accusative and dative. The nominative (with the functions of accusative and dative) is uninflected, case relationships being expressed by the relative position

of the words in question. E. g. 'giv kat sum milk' where kat is dative 'rists mi fador o kup', where mi fador is dative. Often the relationship is expressed by the preposition to. tol as, 'send sum mist tot men it he'. The genitive is expressed by the addition of -z (at times -oz, -s), OE. -es, as 'o manz laif', 'kut uut fisoz gilz'. The -r-nouns as a rule form their genitive without -z, as 'hor fador diuor', cf. ME. fader (gen.) Ferumbras 1351. 'hiz mudor āld bliu bonot', cf. ME. on his moder knē CM. 11681. 'mi brudor kūot', cf. ME. broder Laz. 6741. In a few cases an uninflected genitive occurs with other nouns as 'dog mudor', 'kat lug'. Here the absence of -z is perhaps due to the analogy of the -r-stems.

The genitive can also be expressed by the preposition ∂v , ∂v , as 'tank of diver'.

The partitive use of the genitive is also expressed by ∂v , ∂

- § 432. The plural is usually formed by the addition of -z (at times -2z, -s) to the stem, as digz, hōz, ratuz, refez, fifez, kats, rieps. Nouns ending in f, s voice the consonant before z in the plural as lief, lievz, lōf, lōvz, kōf, kōvz, huus, huuzez. buus sb. cowstall, seems to have no plural.
- § 433. The Kendal dialect has the following Umlaut plurals e. g. men, gis, tip, kai, lais, mais. There are only two -n plurals in Kendal; in sb. eyes and *fuun sb. shoes, the latter of which is now obsolete, its place being taken by fuuz. The -r pl. *tfildər is unknown, its place being taken by barnz. A few nouns originally neuter, have the same form for singular as plural e. g. fip pl. fip, dier pl. dier, swain pl. swain. The latter, however, seems to be generally used in the singular as 'e gert big walepin

swain'. The word bjəst sb. beast has the plural bjəs used collectively.

Nouns expressing weight or measure usually have no plural as, 'tuu pund a mīal'. But those expressing time or space seem to have a plural as, prī jīaz, ēt munps. A few nouns are only used in the plural as sidarz, tanz.

Adjectives.

§ 434. The adjective remains uninflected both in singular and plural.

Many new adjectives have been formed in the dialect by the addition of -li (OE. lic) to ME. adjectives. These correspond sometimes, but not always, to the adjectives in -ish of Polite English. Examples are — bruunli, āldli, dərtili, kwiərli, wetli.

The only adjective in isc seems to be walf insipid, tasteless, for OE. *walhisc, ME. *wallisch, cf. Lonsdale Dial. wallaish.

§ 435. Adjectives are compared by the addition of -2r, -2st (OE. -ra, -0st), as hārd, hārder, hardest. The umlauted comparatives and superlatives have passed over into the -ra, -0st type; hence lay, layer, layest, instead of lay, *leyer, *leyest.

The following adjectives take positive, comparative, and superlative, from different stems —

bad, wār, wārst.

fār, fārdər, fārdəst.

gud, beter, best.

lail, lįss, lįsst.

mįts, mį r, mį ost.

nīər, niədər, niədəst.

Numerals.

- § 436. The Kendal dialect has the following cardinal numerals, which are indeclinable jā (jan), tyu (*twīp obsolete), prī, faupr, faiv, siks, sebm, ēt, nain, ten, plebm, twelv, pərtin, fauptīn, twenti, pərti, faupti, fifti, sebmiti, hundrad, pyuzņd.
- § 437. The ordinals are fərst, seknd, pərd, fauərp, fift, siksp, sebənp, ētp, nainp, tenp, twentiəp, hundrətp. The distributives are 'jan bi jan', 'tuu bi tuu,' 'prī ət jā taim' or 'prī ət ə taim' etc.

The multiplicatives are 'jans,' 'twais,' 'prī taimz,' 'bīpp taimz' etc.

The Definite Article.

- § 438. This is expressed in Kendal by what is probably a remnant of the neut. pron. dat. viz. -t. It is lost before the stops k, g, t, d, p, b; its place being taken by a more emphatic pronunciation of the consonant with possible slight glottal closure. (Denoted in the specimens by the accent' being inserted just before the consonant thus stressed.) Before l, r, s, m, n, hw and w it is sounded, but seems to be generally silent before sk, st, sp, sm, sn, as 'snā kumz duun varə hwaiətli,' 'skai liuks tərbl blak tə nīt'. h is generally dropped after it, as 'tamər' 'the hammer'.
- § 439. When however the article is preceded by the prepositions bi, i, into; anto, to o (ov) all of which end in vowels, the 't' is preserved, no matter what consonant follows, as 'had it bit 'tīop,' 'gā intot huus,' 'a went antot brig'. 'gin sumot tot lad on let im gay owē. 'az bi gān tot taun it marning,' 'tak o hier ot day ot bīot jo'. Examples of the treatment of the article are ''kats torbļ fruski tonīt,' 'gīs iz ant pand,' ''day lē duun ofuer tfaio,' ''padif hez nīo sōt

int," 't landz mį ān," 't sā izņt aus sarp," 't wamps hez įtņ ōt rasberis," 'spn tubm diuer en sī if tmīets redį".

§ 440. The indefinite article is expressed by ϑ , ϑn , the former before consonants and h, the latter before vowels. E. g. ϑ pig, ϑ hulst, ϑn apl. The negative indefinite article is $\eta i n$ as ' $\eta i n$ ϑn ϑ

The indefinite numerals are \bar{o} , meni, fix; od, a large number is expressed by 's get fix', 's lot', 's torbl meni'. Get fix denotes very few.

Pronouns.

§ 441. The Kendal dialect has the following pronouns —

That of the first person is nominative as (stressed form), a (secondary form), a (unstressed form) which are used as follows —

'aiz gān not đưu', 'a hupp jol kum ogēn', 'mún o kum in?'
The accusative and dative to this pronoun are
mi, mi, mo, which are used in the same way as the nominative as — 'it sīmz to mi, jid betor o stopt ot hōom', 'gi
mi dat plīot hōor'', 'hwat hezto braut mo?'

The plural is wi, wi, accusative and dative us, as as, 'wi pipk jid beter not', 'wi wokt ot we to Seber', 'eks us objut it not him', 'tel as hwat ji pipk at'.

The accusative is used for the nominative in the phrases 'its mi', 'us at naz im' (also 'wi at naz im', see § 482).

§ 442. That of the second person is nominative đụu (stressed form), đụ (secondary form), to (unstressed form), which are used as follows: — 'đụu mun diụ it not mi', 'đụ sęz đụz bin bụt a dōnt nã hweder đụ hez'.

To, the unstressed form is only used after verbs as 'hez-to bun dem bioz up jit?' 'wilto kum in?'

The accusative and dative of this pronoun are δi , δj , δi which are used as follows 'a didnt eks δi , had δj naiz', 'al gi δi sits a walapin if δi duznt lig hwaist'.

The plural of this pronoun is ji, jį, accusative and dative jo as 'ji pįnk az ran but apn az not so far uut', 'ji na, last taim a sed ji mud diu pisnz', 'a tel jo wat jid betor bi kiorful'.

Note. ji, jo is often used in place of the singular to people with whom the speaker is not quite so familiar as his own family.

When the neut. demonstrative pronoun 'it' follows immediately after the personal pronouns mo do, the two coalesce giving mot dot as 'hez to braut mot? nio av not braut dot'.

§ 443. The demonstrative pronoun of the third person is — hi (hi), si (si), it with the accusative and dative him, her, it and the genitive hiz, her, it as — 'hi kānt gā bet wi kan', 'hi sed wi mud gā in', 'si wants te net mi', 'sikņ kum', 'it wēnt dīe etō al epedte'. 'Tel im av sīn er.' 'Brin it bak wi bī.' 'Hiz suuz iz terbļ āld.' 'It fader wez e sīpdeg.'

The plural of this pronoun is $\delta \bar{e}$ (δe , δa), with accusative, genitive, and dative $\delta e m$, $\delta a m$, δm , the latter being derived from ME. hem.

Examples are — 'a want to bai tors bot of went sel it', 'brin om hwen of or redi', 'ool siyoli stop hwail a git offor'. 'Tel off to kum not tudor fok.' 'Of them' is expressed by on om, 'to them' by 'tol om', 'with them' by 'wi om', 'in them' by 'in om'.

§ 444. The reflexive pronouns are misel, disel and jorsel, hizsel, horsel, itsel, pl. yurselz, jorselz, dorselz. This relation may also be expressed by the simple personal pronoun, or by the demonstrative as — 'al in gā on lig

mə dyun.' 'Sit jə dyun ən mek jərsel ət hām.' 'Tel im tə wef im it kitsin.'

§ 445. The pronominal adjectives are mi, di, hiz, həri it, quar, jər dər, as 'mi fadər selt ə hiəl flək ə sip jistədi', 'hiz tētiz ərnt wurd gitn up bat quar tētiz apn ər betər nə dat!' 'It fadər wəz ə sip dəg'.

The independent possessives are main, fain, his, hers, quers juurz, fers.

§ 446. The other demonstrative pronouns in use in Kendal are —

địs, pl. đĩz, this.

đat, pl. đor, that.

sik, sits, such.

sīem, same.

§ 447. The interrogative pronouns are hwip who, gen. hwips, dat. hwip. hwat what.

hweder which of two.

Relative Pronouns.

§ 448. who is unknown in Kendal, its place being taken always by 'st' as 'Him st dusht git up in s mornin wil nive git twark dien'.

The Verb.

§ 449. There are three classes of verbs in the Kendal dialect — strong (ie-Ablaut), reduplicating, and weak. Of these the weak are most numerous, the strong and reduplicating types being remnants from an older stage of the dialect.

Conjugation.

§ 450. The verb possesses a simple present and preterite, formed on lines analogous to what happens in Polite English.

The present continuous, future, perfect, and pluperfect are compound tenses.

The imperative on the other hand is simple, but the subjunctive is compound.

§ 451. Paradigm of the verb to kym.

Present tense.

a kym, wi kymz (kym).

ou kymz, ji kym.

hī kymz, đệ kymz.

Preterite.

a kom, wt kom.

ðyu kom, ji kom.

hi kom, đệ kom.

§ 452. The present continuous is az kymon, the future al kum, asl kym, the perfect av kymt, the pluferfect ad kymt. The subjunctive is a mē kym (pres.), a myd kym (preterite), a wad o kymt, a myd o kymt, (perfect). The imperative is kym, pl. kym — let im kym.

§ 453. The present participle is kymon, the past participle kymt. Most strong verbs have the past participle in -n, e. g. born, worn, brokn. The infinitive is kym.

§ 454. The verb to bi is conjugated as follows —

Present.

am, az. wī ər, wjər.

dyuiz, dyuz. jī ər, jīər.

hī jz, hīz. đệ ər, đệər.

Preterite.

a waz or wəz, wi war or wər.

đựu was or wəz, jĩ wār or wər.

hị waz or wəz, đệ war or wər.

The future is as | bi, or al bi, the perfect av bin, the pluperfect ad bin, imperative bi, bi(j2), let am bi. The subjunctive mood is formed as in kym.

The present participle is $b\bar{i}$, the past b, infinitive b, b,

§ 455. The verb 'to kev' is conjugated as follows: —

Present.

a hęv, av. wi hęv, wiv. dyu hęz, dyuz. ji hęv, jiv. hi hęz, hiz. de hęv, dęv.

Preterite.

a hęd, ad. wi hed, wid. by hed, by hed, jid. hi hęd, hid. bē hed, bēd.

The imperative is hev. In the future hev sometimes becomes a, as 'asl a naut ato to dist not oat'. The present . participle is hevin, the past hed.

Strong (Ablaut) Verbs.

§ 456. Of these there are six classes in the Kendal dialect, corresponding to six Gmc. classes of Ablaut (see Sievers Ags. Gr.³, § 381 ff.). In many cases verbs have been transferred from one class to another. In others they have become weak.

§ 457. First Class (Gmc. 5, ai, i, i). bait, but, bits, bits.

draiv, driev, drevn, drive. raid, rjed, rjdn, ride.

haid, hjad, hjdn, hide.

§ 458. Second Class (Gmc. eu, au, u, o).

flai, fliu, flon, vb. fly.

friz, friez, frozn, vb. freeze.

krīp, krīpp, kropņ, vb. creep.

Note. tfiuz, originally strong has become weak.

§ 459. Third Class (Gmc. i, a, u, o(u)).

I. nasal + cons.

bind, band, byn(d), bind.

drink, drank, drunk, drink.

find, fan(d), fun(d), find.

klim, klam, klym, climb.

or klimt, klimt.

sip, sap, sup, sing.

frink, frank, frunkn, shrink.

II. l + cons.

The three verbs originally belonging here, help, milk, swals have become weak.

III. r, h + cons.

burst, brast, brosn, burst.

fait, faut, fight.

ren, ran, ren, run.

prest, prast, presn, thrust.

§ 460. Fourth Class (Gmc. e, a, \bar{z} , o).

bīpr, bīpr, born, bear.

brek, brak, brokņ, break.

kym, kom, kymt, come.

stīpl, stīpl, staun, steal.

Note. *fier is not in use in Kendal, only the p. p. forn being used. kut, originally weak, now belongs here, e. g. kut, kut, kutn.

§ 461. Fifth Class (Gmc. e, a, \bar{z} , e).

st, et, etn, eat.

git, gat, gitn, get.

giv, gev, or ge, gin, give.

sit, sat, sitn, sit.

tred, tried, trade, tread.

lig, lē, lēn, lie.

st, sā, sīn, see.

§ 462. Sixth Class (Gmc. a, \bar{o} , o, a).

drā, driu, drān, draw.

grīv, grīv, grovn, dig (peats).

stand, stīpd, stydn, stand.

swier, swiar, swern, swear.

Note. The following verbs originally strong have become weak — bisk bake, laf laugh, we wash, waks grow, wax.

§ 463. The Kendal dialect contains also the following originally reduplicating verbs —

blā, blių, blān, blow.

fo, fel, fall.

hod, held, hodn, hold.

kra, krių, krān, crow.

mā, mių, mān, mow.

prā, priu, pran, throw.

Weak Verbs.

- § 464. The Kendal dialect has three classes of weak verbs, which may be arranged as follows —
- 1. Verbs ending in a nasal + back cons., which originally formed their preterites by the addition of -ta to

Gmc. *yx, as for example OE. pyncan puhte. These are but sparsely represented in Kendal.

- 2. Verbs ending in t, d, which form their preterite by the addition of ad or id.
- 3. Verbs ending in a vowel or any consonant but t, d.

§ 465. First Class.

bai, baut, baut, vb. buy.

brip, braut, braut, vb. bring.

pipk, paut, paut, vb. think.

§ 466. Second Class.

dried, driedid, driedid, dread.

duut, duutid, duutid, doubt.

grunt, gruntid, gruntid, grunt.

skōd, skōdid, skōdid, scald.

snert, snertid, snertid, snort.

Note. Verbs ending in nd, ld, make their preterites and past participles in nt as bend, bent, bent, bild, bilt, bilt.

§ 467. Third Class.

ā, ād, ād, owe.

hipr, hard, hard, hear.

kats, katst, katst, catch.

liuk, liukt, liukt, look.

liv, livt, livt, live.

sęl, sęlt, sęlt, sell.

skēl, skēld, skēld, scatter.

fain, faind, faind, shine.

Note. The older preterites *sāld, tāld, have been supplanted by forms borrowed from the present.

§ 468. Preterite-Present Verbs.

dar, dyst, dare.

kan, kyd, can.

mē, myd, may. myn, myd, must. sal, syd, shall.

§ 469. The following verbs form their tenses from different stems —

 $\left\{
 \begin{array}{l}
 am, \ w \ni z, \ b \ni n, \ \text{be.} \\
 gay \\
 ga
 \end{array}
 \right\}
 \left\{
 \begin{array}{l}
 w \in nt, \ gan, \ go.
 \end{array}
 \right\}$

Adverbs.

§ 470. These are formed in various ways. Most are the normal developments of OE. adverbs, though some are new formations. There are no adverbs in -li as in Polite English, with the exception of hodnli = continually.

They are divided into four classes according as they denote time, place, manner, or measure.

§ 471. Adverbs of time.

iver ever, jans once, jistedi yesterday, jit yet, niver never, nuu now, sien soon, tudede the other day, tede to-day, temuern to-morrow, tenut to-night, hwailz at times, egen again etefte after.

§ 472. Of Place.

bak back, bihint behind, dyun down, som direct, straight, forest forward, him home, him here, jondo yonder, sumwar somewhere, dir there, hwar where, owe away, yut o gist out of the way.

§ 473. Of Manner.

ai yes, app perhaps, fast fast, hodnli continually, huu how, nio no, rit right, ray wrong, sio so, sla slow, valaik probably, wil well.

§ 474. Of Measure.

and over, too, hof half, kwait quite, lail little, mits much, terb! very, remarkably, vare very, enugh enough.

Prepositions.

§ 475. The Kendal dialect possesses the following—and over, bi by, bihint behind, dyun down, efter after, for, for, for, frē, fro from, i, in in, on on, tyl, tol, to to, ynder under, up up, yut out, wei, wi with, prix through, obyun above, obyut about, obyv above, of ūr before, ogēn against, omay among, ostiod o instead of, ot at, otwīn between, ov, of.

Conjunctions.

§ 476. The Kendal dialect possesses the following conjunctions —

1. Coordinate.

bet but, els else, for, fe for, jit yet, en and, er or, here how, sepuez suppose.

2. Subordinate.

bikas because, far, for, sīo so, hwen when, hweder whether, hwail while, until, ot that.

§ 477. Interjections.

1. Of Joy, Excitement etc.

ē, hyrā, ō.

2. Of Pain, Weariness etc.

au, dįvrmi, ō, ųu.

3. Of Surprise.

baidžin, ę lord, lovinz, o, nę, sik-māpment, hwat.

4. Of Aversion.

fə sam, gjt əwē.

5. Of Protestation.

hwatīvə, nē, lord.

6. Exclamations of various kinds. hai, hē, həlo, liuk, sī, wīl dīən, hwist.

Chapter IX.

The Sentence.

§ 478. The order of words in a Kendal sentence is much the same as in Polite English. In the ordinary type of sentence the subject comes first, the predicate follows and the object comes last, e. g. 't mais hez itn a hial lof a briad', 'bird fliu rit and unar hiadz', 'a prin a stian intat water'. The dative, when simply a remnant of the older dative, precedes the accusative, as 'gi mi a sup a water', 'haz-ta gin im ant', but when the relation is expressed by ta, the accusative comes first, e. g. 'giv sum milk tat kat'. The genitive, when not introduced by av or a, also precedes the accusative, e. g. 'Har fadar dinar', 'mi mudar kluak', 'smips hamer', but 'twenti-nainp a mē', 'a bunf a rud fluurz'.

The partitive genitive likewise follows the word expressing the relation. E.g. 'hof a pund a butar', 'a bit a miat', 'a skūar a tētiz'.

§ 479. Adjectives and participles used in the same manner, precede the noun they qualify as 'o rad klūpk, wi hwait ribenz'. 'e wetli rūed', 'e gert lalepin deg', 'e ranja striem e water'.

When used predicatively they come third in the sentence as, 'its kwipr to hier ov hiz gan owe wint kymon to st os'.

- § 480. Adverbs as a rule precede the words they qualify as 'az rēdər hət tə nīt'. 'Dis iz ə tərbi dərti nīt'. 'Jər liəvin auə sīən'. But I have often heard 'hipin bak rēdər'.
 - § 481. The verb under ordinary circumstances occupies the same place as in Polite English as 'hi kumz ən gaz əz i plāəsəz'. 'Its nət rīt tə diu dat.' 'Wi paut ə kumən, but twedər wəz sāə dərti, wi kudat.' When the imperative mood is used, the verb comes first, the person being usually omitted as 'gā uut ən sarə 'kōvz', 'sin əwē ən dont bi flēt ə mi', but 'let im gan if i wants tə'.

The present participle always follows the verb, as 'wi war tōkin əbyut jə, hwen ji kəm in'. 'Triəki kəm ranin dyun twō.' The [past participle is treated in the same way — as — 'ōęv kymt hiəm ət last', 'a gat krəpn intəl ə hūəl'.

The infinitive is placed after the predicate unless it is used as the subject. E. g. 'Hiz gan to sel bios, for wat ikn git' but 'To se oat od bi o li'.

§ 482. When used interrogatively the verb precedes its subject as 'iz-to kymon?' 'dyz-to pink az rīt?' 'did' 'man sē sīo?'

Relative clauses are introduced by ət, as 'him ət livz ə gud laif, iz siyər tə liv wīl', 'wi ət nāz im' sē dats o māpmənt' or 'us ət nāz' etc., 'wəz it him ət nəkt ət diuər'?

§ 483. Dependent relative clauses are also introduced by st or by an ellipse when the person in question is the first as 's man st a just to nā up Teibo wē' or 's man a just' etc., but 'sn āld wuman st nit bump o dē lay'.

§ 484. 'That' after verbs of saying, thinking, etc., is often omitted — as 'hi sed wi mud in gā wi him', 'a pink apn jer rit', 'a nā hi paut i wer kumen'.

In interrogative sentences, where, hwip, hwat, hwar, etc. are used, the pronoun or adverb always comes first — as 'hwip izt'? 'hwar hed wi gith tul'? 'hwen er je kumen egen'?

§ 485. The order in a conditional sentence is the same as in Polite English as 'if du sez dat duuz ray', 'if i koz hier as brek iz nek fer im', 'if ad e paut i waznt kumin a wadnt e rüestit dat bit e mutu'.

Chapter X.

Specimens of the Kendal Dialect.

I was taking a walk close to my farmer friend's house and saw him working at his potatoe heap. I went up to him, and noticing that he had a gun under his arm, remarked "Have you been shooting this morning?"

I.

"Am dzyst flejn 'krāz. Ji nā hwēn 'kərņz kumən up priu 'grund laik nuu, de kumz ən hauks it up wi öər biəks.

Sīz a git 'gun ən hev ə ban ət əm tə flē əm. Av bin wētin fər əm ö tmərnin, bət hevnt kilt jan — dər sə nain. Dər tərbi kunin iz kraz.

Hwail ō tydərs ər haukņ ən prauən intət grund, jan ər tuu sits it trītops, ən watsəs ən kōs uut if ðəs eni dendžər. ən hwen ðər əts sīdņ əmay t'kərn hes itn ənuf, de gas ən taks

tudər pliəs fər öç mud siuərli bi huyərt jan məd piyk. Its öləs best if jan kan tə liəv ə bərd lign diəd ən tfild, fə thwik əns ər tərbi flet əv ə diəd ən. A kudnt hit nin ən əm öis mərnin, siə a kilt ən äld blak hen ən stuk hər öiər fər ə fle kra. Sid mek kwait əs gud ə jan əz eni ə öər." "But what a waste!" "Ne Ne, wisi it tmiət fər yuər dinə, ən mak tflekrā yut ət skin. Apn iti sarə əs varə wil."

II.

ę der war sym kwier od fok, et jiust te liv yp Teibe wę, rīt eman tfęls. De selt e lok e sip fre taim te taim en wi baut e gyd fiu ev em.

Der wez en ald man en je waif en e fix barre. Ja de tlad hed kumt tel quer plies ebuut e sip e sumet e dat mak, en as it wes omest te taim, a paut hi mud ez wil hev sum es net. Hi wes sith duun bit tiebl en a wes dzust gan te le 'klep hwen i spried uut biep hie arme en sed. "Neer maind fe klep e kliep fo mi. A want nie klep eto. As net e pruud fele." Sie hi did wigut.

ənudər dē hwen tmīəstər hed sum bienəs örər ən aid in promist tə gan tə sī əm, wi brəp set of tə spend 'dē wi əm. Ji na it trək ə lail taim tə git tə Teibə bit trēn, ən öçn wid kwait prī mail tə gan ətəp ə öat. ən hwen wi gat örər öər wəz sik ə skraflmənt ən ə hēbē gān ən, ət wi feərli wundert wat it wəz ö əbuut — wi war kwait kapt! Bat wi fan ət öe war katsin tsip it kitsn. Srə wi nəkt ən nəkt ən nəkt, ən ət last tald wumən let əs in — ən siuərli a nivə sa sits ə dərti ruum i ö mi bərn dēz! Trəl pləs wəz blak, ivripin lign haustrau, 'trəbl ənt said, 'tsēprz ö brəkn ər lign ən öər baks, jā bit hrər, ənudə bit örər! A mud tak mi bənət ən kluək əf, ən hwen öe war tiən əf, naut əd sarə but tlasəz mud trai əm ən — ai ivri jan ən əm!

ən den dinə kəm. Tald wymən nain ət wi wər siyər tə kym, hed pyt ə leg ə mytn it ybm tnīt əf yər ən kīpt it ryəstin hwail wi gat diər, ən dat wəz oməst nīən!

əv kuərs it wəz əz təf əz hen miət, bət si kipt prodnt wi ə fuərk tə si if it wəz diən "Riəts hāld! a diu laik ə bit ə miət." Imiəstər hed gan uut wi ə frand dzust əfuər dinə, ən tāld wumən paut ət hid gan əwē fə gud ən sed "Hwat! if ad ə nān ət hid bin gan əwē fər iz dinə, a wadnt ə rüəstit öat bit ə muţn."

III.

Jį nā up Kęndļ wē it āld dēz, sym ət fok war ə gē bit kwiprə nər wat jan myd mīt wi nyuədēz.

Wī list in a nara stauenli sut in mak ev a dēl et stretst rīt up norp Teiba wē, en went duun suup omest te Seber. Klūs to hwar uuer farm lē, der list sik a kwīerli āld kupl, en āld man et nīem a Wil en iz waif Bele.

Wil ō ləz wiar ən āld bəks hat, nə matər hwedər it rend held ə snād, ai! hi ōləz hed it wī him, ən it wəz miər laik ə lail tsimlə gān əbyut bi itsel nər aut els ət akn pink ə. ē hwat! meni ən meni ə taim hiz kymt in ən sitn izsel dyun bit faiər dzyst ebm ənenst mi əv ə nīt, hwen tmisəs wəz diuən əd dzəbz ər apn fetlin pinz yp redər, ən aid kymt in frət fīldz.

Dyun went iz hat, bị hiz said, ətəp ət fliyər ən öçn wi juust tə hev sik ə krak əbuut wedər, 'krəps, ənt liətəst niuz frə Kendl, bət miəst əv ō — əbuut āld taimz. Av əft hard im tel ət huu hwen Belə ən i war nəbət dzust marit, ən öğd gēə fiu fök əbuut 'pliəs, ət Wil hed gitn ə gərt savadz dəg tə flē begəz ən ō sits tagits əwē wi. Jā dē hi wəz gān tə Kendl tət markət ən left Belə əliən wi 'dəg.

"Nyu tak kīər ən hwativər dyu dyz lïəv 'dəg əlīən. Đy mont tyts it.

If it wants to kum in, let it kum in, on dont to lig o hand ont." Sto hi swind his wes benest rud to Kendi.

Eftər id gan Belə began tə wərk. si sarəd thenz ən pigs ən did meni ydər əd dzəbz ət ə nā naut əbyut. Nyu 'dəg lē dzyst it divərstīəd əmakəli in ər rūəd əz si wəz kymən in ən yut, sīə si paut "Hwat al nīvə bi slēt bi aut sik əz datuz, it myd gan yut ō tygidər, ən den a sydnt bi sast wī it!"

It was gitn rēdar līst hwen Wil gat hism an hwen i did git intat huus, i sed "Hwat a teld di wat mud siuarli hapu if du medlt wi dat dag. Du sud a left it alīsn!"

ən hwat Belə wəz rēdi ə kwiəli ald bədi hərsel. Ji juust tə sē ət Ji gat sumət tə it, hwen Ji wəz hupərt, went tə bed əz siən əz ivər it wəz dark, ən gat up it mərnin hwen it wəz līt, ən Ji wəz fēəli waknt! Ai! ən Jid nit bump ən prau əbuut fər ivər ən ivə!

Wil was olas garnan laik, if aut went ray ar biys didnt kwait plias im. If 'pigs hed gitn kram!t yut at hyls ar 'kai hed gitn briy a hyal it hedz hid sē "Dam da hwats to dian tlaik a datus fa! jan mad mek nīa dau ato wi sik as di." Den Bela wi ar bin swīakin āld vais ad paip yp "Waia waia Wil, its nīa gyd ato i swīarin at am, if du went mend hedzas an mek tyls sīa at de kānt git yut."

Jā dē Wil wəs gān tə Kendļ, ən Belə wantid sum apļs ivə sə. Bat hi wantid ə pig ən sum klīps, ən paut ə naut els nēdər. Sīp si sed "Nuu hwativə öu dus, dönt fəgit tə briy ör apļs ət a telt öə əbuut, frə Kendļ." "Nē nē naut ə öat mak ļ kum intəl uuər huus. Asļ briy naut hīpm nəbət ə pig ən ə pār ə britse!"

IV.

Its a torbļ lay taim sen ai went to skuul on pipz hes gith a gud bit altert az jan mad sē. Itwas a lay wē dīpr, but of wi went i omast a wedarz, not laik barnz nuuvdēz ats slēt a katsin oa diaps a kald, bikas its a rēdar wetli an a darti narnin! Wi went rit sian, nivar cstar ēt, for wid kwait prī mail to gay — an wen wid gith to Liunz brig, wi warnt so mits as hos wē diar. But hwats dat tol a skrau a barnz! Hwailz wi juust to gay rēdar pāpanli — not so sast az wi sud a dian, ar aph a lail an mud hiy bak rēdar, an tudarz ad gay bak to lēt im. 'Bēnast ruad, az av sed asuar, was strek aua Liuns Brig an den tot rīt. In a kwīsli āld spot 'brig was. It was so nara at nī kart i ā Haugil, Sebar, a Trība, kud a gith aust. It mud siuali a bin nījad asua so sok nīu huu to bild brigz!

Hyu wi tjobt slay þriut sna iv o kald winter mornen, hwen ivri byu en brans feorli hyy dyun wit rag, on jan kydnt tel hwat jan woz wokin on. Jans o woz gan on ofgo tydozo popen obyut oz lail barnz oft diu, hwen a tymst slap auer heed foret intel o lail gyto ot lê in yuar rued o kyvot wi sna, on mi big brydor hed to kym on pyu mi yut. on o big las ot juust to ga wi os, kód mi ivo sits nemz on sed "ē dyus naut nobet o lail maslin ester ö dyu iz. Dyul nivo diu to gay on wi ús, liekin sik on ebm oz dy dyz. Dyu myn ga hem on git sum drai klez al oped to!"

Menj ə taim wjv bin list ət skipil, frə watsin tlail fitinz ət ran hiər özər ən jvri war it snā. Jan mid öləz ken 'bərdz bit marks ə öər tiəz, miər laik ə fizərk wi pri grenz təlt nər aut els ə nā. Trabits ən hiərz miəstli went prauin priu tsnā rit siən, oməst əfaər 'bərdz wər up vəlaik! Ai! hwat av nān əm bi feər frəzi tə diəp, puər lail pipz! Trabit fitinz wər laik kut fitinz fər o twurld, jan ebm ənenst tydə, wi midər bihint tfərst tuu, ən redər ətwin biəp ən əm, wi apn tfauərp fuut tət

rīt ər tət left. ən it wəz varə kwiər ət wen jan fələd əm ə lan we, jan kumt təl ə plīss hwar ō tfītinz stəpt wiyut līsvin ə sinl trīss. Bat vəlaik trabit hed ləpn ə bit, ə purpəz tə madi jə, ən wəz līskin strek at jə priu tmist.

V.

ə gud fin barnz juust tə dzəin us tudə said ə Liunz Brig əz wi went tət skyul, app fauərtī ət taimz. T lasəz, mījəst ən əm desənt hwaist lail þinz went strek özər apn stopn to gidər od flyuərs i symə taim, ər pyu əwē tlījəvs frē ə gyul fluuər tə sī hwat mak əv ə lyvə öə wə gān tə git; 'tinklər tēljər saudzər sēljər, ritsman pūərman begəman Þīf'. Bat us ladz war ə gēs bit mēsr lis nər jan ə ðər. Nyu rīt dyun i Haugil ðə waz ə tərbi kaykərt ald felə ət kipt ə farm, ən list öjər wj his waif, et wes valaik e mare fe him i kwieli wes. Ji na ht hed oles bin e vare serli bedi, en nebet griu war es i gat āldər. əv kūərs boiz ər öləz up tə sum māpmənt ər udər, ən wi əft popt əbyut ən plēd triks ən im, ə pyrpəs tə plēg im. Den id kym yut swįorin ot hid diy o maks o þips tol əs, if i kud nəbət git hāld ən əs. əwē wid ran uuər təmibagz sakņ up ən duun əz wi went ən him krīpin əlay ən sakin is fist. Hi nive katst nin en es, wi war se lis en him sə hərpit. Av hard sē ət jans wən plyuin 'plyu gat stekt, ən wadnt gan ətō, sīə hi punst it rīt wīl wi hiz buut tə mek it ən līzmt hizsel fər ivə sə lan eftər.

ənudə dē 'pigz warnt diyən džyst wat i wantid, siə hi gev əm ə gyd pynsin wi hiz byuts ən miəd əm skwiəl, hwail tald wymən paut hi myd bi siuərli gan tə kil ivri jan ən əm.

Sīp yut sī kom to sī hwat 'skrau woz ō obyut, ən sed "If jo want to kil ðor pigz al sets jo o nais!"

Bat hwen wi hed gitn tot skuul wi satlt duun feorli hwaist, on mõstli did oz wi war telt. Wi larnt to rīd rait on rakņ

— nət varə mits els. ō öər ət libt əwe frə Haygil jyust tə tak öər dinəs dest up i öər təmibags ən hin 'bagz rīt əlan twō. Sym barnz əft hed triək paiz ət öər mydərs hed biəkt fər əm, ən 'triək kəm yut ən ran dyun twō, siə ət jan feəli klagd tyl, if jan nəbət liənd əgen it.

VI.

Nyu apņ jil Þink eftə ō ə telt ji tydə nīt, ət wi nivər hed eni halidēs ətō, bət ðats nət kwait triu hyuivər. Wi hed tyu ə Þrī it jīər, bət nət hōf sə meni əs barns gits nyuədēs.

'Gərtəst dē əv ō wəs barən-yut-dē — tfift ə nəvembə. Den wi öləs tiək gud kiər tə git tət skuul rīt siən, ən niəbədi wəs liət bət 'miəstər. 'Big lads juust tə gan in fərst əv ō, öen us lail əns fələd eftər əm, ən öen wi klast 'diuər təl ən bard it siə ət niəbədi ət wəs uut kud git in! Varə siən tmiəstər wad kum ən lift 'diuəsnek, bət öat wəs ō tə niə purpəs hwativə, siə hi liukt in priu twindəs əs if i wantid tə nā hwat wəs gān ən. Den 'bigəst ən 'bauldəst ət lads wad tel im if i didnt giv əm ō halidē öed ran strek əwē. Siə hi prəmist ən ətlast wi əpnt diuər. əv küərs hi wəs əs fēn tə git əf wark əz wi war, fər i laikt naut betər nər tə gan samənfisin it Liun.

A nā wīl ən āld say ət biginz —

"Rimembə rimembə tfift ə Nəvembə 'Kin ən iz tren hed laik tə bi slen."

Av fərgitņ ot rəst ənt, bət wi war tərbļ fənd ənt, ən juust tə sip it əbuut 'barən-uut-dē.

Jį nā nyu fōk sīms to hev hwait fogitņ hyu to mak o tiun, jan nivo hioz naut ot o fēor or ot t∫ort∫ or eniwar, ot syunds hōf os gyd os yuor āld norp-kyntri tiunz sit∫ os 'Djo ken Dzon Pīl' or 'Morili danst 'kwēkos waif' or aut laik 'Hwen

đe maitį trympət syunds' ər enį ə dər grand ald tiuns. Đəs naut bət lail bits ə falaldərmənts — Þins jan hips tədē ən fəgits tə mərə.

Tsękņt taim ət wi bard tmiəstər yut wəz 'twentinain ə ə mē. Đen ivri jan ən əs hed ə jakbəb ər lail bit ə jak ən wi san "Jakbəb dē twentinain ə mē, if jə dönt gi əs ə halidē wil o ran əwē."

 S_{1} wi gat enude halīde. But wi nive paut so mits ev it, ex this envembe.

VII.

Tomos Wilsn.

Tomos Wilsn ə butsə ə məri āld lad,

Hwen hī kils ə gud sip, it meks im sīl glad,

Hi kīps ə gud as, ən ī sīdz it rīt wel

ən it kariz him — ō hiz gud mutn tə sel.

Tami saldərəlarəlaide!

It hez tuu gərt hampəz, jan hinz ən īts said, ən ə dənki sə stran, it wəd fēss wind ər taid ən öeər öuz hī marts, sə nöbl ən grand It kariz iz muţn priu Haugil ən Bland.

Jā fain symə mərn i də munß ə Dziulai Təməs kumz wi hiz mutn ən eks əs tə bai Hi sez ət its gud — niə betə kn bi ən hiər iz ə fain bit ə siuət fə dī.

Địc Sius, his waif siz gith kwait fat Wi itn sip hẹdz, bisaid givin tet kat. si sez te hev e butses e vare gud bin Bikes si hes esn her pan so te slip.

Bat dier is a man i live i Seber tyun
Hi butses end haks o his miet up en duun
Hi kos Temes Wilsu e tsiet en e nëv
et martses ebuut wi his denki se brëv.

Anglistische Forschungen

Herausgegeben von Dr. Johannes Hoops

Professor an der Universität Heidelberg

Heft 17

Eigentümlichkeiten des anglischen Wortschatzes

Eine wortgeographische Untersuchung mit etymologischen Anmerkungen

von

Richard Jordan

Heidelberg 1906
Carl Winter's Universitätsbuchhandlung

Vorwort.

Wortgeographische Beobachtungen — wenn man die Ermittlung dialektisch beschränkter Worte so nennen darf — sind sowohl an sich von Interesse als auch ein wertvolles Hülfsmittel zur Lokalisierung von Texten. Was das Altenglische betrifft, so finden sich Aufstellungen über spezifisch anglische Worte in Arbeiten von Miller (Einleitung zur Beda-Ausgabe), Bartlett (The metrical division of the Paris Psalter, Diss. Baltimore 1896, S. 14 ff.), Klaeber (Zur ae. Bedaübersetzung, Angl. 25, 257 ff.; 27, 243 ff., 399 ff.) und anderen. Namentlich das Studium der Beda-Übersetzung hat zu derartigen Beobachtungen Anlaß gegeben.

Die vorliegende Untersuchung über Eigentümlichkeiten des anglischen Wortschatzes, deren erstes Kapitel bereits vor kurzem als Heidelberger Habilitationsschrift erschien, möchte, ohne Rücksicht auf die Lokalisierung eines bestimmten Textes, den Gegenstand systematisch und möglichst erschöpfend behandeln. Absolute Vollständigkeit wird man jedoch billigerweise wohl nicht verlangen wollen. Denn schon der Begriff Wortschatz läßt sich schwer abgrenzen, namentlich gegenüber dem Lautlichen (auszuscheiden sind jedenfalls alle Besonderheiten, die sich aus dem Lautsystem des Dialekts erklären,

also nicht Fälle von Ablaut und grammatischem Wechsel). Und auch abgesehen davon ist die Entscheidung, was Aufnahme verdient, was nicht, oft sehr schwer zu treffen, namentlich bei Worten, die nur vorwiegend, nicht ausschließlich im Anglischen belegt sind. — Was mein Verhältnis zu den bisherigen Forschungen betrifft¹, so habe ich Wiederholungen möglichst vermieden. Doch wurde, wo immer sich eine Anknüpfung bot, auf frühere Aufstellungen verwiesen — oft wird ja eine Beobachtung durch die andere gestützt —; auch war einiges exakter zu fassen. So wird man nicht viel Wichtigeres unerwähnt finden.

Die Beurteilung des Materials, die ja eine Hauptschwierigkeit bildet, habe ich möglichst konsequent zu halten gesucht und über ihre Prinzipien genaue Rechenschaft abgelegt. Die Ermittlung von Dialektworten muß sich natürlich möglichst auf einen Vergleich des Wortschatzes der beiden Hauptdialekte, des Anglischen und (West-)sächsischen, stützen, wobei sich auch manches für das Sächsische ergibt. Doch lassen sich nicht immer zwei genau entsprechende Aquivalente in beiden Dialekten gegenüberstellen. Vielfach muß man sich eben begnügen, das dem einen Dialekt 'Eigentümliche' mit größerer oder geringerer Wahrscheinlichkeit nachzuweisen. A priori läßt sich aber eher ermitteln, was dem Anglischen, als was dem Sächsischen eigentümlich ist, weil die sächsische Prosaüberlieferung (auf die Prosa kommt es ja vor allem an) entschieden umfangreicher ist als die anglische, also das Fehlen eines Wortes im Sächsischen

¹ Die wertvollen Beda-Studien Klaebers erschienen zum größten Teil erst während meiner Sammlungen, noch später die Arbeit von Wildhagen (s. die Literaturangaben).

mehr Beweiskraft für das Anglische hat als umgekehrt das Fehlen eines Wortes im Anglischen für das Sächsische (vgl. Einl. S. 4). Daher die Fassung meines Themas. (Das Kentische habe ich vorläufig beiseite gelassen; bei der spärlichen Überlieferung dieses Dialekts im Altenglischen müßte sich hier die Untersuchung mehr auf das Mittelenglische erstrecken).

Natürlich stützen sich meine Aufstellungen nicht allein auf lexikalische Hülfsmittel (mit besonderem Dank nenne ich die Wörterbücher von Bosworth-Toller, Sweet und Grein) oder auf Wortlisten in grammatischen Darstellungen. Soweit nicht Spezialglossare zur Verfügung standen, habe ich die gesamte mir irgend zugängliche Prosaliteratur durchgesehen und hoffe, nicht viel übersehen zu haben, was etwa gegen die Richtigkeit meiner Beobachtungen sprechen könnte. — Sollten neue sächsische Texte veröffentlicht werden, so würde wohl das eine oder andere selten belegte Wort aus meiner Liste ausscheiden müssen.

Das Hauptinteresse aber und das Endziel meiner Untersuchung lag in der Frage, was sich wohl aus dem Wortschatz für die Stellung des Anglischen und Sächden kontinentalen Dialekten und damit ZU natürlich auch zueinander ergeben würde. Daher die etymologischen Anmerkungen', die sich im wesentlichen im Rahmen des Germanischen hielten, da es ja nur auf intern germanische Beziehungen ankam, und die ich in möglichst knappe Form gefaßt habe. Nur wenige der behandelten Worte freilich lassen sich der Natur der Sache nach für jene Frage verwerten. Was aber hier von Bedeutung sein könnte, habe ich im zweiten Teil des letzten Kapitels zusammengestellt. - Da uns hier nur alte kontinentale Beziehungen interessieren, so habe ich inselkeltische und nordische Lehnworte, zu denen einiges Wenige nachzutragen wäre, überhaupt ausgeschieden.

Quantitätsbezeichnungen habe ich im allgemeinen nur bei den in Frage stehenden Worten, ihren Synonymis und etymologischen Entsprechungen gesetzt; in den Belegen jedoch habe ich die Quantitätszeichen weggelassen, wenn das betreffende Wort sonst noch genannt wurde.

Zum Schluß spreche ich meinem hochverehrten Lehrer, Herrn Professor Hoops, für mehrere Ratschläge meinen herzlichen Dank aus. Zu danken habe ich auch meinem Freunde cand. phil. Brenner, der mir eine vollständige Abschrift des Junius-Psalters zur Verfügung stellte.

Heidelberg, im Dezember 1905.

Richard Jordan.

S. 3, Z. 14 südlich = nicht anglisch: für Byrhtnob kann Essex in betracht kommen. — S. 24, 4, 11 ff. Für Länge des u in andūstrian und Verwandten spricht mit großer Wahrscheinlichkeit seine Bewahrung (nicht o) im Ae. — S. 25, 16 statt lygge 1. lycg. Wenn das Wort, wie ich glaube, = *lugja ist, so ist als kurssilbig ein nom. sg. lycg (gg) anzusetzen; die Belege (im nom. pl.) widersprechen dem nicht. — S. 46, 6 v. u. statt in l. und. -- S. 48. Zu nemne, nympe beachte S. 120 Fn. — Z. 57 Fn. 1. l. klædi. — S. 60, 12 statt blisa, -ige l. blysa, blysige. Es liegt gegenüber blæse Ablaut blus: blas vor, vgl. ae. blyscan 'to blush', an. blys n. 'Fackel' (dan. blus, schwed. bloss). Die Endung in blys-a ist sekundär. — S. 71, 4 v. u. l. ahd. gi-stemmen; S. 72 tilge Z. 4 bis 12 von 'und ahd.' . . . nebst Fn. 1 und lies: stemman ist auf urg. *stammjan < *stammjan zurückzuführen. — S. 76, 11 l. nordhumbrisch. — S. 78 zu for-repa: pp. ropen (zu repan 'reap') begegnet im Me.: zu repen: ropen vgl. ae. drepen: dropen. Freilich lassen sich repan 'reap' und repan [re]prehendere in der Bedeutung nicht leicht vereinigen. — S. 79. Statt -prut ist mit Cook u. a. prut anzusetzen, da doch wohl ein a-Stamm vorliegt und *prüta- *prot ergeben würde. Tilge Z. 13 Setzt . . . bis 15 . . . ware. Z. 4 v. u. l. *prutila.

Einleitung.

Bei der Erforschung von dialektischen Unterschieden in einem zusammenhängenden Sprachgebiet wird immer das Hauptgewicht auf die Lautverhältnisse gelegt werden müssen. Der Wortschatz und seine Verwendung als das am wenigsten Charakteristische hat weit geringere Bedeutung.1 Dies gilt namentlich von verflossenen Sprachperioden, in denen wir das Verbreitungsgebiet eines Wortes nicht sicher feststellen können. Aber doch ist die Erkenntnis dialektischer Eigentümlichkeiten des Wortschatzes nicht nur eine wertvolle Beihülfe zur eigentlich grammatischen Forschung, sondern auch an sich ein Gegenstand des Interesses, an dem wir nicht vorübergehen dürfen. Zur altenglischen Dialektologie soll im folgenden in dieser Hinsicht ein Beitrag gegeben werden durch eine systematische Untersuchung über Eigentümlichkeiten des anglischen Wortschatzes. Ehe wir aber an die Einzelheiten herantreten, wird es sich empfehlen, einige leitende Gesichtspunkte zu erörtern.

Fragen wir zunächst, was wir unter «Eigentümlichkeiten (des anglischen Wortschatzes)», unter «eigentümlich
oder spezifisch (anglisch, sächsisch, kentisch u. s. w.)» zu
verstehen haben. Es ist wohl klar, daß wir den Begriff
nur vom Standpunkt des in der Überlieferung Gegebenen

¹ Vgl. Paul, Prinzipien, § 30.

Jordan. Eigentümlichkeiten des angl. Wortschatzes.

formulieren können, nicht vom vorliterarischen oder etymologischen. Gewiß ist die Etymologie eine unentbehrliche Führerin bei der Beurteilung. Aber wir dürfen ihr
nicht soweit folgen, daß wir etwa gemeingermanische und
westgermanische Worte, die einmal auch dem (West)sächsischen angehört haben müssen, von dem Begriff ausschließen. Wollten wir nur diejenigen Worte als spezifisch
anglisch ansehen, die vielleicht von jeher nur anglisch
waren und im Anglischen ihren Ursprung haben, so behielten wir nur verschwindend wenig Sicheres in Händen.
Spezifisch anglisch ist für uns ein Wort, welches,
soweit erweisbar, in der Zeit der Überlieferung
nur im Anglischen gebräuchlich war.

Es ist aber zu bedenken, daß die Zeit reicher literarischer Überlieferung im Altenglischen etwa zwei Jahrhunderte umfaßt, in denen mancherlei Verschiebungen eintreten konnten. Ein Wort kann im 9. Jahrhundert noch gemeinaltenglisch sein, im 10. aber nur noch in einem Dialekt sich erhalten. Solche Fälle lassen sich nachweisen, und wir dürfen sie nicht unbeachtet lassen. Wir sehen bei manchen Worten denselben Vorgang in historischer Zeit sich abspielen, der bei audern schon vorliterarisch geschehen sein kann oder — soweit sie gemeinoder westgermanisch sind irgend einmal geschehen sein muß.

Es stellen sich also neben die oben definierten «spezifisch» anglischen Worte solche, die auch im Sächsischen noch nachweisbar sind, sich aber im Anglischen länger

¹ Natürlich soll hier nicht ein ursprünglich völlig einheitlicher uraltenglischer Wortschatz postuliert werden, etwa nach Art der Stammbaumtheorie. Wir würden ja sonst unseren eigenen am Schluß gegebenen Folgerungen widersprechen.

erhalten, — die sozusagen erst spezifisch anglisch werden. Daraus ergibt sich die Haupteinteilung des Stoffes in Kapitel I und II. Wir wollen gemäß der obigen Definition nur die erste, wichtigere und umfangreichere Gruppe «spezifisch anglisch» nennen.

Ehe wir uns zur Methode der Untersuchung wenden, ist noch zu fragen, welches Material wir zugrunde legen oder vielmehr in welchem Umfang wir unser Material verwerten wollen. Es kann wohl kein Zweifel bestehen, daß das Hauptgewicht auf die Prosa fallen muß. «Die poetischen Denkmäler», sagt Sievers Gramm. § 2 Anm. 6, «entstammen zum größeren Teil dem anglischen Gebiet, liegen aber fast alle nur in südenglischen Abschriften vor . . . * Als westsächsisch, jedenfalls südlich, sind im wesentlichen nur die Metra des Boetius, die sogen. Genesis B, die Gedichte der Chronik, Byrhtnop, (Menologium?) anzusehen. Man könnte nun sagen, daß für den Wortschatz die poet. Texte wohl brauchbare Quellen des Anglischen seien, da ja die ws. Abschreiber oder Bearbeiter wohl Laute und Flexionsformen, schwerlich aber i. a. ganze Worte geändert haben werden. Aber wenn dies auch zutreffen mag, so wäre es doch i. a. bedenklich, Worte, die nur in der Poesie, wenn auch nur der anglischen, vorkommen, als spezifisch anglisch zu bezeichnen, da ihr Fehlen in der Prosa ja allein durch den archaischen Charakter der poetischen Sprache bedingt sein kann, und eine Unterscheidung zwischen anglisch-poetischen und westsächsisch-poetischen Worten schon wegen des geringen Umfangs der ws. Poesie kaum möglich sein wird. Wenn auch nicht zu leugnen ist, daß die Diktion der anglischen Poesie einen Einfluß auf die südliche ausgeübt hat, so muß man sich doch hüten, alles Poetische schlechtweg für anglisch zu erklären. Ich habe daher die Poesie nur insofern als Quelle benutzt, als ihr Zeugnis mit dem der Prosa übereinstimmt oder durch dieses gestützt wird, also bei Worten, die der anglischen Prosa und Poesie gemeinsam sind, sei es nun, daß schon aus dem Zeugnis der Prosa allein hervorgehen würde, daß sie spezifisch anglisch sind (z. B. nemne, gēn, lēoran), oder daß dies erst durch das gemeinsame Zeugnis beider wahrscheinlich wird (z. B. wēlan, alan) — zwei Fälle, die sich nicht immer scharf sondern lassen.

Wir kommen nun zum Hauptgegenstand der Einleitung, der methodischen Frage: Wie ermitteln wir das eigentümlich anglische Wortmaterial — und zwar zunächst und vor allem das oben definierte «spezifisch anglische» (Kap. I)?

Bei der im Verhältnis zur Fülle der lebendigen Sprache doch nur beschränkten Überlieferung ist natürlich die Ermittlung von Dialektworten nicht ohne Schwierigkeit. Man könnte darauf verweisen, daß die anglische Prosa entschieden weniger umfangreich ist als die westsächsische, man also ein nur anglisch belegtes Wort, das dem Ws. fehlt, a priori mit größerer Wahrscheinlichkeit spezifisch anglisch nennen darf als umgekehrt ein nur ws. belegtes, das dem Angl. fehlt, spezifisch westsächsisch. Aber das Fehlen eines Wortes im Ws. besagt dennoch an sich nicht viel.

Sicherheit kann uns zunächst nur ein reichliches Belegmaterial geben, und zwar von Entsprechungen in beiden Dialekten, sei es, daß sich deutlich ein anglisches und westsächsisches Äquivalent gegenüberstehen (z. B. fæs — fnæd, bebyegan — sellan), oder daß neben dem anglischen Wort ein gemeinaltenglisches steht, das das West-

sächsische allein gebraucht (z. B. nympe, nemne — baton, gen — giet). Die Häufigkeit der Belege ist natürlich in großen Verhältnissen der Häufigkeit des bezeichneten Begriffs kommensurabel. Je seltener ein Wort im Angl. ist, desto wichtiger wird es, ein Synonymon im Ws. nennen zu können, damit wir sicher sind, daß der betreffende Begriff nicht bloß zufällig im Ws. unerwähnt ist. Natürlich läßt sich nicht immer ein genau entsprechendes Äquivalent angeben.

Die Häufigkeit der Belege ist aber noch genauer dahin zu definieren, daß ein Wort in mehreren unabhängigen Quellen begegnen muß. Es gilt, Beziehungen, Zusammenhänge unter den geographisch benachbarten Texten aufzufinden. Begegnet ein Wort auch nur in zwei unabhängigen anglischen Texten, so ist die Wahrscheinlichkeit, daß es seinem Dialektgebiet eigentümlich ist, schon entschieden größer, als wenn es nur in einem Text belegt ist. Zu beachten ist hier, daß das südlich-nordhumbrische R₂ (auch in den von Farman geschriebenen Abschnitten Mk. 1—2,15, Jh. 18,1—3) im Wortlaut der Übersetzung von Lind. abhängig, also kein selbständiger Zeuge ist, vgl. Lindelöf, Bonner Beitr. X, Einl. — Über das Verhältnis von Rit. und Lind. s. in Kap. I unter 'spezifisch Nordhumbrischem'.

Eine noch deutlichere Antwort aber auf die Frage, ob ein Wort dem Ws. fremd oder ungebräuchlich war, gibt uns das Verhältnis westsächsischer Umschriften zu dem anglischen Original oder doch einer dem Original

¹ Für das spezifisch Mercische und Nordhumbrische gelten natürlich in kleinerem Maßstab dieselben Kriterien, ich verweise auf die betreffenden Abschnitte in Kap. I.

nahestehenden Hs. Hier läßt sich beobachten, wie ein ws. Schreiber ein angl. Wort absichtlich vermeidet oder mißversteht. Es sind hier folgende Texte von Wichtigkeit.

- 1. Die Beda-Übersetzung (vgl. Millers Einleitungen und die Arbeiten von Deutschbein u. Klaeber). Die älteste Hs. T, etwa vom Ende des 10. Jh., steht dem mercischen Original am nächsten; von den übrigen Hss., die stärker ws. gefärbt sind, führt B (gegen Mitte des 11. Jh.) am radikalsten in Lautstand und Wortschatz das Ws. durch. Für die Textkritik sind die Abweichungen in B natürlich wertlos, für unseren Zweck aber sehr wichtig. Daß auch rein willkürliche Änderungen vorkommen können, soll damit nicht geleugnet werden. Einige Worte, die nur im Beda begegnen und in B vermieden werden, habe ich in Kap. I S. 29 ff. zusammengestellt.
- 2. Die Dialoge Gregors, auf Aelfreds Anregung von Bischof Wærferd von Worcester übersetzt. Nach Keller Die literarischen Bestrebungen von Worcester QF. 84 S. 1 ff. wurde in Worcestershire ein im wesentlichen ws. Dialekt mit mercischer Beimischung gesprochen; indessen scheint nach dem Wortschatz der Dialoge das mercische Element doch recht stark gewesen zu sein. Wichtig ist für uns der Vergleich der beiden nahe verwandten und dem Original am nächsten stehenden Hss. Cu. O² mit der (leider

¹ Ich glaube jedoch Deutschbein, S. 179, darin zustimmen zu müssen, daß auch T zum größten Teil von Westsachsen geschrieben ist. Millers Lokalisation von T in Nordmercien ist nicht überzeugend. Die Unterschiede im Wortschatz der Hss. erklären sich im wesentlichen wohl nur aus dem mehr oder weniger konservativen Verhalten der Schreiber gegenüber der Vorlage.

² Daß O nach der Diss. des Herausgebers Hecht (Die Sprache der ae. Dial. Gr. d. Gr., Berlin 1900) unter kentischem Einfluß stehen soll, will mir nicht recht einleuchten. Das Hauptkriterium, e für y,

nur zum Teil vorhandenen) Hs. H (alle 11. Jh.), die nach Hecht eine «durchgreifende Neubearbeitung der älteren Übersetzung» (Diss., S. 3., s. vor. S. Fußn. 2, Ausg. S. XI), zugleich aber auch eine ws. Umarbeitung ist.

3. Das altmercische Martyrologium. Hs. C, etwas älter als B, (Anf. 10 Jh.), ersetzt anglische Ausdrücke des Originals durch sächsische, vgl. Herzfelds Einltg. u. bes. S. XIII. ff.

Bei allen dreien ist allerdings zu berücksichtigen, daß zwischen Original und Umschrift ein Zeitunterschied besteht, also auch archaische Worte durch jüngere ersetzt sein können. Auch darf man nicht erwarten, daß der ws. Bearbeiter in allen Fällen konsequent anglische Worte vermeidet, er kann Worte, die ihm nicht gerade fremd, sondern nur ungeläufig sind, auch einmal beibehalten. So umgeht Beda B sceppan¹ und semninga² nicht. (Am radikalsten verfährt H in Dial.) Man darf also Worte, für die wir sonst genügendes anglisches Belegmaterial haben, nicht unbedingt von den spezifisch anglischen ausschließen, wenn sie eine ws. Umschrift beibehält.

Dies gilt in besonderem Maße von der Glosse des Junius-Psalters, vgl. Lindelöf, Mémoires de la soc. néophil. à Helsingfors III, 1 ff., u. Studien zu den ae. Psalterglossen, Bonner Beitr. XIII. Sie ist «ws. oder jedenfalls

begegnet nur in embe, und das beweist nichts, vgl. Sievers Gr. § 95 Anm. 2, Bülbring El. B. § 454. — Der Wortschatz der Dial. hat mir die bei Deutschbein S. 176 ausgesprochene Vermutung bestätigt, inzwischen hat auch Klaeber Angl. 27,264 die gleiche Beobachtung gemacht.

¹ Vgl. Deutschbein PBB. 26,171, Wildhagen der Psalter des Eadwine S. 185, 189. Im Mart. 78,26 ersetzt es C durch derian.

² semninga wird aber in Dial. von H stets durch füringa ersetzt, vgl. Klaeber Angl. 27,253.

sächsisch» und stammt etwa aus dem 2. Viertel des 10. Jh. Der Glossator verhält sich zu seiner Vorlage, der Glosse des Vespasian-Psalters, viel konservativer als die ws. Hss. der 3 oben genannten Texte. Er folgt ihr im Wortschatz i. a. sklavisch und behält auch offenbar unsächsische Worte wie leoran, fas bei; erst gegen Ende wird er selbständiger. Um so wichtiger sind daher hier Abweichungen. (Zu den übrigen Psaltergll., die zum Teil auf verlorene angl. Vorlagen zurückgehen, vgl. unten S. 10 ff.)

Ferner ist zu berücksichtigen, daß ein spezifisch anglisches Wort ausnahmsweise auch einmal von einem Westsachsen gebraucht werden, also nicht bloß in Texten aus Übergangsgebieten, sondern auch in streng westsächsischen vorkommen kann (vgl. Klaeber Angl. 25,260). Es ist hier nicht nur an gegenseitige Beeinflussung der Dialekte im mündlichen Verkehr, sondern auch besonders an literarischen Einfluß zu denken. In jeder literarischen Tätigkeit liegt ja ein Keim zur Dialektmischung. Namentlich mag auch die anglische Poesie, die von den Westsachsen assimiliert wurde, ihrerseits eine Rückwirkung ausgeübt haben. Doch darf man mit solchen «Ausnahmen» nur sehr vorsichtig operieren und sie nur dann allenfalls zulassen, wenn häufig gebrauchte Worte — wie leoran, semninga weitaus überwiegend im Angl. und im Ws. nicht etwa bei Aelfred und Aelfric zugleich belegt sind. Kommt ein Wort im Angl. häufig, im Ws. spärlich vor, so folgt daraus nicht notwendig, daß es aus dem Anglischen eingedrungen ist, vgl. Kap. II.

¹ Vgl. dian, in und on. Jun. ersetzt scüa mehrfach durch sceadu, wodurch Wildhagens Beobachtung S. 185 bestätigt wird. — Von dem in ähnlicher Weise vom Vesp.-Ps. abhängigen Cambridge-Psalter haben wir, abgesehen von Lindelöfs Auszügen, nur Varianten bei Spelman.

Doch wir sind zur Beurteilung des alten dialektischen Wortschatzes nicht nur auf intern altenglische Kriterien angewiesen. Wir können auch die me. Überlieferung und vor allem die heutigen Mundarten zu Hülfenehmen.

Was das Me. betrifft, so ist zu bedenken, daß das Gebiet, welches die me. Grammatik als westlichen und mittleren Süden bezeichnet, sich durchaus nicht völlig mit dem Gebiet des altwestsächs. Dialekts deckt, und ein Text aus Worcestershire wie Lazamon (A), den die me. Grammatik zum Süden stellt (ebenso wie die aus Worcester stammenden Dialoge Gregors), wohl als anglisch gelten kann. Zur Katherine-Gruppe vgl. Morsbach, Me. Gramm. Interessant sind die Beziehungen zu der Ancren Riule und Eule und Nachtigall. In der ersteren begegnen die anglischen Worte strynd, wære, lyrtan in der nordwestmittelländischen Hs. Titus D 18, während die südliche, Mortons Text, abweicht.² strynd und wære sind schon vom ae. Standpunkt aus sicher spezifisch anglisch, für lyrtan, das nur einmal in Lind. begegnet, wird dies durch den me. Beleg erwiesen. — Was Eule und Nachtigall betrifft, so stimmt das Vorkommen von strynd, bisen, auch prāg (s. Kap. II) schlecht zu der Annahme, daß der Dialekt

¹ Eine Scheidung der Texte auf Grund des à oder o vor Nasal versucht Heuser, IF. 14 Anz., S. 29.

Nach Mühe, Diss., beruht Tauf einer anglischen, aber unter Mitbenutzung einer südlichen Übersetzung (nicht M!) verfertigten Version. — Zu were, lyrtan s. Kap. I. Zu strynd vgl. Deutschbein S. 172, Klaeber, Angl. 25,292; Ancren Riule ed. Morton, S. 28,7 M: het tu wite me wid ham, sc. he seonen heaned ... sunnen, and alle hore bruchen, T dem Sinn entsprechender strunden with all their brood. Hier scheint M. etwas Sekundäres zu haben. Auffallend sind gejen und gnedelich in M., s. goian und gneah Kap. I.

des Verfassers derjenige von Dorsetshire war. Immerhin kann der Verf., nach Ten Brink ein fahrender Kleriker, die Worte aus dem Mittelland mitgebracht haben. Die drei anglischen Worte zusammen gestatten schon umgekehrt einen Schluß vom Ae. auf das Me.

Wichtiger als me. Texte sind aber die heutigen Mundarten. Zwar kann sich das Verbreitungsgebiet eines Wortes seit der ae. Zeit geändert haben. Es kommt vor, daß gemeinae. Worte sich nur in nördlichen Mundarten erhalten. Aber wenn ein Wort im Ae. nur im Anglischen, wenn auch nur einmal, belegt und zugleich in den heutigen Mundarten auf den Norden beschränkt ist, so kann man es mit Wahrscheinlichkeit auch für die ae. Zeit als spezifisch anglisch ansehen. Vielfach dienen sodann die Mundarten zur Bestätigung bezw. Kontrolle der Beobachtungen am Ae.

Damit haben wir die Hauptprinzipien für die Ermittlung spezifisch anglischer Worte erörtert. Was diejenigen Worte betrifft, die sich im Anglischen länger erhalten (Kap. II), so ergibt sich ihre Beurteilung meist schon unmittelbar aus den Belegen. Insofern als diese Worte spätws. schwinden oder weniger gebräuchlich werden, kann bei den jüngeren ws. Umschriften von Beda, Mart. und Dial. auch für sie das Kriterium der Vermeidung zutreffen. Auch hier spielen natürlich die Mundarten eine Rolle. Für alles Nähere verweise ich auf Kap. II.

Zum Schluß noch einige Bemerkungen über anglische Texte (teilweise erst Resultate der Untersuchung).

Wie der ae. Junius-Psalter vom Vesp.-Ps. abhängt, so geht auch die Glosse des Psalters des Eadwine von Canterbury (ed. Harsley EETS. 92, geschrieben im 1. Viertel des 11. Jh.) im Grunde auf eine anglische, wahrscheinlich nordmercische Urform zurück, die dem Vesp.-Ps.

nahegestanden sein muß. Aus der anglischen Vorlage hat sich ein beträchtlicher Rest anglischer Worte erhalten, die Abschreiber sind also verhältnismäßig konservativ gewesen. Vgl. die Arbeit von Wildhagen in Morsbachs Studien, Heft 13.

Auch die ws. Glosse des Royal-Psalters (ed. Roeder, Morsb. St. 18) zeigt Spuren einer angl. Vorlage (vgl. sihile, lēoran, nympe, fēogan u. a.); eine genaue Untersuchung fehlt hier noch.¹

Der ae. Spelman-Psalter ist im wesentlichen ein unabhängiger ws. Zeuge, wenn auch nicht ganz frei von anglischem Einfluß.²

Im Laece-Boc und den Lacnunga fallen anglische Eigentümlichkeiten auf, z. B. nemne, wærc, in. Die Vermutung anglischen Ursprungs wird durch die Neuausgabe dieses Textes von Leonhardi, Bibl. Pros. VI, bestätigt.

Auf anglische Färbung in der Vita Guthlaci, den Homilien ed. Assmann (Bibl. Pros. III) XHsN, XVIIIe, sowie in der Epistula Alexandri (Angl. 4) hat Klaeber Angl. 25,304, 27,399 fn., 251 fn., 418, hingewiesen.

Über anglischen Einfluß in Stücken aus Napiers Wulfstan s. unter in, semninga.

Daß die Blickling-Homilien anglischen Ursprungs sind, setzte ich als bekannt voraus.³

Endlich noch eine Bemerkung zu den Glossen. Nicht nur das Epinal-, Erfurt-, Leyden- und Corpus-Glossar kom-

¹ Nach Lindelöf, Bonner Beitr. 13, S. 102, hat Royal keine Beziehung zum Vesp.-Ps.

² Vgl. nimpe, cēgan.

³ Miller I, Einl. S. XXXVIII, scheint sie nach Ostanglien setzen zu wollen, wo sie sich jetzt befinden (Norfolk). Dies würde zu ihrem Wortschatz nicht übel passen. Nach Hardy, Diss., erinnern die anglischen Reste eher an R_1 als an Ps. und Nordh.

men für das Anglische in Betracht. Auch die Glossen bei Wright-Wülcker 192 ff., 248 ff., 258 ff., 338 ff., 474 ff., zeigen sämtlich anglischen Einfluß in Lautstand und Wortschatz, jedenfalls finden sich anglische Einsprengungen. 1 Das Glossar 338 ff. ist ja deutlich mit dem Corpus- und damit dem Epinal-Gl. verwandt. So findet sich 364,45 noch die altertümliche Form lytisna, statt lytesne, aus Ep. Gelegentlich werden anglische Worte durch ws. Zusätze erklärt, z. B. pæcele, wærc. Ist also ein Wort durch andere Texte als spezifisch anglisch erwiesen, so spricht sein Vorkommen in diesen Glossaren zum mindesten nicht dagegen, wenn man sie auch nicht als selbständige anglische Quellen verwerten wird. In Glossen können ja überhaupt durch Kompilation leicht verschiedenartige Elemente gemischt werden. — In den übrigen ae. Glossaren bei Wright-Wülcker (abgesehen von Corpus und den kent. Glossen) habe ich dagegen nichts Anglisches gefunden. Die Wichtigsten hiervon, 89 ff. (das Colloquium), 104 ff., 168 ff., 304 ff. (= Zupitza Aelfc. Gl. Hs. J), 536 ff. (= Zup. Hs. W) sind eben diejenigen, welche man mit Aelfrics Namen in Verbindung bringt.

Vgl. conu WW. 479,32 (zu Miller I, Einl., S. XXXI), gemung, iemung nuptiae WW. 277,22, 481,27, 453,28; lytisna 364,45 (zu Klaeber Angl. 27,399, 25,315), ferner gescræpe, nimpe, bebycyan, wærc, wiperbreca, pæcele usw. Genauere Untersuchung der Zusammenhänge wäre noch erwünscht. — Zu dem Gl. WW. 192 ff., das wærc, sceppan u. a. enthält, vgl. jetzt P. Boll, die Sprache der ae. Glossen im Ms. Harley 3376, Diss., Bonn 1904, Teil I.

Kapitel I.

Worte, welche, soweit erweisbar, dem Anglischen eigentümlich sind ('spezifisch anglische').

Aus den in der Einleitung erörterten Prinzipien ergibt sich die Einteilung des Kapitels. Wir unterscheiden

- 1. Worte, welche vom intern altenglischen Standpunkt als spezifisch anglisch betrachtet werden können;
- 2. Worte, welche durch übereinstimmendes Vorkommen in ne. Mundarten (oder me. Texten) als spezifisch anglisch erwiesen werden.
- Bei 1. kommen Mundarten oder me. Zeugnisse zwar oft bestätigend hinzu, spielen aber nicht die Hauptrolle, bei 2. sind sie ausschlaggebend.

Die Entscheidung, wann ein Wort, das im Ws. nicht belegt ist, vom ae. Standpunkt aus als spezifisch anglisch gelten soll, wann nicht, läßt sich natürlich oft schwer und nur unbefriedigend treffen, aber man muß irgendwo eine Grenze ziehen, wenn man nicht auf kritische Beurteilung verzichten will. Als ein brauchbares Kriterium für eine solche Scheidung hat sich das Vorkommen eines Wortes in mindestens zwei unabhängigen anglischen Quellen erwiesen, s. oben S. 5.1 An der Grenze der Wahrscheinlichkeit befinden sich dabei die Worte, welche

¹ Natürlich muß nach S. 3, 4 unter den Quellen mindestens ein Prosatext sein.

diese Bedingung noch erfüllen, aber nicht in den Texten begegnen, auf die sich das Kriterium der Vermeidung anwenden läßt. Kommt ein Wort, das auch nur in zwei Quellen begegnet, zugleich in den Mundarten vor, so stelle ich es gleichwohl zu 1., nicht zu 2. Zu 1. stelle ich endlich auch einige Worte, die nur in Beda begegnen und in B vermieden werden. Wird ein Wort andererseits in den ws. Hss. von Beda, Dial. oder Mart. beibehalten, so müssen wir schon reichlicheres Belegmaterial verlangen, um es für spezifisch anglisch halten zu können, s. S. 7.

Worte, die nur in je einem unabhängigen nördlichen Text und nicht in den Mundarten (oder Me.) begegnen (namentlich ἄπαξ λεγόμενα), die also spezifisch anglisch sein können, aber vielleicht auch nur zufällig im Norden belegt sind, stelle ich als

- 3. Unsicheres (Zufälliges?) für sich. Alles Weitere an Ort und Stelle. 1
- 1. Worte, welche vom intern altenglischen Standpunkt als spezifisch anglisch betrachtet werden können.

Wir sondern prosaische Worte von solchen, die in Prosa und Poesie belegt sind (vgl. Einl., S. 3 ff.), um den Anteil der Poesie im Zusammenhang überblicken zu können. Das meiste ist gemeinanglisch, nur Weniges läßt sich als spezifisch mercisch oder nordh. erweisen. Ich ordne die Worte im wesentlichen nach der Zahl der Texte, in denen sie belegt sind.

¹ Keltische (kymrische und irisch-gälische), sowie nordische Lehnworte, die natürlich anders zu beurteilen wären, scheide ich aus.

a. Nur in Prosa belegte Worte.1

a) Gemeinanglische.

los gegen lor.

Sweet, Stud. Dict., vermutet, los sei anglische Form für lor. Ich fand ungefähr dasselbe Resultat unabhängig von Sweet durch folgende Aufstellung.

I. Lind. Mt. 7,13, 12,14 los perditio. Mehrmals loswist. — R₂ los(e)west. — Rit. 169,17 losvist.

 R_1 5,30, 18,14 to lose weorpan, 5,29,30, 9,17, 10,6 to lore.²

Beda³ 324,25 T to lose weard, OCaB lore. 412,11 TOCa to lose, CB lore!

Doch Bl. Hom. 69,7 to lore.

Dial. Greg. 68,30 to love, 141,14 CO love as (fem? H lyre).

Corp. Gl.⁴ 144 forlor amisionem.

II. Past. 33,9, 301,9, 403,13 (for)lor neutr. 63,17, 249,13, 255,4, 267,4, 383,26,28 to (for)lore weorpan (dōn). 249,1 H lose, einzige südliche Ausnahme, C lore.

¹ D. h. soweit die anglischen Worte in Betracht kommen. Einige der südlichen Äquivalente begegnen auch in Poesie. — Wo sich deutlich zwei Äquivalente gegenüberstehen, nenne ich in der Überschrift beide. Bei zahlreichen Belegen ordne ich die Texte möglichst in geographischer Reihenfolge von Norden nach Süden, was am anschaulichsten sein dürfte. Auf die Chronologie kommt es ja hier weniger an. — Den Vesp.-Ps. setze ich mit Miller etwas nördlicher als Beda. Vesp.-Ps. hat mit R₁ sihde gemein (Miller Einl. I S. XXXII), das auch in dem vielleicht ursprünglich nordmercischen Cant.-Ps. begegnet. Andrerseits freilich hat VPs. nur südlich get, kein gen.

² R₁ enthält Spuren sächsischen Dialekts, vgl. M. Förster ESt. 28,429, Schulte, Diss. über Beziehung von R₁ zu dem lat. Text (Bonn 1903), Verf. ESt. 35,95. Wir werden dies noch öfter beobachten.

³ Zitiert nach Miller EETS. 95, 96, 110, 111.

⁴ Nach Sweet OET. zitiert.

Oros. 132,15 mid micle forlore.

Wulfst. 149,4, 262,17 to lore weorpan.

Poetische Texte: Andr. 1423, Gen. (B) 721, 757 forlor.

Gemeinae. ist los in losian. Angl. los n. stellt sich hinsichtlich des gramm. Wechsels zu an. los n. «Auflösung, Zerstörung», ws. lor zu as. ahd. farlor «perditio». Natürlich gehört *lusa, — *luza zu verlieren, los.

fæs gegen fnæd fimbria.

Vgl. Miller I Einl. S. L. Klaeber Angl. 25,309.

I. Anglisch. Lind. fas, fasne (as. Lk. 8,44).

R, fæse, fæste (für fasne Lind.)

R₁ fæss, pl. fasu.

VPs. 44,14 feasum, Jun. Cambr. fæsum; Royal fnædum, Spelm. Cant. fnadum, vgl. Einl. S. 7, 10 ff. — Par.-Ps. I fnasum.¹

Beda 78,13 TCa pæt fæs, O fes, B fnæd.

Dial. Greg. 111,28 C fas[c]e, O fnace.

II. Im Ws. finde ich nur fnæd (ws. Ev., Ben.R. Schröer 135,26, Aelfc. Hom. II 160,23, 394.6,10, HL. 31,570, Hom. Assm. 16,48,227), beachte auch fnæd WW. 152,12, 328,9, 547,24 wegen Einl. S. 12. Fnæd in dem auf angl. Grundlage beruhenden poet. Teil des Pariser Psalters 132,32 kann vom ws. Bearbeiter herrühren.

Angl. fws n. — in Cooks Glossary fälschlich mit a — gehört zu ahd. faso m., fasa f., mhd. vase, spät vaser Faser, Franse, Saum', vgl. Kluge Et. Wb. s. v. Faser,

¹ Die Psalter-Glossen müssen des Vergleichs wegen zum Vesp.Ps. gestellt werden. Auch die freie Übertragung des Par.-Ps. schließe ich hier an. Der Übelstand, daß so auch ws. Texte unter den anglischen aufgeführt werden, läßt sich nicht gut vermeiden.

² Vgl. Helen Bartlett The metrical division of the Paris Psalter, Diss. Baltimore 1896.

Foley (Yale Studies XIV), S. 2, Weiteres bei Uhlenbeck PBB. 26,296.

Ws. fnæd n. hängt gewiß mit dem in Par. Ps. I belegten fnæs zusammen, und hiermit fasne as. Lind., falls für fnase verschrieben. fnæs entspricht dän., norw., schwed. dial. fnas 'Hülse, Schale, Faser', dän. dial. kornfnas 'Unkraut, Spreu im Korn' (Tamm, Falk-Torp s. v. fnas, Rietz, Molbech Wbb.), vgl. fries. fnaskje 'kauen', fnasseltje, fnisseltje, fnitteltje 'ein wenig, kleines Stück' (Dijkstra). Nach Maßgabe von fnæd ist fnæs wohl aus *fnad-ta assimiliert, und hierzu stellt sich auch dän. fnat, schwed. dial. fnatt 'Ausschlag, Krätze', fnatta 'reiben, kratzen', falls aus *fnadn — entstanden.¹

efolsian blasphemare,

häufig in Lind. R₂, Rit., R₁, auch in Cant.-Ps. 105,39 von Wildhagen, S. 249, nachgewiesen (efchylsiende fornicati), wo es aus nordmercischer Vorlage stammt. Auch der Text Angl. 11,98, wo eofulsung begegnet, scheint nicht ws. zu sein, vgl. feowung Z. 41, mordor Z. 32, mehrere in. yfelsian findet sich in dem Confessionale Ecgberhti L. a. J., S. 360 (10. Jh.): dæt dæt yfelsang wære on God, sede for yfelne man mæssan sunge (hier ist y wegen des Wortspiels mit yfel jedenfalls original), und in der Gl. WW. 482,8 blasuemiat: yfelsap. yfelsian könnte mit Anlehnung an yfel aus efolsian hervorgegangen sein. Ob aber wegen yfelsang in dem im wesentlichen ws. Conf. Ecgb. efolsian auch für den Süden vorauszusetzen ist, mag dahingestellt

¹ Dann paßt aber nicht der Dental in den von Tamm und Falk-Torp s. v. fnat herangezogenen gr. κναδάλλω 'beißen, schaben', κνώδαλον 'beißendes Tier'; anders über diese Zupitza Germ. Gutt. S. 110.

bleiben. Das eigentliche Verbreitungsgebiet von efolsian ist jedenfalls der Norden. — Die ws. Evang. brauchen für blasphemare bysmerian, dysegian u. a.

Was die Etymologie betrifft, so wird die gegenüber früheren Versuchen einzig richtige Erklärung aus *ef-hāl-sian (Sievers, Gr., § 43, Anm. 4) durch das oben genannte efehylsiende mit h bestätigt. Als parallele Bildung führe ich an efsacian GB. No. 529.

gescræpe aptus,

belegt in Beda (in B meist vermieden, teilweise auch in andern Hss.), Rit. 117,7 und in Glossen: Corp. Gl. 568 conpe(n)dium: gescræpnis, WW. 206,2,4, 420,43 -gescræpe (æ weist auf dialektisches æ, vgl. Deutschbein S. 172, 200, Klaeber Angl. 27,413). Ws. würde etwa pæslīc entsprechen. — gescræpe (*skrōpja-) entspricht ahd. ur-scruoffer (uper-uualtsiner, spurius Graff Sprsch. VI 581, Steinm.-Sievers I 400, Gl. zu I Sam. 17,4). Nach Graffs richtiger Vermutung hat spurius hier den Sinn von 'gigas, Ungeheuer', also erklärt sich ur-scruoffi als 'unpassend, über das Maß hinausgehend'.1

leapor, lepran 'lather'.

Lind. Jh. 11,2 (geduog vel smyrede vel) ledrede unxit.

Laeceboe I 50 S. 38 lypre² mid sapan. Lacnunga 1
S. 121 gnid swipe pwt heo sy cal geledred, pwcah mid py leadre (ws. für ungere nur smirwan, s. BT.). WW. 456,14

nitrum: leapor, 455,8 nitria: pwt is of leadre; Pfl. N. leaporwyrt WW. 361,2, 408,32, (vgl. Einl. S. 12).

¹ Nach freundlicher Aufklärung von Herrn Professor Braune.

² Daß hier der Schreiber die ws. Form bildet, beweist nicht, daß das Wort auch echt ws. war. Dasselbe geschieht bei wærc siehe dort.

Me. leder(i)en 'to lather' in der Katherine-Gruppe und Lagamon 7489 (B).

Ne. in nördl. Dialekten (bis Lincolnsh. O. Angl. südwärts), auch schriftsprachlich *lather* 'Seifenschaum, Schaum; vb. plätschern im Wasser, schäumen u. s. w.'

lēapor, Instrumentalnomen zu Wz. lau (vgl. Kluge Stammbild. § 93, Kluge-Lutz Engl. Etym. s. v. lather, sowie Et. Wb. s. v. Lauge) entspricht an. laupr n. 'Schaum, Seife', schwed. lödder 'Schaum'; lēpran = an. lcypra 'schmieren, waschen, zum Schäumen bringen'.

dīan, dēon säugen, saugen.

Vesp.-Ps. 8,3 milcdcondra lactantium, Jun. mcolctcondra (!), Spelman Royal succendra, Cant. sukendre, Par.-Ps. pe meole sucad.

R₁ 21,16 diendra lactantium. Lind. Mt. 21,16 diendra id., Lk. 11,27 gediides suxisti. (R₂ verderbt detedes). Vgl. Sievers Gramm. § 408 Anm. 17.

Das Ws. hat nur sācan, vgl. ws. Evang., den Vers Ps. 8,3 bei Aelfc. HL. 31,277 of unsprecendra mupe and succendra, Aelfc. Hom. I 246,21 da sucendan cild, 84,16 da breost pe swylce gesihton (zu sycan) u. s. w. — tēondra im Jun.-Ps. fasse ich nicht als Schreibfehler auf, sondern als Beweis dafür, daß jedenfalls schon zu Anfang des 10. Jh. dēon im Ws. ungebräuchlich war, vgl. Einl. S. 8.

Das Wort ist gemeingermanisch, vgl. mlid. dien, tien, nordfries. diedje (Outzen, Halbertsma, vielleicht dän. Lehnwort) und die nordische Gruppe adän. di, ndän. die, aschwed. dia, nschwed. dia, di 'säugen, saugen'.

Im Ablautsverhältnis steht ahd. tācn und ferner got. daddjan = aschwed. dæggia, nschwed. dägga, dän. dægge¹

¹ Daher vielleicht engl. dug.

(*dajjan), vgl. besonders Bremer PBB. 11,55, Brugmann Grdr. I² S. 486.

porf(f) wst utilis,

belegt Lind. R₂ Lk. 14,35, Rit. 192,4, 91,13 (a sie prosint), 179,17 (undorfæst ineptus). Hierzu stellt Klaeber Angl. 27,423 mit ansprechender Emendation (pearf)festre¹ utilius Beda 380,3 (vgl. Miller I S. L). — Von porf-fæst aus, das sich in der Aussprache in por-fæst zerlegte, erklärt sich analogisch der Schwund des f in nordh. porlēas; dies ist zu Bülbring El.-B. § 533 g anzumerken. In ws. pear/lēas (Aelfc. Hom. I 82,20, II 452,16) wirkte diese Analogie nicht, da hier *pearffæst nicht gebräuchlich war. Gemeinae. Ausdruck für utilis ist nytt, vorwiegend ws. ist nyttwierde, -weorp, s. BT.; vgl. auch behēfe 'nötig, nützlich', = utilis in Aelfc. Coll.

spittan gegen spætan.

I. Lind. u. R₂ Mk. 10,34, 14.65 (R₂ Lk. 18,32) -spitta conspuere. Doch Lind. spatende (Cook *spātian; etwa für spātlende, oder spātende?).

Rit. 19,9 gispitta. Ri 26,67, 27,30 spittan.

II. Past. 45,4, 261,10 spatan.

Aelfe, Gr. 158,6, 167,10, Deut. 25,9 spætan. ws. Evang. spætan (9 \times).

spætan allerdings in dem auf anglischer Grundlage beruhenden Laeceboc, II 22 S. 63 geondspæt, II 1 S. 53 spætang, u. Rätsel 18,4, 24,8; es kann vom ws. Schreiber herrühren. Jedenfalls ist spittan die nördliche, spætan die vorwiegend südliche Form. — Im Ws. (Boet. 27,1, Aelfc.

¹ Beda hat *pearf*, nicht *porf*. Über nordh. *porf* s. Füchsel, Angl. 24, S. 20, § 16.

Num. 12,14) begegnet auch spigettan. Wegen spātl(i)an, zu spātl, s. BT. Gemeinae. ist spīwan.

Im ME. ist die Scheidung zwischen spittan und spætan weniger klar, s. Stratm. S. 568, 564. Beachte speten vorwiegend in der Ancr. Riule (Morton S. 78, 106, 240), spitten Cursor Mundi 16635, freilich auch in Haly Maidenhad (EETS. 18 S. 17). Chaucer hat spete Troilus II 1617, spitte C. T. C. 421. ME. spitten im Süden kann auch auf spigettan zurückgehen. NE. praet. spat = spætte. Als Rest des südlichen spætan ist wohl ne. dial. spet in Wilts. Dorsets. — jedenfalls hinsichtlich der Schreibung (gespr. spit) — aufzufassen.

Zur Etymologie s. Kluge Et. Wb. s. v. speutzen, Kluge-Lutz Engl. Etym., Skeat Conc. Et. Dict. s. v. spit.

Ws. spīgettan entspricht ahd. spīwizzōn (Sievers PBB. 9,204), mhd. spiwezen, spiuwezen, spiuwezen, Intensivum zu germ. spīwan. Angl. spittan (nicht spyttan, wie Kluge mit BT. ansetzt!) ist wohl kaum aus spīgettan kontrahiert, sondern setzt eine Basis *spit (parallel zu *spūt, in an. spūta, dän. spytte, schw. spotta) voraus, wozu ablautend me. spūt, spōt 'Speichel', ae. spētan (*spaitjan), spātl, spātlian.

Anmerkung. Eine auffällige Bildung ist das Prät. spēoft, spēaft in Lind. und R₂. Gegenüber seiner früheren Annahme, daß spēoft ein redupliziertes Prät. II sei, hält Sievers PBB. 9,279 u. Gramm.³ § 384 Anm. 5 wegen des Part. gespēoftad es für wahrscheinlicher, daß wir es mit einem ursprünglich schwachen Verb zu tun haben. Die ältere Auffassung dürfte vielleicht doch die richtigere sein; ich hoffe, auf die interessante Form noch zurückzukommen.

roc(c)ettan gegen bealcettan eructare.

roc(c)ettan begegnet Lind. Jh. S. 187,12 rocgetede, Ri 13,35 roketto vel bilcetto (letzteres schon wegen des ws. i nicht ursprünglich, vgl. S. 15 Fn. 2), Vesp.-Ps. 18,3, 44,2 roccetted, 118,171 rocct(t)ad (ebenso der abhängige Junius.)

bealectan, bele: Royal (beleettan), Spelman (bealean, —ettan), Cant.-Ps. (beleep, beleette, 118,171 uproceented aus angl. Vorlage), sowie Boet. 51,5.

Zu den Glossen WW. 229,18 eructuat: bylcettep roccetep, 531,16 (e)ructabat: blew odde roccette vgl. Einl. S. 12.

Jedenfalls neigt das Anglische zum Gebrauch von roc(c)ettan, das Ws. zu bealcettan; einen authentischen ws. Beleg für roc(c)ettan haben wir nicht. Zu r. vgl. ne. dial. rochlis (Hertf., Pembr.) 'Rasseln in der Kehle, Todesröcheln'. Daneben stehen andd. ropizōn, ahd. rofazōn, roffazzan, mhd. roffezen, an. ropa 'rülpsen', vgl. Zupitza Germ. Gutt. S. 43. Zu bealc(ett)an, ne. belch s. Franck Et. Wb. s. v. balken.

bisene caecus.

In Lind. dreimal zu Anfang: np. Mt. 9,27 bisene, 9,28 bisena vel blinde, 11,5 biseno. Im ff. und in den übrigen Ev. gibt Lind. caecus nur durch blind wieder. (Rush. hat nur blind).

Dazu Dial. Greg. 275,3 ns. C bysne, O bysene, H fehlt. 77,28 CO pæs bysenan mannes, H blindan! — Cook und Sweet setzen bisen an, doch scheint eher ein jæ-Stamm bisene vorzuliegen. — Das Ws. hat nur blind.

Me., ne., nord- und mittelld. bisen, -sne, bisson 'blind, halbblind, kurzsichtig', s. Mätzner, Stratman Wbb., NED. s. v. 'bisson'. Das Wort begegnet bei Shakespeare Coriolan II 1,70 'beesome conspectuities', Hamlet II 2,529 'with bisson rheume'. Das Vorkommen von bisne in Eule und Nachtigall V. 243 (Dorsetshire?) spricht nicht dagegen, daß es anglisch ist, denn hier begegnet auch ein anderes, offenbar anglisches Wort, nämlich strynd, s. dort und Einl. S. 9.

Die heutigen Dialekte, in denen bisson (byson, beesen, beesen) im Norden von Northumberland bis Northampton

südwärts vorkommt, stimmen zu der ae. Begrenzung des Wortes. S. DD. s. v. bisson. —

Es leuchtet ein, daß in dem Wort der Stamm sehen steckt, vgl. NED. s. v. bisson. Skeat Et. Dict. stellt es zu mndl. bisiende, nndl. bijziende 'kurzsichtig, blödaugig', womit nhd. beisichtig zu vgl. ist. Doch kann ae. bisene der ndl. Form nicht völlig gleichgestellt werden, denn dann wäre der Schwund des d nicht zu erklären. Liegt etwa ein ja-Stamm bīsiene, -sēne vor als Weiterbildung eines Bahuvrīhi-Kompositums got. bi-siuns 'nahes, kurzes Sehen habend', vgl. beisichtig? — Zur späteren Entwicklung vgl. Luick Angl. Beibl. 8,40 ff., Archiv 102 S. 71.

scra Schienbein, Bein.

Ep.-Gl. 299 == Corp.-Gl. 602 crus: scia.

Lind. Jh. 19,31-33 pl. sciu crura.

R₂. Jh. 19,32 scia, 33 sciæ. Vgl. Sievers Gramm. § 277 Anm. 2.¹

Gemeinae. ist sceanca, sceonca.

scia m. entspricht mhd. schie, schige swfm. 'Zaunpfahl, Umzäunung von Pfählen', nhd. dial. scheie f. 'Zaunpfahl, Stacket', ein oberdeutsches, bes. schweizerisches
Wort, doch auch auf niederd. Gebiet (schigen oder stecken),
s. DWb. s. v. Scheie. Vgl. ne. dial. shy (Norfolk) 'a groin
or light rail erected on the beach for the protection of
the coast'? — Eine Weiterbildung ist ahd. scina, ae. sčinu,

¹ Sehr fraglich ist, ob in Rätsel 4,41 (ponne scearp cymed sceo wid oprum, ecg wid ecge, es ist von Gewitterstürmen die Rede, vgl. Dietrich ZfdA., 11,461) mit scēo etwa 'Beinschiene' gemeint sein könnte: dann würde es zum Bild eines Kampfes zwischen zwei Gewappneten gehören. Man erklärt es gewöhnlich als 'Wolkendecke, Wolke' (as. skio), wozu freilich das folgende Bild ecg wid ecge nicht recht paßt.

mhd. schinebein 'Schienbein' und ahd. scina 'Nadel', mhd. schin, schine 'Schiene, Röhre', s. Kluge Et. Wb. s. v. Schienbein.

andŭstrian verabscheuen.

Lind. Mt. 26,74 adustriga detestari. R₁ ib. ondustriga, 24,15 ondustrungæ abominationem (Lind. unfægernis). Da beide Texte unabhängig das seltene Wort verwenden, so ist nicht unwahrscheinlich, daß es dem Norden eigentümlich ist. Das gewöhnliche, namentlich ws. häufige Wort für verabscheuen ist onscunian. (ws. Mt. 24,15 onsceonunge).

andustrian ist etymologisch unklar, doch ist Beziehung zu ahd. ustinön 'fungi', ustrī 'industria' Graff I. 500 wohl nicht abzuweisen. Die Quantität des u ist unsicher.

sunor Wildschweinherde.

Lind. Lk. 8,32 cde vel sunor bergana grex porcorum, 8,33 pet sunor (R2 fehlt). Mt. 8,30-32 suner.

R₁ 8,30 suner swina, 8,32 sio suner vel wræð, 8,31 in pas sunræ. (ws. swina heord).

Dazu me. sunder im nordwestmittelld. Gawein V. 1440 — also i. g. 3 Zeugen aus dem Norden! Freilich wird das Wort sonst noch zweimal als technischer Ausdruck erwähnt. Halliwell zitiert in seinem Wb. unter soundre aus einer Hs. Bodl. 546: that men calleth¹ a trip of [a] tame swyne, is called of wilde swyn a soundre, that is to say, gif ther be passed V or VI together. In einem anglonormannischen Gedicht bei Hickes Thes. I 154, dessen erstes Kapitel Kollektivausdrücke für Jagdtiere gibt (docet rhetorice loqui de assimilitudine bestiarum) begegnet soundre des porks. (NE. veraltet soundre nennen die Wbb., es fehlt

1 miles

¹ Dies könnte auf den Süden weisen.

im DD.). Nach diesen Zeugnissen mag das Wort als technischer Ausdruck der Jägersprache weitere Verbreitung gehabt haben, allgemein volkstümlich aber war es höchstwahrscheinlich nur im Norden.

Es entsprechen langob. sonor-pair 'Herdeneber' (Bruckner Spr. d. Lang. S. 212) und nach Sievers PBB. 16,540 ff. an. sonargeltr 'Opferschwein'; im Ablautsverhältnis steht mhd. swaner 'Herde, Rudel', ahd. swanering 'männliches Schwein in der Herde'. Derselbe Stamm findet sich in son 'scrofas sex cum verre' der Lex. Angl. et Werin. VIII 2, afränk. sonesti 'Pferde-, Schweine- und Rinderherde' Lex. Ripuar. XVIII 1, son(n)ista, sunnista in den Malb. Gl. zur Lex Sal. II 11, 14, XXXVIII 3. Vgl. Palander Die ahd. Säugetiernamen S. 162, Sievers a. a. O., Schmeller B. Wb. II 296.

lygge falsus.

Lind. Mt. 26,60 lease vel lycce, ib. liycce. R₁ 7,15, 24,11 lyge vel lease (witgu). (ws. lēas).

cc in nordh. lycce wird von Kluge Stammbild. § 230 aus einem ni-Suffix erklärt, ein lycce mit kk scheint auch Bülbring El. B. § 499 anzusetzen. Erwägt man aber, daß geminiertes g in Lind. vereinzelt auch cc geschrieben wird (Foley § 43) und daß die Entsprechungen as. luggi (Wadstein Sprachdenkm. S. 17,8), ahd. oberd. lukki (Braune ahd. Gramm. § 149 Anm. 7) deutlich geminiertes g haben, so wird man auch die nordh. Form als *lugja- anschließen müssen. — lyge R1 kann hiervon kaum getrennt werden. Die Schreibung mit einf. g erklärt sich aus dem Einfluß des Sbst. lyge, das sich dem Schreiber mit dem Adj. vermischt zu haben scheint. — Nördl. dial. lig Tügen hat mit dem Adj. wohl nichts zu tun.

rif reißend.

Rit. 125,16 rifista ferociora.

Ep. Al. 114, 134, S. 144 [h]rifra wildeora, vgl. Einl. S. 11.

rif 'reißend, wild' entspricht schwed. dial. rīv 'reißend, rasch, hurtig' und stellt sich zu me. rīven '(zer)reißen, brechen', ne. rīve in nördl. Dial. '(zer)reißen, spalten', an. rīfa, dän. rīve, schwed. rīfva 'reißen, zerreißen'. Entlehnung des me. rīven aus dem Nordischen ist unsicher, vgl. Björkman Loanwords S. 252, und für rīf wegen des Belegs in der Ep. Al., die sonst keinen nord. Einfluß zeigt, entschieden unwahrscheinlich. Von reißen (*urīban) ist rīfa(n) nach Björkman a. a. O. wegen aschwed. rīva (nicht *vrīva) zu trennen, wofür auch die Bedeutung spricht, anders Kluge-Lutz s. v. rīve, Falk-Torp s. v. rīve. — Ob auch ae. rīf, ne. rīfe 'reichlich', an. rīfr 'freigebig, reichlich', nındl. rījf. ndd. rīve 'reichlich, überflüssig, häufig, freigebig' sich mit rīf 'reißend' in der Bedeutung vereinigen lassen, wie Falk-Torp s. v. rīv annehmen, dürfte fraglich sein.

styltan, styllan starr stehen, erstaunen.

a. styltan: Lind. u. R₂ (ā-, ge-, for-, fore-, wiā-) stylta, praet. stylte, stylton, -tdon, -dton stupere, obstupescere, haesitare. R₂ Mk. 1.22 stylton gehört zu Farmans Anteil, der hier im Wortlaut der Übersetzung von Lind. beeinflußt ist, 1 vgl. Lindelöf Bonner Beitr. X 5 (Einl. S. 5); in der Matth. Gl. 12,23 hat Farman wundradun stupebant.

¹ styltan ist also Farman nicht fremd, also nicht spezifisch nordhumbrisch. Es fragt sich aber andrerseits, ob es überhaupt spezifisch anglisch ist. Da wir für styllan wohl zwei unabhängige Zeuzen Corp. Gl. und Lind.) annehmen dürfen, so schließe ich beide diesem Abschnitt noch mit an. — Die ws. Evang. haben für stupere, obstupescere wundrich wie R₁, forhtian.

b. styllan: Corp.-Gl. 662 descivit, pedem retraxit: widstylde. Lind. Mk. 1,22 styldon, Lk. 8,56 gestyldon stupebant. Sievers Gr. § 405 Anm. 10 sieht freilich in stylde nur Schreibvariante für styldte, stylte, wofür ja die Änderung des Schreibers von gestylde > gestylte Mk. 9,15 Lind. s. Skeat S. 143) zu sprechen scheint. Doch wegen widstylde in Corp.-Gl. (nicht zu *stalljan, wie BT. will) und auch wegen etymologischer Entsprechungen wird man doch wohl ein styllan neben styltan annehmen dürfen. —

styllan (*stulljan) 'starr stehen' (vor Erstaunen, Schreck, Zweifel) ist westgermanisch, vgl. ahd. stullen 'stehen bleiben', stulla 'Zeitpunkt', ndl. stollen 'concrescere, conglobari, condensari, constipari' (Kilian), westf. stollen 'starr werden'. — styltan stellt sich zu mnd. stulten, stollen 'dick, fest werden, gerinnen', nndd., ostfries. stulten, stülten 'stehend oder fest und starr werden, gerinnen' (Stürenburg, Doornkaat), vgl. ferner schwed. dial. stylt 'Stütze', stylta 'stützen, am Fallen hindern, d. h. stehen machen' und die Sippe Stelze: dän. stylte, schwed. stylta, me. ne. stilt(e), ndl. stelt, ahd. stelza, s. Franck Et. Wb. s. v. stelt. Germ. *stelt— *stult— steht parallel zu *stall, *stell, *stull in Stall (wozu stellen), still und Stollen, *sthel 'stehen', s. Kluge Et. Wb.

Anmerkung. Auch das verwandte stællan < *stalljan 'springen' scheint anglisch zu sein, vgl. die Belege bei Deutschbein S. 218. astylde prosiliit — freilich mit ws. y — begegnet Dial. 21,27 (H ford arwsde), stellan innuere in einem sonst ws. Glossar ZfdA. 20,39.

*yōian, *yēgun.

Beda: (vgl. Miller I Einl. S. L, Klaeber Angl. 25,289)
88,15 T yout ingemiscat, OCa hogat, C gep, B gwt.

88,17 T goicade cuad gemebat dicens, OCa hogiende, C gende, B scofiende.

48,5 Ca yeony, glossiert mit yrmd, gemitus, B gnornung.

76,15 T gooung gemitus, OCa goung, B geong.

Mit gende C 88,17 identifiziere ich das unerklärte gende frenans Rit. 162,5; der Glossator kann an fremens gedacht haben, und Verständnis für den Zusammenhang braucht man von ihm ja nicht zu erwarten. — Gemeinae. entspricht etwa hrieman, ē.

Entsprechend dem urverwandten an. geyja 'bellen, ausschelten' (*gaujan, Praet. gō) sollten wir angl. *gēgan, ws. *gregan erwarten, vgl. an. heyja = angl. hēgan. Hierzu stimmen denn auch gēp, gēnde, gēong, sowie me. gējen 'schreien'. Daneben stand, von der im an. Praet. erscheinenden Ablautsstufe aus gebildet, ein swv. II *gōian, wozu gōad, gōung etc., vgl. Sievers Gr. § 414 Anm. 5 a. — Im ME. begegnet gējen in ff. anglischen Texten (Stratman, Mätzner): Gawein 1215, nördl. Allitt. Poems 2,846, Lazamon 27750 (A geiden, B gradden), Kath. Jul. Marg. (es fehlt in Haly Maidenhad! vgl. Einenkel Angl. V 98), ferner in den von südwestlichem Schreiber kopierten Lambeth-Homilies (EETS. 29, 34) I S. 43, 253 und Cod. Digby 86 ed. Stengel S. 792, freilich auch in Sawles Warde EETS. 34 S. 253, und in der südlichen Hs. der Ancr. R. Morton S. 66, 152, 288.³

Außer dem an. geyja (dän. gjo, aschwed. göia, schwed. dial. gö, dazu an. gaul 'Gebell', gaula, dän. gaule 'bellen') gehört hierher fries. geije 'exclamare' (Dijkstra Wb. I 446, vgl. *daujan >> deije I 263). Verwandt sind im Deutschen

¹ Unsicheres konjiziert Ritter Arch. 113,186.

² Nach Heuser IF. 14 Anz. S. 29 beruhen Lambeth-Hom. und Digby 86 auf mercischer Grundlage wegen o vor Nasal. In Lambeth-Hom. begegnet auch *fräg*, s. dort.

⁸ In Dorsetshire Ten Brink Litt. Gesch. S. 239 ff.) sollte man das Wort kaum erwarten, vgl. Einl. S. 15 Fn.

hess. gauwen, gauben 'laut murren, namentlich von Hunden und kleinen Kindern', westf., hess. gauzen, bayr. gautzen 'bellen' (*gauatjan). Vgl. ferner ae. poet. gēaā 'Torheit, Spott' = an. gauā 'Gebell', während mhd. giude, göude, md. gūde 'geräuschvolle Freude, Jubel, Verschwendung, Annehmlichkeit, Genuß', giuden, göuden 'prahlen, prahlerisch verschwenden, großtun, in geräuschvoller Freude sein', die Falk-Torp s. v. gjø herausziehen, wohl besser fern bleiben, vgl. Kluge Et. Wb. s. v. vergeuden. Den germ. Namen des Kuckucks *gauka-z mit ableitendem k wird man am besten zu *gaujan stellen ('der Schreier').

Im Anschluß an gēgan, das im Ae. nur im Beda sicher belegt ist, führe ich einige Worte an, die nur im Beda begegnen und hier von B (teilweise auch von Ca, O, C) vermieden werden, vgl. Einl. S. 6. Ich fand die meisten nachträglich in Klaebers Beda-Studien erwähnt, möchte sie aber wegen ihres etymologischen Interesses hier nicht unterdrücken.

cwinan gegen cwincan.

Beda T 118,14 pæt fyr acwán, C acwinen wæs, B acwanc. Vgl. Klaeber Angl. 27,251.

(a)cwincan ist auch sonst ws. belegt: Aelfc. HL. 35,314, Angl. 13,365 (accounce delitesceret), Chron. E ao 1110, Nap. OEG. 1,2384 u. ö.; doch auch Dial. Greg. 10,13, 47,18.

Im Süden ist also cwinan durch cwincan verdrängt worden. Gemeinengl. ist das Kausativ cwencan = ne. quench (Orm cwenken).

¹ Falk-Torp knüpfen *gaujan an aind. húrate, aksl. zorą 'rufen' = lit. žarėti 'besprechen, zaubern' (Brugmann Grdr. I. § 613 zu idg. ĝh, Uhlenbeck aind. et. Wb. S. 359). — Uhlenbeck PBB. 30,281 stellt mhd. giuden zu lit. gaudžiu, gaūsti 'sausen, summen, heulen, weinen, jammern'. Demnach wären *gaujan und giuden nicht zu vereinigen.

In den übrigen Dialekten stellen sich zu cutnan: neuostfries. nordfries. quinen, mnld. quinen. nndl. kuijnen
hinwelken. absterben' (s. Franck Et. Wb.), mnd., nndd.
(westfäl. Bremen, holst., pommersch) quinen, mhd. verquinen, md. (thür.) queimen 'siechen. kränkeln', endlich adän.
keine, dän. dial. qvine 'hinsiechen' (norw. dial. kvina
'schreien, klagen'). Zu cwincan gehören afries. kwinka
'schwinden', schwed. norw. dial. kvinka 'wimmern'.

Der etymologische Zusammenhang von cucinan und cwincan wird bei Kluge-Lutz Engl. Etym. s. v. quench wohl mit Unrecht bezweifelt. Vielleicht darf man auf das Verhältnis von ne. chine (ae. cīnan): chink hinweisen, vgl. NED. s. v. chine sb¹. vb¹, chink sb². Demnach wäre cucinan aus der i-Reihe infolge k-Ableitung in die Nasalreihe übergetreten, vgl. das Verhältnis von swīnan: sucindan Streitberg Urg. Gr. § 105. Ob cwīnan als Ablautsform zu ae. cwānian, an. kveina. kveinka 'klagen', got. qainōn 'weinen' zu betrachten ist, ist nicht ganz sicher (Zupitza Germ. Gutt. S. 84. 88 trennt beide). Im Nord. kann kvin(k)a in der Bedeutung von kvein(k)a beeinflußt sein, doch vgl. auch bayr. quenkeln 'winseln, ächzen', das zu cwincan, cwencan zu gehören scheint.

fleswian.

Beda 122.17 mid by he ba geswippre mupe licetende wrend wreakte and lease fleosewade, cum simulatam legationem ore astuto volveret. O fleswade, Ca fleswede, B ersetzt es durch leaslice ongann. Vgl. Klaeber Angl. 27.253,

¹ Molema Wb. der groning. Mundart und Stürenburg. Doorn-kaat Ostfries. Wbb.

² Outzen: quinz 'kränklich sein, sich klagen'. Ob diese Formen echt friesisch sind, ist natürlich nicht sicher, vgl. afries. kvinka.

der auf Cura Past. 421,26 verweist: de swide eadmodlice onginnad beforon ricum monnum.

Das nur hier belegte fleswian ist sicher keine Korruptel, wenn auch die Bedeutung unklar ist (BT. u. Sweet 'murmeln, wispern'?). Das Grundwort scheint in schwed. dial. fles 'Gesicht, Stirn' vorzuliegen, also etwa 'ein Gesicht machen, das Gesicht verziehen'? Unsicher sind Beziehungen zu hd. flescheln, flüscheln 'schalkhaft lächeln, ridere, plorare' (D. Wb.), und vollends zu nordfries. flewwern, 'aus hämischer Falschheit nach jemand das Maul verziehen' (Outzen), (Siebs Sylter Spr. fleere 'schmollend ein spöttisches Gesicht machen'). — Man beachte, daß nach Kluge Et. Wb. s. v. flennen, ahd. flannen 'das Gesicht verziehen' auf *flaznen beruhen könnte.

gemynde gegen gemyde.

Beda 398,17 T æt dæm gemyndum Tune streames, iuxta ostium, OCa B gemydum, C gemærum. Vgl. Miller I Einl. S. L.

gemynde neben gemyde braucht nicht sinnlos zu sein, wie Klaeber Angl. 27,427 anzunehmen scheint. Es erklärt sich einfach aus grammatischem Wechsel (*mundja). Derselbe liegt wohl auch vor in as. gimundi ostia (neben cuth) in Prud. Gl. (Wadstein Sprachdenkm. S. 102,23, Gallee as. Gramm. § 102 Anm.), mund Hel. Mon. gegen math, vgl. Holthausen as. El. B. § 192 Anm., § 257 Anm. 2, vielleicht auch in fries. mund neben math, vgl. Siebs Grdr. I S. 1264.

? ēonde.

Beda 196,6 T pat betste hors and pas fagerestan condes equum optimum, CO endes, Ca heowes, B hiwes. 196,19 T uncymre hors and odres condes equos viliores uel alias species, O endes, Ca endes, glossiert hiwas, B hiwas. Klaeber

Angl. 27,277 liest mit BT. und Sweet für eondes andes endes 'species, kind'; auffällig ist aber doch, daß das seltsame eo in T zweimal begegnet. Ich kann die Vermutung, nicht ganz abweisen, daß in ēonde 'Pferde-Zucht, Rasse, Schlag, breed' der Stamm eoh 'Pferd' (got. aihwa —) stecken könnte. Die Stammbildung (*chu-ndja?) wäre allerdings sehr problematisch, doch vgl. Wilmanns D. Gr. II S. 351, unter dessen Beispielen vielleicht besonders auf ahd. ārunti, ae. ārende zu verweisen wäre.

clugge Glocke, (? clucce).

Beda 340,6 T hleofor heora clucyan, O cluccyan, Ca clugyan, B bellan! Man wäre versucht, clugge wegen seines isolierten Vorkommens auf anglischem Gebiet direkt auf das Kymrische oder Irische zurückzuführen: cymr. cloch f., corn. cloch, ir. cloce m. = *klukkos, -a (Stokes Urkelt. Sprachsch. S. 103). Aber abgesehen von lautlichen Schwierigkeiten, die sich dabei ergeben. machen es die kontinentalen Entsprechungen (s. Kluge Et. Wb. s. v. Glocke) wahrscheinlicher, daß es sich um ein altes kontinentalkeltisches Lehnwort handelt. Dies hat sich im Anglischen erhalten, während es sonst durch belle 'Schelle' (mndl. belle, nndl. bel, mnd. nndd. belle, an. bjalla) verdrängt wurde. S. Belege für belle bei Paddelford OE. Musical Terms, Bonner Beitr. IV S. 65.

Anmerkung. Das ān. her. myl 'Staub, Müll' Beda 14.20 CaB (Klaeber Angl. 25,272) hat sich jetzt auch in der Psalterglosse G, Lindelöf Bonner Beitr. XIII. S. 15 Ps. 7,6 gefunden. — *Pylice* in Greg. Dial. 116,13 C, wofür OH. kæppe (melote), steht wahrscheinlich für pylice.

Zum Schluß dieses Abschnittes noch zwei lateinische Lehnworte:

 $^{^1}$ Über dem ersten g nach Miller ein kleines c.

casering

in Lind., R₂, R₁ = drachma, didrachma (ws. Ev. für drachma scilling). Vgl. cheisuring im Hildebrandslied 34.

cælc gegen calic

s. Pogatscher Lehnw. § 216. Lind. R₂, R₁ haben cælc, Vesp.-Ps. 15,5 celces, daneben aber alle auch jüngeres calic, das im Süden ausschließlich zu gelten scheint. Die ws. Ev. haben nur calic. cælic in Spelm.-Ps. 115,4, Royal 15,5, 115,4 wird auf Mischung beider Formen beruhen. cælc entspricht ahd. kelih, afries. tzilick.

3) Spezifisch nordhumbrische und spezifisch mercische Worte.

Wir haben uns bisher nur mit gemeinanglischen Prosaworten befaßt. Es zeigte sich dabei ein enger Zusammenhang zwischen dem Mercischen und Nordhumbrischen; das Anglische als Ganzes stellt sich dem (West-) Sächsischen gegenüber. Wegen dieses Zusammenhangs wird es um so schwieriger, zwischen spezifisch Nordhumbrischem und spezifisch Mercischem zu schei-Die Prosadenkmäler beider Gebiete sind ja so wenig umfangreich, daß das Fehlen eines Wortes in einer von beiden Gruppen an sich i. a. nicht viel besagt. Besonders ist hier wieder die Häufigkeit der Belege maßgebend, aber auch, ob ein Wort in mehr als einer unabhängigen Quelle begegnet, vgl. S. 5 und 13. Für spezifisch Nordhumbrisches sollte sich ein Aquivalent im Mercischen, für das Mercische ein Äquivalent im Nordhumbrischen belegen lassen.

Was das spezifisch Nordhumbrische betrifft, so wäre es für die Beurteilung einiger Worte wertvoll, zu wissen, ob die Glosse des Rituals außer allem Zusammenhang mit

der von Lind. entstanden ist. Die Ansicht, daß die Glossatoren beider identisch sind, ist nach Lindelöf Bonner Beitr. X S. 6 § 8 aufzugeben. Doch könnte man fragen, ob alle Übereinstimmungen beider in der Wiedergabe des Lateins sich nur aus der gemeinsamen Mundart oder auch etwa aus gemeinsamer Übersetzerschule ergeben. Ein Fall ist hier von Interesse. Im Rit. und (einmal) auch in Lind. (nebst R₂) findet sich die seltsame Übersetzung von lat. pro- durch soā, die wohl durch die Analogie von proverbium = sođcwide veranlast wurde (!), vgl. sođcuma procedere Rit. und Lind. R2 Jh. 15,26, sođfylga prosequi, sodlæda producere, sodgistrynd progenies Rit. Sollten beide unabhängig auf diese Torheit verfallen sein? Immerhin würde dies nichts für direkten Zusammenhang beweisen. Wir können doch wohl annehmen, daß Rit. und Lind. im allgemeinen unabhängige Zeugen sind. 1 Daß R2 von Lind. abhängig ist, ist schon erwähnt.

Doch nun zu den Einzelheiten. Als spezifisch nordhumbrisch können wir die folgenden in Lind. Raund Rit. belegten Worte ansehen (ich stelle das Sicherere voran).

giwiga bitten, verlangen.

Lind. (gc-, ofcr-) giwiga, giuge, praet. giude petere, postulare, mendicare, poscere, exigere.

Rit. (gi-) givia petere, appetere, expetere, poscere, postulare. R. giowigia. — R. hat nur das gemeinae. biddan.

Für weitere Formen s. die Wbb. und Sievers Gramm. § 416 Anm. 14 b. Das Wort ist in allen drei Texten häufig belegt und sicher spezifisch nordh. — Das nörd-

¹ Eine Kleinigkeit sei noch erwähnt: Rit. hat stets gimung, Lind. gemung (nuptiae).

lich-nordhumbr. giw- flektiert vorwiegend nach der ai-Klasse (vgl. ahd. given), das südlich-nordhumbr. giour- nach der o-Klasse (ahd. gewon). Das i in giwian wurde früher von Sievers (Angl. 16,98, so auch Cook) für lang gehalten, doch später als kurz erkannt, wozu das io in R₂ und die ahd. Entsprechungen nötigen. Die Sippe ahd. giwen, gewon 'hiare, oscitare', mhd. giwen, gewen 'das Maul aufreißen, gähnen' (göuwen 'gierig, lüstern nach etwas sein), bayr. gewen, nndl. geeuwen 'gähnen' (dazu geeuwhunger = Gähhunger¹) ist eine w-Ableitung zur Wz. gř in ahd. gien 'gähnen', an. gina, ae. ginan 'klaffen', ahd. ginen, geinon, ae. ginian, ganian 'gähnen' (lat. hiare); auch das nach Sievers a. a. O. (jetzt auch Uhlenbeck PBB. 30,283) reduplizierte got. geigan 'erstreben' gehört vielleicht hierher. Vgl. auch Kluge Et. Wb. s. v. gähnen, Franck Et. Wb. s. v. geeuwen.

(Für wærlan 'gehen, sich wenden' macht Ritter Arch. 113,186 Entlehnung aus dem Nordischen wahrscheinlich.)

dēpa töten.

Lind. Lk. 23,32 woere gededed interficerentur, Mk. 7,10 gededed se moriatur, Jh. 12,33 sucltende vel gededet moriturus.

R: gideđed.

Rit. 21,16, 25,22 gideđed, -od mortificatos, 72,13 deđinges mortificationem.

Es entspricht sehr schön ne. dial. to death 'kill' West Yorks. — dēdan darf man wohl gleichsetzen mit ahd. töden (Notker), mhd. töeden (? Faktitivum zu daupa- 'tot' Kluge

Ostfries. gä-hunger (Doornkaat), geehunger (Stürenburg), gron. geihonger (Molema). — Fraglich sind in heutigen Dialekten pommersch gewen, geewen 'wimmern', thüring. gewern 'schwatzen'.

Stammbild. § 224). Weit überwiegend ist das Faktitivum zu dauda-: ae. ws. diedan, ahd. toten, mhd. toeten, ndl. dooden u. s. w. 1

hoga prudens,

häufig in Lind. R: (prudens, sollicitus), und Rit. (prudens), dazu in Lind. hoglice, hogafæst, hogafull prudens, in Lind. R: Rit. hogascipe prudentia, industria.

(R₁ hat für prudens snottor, die ws. Evang. gleaw, doch ist auch snot(t)or im Ws. häufig.)

Das Adj. hoga steht im Gegensatz zu der im Ws. häufigen Abstraktbildung hoga, ymbhoga swm. 'Sorge, Sorgfalt', die das Ursprüngliche darstellt. Es wäre denkbar, daß in Bildungen wie hogafæst und hogafull hoga- unter der Analogie von wisfæst, sodfæst (Kluge Stammb. § 242), gesundfull u. a. allmählich auch als Adjektiv empfunden und nun als solches losgetrennt wurde; dazu kam wohl noch der Einfluß primärer nomina agentis wie sceapa, lida (Kluge a. a. O. § 13), die freilich nicht mehr produktiv waren; hoga wäre demnach 'der Denker' (vgl. betro hogo prudentiores Lind. Lk. 16,8 und oferhoga unten). Die ursprüngliche Bildung ist jedenfalls das Abstraktum hoga 'Sorgfalt'; nomina agentis werden ja nur von primären Verben aus gebildet, vgl. Kluge Stammbild. §§ 106, 15. —

Mit hoya prudens zu vergleichen ist oferhoga 'superbus', belegt Vesp.-Ps. 118,22, 122,4, 139,6 (dafür Spelm. Royal ofermod, -ig, Cant. und Par.-Ps. oferhydig), doch auch Wulfst. 92,16, 164,12, 177,11 (se bid Godes oferhoga, be Godes bodan oferhogad = L. a. Inst. S. 424). Nach dem

¹ dēadiya mori Lind. R₂ Rit. (ws. Ev. sweltan) begegnet auch ws., doch mehr in der Bedtg. 'hinsterben, absterben': Aelfc. Hom I. 168,32 forweornaß and adeadaß, 160,15 gode adeadod 'dead to good'.

letzten Beispiel ist oferhoga sehr wahrscheinlich sekundär nach Muster der nomina agentis zu oferhogian gebildet.

drysniga, ? drysna.

- 1. Lind. R. Lk. 24,31 ge-, gidrysnade evanuit.
- 2. Lind. R: Rit. ā-, gedrysna extinguere, compescere: Lind. 2. sg. prs. drysnes 1, praet. -drysnede 1, pp. -drysned 5; Rit. inf. drysne 1, imp. -drysne 2, pp. drysned 1, drysnad 1; doch R: pp. -drysnad 2, drysned 1.

(R1 hat für extinguere ādwāscan, ebenso Beda 118,14, 128,31, 286,13, ws. Ev. acwencan, ādwāscan.)

- 1. Das swv. II drysnia(n) evanescere entspricht as. drusnon, *drusinon 'abfallen' (Hel. C. 154, Gallée as. Gramm. § 306), es ist eine Inchoativbildung zu got. driusan, as. driosan, ae. drēosan 'fallen'. Beachtenswert ist der durch die Mittelsilbe verursachte Umlaut, der sonst in ähnlichen Fällen nicht nachzuweisen ist, vgl. Beispiele bei Sievers Gramm. § 411 Anm. 4.1 Vielleicht gab es neben drysnian < *drusin- auch *drosnian < *drusan-. Daß im gramm. Wechsel drysnian vom pp. droren abweicht, spricht nicht gegen Zusammenhang mit drēosan. Vgl. über diese Bildungen Kluge Grdr. I S. 446, Vorgesch. § 193.
- 2. Ein swy. I drysna(n) extinguere scheint hauptsächlich aus Lind. und Rit. hervorzugehen. In R2 überwiegen Formen nach Kl. II (s. die Belege), und Lindelöf Bonner Beitr. X S. 145 möchte für R2 lieber drysniga II ansetzen. Es scheint, daß das ursprüngliche intr. drysnian sekundär auch transitive Bedeutung annahm und bei der be-

¹ In fægenian (neben fagenian) liegt wohl nicht, wie das NED. s. v. fawn mit Berufung auf Sievers anzunehmen scheint, *fagin- vor, sondern *fagan (nach Kluge Grdr. I S. 442 ?fagēn-). Die Umlautsform wäre *fegen. — Vgl lycnian Abschnitt 3?.

ginnenden Zerrüttung der Flexion namentlich im nördlichen Nordh. Formen nach der I. Kl. bildete.; Ein stv. *drusn-jan zu *drosn (*drusna-), welches Sweet Stud. Dict. annimmt, ist mir wenig wahrscheinlich. Ein Stammwort drosn fehlt; ae. drōsna pl., ahd. truosana (freilich auch trusana, trusna, trosena Graff Sprsch. V 546, mhd. drusene, -ine, etwa gekürzt?), mndl. droese, nndl. droesem haben doch wohl ō, vgl. Kluge Et. Wb. s. v. Drusen.

spyrd.

Lind. R₂ Lk. 24,13, Jh. 6,19, 11,18 spyrd stadium. Rit. 5,16 in spyrde iornad in stadio currunt.

In Lind. R₂ ist stadium (Luther 'Feldweg') falsch, in Rit. richtig übersetzt, vgl. got. spaúrds, ahd. spurt f. 'Rennbahn' (wohl zu spurnan). Im Beda 56,30 wird stadium richtig mit furlang wiedergegeben, ebenso in den ws. Ev. und WW. 147,24; vgl. auch WW. 486,12 (Aldh.-Gl.) stadium: octava pars mil., wo doch der Zusammenhang des Glossars auf 'Rennbahn' weist; wir finden also südhumbrisch als Übersetzung von stadium nirgends spyrd. — Wenn Lind. und Rit. unabhängig auf die Übersetzung spyrd gekommen sind (vgl. oben S. 34), so ist es immerhin nicht unwahrscheinlich, daß es ihrem Dialekt eigentümlich war, mithin das alte Wort sich im Norden am längsten erhalten hat.

Dazu das Lehnwort

place platea.

Lind. plæce (5), R₂ plætse (2), plæse (1), Rit. plæce (2). (Die ws. Ev. haben für platea stræt). Die Quelle ist romanisch assibiliertes platsja, vgl. Pogatscher Lehnw. § 357.

Der Lautwert war wohl plætse, nicht plæče, wie Kluge Grdr. I S. 993 annimmt; darauf weist deutlich die Schreibung in R2, vgl. Sievers Gramm. § 205 Anm. 1 und 2. — Kontinentale Entsprechungen fehlen; mhd. platz, mnld. platse sind viel später aus dem Franz. aufgenommen.

Außer den bisher genannten, in Lind. R2 und Rit., also in zwei wahrscheinlich unabhängigen Quellen, belegten Worten dürfen, entgegen unserer allgemeinen Regel, noch die zwei folgenden, nur in Lind. R2 belegten hierher gestellt werden, die hier ziemlich häufig begegnen und als eigentümliche Bildungen neben den gemeinae. Äquivalenten auffallen — mit Sicherheit wohl das erste.

forwost primus.

Lind. forwost princeps, primus, tribunus, primatus¹, 8.² R₂ nur Mk. 6,21 forwestum primis. Lk. 19,2 und Jh. 18,12, wo Lind. aldormonn vel forwost, läßt R₂, wie oft, die zweite Glosse weg.

Rit. hat forma primus, ebenso R₁. — forwost, -est beruht wahrscheinlich auf *fore-wesa, nordh. wosa (Bülbring El. B. §§ 266, 267) 'Vorsteher', — vgl. ae. fore-wesan 'praeesse', an. forvista 'Leitung', deutsch Verweser (Kluge Et. Wb.), — und wurde aus diesem nach Analogie der Superlative auf -ost, -est, namentlich aber des (selbst analogischen) formest, fyrmest (Lind. R₁ fordmest) gebildet. Es handelt sich hier gewiß um eine lokal begrenzte Konta-

¹ Mk. I 4,8 foruost vel aldordom. Es kommt auch sonst vor, daß der Glossator ein Wort falsch und richtig zugleich wiedergibt, vgl. Mk. 5,5 concidens falletande vel dærscende, 4,9 cadens fallas vel slæhtas.

² Zahlen hinter den Belegen bezeichnen die Häufigkeit des Vorkommens.

minationsbildung. — Vgl. fordmest Lind. R1. færdmest R2. Sievers Gramm. § 328.

ēar-lipric(e) auricula, Ohrläppchen.

Lind. (đio) earlip(p)rice f., 8.

Re ear-lip(p)rica n. (doch 1 acc. done zarliprica), 5.

(R1 fast auricula als ēarc, ebenso die ws. Ev.)

Dagegen ws. ēar-læppa WW. 157,11,12 = me. ere-lappe (belegt Reliquiae antiquae I 54 in einer in nörd-lichem Dialekt geschriebenen Rezeptsammlung des 14 Jh.; ēar-læppa wird also wohl schon ae. auch im Mittelland gegolten haben); ne. ear-lap. —

Dem Sinne nach möchte man lipric zunächst zu læppa 'Lappen' stellen, so setzt Kluge Stammbild. § 68 b -læprec an. Allein der Form wegen liegen wohl näher as. lepor, ahd. leffur 'Lippe' (s. Kluge Et. Wb. s. v. Lippe und Lefze), aus denen sich das r erklärt; es sind s-Stämme, vgl. Kluge Stammbild. § 84. Zu as. lepor scheint auch das einfache p in der Hälfte der Belege von lipric zu passen; die im Spätnordh. häufige Doppelschreibung dürfte das Sekundäre sein. Das übrig bleibende Suffix- ika- wird sich wohl als Deminutiv erklären.

Wir kommen zum spezifisch Mercischen.

Hier hat sich noch weniger ermitteln lassen. Doch sind einige häufige Partikeln zu nennen.

Sicher mercisch ist

schæe, sihæe ecce.

Vgl. Miller I Einl. S. XXXII, Wildhagen Der Psalter des Eadwine v. Cant. S. 186, 204. Es ist im Vesp.-Ps. die ständige Übersetzung von ecce und begegnet auch in R1 (10 ×) neben häufigerem henu. — Zu den übrigen Psalterglossen ist ff. zu bemerken (vgl. Einl. S. 7, 10).

Der Jun.-Ps. behält sehde bei. Eadwines Cant.-Ps. hat aus mercischer Vorlage einige (on) (ge)sihde, vgl. Wildhagen a. a. O., meist aber eællengæ (eallunga). Royal hat ebenfalls einige on (in) gesihde, z. B. 7,15, 32,18 u. ö., die entschieden auf mercische Vorlage deuten (vgl. Einl. S. 10), daneben efne (nu). Spelman-Ps. hat efne, die gebräuchlichste Demonstrativpartikel im Ws. — Entsprechungen in allen Psalterglossen für Ps. 7,15, 51,9 s. bei Lindelöf Bonner Beitr. XIII S. 20, 63. — Der Par.-Ps. I läßt ecce meist unübersetzt; Par.-Ps. II hat meist efne. — Lind. Ra heonu.

Mercisch ist auch ono (Beda TO ono, Mart. 34,23 hona = Cockayne Shrine 60,14, Bl. Hom. 165,24, 241,3 an(n)a) gegen gemeinanglisch, doch vorwiegend nordh. heonu, vgl. Miller I Einl.

Über nemne (gegen nympe), semninga s. im nächsten Abschnitt. —

S. XXIX ff. —

Erwähnenswert ist vielleicht noch aus Vesp.-Ps. die Interjektion georstu (aus geherst-pu) für lat. o 114,4, 115,16, 117,25, für die Junius ēala einsetzt, ebenso Royal und Spelm., Cant. ēowlæ. —

Die auf S. 29 ff. besprochenen Worte aus Beda, die in der ws. Version vermieden werden, für spezifisch mercisch zu erklären, liegt kein Anlaß vor.

b. In Prosa und Poesie belegte Worte.

Hierher gehören die wichtigsten anglischen Charakteristika. Ich ordne die Worte in Gruppen nach Maßgabe der Prosatexte, in denen sie belegt sind: zunächst einiges allen oder mehreren Texten Gemeinsame, dann Worte, die außer der Poesie nur in je einem (unabhängigen) Text begegnen (Beda, Lind. R2, R1, Dial.). Die allermeisten der

hier zu behandelnden Worte sind gemeinanglisch; weniges spezifisch Mercische stelle ich gegen Schluß S. 61.

Zunächst einige Bemerkungen zu den Präpositionen in und on.

Vgl. Napier Angl. X 139, Miller I Einl. S. XXXIII ff., Belden, The prepositions in, on, to, for, fore and æt in ags. prose, Diss. Balt. 1897, Krohmer W., Altengl. in und on, Diss. Berlin 1904.

Die zuletzt genannte Spezialuntersuchung gibt eine beschreibende Syntax sämtlicher Verwendungen von in und on hauptsächlich auf Grund der poetischen Texte; von der Prosa sind nur aus Aelfc. Hom. Belege gegeben. Bei dieser ungenügenden Verwertung des Prosamaterials sind die Aufstellungen über die einzelnen dialektisch verschiedenen Verwendungen mit Vorsicht aufzunehmen.

I. Im Ws. ist bekanntlich in (Begriff der Umschließung) durch on verdrängt worden, das ursprünglich wohl ein allgemeines und unbestimmtes Raumverhältnis, etwa wie ne. at, on bezeichnete, vgl. Krohmer S. 5 ff. Aelfred hat noch vereinzelte in, diese sind wohl schwerlich, wie Krohmer meint, aus dem Einfluß des Anglischen als der einst führenden Literatursprache zu erklären, vielmehr als schwache Reste des natürlich einst auch im Ws. vorhandenen in. Als Adverb 'hinein' und in der Verbindung into ist es ja im Ws. bewahrt geblieben. — Daß, von solchen Resten abgesehen, angl. in durchaus ws. on entspricht, sei noch durch folgende Beispiele bestätigt:

1. In den Dial. Greg. ersetzt die ws. Umarbeitung H die in CO häufigen in stets durch on. Die dem Original nahestehenden Hss. CO haben, entsprechend unserem 'in', weitaus vorwiegend in; on meist da, wo auch ein unbestimmteres räumliches oder zeitliches Verhältnis gedacht

werden kann, so auf S. 15-35 6 on tid(e) = 'zu der Zeit', 3 in tid = 'in der Zeit', 2 on ceastre = 'at a town'.

- 2. Der Junius-Psalter behält nur im Anfang, etwa bis Ps. 17, i. a. die in seiner Vorlage, des Vesp.-Ps., bei, von da an setzt er stets on. Vgl. Lindelöf Mém. de la soc. néo-philologique à Helsingfors III 64. Zu den übrigen Psalterglossen vgl. Lindelöfs Auszüge. Par.-Ps. I hat stets on.
- 3. Das Laece-Bōc (Neuausgabe von Leonhardi) hat im Anfang einige aus anglischer Vorlage stammende in: I 14 S. 8 in pa nosu, I 2,1 S. 9 in pa eagan, 2,21 S. 12 in cyperen fæt oð de on æren, von da an setzt der ws. Schreiber stets on. Zu den Lacnunga, wo häufige in, vgl. jetzt Leonh. S. 159.
- 4. In der Hom. XL in Napiers Wulfstan fallen häufige in auf. In dem Passus S. 187,15 ff., der sich poetischer Form nähert, häufen sich Paare wie in mordre and on mane, in susle and on sare, in wean and on wyrmslitum u. s. w., in denen on vom ws. Schreiber herrühren muß. Hs. C. aber hat für in stets on, N schreibt on über in! Man ist versucht, eine poetisch-anglische Vorlage anzunehmen, wenn auch die Allitteration an sich dazu nicht nötigt. Anglische Züge im Wortschatz der Homilie sind södfæst 'gerecht' 184,3,5¹, gewinn 'Pein'² 186,2, nicht strengws. ist mordor, poetisch-anglisch hleodrian³. Über in und on in der Poesie s. S. 64.

¹ Vgl. Helen Bartlett S. 16. — Interessant ist, daß sich dies auch in Aelfc. HL. 2,148, 3,304, 546, 29,306, 31,294 findet; in der halbmetrischen Sprache bedient sich also der Westsachse eines anglischen Ausdrucks. — Ws. sößfæst i. a. nur 'wahr, wahrhaft, aufrichtig'.

² Vgl. Wildhagen S. 184; ws. gewinn = 'Kampf'.

³ Vgl. Klaeber Angl. 25, 302. Auch die meisten Prosabelege sind anglisch.

II. Ist sould on im We die gewöhnliche Bezeichnung für im. so darf man erwarten, daß das We, wenn es deutlich unterscheblen will, für auf, an einen anderen Ausdruck gebraucht nach Krohmer uppen, ofer, zet, während das Anglische, das im nach wie vor mit in bezeichnet, für auf, an on verwendet. So hat denn auch Krohmer S. 19 bei Aelfric für auf, an mehrere uppen, ofer belegt und, wie er S. 8 versichen, in Aelfric on fast nur gleich in gefunden. Aber wie schon dies fast andeutet, findet sich im We, neben on = im auch noch on = ian, auf — eben vermöge der ursprünglichen unbestimmten Bedeutung, die sich neben der speziellen erhält. Beispiele dafür lassen sich bei Aelfred und auch noch bei Aelfric zur Genüge nachweisen.

Alle on = 'auf, an' im Ws.. wie Kr. will, aus anglischem Einfluß zu erklären. wäre unmöglich, und on = 'auf, an' ist an sich nicht notwendig ein anglisches Charakteristikum. — Weiter kann ich auf die Frage in diesem Zusammenhang nicht eingehen.

legran

'gehen', meist übertragen (euphemistisch), 'verscheiden, sterben', ist als das wichtigste Merkmal des anglischen Wörtschatzes schon lange bekannt. Vollständige Zusammenstellung der Belege dürfte nicht ohne Interesse sein.

Lind. R₂ geliora praeterire, transire, obire, defungi. geliornise Galilea², recessus, transmigratio etc. Rit. R₁ ofer geliora transire.

¹ Z. B. Pant. 22,17 on laddre, 18 on solore, Oros. 8.27 on pam sæ an, Aelfe. Hom. I 38, III. 12,24 on cordan. III. 13,9 on munte, Hom. I 53,82, III. 14,42, on henegene 'an'.

S. BT. — Wie mir Herr Lic. Wielandt freundlich mitteilt, kommt Galilea – transmigratio daher, weil hebr. Galil eigentlich

Vesp.-Ps. leoran transire, emigrare etc. 29 × ohne Hymn. Jun.-Ps. behält leoran i. a. bei, nur gegen Ende ändert er 4 ×, Cant. bewahrt lioran bezw. -nis 3 ×: 100,3, 118,119, 148,6. Royal hat leoran 56,2, 148,6, Spelm. 118, 119, sonst nur faran, fēran etc. Vollständige Parallelangaben zu Ps. 51,7, 89,4,6, s. bei Lindelöf Bonner Beitr. XIII S. 62, 70, 71.

Beda s. Miller I Einl. S. XLIX. In 31 von mir beobachteten Fällen behält B leoran nur 16 × bei.

Mart. leoran, geleornes häufig in B, von C meist vermieden. — Ferner begegnet leoran:

Bl. Hom. 149,11,14; Lacnunga 19 S. 129 (Cockayne Lchd. III S. 20); Dial. Greg. 138,29 CO -leoriad, H farad, an anderen Stellen fehlt H, vgl. 161,27, 328,4, part. praes. CO 175,8, 191,18, 291,22, 299,15, 300,11, 325,27, 301,14, geleornes u. ä. 192,8, 282,11, 291,14 (C hat vorwiegend leorian, O leoran); Urkunde aus Worc. ao 873, GB. No. 579; Ep. Al. S. 166, Z. 742 oferhleohdred? —

Poetische Belege s. S. 62,63.

Dem Ws. ist lēoran freind, es gebraucht dafür (ford) gewitan, (ford) faran, fēran u. ä. Doch fehlt es nicht ganz an ws. Belegen (vgl. Einl. S. 8): Par.-Ps. I 9,6 geleorode = defecerunt, Aelfc. HL. XXIII B 752, 761, 804 [h] leoran (vgl. Klaeber Angl. 25,260 Fn.; bei genauerem Zusehen freilich zeigt sich, daß die Hom. nicht von Aelfric ist);

^{&#}x27;drehbar' bedeutet und das zugrunde liegende Verb 'sich drehen, kreisen'. Zum Namen Galilea ist es geworden durch den später weggelassenen Genitiv τῶν ἐθνῶν 'Kreis, Landstrich der Heiden' im Stamm Naphthali.

¹ Der Text ist nach H. Bartlett ws.; es fallen vereinzelt auf bebycgan u. sceppan; der Vers 9,6 hat rēdels.

² Vgl. Skeats Anm. S. 446. Sie ist identisch mit dem Bruchstück der Legend of St. Maria Egyptiaca ed. Earle 1861, = Glouc.

geleorednes in ws. Evang. Mt. 1,11,12,17 (transmigratio), Aelfc. HL. XXXIII 285. Sein Vorkommen in den kentisch gefärbten Digby-Glossen Nap. OEG. 1,405, 2278, 3405 (Brüsseler Hs. ZfdA. 9 liorod-) beweist wohl nicht, daß leoran auch kentisch war. —

Etymologisch ist leoran m. W. noch nicht gedeutet. Sievers Gramm. § 384 Anm. 4 sieht darin wohl mit Recht ein ursprüngl. stv. im Hinblick auf das part. gel[e]orene Ruine 7.

Zu erwägen wäre Verwandtschaft (mit Ablaut) mit schwed. dial. lara, lora 'langsam gehen, saumselig sein, langsamer werden, nachlassen', wovon abgeleitet schwed. dial. lurka 'etwas langsam tun', norw. dial. lurka 'sich wegschleichen, etwas langsam tun, — auch lauern', ostfries. lurken 'schleppend, langsam gehen', wohl auch nndl. lurken (s. Franck Et. Wb.), hess. lurchen 'schlurfen'. Schwed., norw. dial. lurka wird von Skeat Conc. Et. Dict. s. v. lurk, Falk-Torp s. v. lure zu lauern gestellt (spätmhd., mnd., me. luren, ne. lower, mndl. loeren, dän. lure, schwed. lura 'betrügen, lauern', dazu k-Ableitung me. ne. lurk(en), braunschw. belurken 'lauern'), und im norw. dial. lurka berühren sich beide Bedeutungen. Als gemeinsame Grundlage aller dieser Verba ist vielleicht eine Wz. lur langsam gehen, schleichen anzunehmen. Nach D. Wb. in Falk-Torp bezeichnet freilich lauern ursprünglich eine Augentätigkeit und wäre demnach von Wz. lur 'langsam gehen' zu trennen.

nemne, nympe gegen baton.

Vgl. Mather MLN. 1894,152 ff., H. Bartlett S. 18, Deutschbein S. 172.

Fragm. BT. (hier leorde S. 110,30). Die Sprache scheint nicht ganz rein ws., es fallen gegenüber Aelfric auf tīd und Pron. auf -hwega (s. Kap. II.).

I. Anglisch. Lind. nisi = nymđe 6, buta 67 (nymđe nur im Mt. und Anfang Mk.; später gibt der Glossator das Wort auf).

R2 nymáe 2, sonst buta.

 R_1 nisi = nymde 20, butan 0 (butan nur = extra, exceptus).

Vesp	oPs. Jui	nius Ca	nt. F	loyal S	pelm.
7,13 ner	mne n er	nne bu	te ny	j m đe b	uton
93,17 ne	mne nei	mne	n	ymđe b	uton

126,1 ne	mđe ny	mđe	ทุ	ymđe <u>b</u>	niton

V. Hy. 7,60 nemđe, 7,53 nybđe.

Beda. nemne ca. 27 × in Millers Text. T hat stets nemne (1 næmne), ebenso O (nur 208,27 dafür buton). In Ca wird nemne und nympe oft durch butan glossiert. B hat 2 nemne, 1 næmne, 1 næmne (!), 5 nympe, 14 butan. 'C scheint nemne nicht zu kennen'. Vgl. Deutschbein a. a. O.

Chad Angl. X nympđe 2.

Bl. Hom. 19,22 nemne buton, 161,11 nempe.

Laeceboc II 7 S. 56 nympe, II 20 S. 61 (drincan hie) nemne (wæter).

Dial. Greg. 54,8 C nemne, O nimde, H buton. 177,24, 221,9, 297,24 CO nympe, 203,24 C nymde, O nemde, 336,2 C nymde.

Urkunden: GB. No. 171 (mercisch a^o 743) nymđe. 318 = OET. No. 34 (Kent. a^o 805) nymne¹. 510² (a^o 864) 3 nymđe. 906 (? Abingdon, a^o 955) nymđe.

¹ Kemble und Earle nimne.

² Privileges granted by King Aethelbreht to the church of Sherborne, Dorset; aber nicht rein ws., vgl. deg, liof-, gære, in.

WW. 249,9 nisi: nimpe. 454,23, 525,3 ni forsan: nimđe wen wære.

II. Das Ws. braucht statt nemne, nympe būton. Nur būton haben, was ich selbst bestätigen kann, Aelfred, Aelfric, ws. Evang., die Wulfstan-Hom., Chronik, Gesetze, Ben.-Regeln.; vgl. Mather a. a. O.

Poetische Belege s. S. 62,63.

Was die Etymologie betrifft, so sind die Ausführungen Hempls MLN. 1894,313 ff. nicht überzeugend. Seine Herleitung aus *ne-grem-pu scheitert schon daran, daß dabei das Anglische — namentlich das Nordhumbrische, wo Einwirkung ws. Schreiber entschieden ausgeschlossen ist — nicht nympe, sondern nur nempe haben dürfte. y in anglisch nympe (ganz selten nimpe mit später Schreibung) kann nur i-Umlaut aus u sein. Der Zusammenhang mit as. neba, nebo, -u, nova (b) 'außer daß' (Kögel GddL. I 568), ahd. nibu, nuba, noba, got. nibai 'wenn nicht, außer daß' ist doch wohl offenbar, wenn auch im einzelnen nicht alles klar ist. y in nympe darf man wohl zu dem u in ahd. nuba, noba, as. noba in Beziehung setzen.

Ob etwa das cymrische namyn², gespr. namin, auf das mercische nemne eingewirkt haben könnte, ist unsicher.

gēn, ge(o)na gegen gīet(a).

I. Anglisch. Lind. adhuc bezw. nondum = (đa) geona, -e bezw. ne da geona, -e 18, dazu geana nu modo 1

¹ As. nevan, novan kann nicht, wie Leitzmann PBB. 26,254 will, direkt mit angl. nemne identifiziert werden, sondern wird wohl mit Recht von Kögel a. a. O. als mit neunan (ahd. mhd. niwan) kontaminiert betrachtet.

² Z. B. namyn 'except, but' Peredur ed. K. Meyer Glossar S. 72. Vgl. air. nammá 'tantum, solum', arem. nemet Zeuß Gr. Celt. 620, 728.

(Mt. 24,21). adhuc, nondum, necdum = (da) get, ne (da) get 44.

 R_2 (đa) geona 11, (đa) get 27.

Rit. dageane 1, daget 2, gett 1.

 R_1 nu gen 1, (nu) get(a) 4.

Vesp.-Ps. hat nur nu get = adhuc (6), aber Cant.-Ps. aus merc. Original gen 82,5, nugin 77,30, nugean Hy. 4,18, s. Wildhagen S. 182.

Beda. S. Deutschbein PBB. 26,173. «TOC haben zahlreiche gen(a), CaB fast nur gyta,» und zwar hat B etwa gleichmäßig gyta, gyt, selten git(a), kein gen(a)!

Nur get, i, y haben Bl. Hom. (25), Mart. (6) und Dial. Greg.

II. Das Ws. hat von Anfang an nur die t-Form giet(a), gyta. Auffällig ist genu 'furthermore, still' in den Soliloquien ed. Hargrove (Yale Studies XIII) 62,31; es stimmt schlecht zu Aelfred als Übersetzer, namentlich im Verein mit frāsian (s. frignan Kap. II) und instæpe. 'The dialect is late ws., impure in many respects'.

gēn, ge(o)na ist rein anglisch, und zwar scheint es auch dem südlicheren Mercisch zu fehlen. Poetische Belege, worunter gien(a) s. S. 62. —

Etymologisch sind gen(a), giet(a) unklar. Hempls Erklärung Acad. no. 1024 (1892) S. 564 ist nicht befriedigend. giet(a) entspricht afries. ietta, iette, yetta adhuc. Mit deutsch jetzt, das Skeat Conc. Et. Dict. hierherstellt, hat es nichts zu tun, vgl. Kluge Et. Wb. s. v. jetzt. — Gewöhnlich werden beide Formen mit Länge angesetzt. Für langes gen spricht ja die metrische Verwendung, z. B. Beow. 2070, aber nordh. geona mit u-Umlaut muß kurz

¹ Unsicher Bl. Hom. 167,6 pagen, wohl für pagegn.

sein, und Kürze scheint auch in gieta mit der friesischen Entsprechung vorzuliegen. Welche Quantität die ursprüngliche ist, läßt sich nicht entscheiden.

bebycgan gegen sellan.

I. Anglisch. Lind. vendere, venumdare = bebycga 22 (ccapiga 1, Jh. S. I 3,12). R₂ bibycga 9 (sellan in Lind. R₂ = dare, tradere etc).

R₁ bebycgan 5, sellan 5 (13,44 bebygið vel sellað, 19,21 sylle vel bebycge¹).

Vesp.-Ps. 43,14, 104,17 bebycgan, ebenso Jun. und Cambr., aber Royal, Spelm. becypan, Cant. sellan.

Beda 130,33 TOCa. bebycgan, B gesyllan. 162,18 TOCa bebohte venditi, B gebohte (!). 328,28 TO bebohte, CaB (ge-) sealde.

Ferner bebycgan Mart. 94,16, 100,15 B (C sellan), Bl. Hom. 63,7 (aber 69,8,13, 75,22 sellan), Lacnunga 103, 3× (Cockayne S. 68, Bibl. Poes. I 327), Dial. Greg. 63,25, 64,7 CO (H sellan!), Hom. Assm. XVIII 187, 4152, WW. 200,29, 483,5.

II. Wests. Aelfred Past. 449,14,15, Oros. 34,3, 124,6, 126,16, 154,9, 189,16 (ge)sellan (wid feo).³

Aelfc. Hom. II 356,6, Gen. 37,27, 45,5, Exod. 21,16,35, Gramm. 28,8 u. s. w. syllan, z. T. mit to ceape, wid feo. — Evang. vendere = (ge)syllan, e 11, (cypan 4, becypan 1). Ben. R. Logeman 95,1 sillan.

Ges. Aelfred Einl. 15, 23, 24 S. 30, 34, Ine4 11 S. 94

¹ Vgl. S. 15 Fn. 2.

² Dies stimmt gut zu Klaebers Beobachtung Angl. 27,251 Fn. 3.

^{*} unbehohtra deora Oros. 18,10 bezeichnet im Gegensatz zum Angl. 'ungekauft, d. h. eigener Zucht', vgl. Zupitza-Schipper Lesebuch. Vielleicht jedoch nur Schreibfehler.

⁴ Beide sind ws. nach Priese Diss.

bebycgan (im ff. und in späteren Ges. stets syllan) ist wohl kaum ein Rest alten gemeinae. Gebrauchs, eher könnte die Sprache älterer außerws. Rechtsquellen eingewirkt haben, vgl. sceppan¹ in Gesetzen. Zu bebycgan Par.-Ps. I 43,14 s. Fn. 1 zu leoran S. 45. —

Poetische Belege s. S. 62.

Anmerkung. Die Bezeichnungen für den Allgemeinbegriff 'Tauschhandel treiben', bugjan, kaupon, ergeben ohne weiteres auch den Ausdruck für den Spezialbegriff 'kaufen' (got. bugjan, as. buggjan, ae. bycgan, an. byggja), während für 'verkaufen' besondere Bezeichnung nötig wird (be-bycgan, verkaufen²). Dies hängt wohl damit zusammen, daß beim Tauschhandel das Hauptinteresse auf den Gegenstand fällt, den man eintauscht, d. h. kauft; erst bei ausgebildetem Geldhandel gewinnt der Begriff 'verkaufen, d. h. veräußern, zu Geld machen'. größere Bedeutung. — sellan heißt eigentlich 'übergeben', sc. wid feo, vgl. got. saljan 'als Opfer darbringen', mhd. sellen 'übergeben, überliefern, (verkaufen)', an. selja 'übergeben, verkaufen', dän. sælge, schwed. sälja 'verkaufen'.

wærc Schmerz.

Lind. wærc. R2 werc-sar dolor.

Beda. 322,24 TOCa pæs swiles and wærces, B weorces.

Laeceboc häufig wærc, meist in Kompositis wie heafodwærc I 1,4 S. 7. Dazu wærcan schmerzen: II 52,3 S. 82,4 gif hine wærce.

Lacnunga. 10 were, 3 were, 5 wyre, 3 wræe s. Leonh. S. 170.

Dial. Greg. 182,18, 297,8 mid (on) sidwærce, O-wræce. WW. 200,12 banwærc, 204,9 heafod-wærc, mit erklärendem Zusatz vel ece!

Poet. Beleg. Guthl. 1001 me sar gehran, wære inge-

Bülbring Angl. Beibl. 9,98, Deutschbein S. 171, Wild9.

ad. as.; im Mhd. nur selten für 'verkaufen' koufen.

Klaeber Angl. 27,418 scheint wære dolor mit weere opus zu identifizieren, ebenso Deutschbein S. 283 Anm. 3. Allein angl. wærc, werc dolor (masc., vgl. se sidwærc Lcb. II 46 S. 78,12 und die Beda-Stelle) hat mit we(o)rc opus nichts zu tun, obwohl letzteres spontan ebenfalls die Bedeutung 'Kummer, Schmerz' annimmt, und zwar vorwiegend in der Dichtung und anglisch gefärbten Texten, (doch auch in as. verk 'Werk, Mühsal', vgl. lat. labor). weorc 'opus' lautet im Nordh. woerc, davon ist wærc 'dolor' deutlich getrennt. weorc entspricht ne. work, wærc dagegen in nördlichen Dial. (bis Shropsh., Ost Angl. südwärts) wark bezw. warch werch; hier zeigt sich auch die verschiedene Qualität des c. Wenn im Beda der Schreiber B weorces für wærces einsetzt, (vgl. Klaeber a. a. O.), so substituiert er damit, wenn auch wohl ohne es zu wissen, ein anderes Wort. — wærc ist, wie Füchsel S. 25 richtig erkannt hat, dem an. i-Stamm (nicht ja-Stamm) verkr, dän. værk2, schwed. värk 'Schmerz' gleichzusetzen, hat also Umlauts-æ nach w; ebenso urteilt Leonhardi a. a. O. Die entsprechende ws. Form wäre *wiere, wyre, diese bildet fünfmal richtig der ws. Schreiber der Lacnunga (s. o.), woraus aber noch nicht folgt, daß wyrc ws. gebräuchlich war (gemae. sār, ecc). wræc statt wærc (dreimal in Lacn. und in Dial. O), nach Leonhardi mit 'Metathese', ist wohl eher der neutrale a-Stamm wræc, ne. wrack, den der südliche Schreiber für das ihm ungewöhnliche Dialektwort einsetzte. wærc = *warki- stellt Schade Wb. 1099 zu wrecan; dann

¹ Abgesehen von der geringen Wahrscheinlichkeit etymologischer Verwandtschaft.

² Aus dem Dän. stammt vielleicht nordfries. wark Outzen, Siebs Sylter Spr. — Ahd. warah, mhd. warch, warc(g) hat germ. h, vgl. schwed. var 'Eiter', Schmeller Bayr. Wb. II 999.

müßte es mit sehr früher Metathese aus *wraki- entstanden sein und wäre mit dem eben genannten wræc verwandt. Dies ist mir weniger unwahrscheinlich, als daß es im Ablautsverhältnis zu dem alten a-Stamm Werk stehen sollte; die erwähnte Bedeutungsentwicklung von weorc, die zur Berührung mit wærc führt, beweist natürlich nichts für etymologischen Zusammenhang. — Mittelengl., sämtlich anglische Belege s. bei Stratman s. v. werk, -in. In der Ancren Riule ed. Morton 326,19, 360,29, 368,26 hat die nördliche Hs. warch(en), die südliche eke(n), eche(n)!

wiperbreca gegen -saca, -winna.

I. Anglisch. Lind. Mt. 5,25, 12,26 widerbraca adversarius (R1 widerweard), vgl. Bülbring El. B. § 422.

Vesp.-Ps. 3,8 widerbrocan adversantes, 34,19 widerbrociad adversantur, 73,10 widerbrocad adversarius (sic); Jun., Cambr. wie Vesp.; Royal wipergende, -weardiad, -wengel², Spelm., Cant. widriende, -weardiad, -wearda. Ferner wiperbreca Bl. Hom. 175,8, Dial. Greg. 36,6 (freilich auch in H), WW. 463,12.

Poet. Belege s. S. 62.

II. Das Ws. braucht wiferwinna (Past. Aelfc. Hom., H. L., Evang.), wifersaca (Aelfc. Hom., Ben. R. Schr., Wulfst.). — Gemeinae., doch spätws. seltener ist widerweard. —

Vgl. ahd. widarbrechan repugnare, winno, -sacho, -wart; as. widarsako, -ward.

grorn-ian gegen gnorn-ian.

I. Anglisch. a. Prosa.

Lind. R2 Lk. 1,6 grornung querela.

¹ U. a. Destr. of Troye (EETS. 39,56); westmittelld.) doch nordh. Ursprungs, vgl. Pref. LXI. Rel. Ant. I 51: Medical receipts, in rather a Northern dialect.

² S. Roeder Ausg. S. 136.

R₁ 20,11 grornadun murmurabant.

Beda 426,33 T grornende maerentes, OCaB gnornigende. (128,24 TBCa gnornast, O gnornast).

Chad Angl. 10 S. 147 Z. 256 grorniende.

Doch Mart. 36,23 gnorniendum, Dial. Greg. gnornian.

b. Poesie. grorn- haben Reimlied (? 66, 49), Crist 971, 1205, Jul. 324 (grorn-hof), auch die Inschrift auf dem Casket OET. S. 127, gnorn- alle übrigen Dichtungen.

II. Das Ws. hat nur gnorn-, z. B. Past. 225,10, Oros. 76,23, Boet., Aelfc. Hom. II 80,13, 350,28 u. s. w. Eine Ausnahme ist vielleicht gro(r?)nung maeror Scint. 20,1. — Beachte grnorniendum Kent. Gl. WW. 86,15. Neben grornund gnorn- steht auch noch poet. gyrn 'Kummer, Leid' und parallel as. grornön, gnornön, gorn-word. Uhlenbeck PBB. 30,282 stellt sie zu gryre, as. gruri 'Schreck', wonach r-r das Ursprüngliche wäre.

ēpian gegen orpian.

I. Anglisch. a. Prosa. Lind. R₂ Jh. 3,8 oeđiga spirare.

Vesp.-Ps. 17,16 onoedunge inspiratione, Jun. onepunge, Cambr. epunge, Royal onepgunge, Cant. epgunge, aber Spelm. ordunge.

Mart. 66,22 B edode, freilich auch in C.

Dial. Greg. 146,12 CO epad, H orđad.

Ep. Al. S. 151, Z. 324 ededon.

WW. 240,1 flatus . . . orop vel epung. ib. 338,1 anhelantium: epgiendra.

b. Poesie. edigan Elene 1107, Par.-Ps. 113,14.

II. Ws. orpian, z. B. Jh. 3,8, Jos. 10,40, Aelfc. Gr. 14,5,8, 121,6, 276,7, 248,12, Aelfc. Hom. I 86,8, 534,11, 456,10 u. s. w. —

Angl. ēpian setzt *ēp < *anpi- voraus (vgl. anda, got. us-anan, lat. animus u. s. w.); ws. orpian gehört zu orop = *us-anp- Sievers Gramm. § 43 Anm. 4, 186 Anm. 3. Das Angl. hat also die Ableitung zum Simplex, das Ws. die Ableitung zum Kompositum.

gnēap, gnēpe, d karg, scanty.

a. Prosa. Beda 452,6 O gnedra mediocriter insignitus, B gnedra, fehlt in Ca.

Mart. 68,9 B gneadnes, C genednys (mißverstanden, oder alte Form mit erhaltenem ge s. die Etym.?), 130,26 beide gneadum.

Dial. 43,26 CO ungnepelice non mediocriter, H unheanlic. 51,13 alle gnedelice parum.

Gll.: WW. 441,30 mediocri: gnepre, 464,25 parsimonia: gnepnes. 244,6 frugalitas: spærnes, gnepelienes. Nap. OEG. 1,2437 id.: gneapnysse gen., gneadlicnys. Prud. Gl. (s. BT.) gnedum parcis. — Zu den Gll. bei WW. vgl. Einl. S. 12. Das Glossar Nap. OEG. 1, das kentisch gefärbt ist, enthält allerdings — mit Ausnahme von leoran (s. o.) — keine anglischen Worte.

b. Poesie. Beow. 1930 gnead gifa. Panther 71 ungnyde.

Der Schwerpunkt der ae. Verbreitung des Wortes lag jedenfalls im Anglischen, wenn es auch in ws. Umschriften nicht immer vermieden wird. Gemeinae. würde etwa spær, spærlic entsprechen, s. BT.

Die me. Belege (Stratm. S. 300) sind größtenteils sicher anglisch: *gnēde* Tristan 2838, All. Poems II 146, 154, Havelock 97, Misc. 92,48 (mittelld., vgl. Brandl Grdr. II 623), freilich auch Ancr. Riule M 202,28, 350,2, 414,24 *gnedeliche* (Hs.

¹ Zur ws. Form vgl. das unter wærc S. 52 Bemerkte.

C medfulliche), vgl. Einl. S. 9 Fn. 2. Im Cursor Mundi wird gnede in den mittelländischen Hss. T und G¹ vermieden, s. Barth Wortschatz des Cursor Mundi, Diss. Königsberg 1903, S. 34, das Wort beschränkt sich also immer mehr auf den Norden.

gnēap mit der ja-Ableitung gnēpe, de 'karg' stellt sich zu ahd. ginōti, gnōte, mhd. genæte, sup. gnōtest, adv. gnōte 'beengend, beengt, beschränkt', ist also aus *ga-naupa, *-naupja, dja entstanden und zu Not gehörig, womit vielleicht auch genau zusammenhängt.

wēķe mild, lieblich.

a. Rit. 100,7, 105,1 (gi)woednisse lenitas.

Beda 432,19 TO pæs weðan songes, Ca swetan, C weorpan, B pæs sanges, cantilenae dulcis.

b. wepe Crist 916, 1672, wedniss Par.-Ps. 144,7, dazu wēpan: 106,28 brimu wepad fluctus siluerunt?

Vgl. got. wōpeis 'süß, lieblich', as. wōthi 'angenehm', alıd. wuodi? Graff Sprchsch. I 776.

gewesnis.

Beda T 274,5 gewesnisse dissensioni, [O towesnisse, Ca towisnesse, B towesennesse], vgl. Klaeber Angl. 27,406. Dazu ist zu stellen nordh. (ge)-wosa m. conversatio in Rit. (wohl kaum für gewesan inf., wie Sweet Stud. Dict. vermutet), sowie Vb. gewesan, Sal. und Sat. 181 ic flitan gefrægn modgleawe men, gewesan ymbe hyra wisdom. gewesan mit Ableitungen heißt eigentlich: 'zusammensein, sich unterhalten, verhandeln, streiten', vgl. mnd. dat recht, de anspreke unde de gewesede, de unse vader unde wy hadden Schiller-Lübben II 104. — Im südlichen Ae. ist diese prägnante Bedeutung verloren gegangen, zur Wieder-

gabe von dissensio bedarf es hier der erläuternden Partikel to 'auseinander', vgl. Beda OCaB und towesness = rixa, discordia, jurgium in Past.

wloh Zotte, Franse.

a. Ep.-Erf. 1066 villis: uulohum. Corp.-Gl. 2122 uuloum. ib. 2142 villus: u(u)loh.

Lind. wloh fimbria, pl. wloch (neben fas, fæs).

b. Poet. Belege Jul. 590, Andr. 1471, Guthl. 1127 (als Bezeichnung einer geringfügigen Sache ne wloh, vgl. Grein Sprchsch. 730, Dietrich ZfdA. 10,359). an-wloh, ge-wloh 'geschmückt' Dan. 585, Gen. 1789. — Ungefähr synonym sind angl. fæs, ws. fnæd.

Grein stellt wloh mit Recht zu isl. lo 'lanugo, tomentum', daran schließen sich dän. lu, norw. lo 'Wolle am Tuch', schwed. dial. lo 'Flaum, Flaumhaar'. Weitere Beziehungen (aksl. vlakno Faser,? aind. valkas 'Bast') s. bei Falk-Torp s. v. lu, Zupitza Germ. Gutt. S. 143, Uhlenbeck Aind. Et. Wb. s. v. valkas.

wālan vexare.

a. Lind. R2 Mk. 5,18 awæled vexatus.

R₁ 8,6, 9,36, 15,22 ge-wælan vexare, torquere² (ws. Ev. gedreccan, geþrēagan).

b. Andr. 1363, Guthl. 396 witum (be)wælan.

BT. stellt wælan richtig zu an. veill 'schwach, krank, elend' (aus *ve-heill Noreen Grdr. I S. 560), veilendi 'Schwachheit, Krankheit', wozu norw. veil 'löcherig, gesprungen, schwach', wohl auch schwed. dial. velig 'halbverrückt, schwachsinnig'.

¹ lõ ä klædi Vigf., fälschlich zu lõd gestellt.

² to wwlede advolvit 27,60, awalde revolvit 28,2 gehören doch wohl zu waltan 'wälzen', Lind. walta.

bāsni(g)an erwarten.

a. Lind. R2 (ge)basniga expectare.

Rit. (on)basnung expectatio.

b. basnian Andr. 447, 1067, Gen. 2417, unsicher Exod. 470. (Gemeinae. bīdan, an(d)-bīdian.)

bāsnian ist abgeleitet von einem zu bīdan gehörigen Abstraktum *baiāsni- (Kluge Stammbild. § 147 b), vgl. Bright MLN. 3 (1888) S. 73.

alan erzeugen, nähren.

- a. Lind. Lk. 11,44 parent = foedađ vel alađ vel adeauæ d^1 . R₂ foedađ vel aleđ.
 - b. Reimlied 23 swylce eorpe ol.

Vgl. got. alan 'wachsen', an. ala 'zeugen, gebären, nähren', schwed. dial. ala 'gebären, erzeugen, hervorbringen, wachsen'. Im Westgerm. ist außerhalb des Anglischen das part. alt der einzige Rest des alten Wortes (lat. alo, gr. ἄναλτος, air. alim).

æring Morgendämmerung, Tagesanbruch.

a. Lind. R. Mk. 1,35 on aring diluculo.

Lind. Mk. 13,35 on aring mane (Rs on merne).

b. Jul. 160 in æringe.

Vgl. poet. ær-dæg, gemeinae. ær-morgen.

forcuman überkommen, besiegen, vernichten.

- a. Lind. R2 forcuman invadere, exprobrare, consternare, vincere.
- b. Andr. 1327, Crist 561, 151, Sal. und Sat. 176, 206, Par.-Ps. 54,5, 73,14, 93,5 (vexare).

¹ Der Glossator denkt an pariunt. Auch sonst gibt er Worte falsch und richtig zugleich wieder, vgl. S. 39 Fn. 1.

sāda Strick.

- a. Lind. R. Lk. 21,35, Lind. Mt. 27,5 sada laqueus.
- b. Par.-Ps. 123,7 grin bid on sadan grame torænded. 139,5 weal(h)sada laqueus. —

Vgl. ahd. seita, o, seid; Kluge Et. Wb. s. v. Saite. Das gemeinae. Wort ist grin.

arwunga unentgeltlich, ohne Grund.1

- a. R₁ 10,8 arwunga gratis (Lind. unboht, ws. Ev. to gyfe).
- b. Par.-Ps. 68,4, 108,2, 118,161, 119,6 earwunga id. (ohne Grund).

Vgl. got. arwjo unentgeltlich, ahd. arwūn, arowingūn gratis, frustra'. Für 'unentgeltlich' vorwiegend ws. wolll orcēape, -unga.

An speziellen Berührungen der Sprache der Dialoge Gregors mit der poetischen sei hier genannt:

gehlæg Gelächter, Spott.

Dial. 209,21 (H fehlt) und Be domes dæge 15, vgl. an. hløgi 'was Lachen erregt'. — Poetisch, doch nicht bloß anglisch, sind auch hyserine 338,22, wintrum geong 219,3.

Über prāg s. Kap. II.

Von lateinischen Lehnworten gehören in diesen Abschnitt:

pæcele gegen blæse Fackel.

I. Anglisch. Lind. decille, a^2 lucerna (10 \times , daneben lehtfixt), lampas (1), fax (1).

Re dæcela, -ella lucerna.

Rit. dwccelle, -ille lucerna (2), lampas (1).

R₁ decele lampades (1).

¹ Auch das synonyme hölunga scheint, wenigstens vorwiegend, anglisch zu sein, s. BT.

² Cook hätte besser fem. angesetzt.

Beda 476,15 C fyrenpecele facem ignis, Ca decelle, B fyrencylle (!).

Dial. Greg. 117,28 C wæs he . . inæled mid þam þyc-cylum þærc æfæste, O þæcelum, H mid þæs niðcs blæsum (!).

Ep. Al. S. 151, 159 swylce byrnende pecelle.1

WW. 266,38 fax: pæcile, blysige (letzteres wohl ws. Zusatz), 490,31 facula: đecele. Vgl. Einl. S. 12.

Poet. Beleg Sal. und Sat. 418 dryhtnes decelan.

(Auch fæcele scheint ws. nicht gebräuchlich zu sein, belegt Ep.-Gl. 407 fæcilae, WW. 399,35,36 fecele [blysige dahinter wohl ws. Zusatz], WW. 531,8).

II. Das Ws. braucht für 'Fackel' blæse, blisa, blisige; vgl. oben Dial. H, ferner dp. blasum Joh. 18,3, blysa Aelfc. Gr. 68,12 (blisa, blase), 210,9, WW. 126,26, Aelfc. HL. 14,44, 37,159, blysige WW. 266,38 (s.o.), 399,35,36. — Doch fehlt blæse dem Angl. nicht ganz: bælblæse Guthl. 648, -blyse Exod. 401, Dan. 232.

Nach Kluges ansprechender Erklärung Et. Wb. s. v. Fackel beruht pæcele auf fæcele mit Anlehnung an Wz. pak, ahd. dachazzen 'brennen'. Sollte mit letzterer nicht das auffällige poet. peccan zusammenhängen in Beow. 3015 æled peccan, Phön. 216 brond peced, 365 ad peced etc.? Ich bin in dieser Vermutung mit Grein Sprehsch. 577 zusammengetroffen. — blæse, wozu blæsere, blasere 'Brandstifter', ist Erbwort, vgl. mhd. blas 'brennende Kerze, Fackel' und Skeat Conc. Et. Diet. s. v. blaze.

segne

in Lind. (Mt. Einl. S. 19,12, c. 13,47, Jh. 21,6,8,11) = rete, sagina und poet. Exod. 584, vgl. S. 65. R: ersetzt Jh. 21,8 segni seiner Vorlage durch nett; vielleicht war dem-

¹ Das Vorkommen des Wortes stimmt gut zu Klaebers Beobachtung Angl. 27,418, daß die Ep. Al. anglisch gefärbt ist. Vgl. Einl. S. 11.

nach segne im südlichen Nordh. damals schon weniger gebräuchlich. Auch sonst begegnet ae. nur nett, beachte auch die Gl. WW. 336,20 sagene: sænet, wo segne doch nahegelegen hätte, wenn es dem Glossator geläufig gewesen wäre. Vgl. afries. seine, seyne, as. (Hel. 2630) ahd. segina = lat. sagēna 'Schleppnetz', Pogatscher § 205 u. ö., Kluge Grdr. I S. 328. — Die me. Formen (seine, saine) gehen wohl alle auf franz. seine zurück.

Bisher hatten wir in diesem Abschnitt nur mit Gemeinanglischem zu tun, ich schließe nun noch ein wichtiges spezifisch mercisches Wort an, das hier nicht unerwähnt bleiben darf, das Adverb

semninga 'auf einmal', plötzlich,

worüber Deutschbein S. 198, Klaeber Angl. 27,253 zu vgl. ist. Es ist häufig in Beda, Bl. Hom., Dial. Greg. (H færinga) und anglisch gefärbten Texten wie Vita Guthlaci, Ep. Al. Dazu stimmt auch semninga Laeceboc II 60 tit., 39; S. 52, 74. Die Stelle bei Wulfstan S. 262, wo s. Z. 7,11, ist poetisch gefärbt, der Anfang der Homilie liegt in den Bl. Hom. S. 104,1 ff. vor. Das Fehlen von semninga im Nordh. ist wohl nicht bloß zufällig; hier begegnet namentlich recone (statim, confestim) s. Kap. II. Im Ws. kommt s. nur 'ausnahmweise' vor (vgl. Einl. S. 8), so sæmninga

¹ Daß an den beiden andern Stellen, wo Lind. nett vel segne hat, R₂ segne wegläßt, ist nicht auffallend. Auch sonst begnügt sich R₂ oft mit einer Glosse. Man darf daher nicht aus der geringeren Häufigkeit eines Wortes in R₂ auf geringere Gebräuchlichkeit desselben im südl. Nordhumbr. schließen.

² Andere angl. Züge sind 256,8,18 sōpfæst 'gerecht', 253,7 mordor, 265,12 gefēod, 256,4 mishērnes (vgl. Kap. III 1). Erwähnung verdient hier auch frympelīc 'anfänglich' 252,12 = BIH. 107,51, das noch in Rit. 101,20, Beda 10,8, 60,23, 334,11 begegnet.

Aelfc. Hom. II 398,33, 2 samninga in ws. Ev., samnunga ilico Angl. 13,446. Die Endung unga bevorzugt auch Beda B in der Zwitterform sæmnunga.

Als spezifisch mercisch können wohl auch selegescot tabernaculum H. Bartlett S. 21 und instæpe(s) statim, continuo Klaeber Angl. 27,256 bezeichnet werden.

Am Schluß dieses Abschnitts dürfte es sich lohnen, zusammenzustellen, in welcher Weise sich die wichtigeren der behandelten anglischen Worte, welche schon nach dem Zeugnis der Prosa allein als spezifisch anglisch gelten können, auf die einzelnen poetischen Texte verteilen.

In die linke Spalte setze ich die spezifisch angl. Worte, in die rechte die gemeinaltengl. Synonyma, die im Ws. allein gebraucht werden, und alles, was auf den Süden weist.

Bei Feststellung des Verhältnisses von nemne (nympe): baton ist zu beachten, daß beide nur in der Bedeutung 'außer, außer daß' kommensurabel sind, also baton in der Bedeutung 'außerhalb, ohne' nicht mitgerechnet werden darf.

Metra		giet 12, būton 3
Byrhtnob		būton 1
Chronik-		gyt 2, buton 1, wid
Gedichte		fēo sellan 1.

Deutschbein S. 204, 172; Klaeber Angl. 25,292, 315.

Das Ergebnis ist das zu erwartende: In den meisten Dichtungen begegnen anglische Worte, sie fehlen nur in Genesis B, Metra, Byrhtnop und Gedichten der Chronik, die man für wests., jedenfalls südlich hält.¹ (Zum Menol. s. unten.) Diese Scheidung trifft auch zu, wenn man die Belege von sceppan einträgt (vgl. Wildhagen S. 185; derian vorwiegend südlich, $4 \times$ in Metra; doch auch gemeinae.). Metra (Runenlied) und Byrhtnop haben nur on (Grein Sprchsch. 140). In den Chronik-Ged. finde ich in Eadw. 31, sonst on. Freilich hat auch die Genesis nach Grein nur 3 in, die on müssen dem ws. Bearbeiter zufallen. Krohmers Behauptung, Byrhtnop müsse wegen der Verwendung von on = 'an, auf' von einem Angeln geschrieben sein,2 erscheint bei dem Fehlen sonstiger zwingender Beweise sehr gewagt, s. oben S. 44. Wie wir sahen, ist diese Verwendung im Ws. ein Rest älteren Gebrauchs und kann daher in einer Dichtung nicht auffallen.

Im übrigen ist Folgendes zu der obigen Zusammenstellung zu bemerken: Wie gezeigt, begegnet in Prosanemne nur im Mercischen neben nympe, das Nordh. hat nur nympe; auch semninga ist wahrscheinlich spezifisch mercisch. Beide Merkmale finden sich im Beowulf und dem ihm nahestehenden Cynewulf-Cyklus, die man für mercisch hält. semninga und nemne fehlen aber in den sogen. Caedmonschen Dichtungen (zu semninga vgl. Sarrazin Anglia 9,533, Klaeber a. a. O.) Sarrazins Annahme, daß semninga ein jüngeres Wort sei, das bei Caedmon

¹ Auf das Fehlen von nymde in diesen Texten verwiesen schon Mather und H. Bartlett a. a. O.

² Nach Kr. S. 12 'wußte der Verf., daß man im Ws. on für in sagt. Demgemäß hat er on für in, braucht aber dazu noch on entsprechend dem Anglischen.' (?!)

noch nicht vorkomme, ist recht unsicher. nympe könnte andrerseits jüngere oder doch überlebende Form gegenüber nemne sein (s. die Belege S. 47), man wird aber doch nicht umgekehrt 'Caedmon' für jünger halten. etwa das Fehlen von semninga zusammen mit dem ausschließlichen Vorkommen von nympe (nicht nemne) darauf hinweisen, daß der Caedmon-Cyklus wirklich nordhumbrisch ist? Ich verkenne natürlich nicht, daß derartige Argumente an sich sehr geringe Beweiskraft haben; auch werden solche Schlüsse schon dadurch unsicher, daß wir das sicher Nordhumbrische im Wesentlichen erst aus so später Zeit kennen. — Daß das in Lind. häufige segne Schleppnetz' in Exodus (584) vorkommt, beweist kaum mehr als den gemeinanglischen Zusammenhang. gnornian (statt nordanglisch grornian) in Exodus und dem problematischen 'Crist und Satan' könnte ja leicht von Schreibern herrühren, mit deren Eingreifen ja immer zu rechnen ist. — Wir befinden uns eben hier auf schlüpfrigem Boden.

In betreff der Metra bleiben noch einige Schwierigkeiten zu lösen, namentlich anschließend an die ff. Worte:

- 1. tēogan¹ anordnen, bestimmen, schaffen.
- a. Prosa. Ep. Gl. 97 apparatione: gitiungi. Corp. Gl. 185 getiunge. Beda 138,31 TOCa for(c)tcode praeordinati, [B forcætywed], 332,9 T geteode decrevisset, [O geteohode, Ca

¹ Zur Etymologie vgl. Kluge Et. Wb. s. v. Zeche, Uhlenbeck s. v. taujan. tēogan (Inf. nicht belegt, vgl. Sievers § 414 Anm. 5 b) = *tehōn ahd. gizehōn 'anordnen, richten'; teohhian = *tehhōn, mhd. zechen. Auf Grund des got. tēwa 'Ordnung' kann man auch ae. tāwian 'zubereiten' hierherstellen, (getāwe 'Rüstung', ahd. zāwa); daneben erklärt sich tēagan, pt. getēad als ablautendes *tāwōn, *tawōjan, das nun wiederum ahd. zouwen 'fertig machen', got. taujan nahe steht.

geteohode, B läßt es aus], 234,25 TOCaB geteod. Ep. Al. S. 165,729 getiod. Urk. GB. No. 558 (nicht rein ws.) gif dæt donne god allmæhtig getrod hæbbe.

Daneben tēagan Beda CCa 366,24 (TB tawian), Laeceboc II 29 S. 68 wel getead.

b. Poesie. teogan in Caedm. Hymn., Beow. (3), Dan. (5), Andr. (1), Denkspr. Ex. (4), Par.-Ps. II (4), aber auch Metra (11,38, 13,13,44, 24,14). Daneben teohhian Beow., Jul., Metra.

Die ws. Prosa kennt nur teohhian 'denken, beschließen, beabsichtigen', so Past. 305,4 u. ö., Boet., Par.-Ps. I, Aelfc. Hom. I 198 u. ö.

2. worn, wearn Haufe, Menge.1

a. Corp. Gl. 994 gregatim: wearnmelum. [Dagegen WW. 201,21, 411,42 id: heapmælum]. Lind. R. Mk. 5,11,13 worn grex [ws. Ev. heord].

b. worn fast in allen poet. Texten (Grein S. 736) incl. Metra 9,7, 26,33.

3. mey-, mægwlite.

Vgl. Klaeber Angl. 25,312. Das Wort begegnet in Lind. R₂ (species, aspectus), Rit. (species, majestas), Beda 90,9, 482,9 (auch in B, species, forma), Bl. Hom. 127,19 und Poesie: Gen., Andr., Crist, Guthl., auch in Metra. (Kluge Grdr. I S. 339, 350 führt den ersten Bestandteil auf lat. imago zurück).

tēogan, worn, mēguelite sind also anscheinend anglisch, und doch begegnen sie in den Metra.² Wird dadurch die

¹ Gehört worn zu wirren?

² Auch das vorwiegend anglische giō-mann 1,23 (Klaeber Angl. 27,433) verdient hier Erwähnung.

oben bestätigte Ansicht, daß die Metra dem Süden angehören, unhaltbar? Ich glaube nicht. Sie mögen ja dem Anglischen vielleicht näher stehen als das Strengws. Aelfreds, aber für anglisch brauchen wir sie wegen jener Worte wohl nicht zu halten. Die Sprache der Metra weist im allgemeinen nach dem Süden, vgl. Krämer Bonner Beitr. VIII S. 33.1

Es können hier Beispiele dafür vorliegen, daß anglischpoetische Eigentümlichkeiten von einem südlichen Dichter
nachgeahmt werden.² Die spezifisch anglischen Formworte nenne, gen, (auch in) hätten sich dagegen der Nachahmung entzogen.

Schließlich ist aber noch eine andere Erklärung nicht ganz ausgeschlossen, nämlich daß wir es mit gemeinaltenglischen Worten zu tun haben, die im Süden früher geschwunden, aber in der archaischen Sprache der Poesie noch gebräuchlich waren. Vgl. Kap. II und besonders präg.

¹ Einen streng ws. Eindruck machen die Laute freilich nicht. Auf die Frage der Kentizismen kann ich hier nicht eingehen. — Die Ansicht, daß die Metra von Aelfred übersetzt sind, ist jetzt wohl i. a. aufgegeben, vgl. Wülcker Gesch. d. e. L. S. 55, anders Krämer. Eine Kleinigkeit sei erwähnt: Der Prosa-Boetius hat gedrēfednes, die Metra weniger streng ws. gedrēfnes, vgl. Kap. III 1.

² Vgl. Binz Littbl. f. germ. und rom. Philol. 1904 S. 100 zu Imelmanns Diss. über das Menologium. Ob aber der Dichter des Men. auch das Formwort in nachgeahmt haben sollte, erscheint mir fraglich. Imelmann dürfte vielleicht doch damit im Recht sein, daß der Dichter kein Westsachse war. — Auf dem vorbildlichen Einfluß der angl. Poesie beruht wohl das Eindringen der angl. Form mece 'Schwert' in den Süden (Metra, Aethelstan, Byrhtnop), vgl. Wildhagen S. 187. mēce findet sich auch in Napiers Digby-Gll., die zwar kentisch gefärbt sind, aber sonst \bar{x} haben. Die ws. Form begegnet nur WW. 319,12 und Aelfc. Gr. Zup. S. 39 Hs. J.: mæcefisc.

2. Worte, welche durch übereinstimmendes Vorkommen in ne. Mundarten (oder in me. Texten) als spezifisch anglisch erwiesen werden.

Vgl. Einl. S. 9,10 und 13. Bei den bisher behandelten Worten kam einigemale schon das Zeugnis heutiger Mundarten bestätigend zu demjenigen altenglischer Texte hinzu. Wir stellen im folgenden Worte zusammen, deren Verbreitungsgebiet wir nach den ae. Belegen nicht sicher auf den Norden beschränken könnten (d. h. in der Prosa solche, die nur in je einer unabhängigen Quelle, und zwar meist selten, belegt sind, z. T. ἄπαξ λεγόμενα), wenn nicht das Zeugnis der Mundarten, z. T. auch dasjenige me. Texte (bei lyrtan nur dieses) vorläge.

a. In ae. Prosa belegte Worte.

Wir können uns hier mit alphabetischer Reihenfolge begnügen.

$b\bar{o}s(ih).$

- a. Lind. Lk. 13,15 of bosih a praesepio, R₂ of bosge.
 Dazu O. N. Boswoorth 'Bosworth' GB. No. 409??
- b. me. boos bostar Prompt. Parv. 441, bose id. WW. 729,32.
- c. ne. nördl. boosy 'Krippe eines Viehstalls, Abteilung eines Kuhstalls' (von Yorks. bis Worc. Hertfords.), boose 'Pferde-, Kuhstall, oberer Teil des Stalls, wo Futter aufbewahrt wird'.

Vgl. nordfries. bōs, bōscm 'Hütte' (Ditm. bōs schon bei Schiller-Lübben, Sylt būsom). ostfries. būs(dör) 'Stall(tür)', in ndd. und md. Dial. (westf., brem., holst., hess., thür.)

¹ Zum Suffix vgl. ātih und Pogatscher ESt. 27,221 Fn.

banse 'Scheune, auch Haufe, aufgestapeltes Brennholz', ferner an. bāss 'Raum um etwas aufzubewahren, abgeteilter Raum im Stall', dän. dial. baas 'Viehstall, Abteilung im Stall', schwed. bås 'Stand, Stallstand', endlich got. bansts 'Scheuer', wozu mndl. banste 'dasselbe'. Falk-Torp s. v. baas stellen germ. bansa- zu binden.

ceir clamor.

Rit. 12,18 u. ö. (7). — Lindelöf Spr. d. Rit. § 23 und Glossar zu Rit. möchte ceir zu cēiga, ws. cīegan 'rufen' stellen, allein dabei wäre die Stammbildung unerklärlich. Es ist wohl an nördl. dial. (Yks. Lanc.) char 'schelten, keifen, bellen' anzuknüpfen, das auf kurzes e weist, vgl. ae. ceorran stv. 'knarren', mnd. kerren, karren swv. 'stridere', mndl. kerren 'schreien, keifen, wiehern, grunzen, knarren' etc., ahd. kërran, mhd. kerren stv. 'einen grellen Ton von sich geben' (dazu ae. ceor -ian 'murren'?; Zusammenhang mit got. kara Sorge etc. ist fraglich, s. Uhlenbeck Et. Wb.). ceir fasse ich als *ceorr, *kerra- mit nordh. ei wie in neirxna wong. Aus dem vorhergehenden Diphthong erklärt sich dann die sonst im Rit. nicht übliche Vereinfachung der Gemination im Auslaut.

ge-hyrsta(n) murmurare.

Lind. R₂ Lk. 15,2, wohl zu dial. schott. ir. hurstle, hirstle 'Geräusch rauhen Atems infolge von Schleim in den Luftwegen'.

be-lyrtan betrügen.

Lind. Mt. 2,16 bisuicen vel bilyrtet inlusus (R₁ awæged, ws. bepæht). Anglisch sind auch die me. Belege von lyrtan: In der Ancren Riule 280,18 hat die nordwestmittelld. Hs. T bilurt (outwitted), die südliche M bicherd! Ferner

mittelld. Belege *lilirten* Gen. und Exod. 316, Bestiary 304 (Misc. S. 13).

Es entsprechen mhd. lürzen 'täuschen, betrügen', (lurzen 'schmeicheln', er-lerzen aufheitern, scherzen: lerzen Lexer 1886), bayr. lurzen, lürzen 'betrügen', adän. lyrte 'scherzen, spaßen, kosen'. Vergleicht man lat. ludere, illudere, so möchte man die letzte Bedeutung für die ältere halten. Unklar und unsicher ist Zusammenhang mit mhd. lerz, lurz, auch lerc, lurc 'links', s. Grimm GdSp. 991, Fick Wb. I⁴ S. 538.

? macalic opportunus.

Lind. Mk. 6,21 maccalic, R₂ macalic. Dazu schott. makly 'geziemend'? (bei Vigf. s. v. makligr, doch fehlt es im Dial. Dict.). Entlehnung aus dem Nordischen ist kaum anzunehmen (Björkman S. 250), vgl. ahd. gamahlich opportunus, nordfries. meakalk 'gemächlich, bequem'.

sā Zuber, Bottich.

- a. Corp. Gl. 17 libitorium: saa. Es fehlt unter den nomina vasorum in 'Aelfrics Glossar' WW. 122 ff.
- b. me. Prompt. Parv. 462 soo. Havelok 933 so. WW. 662,32 sa tina.
- c. ne. sou, (so, soe etc.) in nördl. Dial. bis Bedf. südlich, say Schottl., North., Durh. 'ein großes rundes Gefäß, meist mit zwei Henkeln'.

sā m. entspricht an. sār, adān. så, dän. dial. veraltet saa, schwed. så 'Zuber, Bottich' (*saiha-). Entlehnung aus dem Nordischen ist für den ältesten Beleg ausgeschlossen und für die spätere Zeit wenigstens durch nichts

Johansen Die nordfries. Sprache nach der Föhr- und Amrumer Mundart. Kiel 1862 S. 156.

erwiesen, vgl. Björkman S. 109. Lidén Upsala studier S. 81 ff. vergleicht lit. saīkas.

screpan einschrumpfen, verdorren.

R₂ Mk. 9,18 screpes arescit (Lind. scrinced, ws. for-scrince).

Es liegt hier wohl nicht, wie Lindelöf Bonner Beitr. X § 16 Anm. 1 vermutet, Schreibfehler oder Mißverständnis vor. Ich möchte vielmehr ein Vb. screpan 'einschrumpfen annehmen, vgl. ne. dial. (Ostangl.) shrepe 'sich aufklären (vom Nebel), d. h. zusammenschrumpfen, ferner ndd. (Brem.) schreepsk 'mager, eingeschrumpft, schmächtig, klein', holst. schreep 'schmal', ndl. schrepel, 'mager, schlank' (Frank Et. Wb.).

Man darf vielleicht screpan als die nasallose Form von schrumpfen, mhd. schrimpfen (engl. shrimp) auffassen nach Beispielen bei Streitberg Urg. Gramm. § 203. Vgl. auch an. skorpinn 'dürr, eingeschrumpft', skorpna 'einschrumpfen'.

stemman.

- a. Lind. Lk. 11,52 forestemdon prohibuistis, R₂ for-stemdon (mit vereinfachter Gemination, vgl. Sievers § 405 Anm. 6); ws. forbudon.
 - b. me. stemmen nördliche Allitt. Poems (EETS. 1, S. 63).
- c. ne. to stem in nördl. Mundarten südl. bis Leic., Warw. 'aufhalten, hemmen, stillen (Blut), dämmen, stauen'.

Es entsprechen ostfries. stemmen, älter ndl. (Kilian) stemmen, stimmen 'firmum reddere', ~ den schoen 'consuere oram calcei', ahd. gi-steman, mhd. stemen, stemmen 'Einhalt tun, stehen machen', an. stemma, dän. stemme 'aufhalten, stauen, dämmen', aschwed., schwed. dial. stämma 'hemmen, authalten, einfassen, säumen (Kleider), mit dem Eisen stemmen'.

Kluge Et. Wb. s. v. stumm, ungestüm führt stemman auf *stamjan zurück, allein die nordische Form zeigt, daß mm bereits urgerm. ist, vgl. stumm, stammeln. Daneben steht einfaches m in ungestüm und ahd. ?steman¹, mhd. stemen, das ein stv. gewesen sein muß, wenn auch keine starken Formen mehr belegt sind. Vielleicht ist stemmö auf *stemnö zurückzuführen, vgl. Noreen Urg. Lautl. S. 157. Wir müssen wohl annehmen, daß in stemman < *stemnan e seine Erhaltung vor gedecktem Nasal dem Einfluß von steman verdankte; letzteres wurde allmählich durch stemman verdrängt, das auf westgerm. Gebiet sich der Analogie der jan-Verba anschloß.

sprintan.

- a. Lind. Jh. S. 187,12 (rocyetede vel) gisprunt (mit dem Vokal des Plurals).
- b. me. Kausativ sprenten, doch in der primären Bedeutung 'springen, laufen' in nördlichen Texten (doch sprenting bei Trevisa, sprintel Ancr. R. 276) s. Stratman.
- c. In nördl. Dialekten sind sprintan und sprentan erhalten: schott., nordengl. (bis Warw. südwärts) sprint² 'springen, schnell, kurz laufen etc.', sprent (bis Northampt. südlich) 'sprengen, spritzen, vorwärtsstürzen'.

Vgl. ahd. sprinzan 'findi', mhd. sprinz 'das Aufspringen, Aufsprießen', sprinze 'Lanzensplitter, flimmerndes Stück', aisl. spretta 'aufspringen, springen, hervorsprossen', dän. sprætte 'zappeln, sprühen, auffahren', schwed. spritta-

¹ Belegt kestemo, kestemit; anders urteilt Schade Wb. 863.

Wenn dies nicht aus älterem sprenten entstanden ist, vgl. send > sind, spend > spind bei Robinson Dial. of Mid. Yksh., auch begegnet sprint in der Bedeutung des Kausativs 'sprengen' in Cumb., Yks., Not., Linc.

'lebhaft sein, zucken', dial. (südl.) sprinnta 'ausschlagen'.

— Zum Kaus. vgl. mhd. sprenzen 'sprengen, spritzen'
('bunt schmücken, putzen'?), nhd. dial. sprenzen 'sprengen',
aisl. spretta, norw. spretta 'losmachen, öffnen, zerstreuen'.

— S. Streitberg Urg. Gramm. § 203.

b. In ac. Poesie belegte Worte.

Nur in Pocsie belegte Worte haben wir aus den in der Einleitung S.3 erörterten Gründen vom internae. Standpunkt aus bisher ausgeschlossen. Aber das Kriterium der Erhaltung in den nördl. Mundarten sollte sich konsequenter Weise ebenso gut auf poetisch wie auf prosaisch belegte Worte anwenden lassen. Trifft dies Kriterium bei einem ae. nur anglisch-poetisch belegten Wort zu, so können wir schon annehmen, daß es nicht gemeinae. und poetisch-archaisch, sondern anglisch war und deshalb dem Ws. fehlte. Indessen hat ein Vergleich des rein poetischen altengl. Wortschatzes mit den heutigen Mundarten nur sehr geringe Resultate ergeben, wohl eben deshalb, weil es sich hier meist um archaische, aussterbende Worte handelt. Erwähnung verdienen etwa die folgenden:

bront steil,

Beow. 238, 568, El. 238 bront, Andr. 273 brant (brond-stæfn Andr. 504, brenting 'Schiff' Beow. 2807) = me. brant im nördlichen Alexander-Roman 3649 = ne. brant 'steil' in nördlichen Mundarten bis Lanc., Linc., brent 'steil, schwierig' bis Leic., Northampt. südwärts. Vgl. aisl. brattr, norw. bratt, dän., schwed. brant 'steil'. Allerdings bietet die Bewahrung des nt keine sichere Gewähr dagegen, daß die Erhaltung des Wortes im Norden nicht etwa mit skandinavischem Einfluß zusam-

menhängt; denn die Assimilation von nt > tt findet sich nicht in nord. Lehnworten, vgl. Björkman Scand. Loanw. S. 169 Fn.

tom leer, frei von,

Crist 1212 = me. tom, ne. toom, in nördl. Mundarten bis Yorksh. südwärts, 'leer, dünn, schwachsinnig'. Vgl. an. tomr 'leer', (dän., schwed. tom), as. tomi 'frei von', ahd. zuomig 'vacans'. Nordischer Einfluß bei der Erhaltung des Wortes ist freilich nicht ausgeschlossen, vgl. Björkman S. 256.

(?) tohte Heereszug, Kampf,

(fem.), Gen. 914, El. 1180, Fata 75, Jud. 197 = heutigem nordh. tought 'Streit'. Aber ae. getoht (n.?) begegnet in dem wahrscheinlich südlichen Byrhtnop, und wegen der abweichenden Form hier gewiß nicht in Nachahmung des Anglischen. Vgl. afries. tocht-man 'Führer'.

Ganz unsicher ist das poetisch häufige

bealu Übel,

(auch in südl. Poesie und Wulfstan 83,13 [unbealafull]) = veraltet nordengl. bale 'Kummer, Leid'. S. NED. s. v. bale.

Anmerkung. Ein negatives Zeugnis liefern die Mundarten z. B. in ff. Fällen:

cnyccan 'knüpfen', Rit. und Lind. = ne. to knitch schottisch, aber auch im Süden (Hamp., Wilts., Dor., Som.).

(tō)-rendan 'zerreißen, schneiden', Lind. R2, auch Par.-

¹ Vgl. auch buta toge 'ohne Streit' Lind. Mt. 4,9 Rand.

Ps. 123,7 = ne. to rend, dial. rend 'strip off bark' Sus., Hamp., Dev., Cornw. — Vgl. afries. renda, sowie Bremer Wb. III 479.

hwispriga 'murmurare, wispern' R₂ Lind. (me. whisperen im Prompt. Parv., bei Lydgate und Chaucer), nach DD. anscheinend gemeinenglisch, in spezieller Bedeutung auch in Kent.

sneorcan Vesp. Ps. 30,13 (gesnerc excidi, Jun. mißverstehend geswearc; Royal, Cant. gefeol) eig. 'zusammenschrumpfen', wozu me. snarchen (*snarkjan) in der Margareten-Legende, mag dem Ws. fremd gewesen sein, ist aber doch vorsichtig zu beurteilen wegen ne. dial. snarker 'Asche' ('the cake is burnt to a snarker', d. h. ist zusammengeschrumpft), Ausdruck der Insel Wight, sowie kent. snirk 'vertrocknen, verwelken' (wenn dies nicht aus dem Nord. stammt, s. DD.).

sturtan 'exsilire' Rit. 57,12 (stv. wie murnan? s. BT.), wohl zu verbinden mit to sturt 'aufscheuchen, aufrühren, beunruhigen', das in nördlichen Dialekten (Schottl., North., Durh.), aber auch in Cornwall vorkommt. — Die gewöhnliche Form ist sterten = ne. to start.

Auffallend ist auch das Verhalten der Mundarten bei stræl und flan 'Pfeil' (vgl. Wildhagen S. 188). stræl bevorzugt i. a. das Anglische (Vesp.-Ps., Beda 268,28, Mart., Bl. Hom., Ep. Al.), flan das Ws. (Past. 431,3, Oros. 134,23, Aelfe. HL. 5,424 u. ö., Exod. 19,13, Deut. 32,42, Aelfric Gl. WW. 118,9), doch begegnen beide nebeneinander in der Poesie. Seltsamerweise aber erhielt sich gerade stræl im Süden: streal(e) Sussex, flan im Norden: schott. flane, pl. flaine. Dies zeigt, daß stræl dem Süden nicht gefehlt

haben kann, worauf auch einige Belege hindeuten (Par.-Ps. 17,15, Spelm. 63,8, 126,4). In der Schriftsprache gelangte earh zum Sieg, s. NED. s. v. arrow.

3. Unsicheres (Zufälliges?).

Unter dieser Rubrik stelle ich Worte aus den nördlichsten Texten zusammen, die nur in je einer unabhängigen Quelle, begegnen (teilweise απαξ λεγόμενα), und die sich weder durch me. Belege noch durch neuere Mundarten sicher lokalisieren lassen. Eine gewisse Wahrscheinlichkeit besteht ja auch noch bei ihnen, daß sie spezifisch anglisch, z. T. spezifisch Nordhumbrisch oder mercisch waren, denn es ist ja nicht immer a priori anzunehmen, daß ein Wort sich über das ganze Gebiet verbreitet haben muß. Aber wir müssen doch hier besonders mit der Möglichkeit rechnen, daß ein Wort nur zufällig im Süden nicht belegt ist, namentlich wenn es sich um ein gemeingermanisches Wort handelt. Ich beschränke mich i. a. auf selbständige Wortstämme. Ableitungen mit produktiven Suffixen (z. B. auf -ung, -ian), die großenteils nur dem Ungeschick der Übersetzer ihren Ursprung verdanken. hier aufzunehmen, hätte natürlich keinen Zweck. Auch von Kompositis, deren Elemente gemeinae. sind, ist nur sehr wenig erwähnenswert. 1

¹ Wohl nur Fehlschreibungen sind ohtripp messis Lind. R₂· nach Binz Zfd. Ph. 36,550 = ofet-rip; hræcing detentio = ræcung Ritter Arch. 113,186; fertin portentum R₂ Lindelöf Bonner Beitr. X S. 15 An.; gerlo tributum R₂ Lk. 20,22 (Lind. geafel) Lindelöf ib. S. 11 An. 2, wohl für geflo. Andere offenbare Korruptelen übergehe ich.

a. Aus Lind.:

ā-blonga erzürnen.

Mt. 26,8 abloncgne vel wrate indignati (R1 abælgede, ws. gebolgene). Vgl. Sievers Gramm. § 395 Anm. 2. Ich fasse das Verbum als nasalinfigierte Form zu belgan, das Nähere würde mich hier zu weit führen. Ganz unsicher ist Beziehung zu schwed. bläng 'stechender, zorniger Blick'.

cursumbor thus Mt. 2,11, unerklärt.

? frāgia fragen,

von BT. und Sweet Stud. Dict. erschlossen aus gefragade Mt. 2,16. Dies wäre bemerkenswert als einziges ae. Zeugnis für die kontinentale Form ahd. frāgēn, as. frāgōn, afries. frēgja, nndl. vragen, auch schwed. frāga. (Zu ā vgl. Bülbring El. B. § 129.) Da jedoch in Lind. daneben mehrfach gefraignade (für freg-, fræg-) begegnet, auch part. fraignende (s. Cook Gloss. S. 80), so ist fragade wohl einfacher als Fehlschreibung für fra(i)g(n)ade aufzufassen, ähnlich wie -fraigende neben frægnende. (Die schwache Flexion erklärt man aus nord. Einfluß).

hron-sparua passer.

Mt. 10,29, unerklärt. BT., Cook, Sweet, Foley (S. 66) lesen hrond. —

locetta eructare.

Mt. I S. 7,5 loceted vel gesprang.

Mt. 13,35 ic loccete vel ic gcyppe.

(R₁ roccet-to vel bilket-to). — Liegt zweimalige Fehlschreibung für roccettan vor? Wandel von r > l, den Foley §§ 4 und 32 vermutet, wäre isoliert; s. roccettan S. 21. An Zusammenhang mit lācan (s. d. f.) ist wohl kaum zu denken.

? lycni(g) a.

Mt. I S. 1,8 slittađ vel lvgcna (geändert aus lvcgnæ) erumpat (in vocem). Es ist wohl lygcnað zu ergänzen mit cg für pal. c, vgl. Foley § 42, Bülbring § 495 Anm. 2. Dies könnte zu einem swv. II lycni(g)a(n) gehören, Inchoativum zu lūcan 'ziehen, schließen', d. h. ('auf)gezogen werden', vgl. got. usluknan 'sich öffnen', s. Schade Wb. s. v. lūchan. Freilich wäre denn ā-lycnian zu erwarten. Zum Umlaut (*lukinōn) vgl. drysnian S. 37; die umlautslose Form wäre *locnian.

(for-repa.)

Jh. I S. 5,8 (begrippene vel) forrepene reprehensam, nach Sievers Gramm. § 391 Anm. 1 isoliert, ist wohl anomal für *ropen und zu gemeinae. repan stv. IV zu stellen, s. BT. 792 a, Skeat Conc. Et. Dict. s. v. reap. Der Glossator verstand vermutlich die Bedeutung 'tadeln' nicht und übersetzte nur prehendere. repad reprehendit Ben. R. Log. S. 102,2 gehört dagegen eher zu hrepian 'berühren'.

stricci(g)a.

Mt. 4,21 geboeton vel gestricedon (netta) reficientes (retia). Vgl. ahd. stricchen, mhd. stricken 'stricken, schnüren, flechten, heften', mnd. stricken 'stricken, schnüren', adän., ndän. strikke 'stricken'. Das Stammwort Strick ist im Ae. nicht belegt. — Das gewöhnliche ae. Synonymon ist enyttan 'to knit', vgl. mnd. knutten, nndd. knütten, an. knyta, dän. knytte, schwed. knyta. Daneben ae. breydan 'weben', afries. brīda, *breida 'schwingen, flechten', neufr. auch 'stricken', (Siebs Engl.-fries. Spr. S. 134), mnl. breiden, nndl. breiden 'stricken, flechten, weben', mnd. nndd. breiden.

-prut.

Mt. 15,34 fisc-drutus pisciculos. In dem zweiten Bestandteil muß deminutive Bedeutung liegen, also prut 'etwas Kleines' bezeichnen. Dementsprechend knüpfe ich vermutungsweise an ndl. dreutel, drotel 'pilula stercoria', dreutelen 'pumilionis passus facere' (= ndd. dröteln 'zaudern'), dreuteleerken 'homuncio globosus nanis cruribus' (Kilian). Die Bedeutungen der beiden letzten Worte passen gut zu -prut; das Subst. dreutel (eig. 'kleines Ding') kann in der Bedeutung von dreet 'Unrat, Kot', vläm. dretel beeinflußt sein. Der Form nach ist dreutel < *prutila- ganz regulär, vgl. Grdr. I S. 821 unten und Franck Et. Wb. s. v. dreutel. Setzt man prüt an, so stimmt dies zu der ndl. Form, während bei prat (wie Cook, Sweet, Foley) natürlich Ablaut anzunehmen wäre. Mit der offenbar verwandten Sippe verdrießen (ae. aprēotan, got. us-priutan beschwerlich fallen', an. prjota 'mangeln') vereinigt sich das bisher Zusammengestellte wohl durch Vermittlung der älteren Bedeutungsstufe 'zusammendrücken', also prut, prutil 'etwas Zusammengedrücktes, Kleines'?

Erwähnenswert sind noch die Komposita:

cūp-noma cognomentum Mt. I S. 6,4, vgl. ahd. chunt-namo cognomen.²

Wenn Vercoullie Beknopt et. woordenboek dreutel mit dreet (drutan) in etymol. Zusammenhang bringt (was schon Frank abgelehnt hat), so ist nicht nur die lautliche Erklärung gezwungen, sondern es fehlt auch die rechte Bedeutungsvermittlung zwischen dreutel und dem Vb. dreutelen.

² Synonyma: *tor-noma in getornomade Lind. Lk. 6,14 (zum Suffix Kluge Grdr. I S. 480). — frēo-nama cognomentum Beda 110,18, 258,28, 422,3, WW. 367,7. — tō-nama Lind. Mk. 5,9; Aelfc. Hom. Asem. 9,25. — (ēke-nāme erst me. belegt).

eorp-crypel paralyticus

häufig in Lind. (in Mk. Cap. 2 von Farman übernommen). Zu Sweets eorscripel applare OET S. 574 s. Schlutter Angl. 19,102. (Nur ist applare nicht in auriculare zu ändern, sondern heißt 'Löffel', hier 'Ohrkratzer'). — Wohl nur zufällig ist Ähnlichkeit mit schwed. dial. jord-krypare 'Ball, der am Boden entlang geht'. — Vgl. crēopere 'Krüppel' Aelfc. HL. 6,20, 10,25, 21,432.

b. Aus Lind. und R₂: ge-fræppi(g)a.

Lind. Mt. 12,10 gefræpgedon vel geteldon accusarent, 21,37 teldon vel fræppigdon verebuntur, Mk. 12,6 gefræppegedon reuerebuntur, R2 Mk. 12,6 gefræpegadun.

Das NED. s. v. frap vermutet, daß der Glossator verebuntur mit verberantur verwechselte, fræppigan also 'schlagen' bedeuten und die germanische Grundlage des frz. frapper darstellen könnte, (nach Körting gehört dies zu ndl. flappen). Dabei bleibt aber unverständlich, warum das an erster Stelle stehende accusare mit fræppigan übersetzt wird. Daß die erste Glosse nachgetragen wurde, ist doch wenig wahrscheinlich. Der Glossator scheint eher intrans. vereri 'sich scheuen, fürchten' mit trans. 'mit Scham, Furcht erfüllen' verwechselt zu haben; vgl. in Lk. revereri = gesceomiga, letzteres kann trans. und intrans. sein. Ist etwa fræppiga(n) accusare mit ne. dial. frap 'streiten, Streit, üble Laune' (nördlich, doch auch Somers. Dev.) zu verbinden, oder gehört dieses wie dial. frap 'schlagen' zu frz. frapper?

nesta nere.

nestad Lk. 12,27, Mt. 6,28 (R₁ spinnap). nestan eig. schnüren, knüpfen entspricht an. nesta festheften, -na-

geln', dän. neste 'binden, nesteln, leicht zusammennähen', schw. nesta 'lose heften', mhd. nesten (einmal neben sonstigem nesteln, genestet: überlestet s. Lexer Wb.). Grundform *nastjan. S. Kluge Et. Wb. s. v. Nestel, Falk-Torp s. v. neste.

? sceapa.

Jh. 20,25 Lind. sceadana und scæddana clavorum, Rs sceodona (ws. nægela). Dazu stelle ich mit BT. (ofer vel on) hornsceafe (supra) pinnaculum Lind. Mt. 4,5, das Gemeinsame wäre dann 'Spitze'. — Das Wort ist dunkel, Stammauslaut und Geschlecht lassen sich nicht sicher bestimmen. — Zusammenhang mit Schädel liegt wohl fern. — Erwähnt sei der Anklang an schwed. dial. skate, norw. skat 'das Oberste, Äußerste von etwas, Baumspitze', norw. skata 'spitz auslaufen', wozu schwed. skat, -a, dän. skade 'Elster' (wegen des langen und spitzen Schwanzes), s. Falk-Torp s. v. skade. Doch lassen sich die Dentale nicht vereinigen. —

scrīpen austerus.

Lk. 19,21 Lind. scripen vel gearuutol, Rz scripende. Lindelöf Bonner Beitr. X § 28 Anm. 1 verweist auf norw. skripen 'ungeduldig (zärtlich, sehnsuchtsvoll, zudringlich, lecker, anspruchsvoll, zänkisch, doch auch schüchtern, blöde)' Ross Norsk Ordbog S. 685, Aasen S. 687. Also vielleicht Lehnwort.

Dazu die lateinischen Lehnworte:

camel, gen. camel(l)es,

statt des alten olfend, vgl. Verf. Die ae. Säugetiernamen, (Anglist. Forsch. ed. Hoops XII) S. 132. Die Quelle ist lat. camelus oder camellus ALL. I 540.

¹ horn-sceap wohl kaum zu sceap 'Scheide', wie Cook und Foley § 21 wollen.

Jordan, Eigentümlichkeiten des angl. Wortschatzes.

celmert-monn

= mercenarius (ws. hyra, hyrling). Wir müssen uns wohl mit Bradleys Erklärung Acad. 1017 S. 385 begnügen, der celmert auf collibertus, *col(l)imbertus zurückführt; freilich wäre dabei nordh. *coelmert zu erwarten. Auf *collimbertus weist nach Br. vielleicht eine volkstümliche Etymologie, die das Wort 'a cultu imbrium' ableitet, s. das Zitat aus Peter de Maillezais bei Ducange.

pis gravis

(in Lind. pis, pislic, gravis, -iter, ingravatus, Rs pislic¹) beruht auf alter Entlehnung von pēsum < pensum (Pog. §§ 131, 299). Einer jüngeren Schicht gehört an ws. pinsian 'wägen, abschätzen, prüfen' mit Erhaltung des n, vgl. frz. penser (z. B. Past. 51,15 u. ö., Angl. 8, 305,47 u. ö.). Eine Spur der alten Form im Süden ist wohl (hu swiđe man) pysæð (þa sawle) in Napiers Wulfstan 239,26 Hs. H. gegen pinsað B.

plett ovile,

wofür ws. (sceapa) fald. plett beruht nach BT. und Füchsel S. 8 auf lat. plecta 'Hürde', und zwar ist als direkte Grundlage *pletta anzunehmen, worauf auch die keltische Gruppe mcymr. corn. pleth 'Haarflechte', arem. plez 'Feldzaun, Hecke aus Zweigen' hinweist (Loth Les mots latins dans les langues brittoniques S. 196). — In andern Worten erscheint ht als Reflex von lat. ct, s. Pog. § 324.

purple.

Jh. 19,5 Lind. purbple, R₂ purple purpureum (vestimentum), doch wohl mit ne. purple in Zusammenhang zu

¹ Dagegen gehört pisum hosum siliquis Lk. 15,16, das Cook hierherstellt, gewiß zu pise 'Erbse', vgl. siliqua pisanhosα Corp. Gl.

setzen. Das Ae. hat sonst nur purpure, -en, das Me. (wohl a. d. Frz.) purpre, z. B. Chaucer Leg. g. w. 654. purp(u)re > purple wird auf Dissimilation beruhen.

c. Aus Rit.:

brogn Laub, Zweig?

95,5 brognena frondium, dazu Kollektiv 19,17 gibrogne virgultum, Gebüsch, Laubwerk. Sollte brogn auf einen primären Stamm *breg zu bregdan 'schwingen, schnell bewegen' (ahd. brettan, an. bregđa) zurückgehen, der in an. praet. brā erscheint?

ā- hloefa evellere

55,10 unklar. Lindelöf Spr. d. Rit. § 18 konjiziert ahneapa.

hæg-hāl incolumis

'sicher im Gehege' 98,19, 124,8, 174,19.

Lateinische Lehnworte:

spilæg spilagius

Rit. 125,25, wohl nur gelehrte Übertragung, vgl. Ritter Arch. 113,187.

(?) gi-berba.

4,3 bylas gyldenno, giberbedo sylfere murenulas aureas vermiculatas argento. Die Stelle gehört zu Hohelied 1,11 (Luther: «mit silbernen Pöckchen»); vermiculatus = quasi vermiculis variatus vel distinctus (Duc.), 'wurmförmig verziert'. Vielleicht läßt sich berban als swy. I auf ein früh entlehntes lat. barba 'Bart, Widerhaken' zurückführen (ae. *b[c]arbe), vgl. die spätere Bedeutungsvariante des aus dem Franz. aufgenommenen engl. barb: 'little roughnesses or ridges produced in the course of metal working' NED. s. v. barb I 7.

d. Aus R1:

dēpan baptizare

Cap. 3, 5 × (1 × deped vel fulwihted; Farman hat fulwigan nur im Markus, anschließend an Lind.), bemerkenswert als Rest des sonst ae. fehlenden und durch fulwian verdrängten Verbums taufen (Kluge Grdr. I S. 943). Nach Stratman begegnet jedoch dēpen 'taufen' auch im Mittelkentischen.

elle reliqui

22,6 (Lind. und ws. ōpere), einziger Beleg des Pron.-Stamms alja außerhalb des Gotischen, anzumerken zu Kluge Grdr. I S. 514 § 53. Im West.- und Nordgerm. ist er sonst nur noch in Ableitungen (z. B. ae. elcor, elles, ne. else) und Zusammensetzungen (Elend, Elsaß) bewahrt.

fetan fallen.

13,7,8 gefetun ceciderunt (ae. sonst nur feallan). Vgl. ahd. gifezzan ex-, recidere Graff III 727, auch wohl an. feta stv. 'geraten auf, treffen, finden, erreichen' (aksl. padq, pasti 'fallen', ai. pádyatē 'gehen, fallen'). S. Kluge Et. Wb. s. v. Fuß, Uhlenbeck Et. Wb. s. v. pádyate.

\bar{a} -(h)locian eruere.

5,29, 18,9 ahloca (ws. ahola). Ist ā-locian zu lesen, zu loc 'Verschluß, Schloß', d. h. 'erschließen, herausziehen', vgl. lycnian?

Lateinische Lehnworte:

txppel (il)-bred scabellum 5,35, 22,44 neben gewöhnlichem ae. txpped = tapetum. Vgl. ahd. (unverschoben) tepul neben tepid, tepi(h).

torcul torcular, 21,33 (ws. win-wringe). An alte Beziehung zum Weinbau (Kluge Grdr. I S. 328) ist kaum zu denken. Ahd. torcul, -a steht ja in keinem Zusammenhang.

vipere viper 23,33 gp. viperana.

An Worten, die außer in nördlichen Texten noch in Glossen begegnen (vgl. Einl. S. 12 ff.) seien am Schluß erwähnt:

mot Lind. Mt. 22,19 und WW. 267,14, 352,6 attomos (?): mot. S. Kluge Et. Wb. s. v. Maut.

hwasta Lind. Mt. I S. 20,15 eunuchus und WW. 443,23 molles: fam (?) hwastas, unerklärt.

āwis(c)-firena: eawis-, æwis-, ewisfirena publicanus R₁, WW. 480,3 puplicani: awiscferinend. Wohl zu ēawian, iewan 'offenbaren', die Anlehnung an æwisc 'Schande' wäre dann sekundär. —

ge-illerocad crapulatus Vesp.-Ps. 77,65 (ebenso Jun., Cambr., aber Spelm. oferdruncen, Royal, Cant. acworren) und WW. 378,15 crapula: illeracu (rocu?). Der erste Bestandteil ist wohl = an. illr, der zweite gehört zu rocettan (S. 21).

Kapitel II.

Gemeinaltenglische Worte, welche sich im Anglischen länger erhalten als im Westsächsischen.

Vgl. Einl. S. 2,3,10. Wir können bei dieser Gruppe beobachten, wie alte, meist ur- oder westgermanische Worte, die sich im Anglischen erhalten, im Ws. früher oder später durch ein konkurrierendes Synonymon verdrängt werden. Der Wortschatz befindet sich ja in ständiger langsamer Bewegung, und dieser ewige Wechsel, dieses Gehen und Kommen von Worten vollzieht sich auch in benachbarten und nahe verwandten Dialekten nicht gleichmäßig. Ein untergehendes Wort leistet in der einen Sprachgemeinschaft längeren Widerstand als in der anderen, oder ein Wort erhält sich in der einen dauernd, das in der andern untergeht. — Den Einwand, daß das Vorkommen eines

¹ Selbstverständlich folgt aus dem Umstande, daß das Anglische eine Reihe von Worten länger bewahrt als das Ws., nicht etwa, daß ersteres konservativer wäre. Auch das Ws. bewahrt Worte, die dem Angl. verloren gehen. Da wir immer vom Anglischen ausgehen und das den angl. Texten Gemeinsame zusammenstellen, so werden wir eben nur auf das, was das Anglische bewahrt, aufmerksam. Was das absolut, d. h. vom etymologischen Standpunkt aus, jüngere oder ältere ist, läßt sich ja vielfach gar nicht fesstellen. Der Anschein, als ob das Ws. das Jüngere bevorzugte, wird vielfach auch dadurch hervorgerufen, daß das ws. Wort in der ne. Schriftsprache erhalten ist. vgl. Kap. IV.

sonst nur anglisch belegten Wortes im Altwests. etwa aus anglischem Einfluß zu erklären wäre, wird, soweit es sich um gemeingermanische oder westgermanische Worte handelt (fēon, gefēon), wohl niemand erheben.

Natürlich kommt es hier besonders darauf an, die Zeitunterschiede nicht nur zwischen den verschiedenen Texten, sondern auch zwischen Originalen und ws. Umschriften (bei Beda, Mart., Dial., Psalmen, vgl. Einl.) zu berücksichtigen. Es ist klar, daß hier im wesentlichen nur die Prosa maßgebend ist. - In der älteren Periode stehen sich Aelfred und die etwa gleichzeitigen Beda und Dialoge gegenüber (letztere aus einem Grenzgebiet und daher in mancher Beziehung dem Ws. ähnlicher). Vesp.-Ps. und Mart. sind einige Jahrzehnte älter als Aelfred. Im Spätae. haben wir auf der Seite des Anglischen an umfangreicheren Denkmälern nur die Texte des Spätnordh. und das nordmercische Ri, aus dem südlicheren (?) Mercischen im wesentlichen nur die Bl. Hom. (971), alles Texte, die ungefähr gleichzeitig mit der Benediktiner-Regel Aethelwolds und wenigstens nicht erheblich älter sind als Aelfrics Werke und die ws. Evangelien. 1 — Ich ordne die Belege möglichst chronologisch, die einzelnen Worte nach der Zeit ihres Schwindens oder Zurücktretens im Ws.

Bei den zuletzt genannten, sēap, embiht, recene, läßt sich nicht eigentlich eine Abnahme des Gebrauchs im Ws. beobachten, sondern nur ein spärliches Vorkommen im Ws. gegenüber häufigem im Anglischen, ohne daß doch ws. Belege als 'Ausnahmen' aus anglischem Einfluß erklärt werden dürften (vgl. Einl. S. 8). Ich fasse die ws. Belege hier als Reste früherer gleichmäßigerer gemeinae. Verbrei-

 $^{^{1}}$ Vgl. zur Chronologie der Evang. Skeat Markus S. VI, XI. R $_{2}$ muß jünger sein als Lind.

tung; die 'längere Erhaltung' fällt bei einigen in spätere Zeit.¹

fēogan gegen hatian.

I. Anglisch. Vesp.-Ps.² feogan odisse 35, fiong 5, ebenso Jun. und (soweit ersichtlich) Cambr. Zum Teil fiogan noch in Cant., s. Wildhagen S. 19, 183. Doch Royal fast immer hatian (feogan 17,41, 5,7, 43,8 wohl aus angl. Vorl.), durchweg hatian Spelm. und Par.-Ps. I.

Mart. 160,13 B feodon, C ladetton.

Beda 48,29, 182,22 feoung alle Hss.

Bl. Hom. feogan 1 (177,9), feoung 2 (171,24, 193,2), hatigan 2.

Rı fiegan 3, fiung 2, hatigan 3 (wahrscheinlich sekundär, vgl. S. 15 Fn. 2, Wildhagen a. a. O.)

Lind. yefiaga 11, fiung 5, R2 gifiaga 6, fiong 2.

II. Ws. Past. feoung 4, hatian 10.

Boet. feon 1, floung 1, hatian 7.

Ben. R. Schr. hatian 4, hatung 1.

Ben. R. Log. hatian 3.

Aelfc. Hom. hatian 20, hatung 1.

HL. hatian 2. — A. Test. hatian 8.

Aelfc. Hom. Assm. hatian 4.

Ev. hatian 13.

¹ Vielleicht ist in diesem Zusammenhang auch ā-ræfnan 'ausführen, ertragen' zu nennen, das in den meisten angl. Texten (Vesp.-Ps. [nicht bei Spelm!], Mart., Beda, Bl. Hom., R₂ Lind., Ep. Al., und Poesie) begegnet, besonders häufig im Mercischen, selten aber im Ws. (Oros. 120,9, bei Aelfc. ræfnian 'ertragen' Hom. II 34,3, HL. 30,135, 'erwägen' Hom. I 30,35, 42,17, 30). Im Mart. ersetzt C āræfnan durch (ā)folian, ebenso H. in Dial. In einem anglisch gefärbten Stück ed. Logeman Angl. 12,501 ff, wird arefnan S. 505,4 510,20 durch folian, gefremman glossiert; ebenda auch in durch on, sceddan durch derian!

² ohne Hymnen.

fēogan (got. fijan, ahd. fēēn, an. fiā) verschwindet also in der ws. Prosa früh, während es sich im Angl. erheblich länger erhält. Es kann also nicht mit Wildhagen a. a. O. (dessen Zusammenstellung ich nachträglich vorfand) schlechthin als anglisch bezeichnet werden. In der Poesie überwiegt fēogan (doch Beow. 2 hatian, daneben das alte Part. hettend, zu got. hatjan).

ge-fēon gegen fægnian.

I. Anglisch. Vesp.-Ps. gefeon gaudere, exultare 43, ebenso Jun. (doch 113,4 wynsumian!) und Cambr. Royal meist blissian, fægnian, daneben upahebban (= exultare!), doch noch gefeogan aus d. Vorl.: 15,9,2 32,1, 39,17, 47,12, 50,10, 67,5, 70,23, 74,10, 95,12, Cant. fægnian (11), blissian (9) u. a., doch noch 3 gefeon a. d. Vorl.: 70,23, 95,11, 149,5.

Mart. 92,11 B gefeonde, C fægnigende.

Beda gefeon 27. Bändert meistens, z. B. 464,2, 470,25 fægenian, 62,13, 302,8 blide für gefeonde, 40,9 geferde (!), 272,3 gesegon (!) für gefege, -on, 380,20 BOCa (ge)fægnian, 272,3, 372,17 glossiert Ca mit blissian. Besonders wird das Praet. vermieden, vgl. Deutschbein S. 171, 194.

Dial. gefeon 10 (in H vermieden 169,10, 170,9), fægnian 5.

Bl. Hom. gefion 18.

R₁ gefeon 3.

Lind. gefeaga 34, R₂ gifeaga 18.

Rit. gifeaga ca. 40.

II. Ws. Past. gefeon 4 (109,2, 183,1, 207,18, 417,2), fwgenian 21, gefægen 'fain' 305,7,8.

¹ Sichere me. Belege fehlen. fede Cursor Mundi 12948 ist = fende, ne. fiend. fode OEHom. II 209 (EETS. 53) = foe-ed 'sat at enmity', ganz unsicher feid Misc. 86.

² gesiehde.

Boet. fægenian, fag(e)nian 1 16.

Aelfc. Hom. fægnian 10, fægnung 3.

Aelfc. HL. fægnian 14.

A. Test. fægnian 3.

Evang. (ge)fægnian 7, (blissian 12).

(Wulfst. 265,12 gefeod ist nicht ws., s. semninga).

Das primäre fēon (ahd. gifehan) wurde also früh im Ws. durch fægenian (schon got. faginon, an. fagna) verdrängt, erhielt sich aber länger im Angl. Das ursprünglich wohl adjektivische fagen, fægen = ne. fain (Kluge Stammbild. § 227) bleibt aber auch im Süden. — Die Poesie hat, wie zu erwarten, weitaus überwiegend gefēon.

prāg Zeit.

I. Anglisch. Corp. Gl. 1064 interim: prage.

Beda 400,13 T sume prage, B läßt p. aus.

Dial. 130,16 CO prage, H hwile.

Ferner prag Laeceboc II 7 S. 56, 19 u. ö., Bl. Hom. 117,24, 131,19, häufig in Poesie, auch in Metra und Chronik-Ged., vgl. S. 65 ff.

II. Ws. wodprag Past. 183,21,25, 185,4 furor, vesania, sio wode prag Boet. 111,28 Hs. B. Dem späteren Ws. ist prāg offenbar fremd, vgl. Beda B, Dial. H.

Die me. Belege (Stratman S. 635) sind die Fortsetzung des Anglischen. Zu prag in Eule und Nachtigall vgl. Einl. S. 9, zu prag Lamb. Hom. EETS. 29 S. 35 vgl. das unter gegan S. 28 Fn. 2 Bemerkte.

Etymologisch ist prag unklar.

¹ Man darf hiernach fag(e)nian nicht mit Kluge Grdr. I S. 933 auf an. fagna zurückführen, vgl. NED. s. v. fawn, Björkman Loanwords S. 111.

esne servus.

H. Bartlett S. 21 erklärt esne (got. asneis, alid. esni) in der Bedeutung servus für spezifisch anglisch. Allein, wie bereits Klaeber Angl. 27,263 erkannt hat, ist esne servus im Ws. archaisch, es begegnet im Süden in den ältesten Gesetzen und bei Aelfred Past. 143,1, 199,3, erhielt sich aber länger im Norden (R1, Lind. R2, Rit.). — Während esne = servus im Süden durch pēow verdrängt wurde, erhielt es sich hier in der Bedeutung vir, z. B. in Aelfc. A. Test., Byrhtferds Handboc, Kluge Angl. 8,321,330,334.

snyt(t)ru gegen wisdom.

I. Anglisch. Vesp.-Ps. sapientia = snytru 9 (insipientia = unwisdom 3, scientia wisdom 5), ebenso Jun.; Cant. snytru 6, wisdom 3 (vgl. Wildhagen S. 188); Royal nur wisdom, Spelman wisdom 8, wisdom vel snytro 1 (18,8). — Par.-Ps. I nur wisdom.

Beda snytru 5, wisdom 14.

Bl. Hom. snyttro 3, wisdom 2.

R₁ sapientia = snyttru 3.

Lind. sapientia = snytru 10, (prudentia meist = ho-gascipe); R₂ snytru 6.

Rit. snytro 12.

II. Ws. Past. snytru 1, wisdom 55.

Boet. snyttru 2, wisdom häufig, s. Sedgefield Glossar.

Ben. R. Schr. snytru 1, wisdom 5.

Aelfe. Hom. wisdom ca. 100.

Aelfc. AT. wisdom 10, auch in Aelfc. HL. nur wisdom.

Ev. sapientia = wisdom 10.

Dadurch wird Wildhagens Vermutung a. a. O. wenigstens insofern bestätigt, als snytru im Ws. durch wisdom

verdrängt wird, sich aber im Angl. erhält. Das Stammwort snotor ('weise', z. B. se ~a Salomon, doch auch 'klug, sagacious') bleibt auch spätws. gebräuchlich, bei Aelfc. sogar häufiger als wis. Dazu neu gebildet snotornys.

tīd gegen tīma.

I. Anglisch. Vesp.-Ps. tid tempus $27 \times$ (mit Komp.), ebenso Jun., Royal, Cant. nur tid, aber Spelm. unter 18 Fällen 1 tima (68,16). — Par.-Ps. I tid 7, tima 1.

Mart. tid ca. 160.

Beda tid tempus, hora ca. 325.

Dial. Greg. tid ca. 140, in H dafür mehrfach tima. Bl. Hom. tid 37.

Chad tid 10.

R₁, Lind., R₂, Rit. tid sehr häufig, s. die Glossare. II. Ws. Past. tid 'Zeit' 16, 'Stunde' 1 (121,15), tima 17. Boet. tid 'Zeit, Jahreszeit' 12, tima 'Zeit, Gelegenheit' 5.

Ben. R. Log. tid hora 53, tempus 16, tima hora 1¹, tempus 4.

Aelfc. Hom. tid 'Zeit, bes. bestimmte Zeitperiode, Jahreszeit, Festzeit' ca. 84, 'Tageszeit, Stunde' ca. 27.2 (tid stets in Kompositis wie gebyrd-, freols-, winter-, easter-, non-, underntid etc., auch in hwiltidum). tima 'Zeit allgemein, auch Gelegenheit, richtige Zeit' 104.

Evang. tid tempus 32, hora 60, tima tempus 6, hora 9. Wulfstan Nap. tid 5, tima 22.

Während also in der angl. Prosa 'Zeit' in allen Bedeutungsnuancen nur tīd heißt, wird in der ws. tīd unter

- ---

¹ 44,14 timam horis geandert in tidum.

² Die Behauptung Beldens (The prepositions in, on, to, fore, æt in ags. prose, Diss. Balt. 1897) S. 36. Aelfric gebrauche tīd nur für 'Stunde', bestätigt sich also nicht.

der zunehmenden Konkurrenz von tima zurückgedrängt und in der Bedeutung spezialisiert. In der Poesie begegnet fast nur tid. tima belegt Grein poetisch nur mit Guthlac 726 (in usscra tida timum — hier tritt der Bedeutungsunterschied zu Tage) und Phönix 246. — Vgl. über tid und tima auch Imelmann das ae. Menologium, Diss. Berlin 1902, S. 27. —

Zu tid vgl. as. tid, ahd. zit, an. tid; zu tima (Kluge Stammbild. § 128 Anm. 1) an. timi 'Zeit, Zeitraum, Stunde, Zeit, in der etwas geschehen muß' (dän. time, schwed. timma, e 'Stunde', dän. schwed. tid 'Zeit').

cēgan 'rufen' gegen clipian.

I. Anglisch. Vesp.-Ps. (in)vocare stets = (ge)cegan, (clamare = clcopian). Ebenso Jun. (in)vocare = cegan, Cant. cigan (nur 24,20 gecleopian), Royal (ge)cigan, Spelm. cegan, cigan, cygan. — Par.-Ps. I invocare = cleopian.

Beda vocare 'rufen' = cegan 28 (in B oft vermieden), clipian 1. vocare 'nennen' = cegan 23. clamare = clipian 11.

Dial. Greg. vocare 'rufen', accessere = cigan ca. 40, (in H oft vermieden). clamare meist = clipian.

Bl. Hom. 'rufen' = cegan, cigean 14, cleopigan 16.

R₁ vocare 'rufen' = cegan 14², cliopigan 4. clamare = cegan 7, cliopigan 11.

Lind. vocare 'rufen' = ceiga 71, cliopiga 2, vocare 'nennen' = ceiga 54. clamare = ceiga 16, cliopiga 59.

R₂ vocare 'rufen' = ceiga 47, cliopiga 4, vocare 'nennen' = ceiga 29. clamare = ceiga 29, cliopiga 40.

¹ Ob dies unabhängiges Ws. ist, ist fraglich, schon wegen des häufigen cegan, vgl. Einl. S. 11.

² Die Stelle Mk. 1,20 nicht mitgerechnet. Da Farman hier von Lind. abhängig ist, rechne ich sie zu R₂.

II. Ws. Past. 'rufen' = ciegan 5, (ge)clipian 24.1

Ben. R. Log. (in)vocare 'rufen' = clipian 3, 'nennen' = cigan 2. clamare = clipian 5.

Aelfc. Hom. 'rufen' = $cigan \ 5$ (I 532,17, II 122,1, 298,3, 488,23,30)², = $clypian \ 147$, 'nennen' = $cigan \ 56$.

Aelfc. HL. (excl. XXIII B, das nicht von Aelfc.) 'rufen' = $cigan 8^2$, = clypian 142. 'nennen' = cigan 25.

Evang. vocare 'rufen' = gecigan 1, clypian 42. clamare = clipian 34.

Im Angl. also wird für 'rufen, vocare' fast ausschließlich cēgan gebraucht, während in der Bedeutung 'laut rufen, clamare' clipian vorwiegt. Dies gilt auch noch für
die spätere Zeit, namentlich im Spätnordh., aber auch in
Bl. Hom. Ws. dagegen tritt cīegan in der Bedeutung 'rufen' schon bei Aelfred zurück, und spätws. gilt für rufen,
vocare und clamare, mit wenigen Ausnahmen nur clipian,
während cīcgan fast nur noch in der spezialisierten Bedeutung 'bei Namen rufen, nennen' erscheint.

frignan gegen āscian.

I. Anglisch. Vesp.-Ps. interrogare = frignan 5, Royal, Spelm., Cant. haben dafür ascian.

Mart. frignan 5.

Beda. frignan 38, be- 1, (ge)ascian 29. B vermeidet frignan mehrfach.

Dial. (ge)frignan 21, (ge)ascian 86.

Chad. fregnan 3 (Z. 139, 140, 178).

Bl. Hom. frignan 4, be- 2, ahsian 8, be- 2.

¹ Vom lat. Text ausgehend, finde ich vocare = ciegan 1 (39,9), clipian 3, clamare = ciegan 1 (379,19), clipian 5.

² Die meisten dieser Fälle in Zitaten direkter Rede.

 R_1 interrogare = (ge) freguen 7.

Lind. interrogare = (ge)fregna 90, be-1, (gefrāsiga 6), 1 (ge)asciga 4. I. g. -fregna 101, (ge)asciga 7.

R₂ interrogare = (gi)fregna 68, (gi)asciga 2.

II. Ws. Past. frignan 6, (ge)ascian 6, ascung 1.

Oros. frignan 3, (ge)ascian 34.

Boet. frignan 2, (ge)ascian 18, ascung 1.

Ben. R. Schr. ascian 8.

Aelfc. Hom. befrinan 62, (ge, of) axian 62.

Aelfc. HL. befrinan 25, (ge, of) axian 117.

Aelfc. A. Test. befrinan 3, (ge, of) axian 13.

Evang. interrogare = ahsian 76, kein frignan!

In der Poesie überwiegt frignan.

Es ergibt sich, daß das Angl. vorwiegend frignan, das Ws. immer mehr āscian gebraucht, doch neigt das Südmercische hier mehr zum Ws. Nordischen Ursprung des mehr nordanglischen fregnan mit e (Nordh., R1, Chad.) hält Björkman S. 239 für sehr zweifelhaft. Ablehnen kann man ihn aber doch wohl kaum für das schwach flektierte fregna in Lind. (das südlichere R2 hat nur starke Formen). Vgl. ne. dial. frayn Scot., Yorks., Lanc.

Die Pronomina auf h(w)ugu,

hwele-, hwæt-h(w)ugu, -hwega (Sievers Gramm. § 344) scheinen sich im Norden etwas länger erhalten zu haben. In Lind. und R₂ sind sie noch häufig: aliquis meist = hwele-hwoegu, aliquid = hwot-hwoegu (in Lind. beide i. g. 21 mal), doch quidam, quispiam = sum, quisquam, ullus, (ali)quis negativ = $\bar{x}nig$. Auch die Bl. Hom. haben noch mehrere

¹ frāsigan ist ebenfalls vorwiegend anglisch (Lind., Poesie.), doch auch Solil. 34,7, s. genu S. 49.

hwylc-, hwæt-hugu, hwega. In den ws. Ev. dagegen finden sich nur noch sum, ēnig (-ping)! — Im älteren Ws. noch ziemlich gebräuchlich (Past. hwæthwugu 17, hwelchwugu 2, 397,25,281), werden diese Formen bei Aelfric selten (Hom. hwæthwega 9, HL. hwæthwega 1, forhwega 2, A. Test. kein Fall). Hs. B in Beda vermeidet hwylc-hwugu stets und setzt dafür sum (vgl. Klaeber Angl. 27,246), während sie hwæthwugu fast immer beibehält. Ähnlich H in Dial. — huhugu ist nur anglisch (Klaeber 426).

bearn gegen cild.

Beide sind nicht völlig kommensurabel. bearn bezeichnet i. a. entsprechend seiner Etymologie ('das Geborene') vorwiegend 'Abkömmling, Nachkomme (Sohn, Tochter), im Verhältnis zu den Eltern', dagegen cild (obwohl etymologisch 'Leibesfrucht') mehr den Altersbegriff 'das Junge, Unerwachsene'. Dementsprechend brauchen die Übersetzungen i. a. bearn für filius, natus, liberi, dagegen cild für parvulus, infans, puer.

Vgl. Lind. bearn natus 1, cild infans, parvulus 12, R₁ bearn natus 22, cild parvulus, infans 3, Past. bearn i. a. = filius, cild parvulus, ws. Ev. bearn filius 62, natus 2, liberi 1, semen 1, cild puer 19, infans 6, parvulus 2, filius 1, Aelfc. A. Test. bearn filius, sehr häufig in Israhela bearn 'Kinder Israel', liberi 15, cild puer 7, (filius 7, liberi 1). So wird auch in Verbindung mit einem die Eltern bezeichnenden Gen. oder Poss. Pron. bearn gebraucht, z. B. Adames, min bearn. In der Regel heißt es bearn cennan, strynan, -ēacen, -lēas, aber cildhād 'Kindesalter'.

Aber cild fängt spätws. schon an, über diese Bedeutungsgrenze hinauszugehen und bearn zurückzudrängen,

¹ Daneben hwæthwuguningas 155,15 H, C-ununges.

vgl. in Aelfc. ATest. 7 cild = filius (s. o.), stēopcild neben seltenerem stēopbearn, mid cilde 'with child' gegen bearn-ēacen (älter mid bearne). Im ganzen hat Past. 26 bearn, 4 cild, aber Aelfc. Hom. ca. 164 bearn, 196 cild. Im Anglischen können wir eine solche Abnahme von bearn nicht beobachten (Bl. Hom. 19 bearn, 4 cild in Bedeutung ungefähr wie oben), und bearn hat sich in nordengl., schott. bairn 'Kind, Tochter, Mädchen' erhalten, wobei allerdings auch der Einfluß des skand. barn zu berücksichtigen ist, vgl. Björkman S. 230. —

Was das Verhältnis von bearn zu den Spezialbegriffen sunu und dohtor betrifft, so vermutet Wildhagen S. 188, daß ersteres der poetisch-heidnischen Literatur' augehöre, während die 'südhumbrisch-christliche Prosa' die beiden letzteren gebrauche. Diese Vermutung beruht wohl darauf, daß der Vesp.-Ps. und mit ihm der Cant.-Ps. filius, filia durch bearn wiedergibt, die ws. Psalter aber sunu und dohtor bevorzugen.1 Auch sonst überwiegt im Spätws. für filius weitaus sunu (in den Evang. $227 \times$, in Aelfc. AT. bearn meist nur im Plural, s. o.), aber auch in Lind. und R2. Daß Wildhagens Fassung des Verhältnisses nicht haltbar ist, geht schon aus den oben angeführten ws. Belegen von bearn filius hervor, und man vgl. nur die Belege von bearn und sunu bei Grein! Doch ist der Gebrauch von bearn == filia in Vesp.-Ps. und Cant.-Ps. vielleicht mit nordengl. bairn 'Tochter' als spezifisch anglisch in Verbindung zu bringen.

seap gegen pytt.

Nach H. Bartlett S. 20 findet sich sēap, ausgenommen

¹ Unter 12 Fällen hat Royal 4 bearn, 1 sunu vel bearn, Spelm. 3 bearn, 1 bearn vel sunu, 8 sunu.

Jordan, Eigentümlichkeiten des angl. Wortschatzes.

einen Beleg im Liber Scint. (und Cant. Ps.) nur in anglischer Prosa (Vesp.-Ps., Lind. Rs., Beda, R1), in anglischer Poesie und den Metra und ist deshalb 'doubtless peculiarly Anglian'. Dieser Angabe widersprechen jedoch ff. ws. Belege von sēaā: Past. 463,17 (daneben 6 pytt), Boet. 9,11, 112,14 (horuscap), Aelfc. Hom. I 489,5, 570,28, 572,3,5,11, II 162,11, 222,2, 320,15, HL. 5,458 (adelseap), 468, 16,81, 36,295 (1 pytt), Aelfc. Gr. 79,10, Canones Aelfrici 23, L. a. I. S. 445, Eccles. Inst. L. a. I. S. 467. Auch Spelm.-Ps. hat für lacus nur seap. sēap (vgl. Sodbrunnen) kann daher nur in ganz beschränktem Sinne als 'peculiarly Anglian' angesehen werden. Es wird im Ws. durch pytt zurückgedrängt und erhält sich länger im Anglischen, vgl. sead Lazamon 841, ne. dial. seath, seeth (veraltet) 'brine-pit' Chesh.

embiht n. Amt, m. Beamter.

Im Anglischen begegnet dieses alte Wort (vgl. got. andbahti n. Amt) außer in Glossen (Ep.-Erf. 187, 866, Corp. 501, 1706, davon abhängig WW. 364,38) und Dial. Greg. 238,21 (ambihtmæn), 251,14 (onbyhtan vb.) und in Poesie besonders häufig im Spätnordh.: Lind. R2, Rit. embeht, -iht, -mon, embihtiga. — Im Ws. dagegen ist es sehr selten, abgesehen von ambihtsmid 'Dienstmetallarbeiter' in Ges. Aethelberhts 7 (Liebermann S. 3) findet sich nur ambihtmen in den Eccles. Inst. (Thorpe L. a. I. S. 473, ca. Mitte 10. Jh.) und ambihthus officina Angl. 13,441; ein poetischer Beleg aus dem Süden ist ambeht Metra 11,9. Dafür, daß das Wort im Norden länger fortlebte, spricht auch amboht bei Orm. 2329, wenn dies nicht nordisches Lehnwort ist, vgl. Björkman S. 226.

recen, recone.

- 1. recen adj. 'bereit, schnell' in Posie, s. Grein Sprchsch. S. 370.
- 2. recene, recone, i, adv. 'schnell, sofort' ist häufig in Lind. R₂, recone statim, confestim, continuo, und begegnet ferner Rit. 178,7 recone, Beda 38,14 CaB 'rec(e)nust, Chad Z. 119 ricene, Dial. Greg. 161,6, 314,5 recene, zudem in Poesie. In ws. Prosa finde ich es nur bei Aelfc. Hom. I 86, II 144, 160 ricene, Hom. Assm. X 265 J ricene, N ræcene. (Die i-Form ist also ws.). Im ME. erhält sich recen, -līce im Anglischen, vgl. Stratman S. 501. —

Es entsprechen afries. rekon 'offen, gerade' ndd. reken 'richtig, ordentlich, rein'. Vgl. Kluge Stammbild. § 227. Der Wechsel von e und i im Ae. beruht auf Suffixablaut. Es liegt wohl die Wz. (s)rek 'recken, strecken' zugrunde, recone entspricht also etwa unserem 'stracks'.

Anmerkungen.

Zu beam und treo.

In der Bedeutung 'Baum' wird beam — abgesehen von der Poesie — fast nur noch in Kompositis gebraucht, vgl. Med. de Quad. I 5 to pam treowe pe man hatep morbeam! beam allein findet sich noch Boet. 117,29 und Aelfc. Hom. II 508,30, sonst nur trēo. Ein dialektischer Unterschied läßt sich kaum feststellen. Höchstens wäre darauf zu verweisen, daß Lind. R2 ficheam haben gegen ws. Ev. fictreo. — Aelfc. Gr. hat lawerbeam, cederbeam, aber boc, box-, fic-, pin-, plam-, win-treo.

¹ N ist anglisch, vgl. Klaeber Angl. 27,399 zu gēmung 'Hochzeit'.

² Daß das Wort aus dem Angl. ins Ws. gedrungen wäre, wird dadurch unwahrscheinlich, daß es auch im Mercischen nicht überaus häufig ist, sondern nur im Nordh. Anders semninga.

Einige Berichtigungen zu unvorsichtigen Aufstellungen:

Mit größter Einschränkung nur kann man Sweets Behauptung Stud. Dict. S. 81 'hana not ws.' (vgl. auch Hist. of lang. S. 34) aufrecht erhalten. Die ws. Ev. haben 6 hana, 6 cocc, außerdem finde ich hana Aelfc. Hom. II 246,4, 248,33.¹ Richtig ist wohl nur, daß cocc im Süden aufkommt und hier dem alten Wort zuerst Konkurrenz macht.

Auf Sweets Bemerkung 'not. ws.' bei nēosian beruht wohl Deutschbeins Hinweis S. 171. Daß es in Past. und Oros. fehlt, beweist doch an sich nichts. Es ist bei Aelfric häufig, z. B. Hom. I 56, 58, (nēosung), 128 u. s. w.

Wildhagens Aufstellung über niowolnis abyssus S. 184 kann ich nicht für berechtigt halten. Abgesehen von Spelm.-Ps., wo ja immer noch anglischer Einfluß denkbar wäre (vgl. nympe), begegnet niwelnis in Aelfc. Gen. 1,2, 7,11, 8,2, Aelfc. Gr. 30,4, in den Hom. finde ich es zufällig II 350,21, 24,32, ferner Angl. 7, Sigewulfi Interr. Z. 342, u. s. w.

¹ hana neben cocc auch in den südlichen (kentisch gefärbten) Glossen zum Durham Hymnarium, vgl. Chapman's Glossar Yale Studies 24.

Kapitel III.

Zur nominalen Stammbildung.

Es erübrigt noch, auf einige Wortgruppen hinzuweisen, in denen das Anglische gewisse Eigentümlichkeiten der nominalen Stammbildung zeigt.

I.

Ein wichtiger dialektischer Unterschied betrifft die Bildung der Verbalabstrakta auf -nis. (Kluge Stammbild. § 138 ff., v. Bahder Verbalabstrakta S. 122 ff.).

Das Ws. bildet Verbalabstrakta auf -nis im allgemeinen nur denominativ, also vom Partizipium (meist Praeteriti), das Anglische dagegen bildet sie vom Verbalstamm. Das Altws. hat Bildungen vom Verbalstamm noch zahlreicher als das spätere.

Ich muß es mir versagen, hier das gesamte Belegmaterial anzuführen und der Entwicklung der Erscheinungen genauer nachzugehen. Ich begnüge mich mit ff. 10 Beispielen:

- 1. Angl. ācennis(sc) Lind., R1, Vesp.-Ps. u. s. w., ws. acennes Aelfred Past., doch ācennednes Aelfred Boet., Aelfc., Evang.
- ¹ R₂ nenne ich nicht besonders. Über die Flexion der nordh. nis-Abstrakta handelt Lindelöf, Beiträge zur Kenntnis des Altnordh., Mém. de la Soc. Néo-philol. à Helsingfors I S. 274 ff.

- 2. gecēgnes, cīgnes Beda 172,30 T, -cyg(e)dnes OCaB und Nap. OEG.
- 3. gedréfnis, -dræfnis Lind., R1, Beda, Vesp.-Ps. 68,20 (aber -edniss 70,13), gedréfednes Aelfred, Aelfc., Evang.
- 4. -lēsnis Lind., R₁, Vesp.-Ps., Beda, Bl. H., -lysednes Aelfc., Evang.
- 5. gemengnis Beda (neben -ednis), gemengednys Aelfc. (doch gemengnis Past.).
 - 6. to-stenenis Vesp.-Ps., to-steneednys Aelfe., Spelm.-Ps.
- 7. geswences (neben -ednes) Beda, geswencednys Aelfc., Evang.
- 8. ætēawnis (selten eawdnis) Lind., ætīwnys Beda 62,13 T, Dial. 19,4 CO. ætīwednys Beda B, Dial. H.
- 9. -prycnes R₁ Beda, -pryccednes Aelfc., Evang. (prycnes Past.).
- 10. (von starkem Vb.) flownis Lind., R1, Bl. H., flowendnys, flowednys Aelfc. (flownes Past.).

An den Handschriften in Beda, Dial. und Mart. läßt sich der Unterschied öfter beobachten. Wo dem Ws. das nis-Abstraktum nicht geläufig ist, setzt es für das vom Verbalstamm gebildete nis-Abstraktum der angl. Vorlage oft andere Bildungen, z. B. in Beda B herung für herenes, lēaf für lēfnys, röwett für röwnes, weore für wyrenis. Die nis-Abstrakta sind also im Angl. häufiger als im Ws. Klaeber Angl. 27,417 ist dem Sachverhalt schon nahe gekommen, wenn er -nis 'ein für den Beda bezeichnendes Generalsuffix' nennt. Der Regel fügt es sich nun auch, wenn Wildhagen S. 183 fyllnes als spezifisch anglisch bezeichnet gegenüber ws. gefyllednes.

eine gewisse Produktivität des Suffixes -ig in sekundärer Verwendung.

Adjektive (oder Part.) werden ohne Bedeutungs-wechsel durch -ig weitergebildet (vgl. Kluge Stammbild. § 206).

- 1. druncenig ebrius Lind. Lk. 12,45 (pætte se druncenig inebriari).
- 2. untrymig infirmus Lind. R₂, zu untrum.¹ Dies untrymig könnte auf untrymiga (statt untrumiga) 'krank sein, werden' eingewirkt haben (anders Sievers Gramm. § 416 Anm. 11 f.), doch wurde vielleicht im Nordh. auch umgekehrt die Weiterbildung auf ·ig durch die Inf. der II sw. auf ·iga begünstigt.
- 3. prostrig tenebrosus Lind. Lk. 11,34, Mk. 8,17, Mt. 6,23 (aber R₂ diostor, R₁ diostre!). Doch auch pystrig Dial. 76,9 (alle Hss.) und Kent. Gl. WW. 56,1 per uias tenebrosas: durh d[r]iostrie weogas.
- 4. wæstig desertus Lind., Rit., Ra und Ri, sowie wēstig Chron. a.º 449 (Earle S. 12, 13). (Letzteres wie das vorige, kentische Beispiel, ein Rest der Bildung im Süden.)
- 5. Ein aus gesyndgad prosperatus Beda 320,12 T erschlossenes gesyndig finde ich belegt in gesyndge T 386,13 (B gesundiglice).
- 6. Hierher wohl auch cypig: Lind. Mt. 26,73 cuđ vel cydig manifestus, Jh. 15,15 cuđa vel cydigo nota (R2 cyde), Jh. S. 6,2 cydig cognitus. Vgl. mhd. kündec, -ic 'kund, bekannt', afries. kundeg-ia 'verkünden', an. úkunnigr 'unbekannt'. Daneben aber findet sich auch die vom Stammwort abweichende Bedeutung kundig: Lind. Lk. S. 7,18 uncydig ignorans, Rit. 4,12 gicyđig cognitor, Vesp.-Ps. 24,7

¹ R₁ hat untrum, aber auch einige untrym, die wohl von verbalem untrym-nis beeinflußt sind.

unondcydignis ignorantia, Elene 961, 725 un-, oncydig, vg!. ahd. kundig 'kundig, persuadens', mhd. kündec 'klug, geschickt'.

Aus Kluge Stammbild. § 206 entnehme ich:

- 7. haswig-federe Phönix 153, zu hasu.
- 8. salwig-federe Gen. 1448, -pād Man. Wyrd. 37, Jud. 211, Aethelst. 61, zu salo.

Adjektivierende Bedeutung kann -ig haben in gestig¹ 'hospes, Gast seiend' Lind. Mt. 25,38.

Die sekundäre Ableitung durch -ig ohne Bedeutungswechsel hat sich also vorzugsweise im Anglischen und namentlich im Nordh. erhalten. Nach Kluge § 206 ist sie speziell dem Kontinentaldeutschen eigen.

III.

Merkwürdig ist eine adjektivische Kompositionsbildung auf -welle im Nordh.

- 1. cwic vel lifwelle uxter aquam vivam Lind. Jh. 4,10, Rz cwic-welle.
 - 2. hārwelle canescens Lind. Mt. S. 1,5.
- 3. hundrað vel hundwelle centesimus Mt. 13,8 (R₁ hund-teontig, ws. hund-feald).
 - 4. rūm-welle spatiosus ib. Mt. 7,13 (rūm R1 ws.).

dēad-wielle 'barren' nennt Sweet Stud. Dict., mir fehlt der Beleg. —

Sweet setzt ws. *wielle an, ebenso Foley S. 29. Foleys Verweis (S. 6) auf Bülbring El.-B. § 175 Ann. besagt nichts, welle Brunnen' kann nicht in Frage kommen. Liegt etwa ein ja-Stamm wallja 'wallend' oder 'das Wallen' (mit Bahuvrihi-Komp.) vor? So ließen sich ewie-, līf-, hār-, rum-

¹ Wegen atih, bosih s. Fn. zu bosih S. 68.

welle noch verstehen, hundwelle 'hundertfältig' wäre mit Verdunklung der Bedeutung analogisch gebildet.

IV.

Bekannt ist schon die nordh. Umbildung des Suffixes en > ern, vgl. Miller I Einl. S. L, Füchsel S. 85. Wir haben ff. Beispiele:

- 1. ēfern vesper Rit. (auch efen). Dazu eferntid Lind. R₂, efernlociga advesperascere Lind., efernlic vespertinus Rit.
- 2. fæstern jejunium (auch fæsten) Lind. R₂, Rit. wuda fæstern 'Waldfeste' Ged. auf Durham, Gray-Birch Cart. Sax. No. 686.¹
 - 3. wæstern desertum, Lind., woestern, -en R2, Rit.

Miller stellt hierher auch aus Beda frēcernisse, nesse 76,20 T, 382,8 C. Ob aber dies mit dem nordh. -ern in Zusammenhang steht, ist nicht ganz sicher. Daneben stehen auch andere Umbildungen, frēcelnis (214,15), frēcednis, und Beda hat fæsten 350,32,33. Farman, der dem Nordh. ja am nächsten steht, hat ēfen, fæsten, wōesten nicht nur in der von Lind. unabhängigen Glosse zu Matth., sondern auch in Markus Cap. 1 (woesten Mk. 1,12,13, æfen 1,32), obwohl er hier im Wortlaut der Übersetzung von Lind. abhängig ist. Er vermeidet hier -ern als seiner Sprache fremd. Demnach scheint das anomale -ern eher spezifisch nordh. zu sein.

Was nun die Erklärung dieser Erscheinung betrifft, so ist Füchsels Vermutung, sie sei aus Kontamination mit dem Suffix -ari entstanden, nicht glücklich. Es muß Analogiebildung an Worte auf -ern vorliegen, und hier bieten

¹ Doch vgl. auch wudu færsten (für fæstern?) Chron. E. Earle-Plummer S. 5.

sich als Träger der Analogie ganz passend nihtern(e) adj. nocturnus (z. B. Angl. 13,377,182; 398,470) nordh. *næhtern, dægþern 'täglich, Tageszeit' (bei undern 'Morgen' hat die zweite Silbe wohl starken Nebenton). Von diesen Zeitbestimmungen konnte -ern zunächst auf efen 'Abend' übergehen (dazu stimmt, daß in Lind. und Ra nur bei efern konstant -ern begegnet), von efern aus dann durch rein lautliche Analogie auch auf andere Worte auf -en. — Vielleicht wurde im Spätnordh. die Endsilbe ern mit sehr geringem Nebenton und schwacher Artikulation des r gesprochen. Im Streben nach sorgfältiger Aussprache konnte dies die analogische Übertragung erleichtern. 1

V.

An Einzelheiten sei unter dem Gesichtspunkt der Stammbildung noch folgendes erwähnt:

1. Zu den s-Stämmen: Das Anglische bevorzugt Formen mit bewahrtem s = r.

morpor, nach Sweet Stud. Dict., 'not ws.' Jedenfalls ist es nicht strengws. Aelfred und Aelfric haben morp. In Napiers Wulfstan S. 253 trifft morpor mit andern angl. Merkmalen zusammen (s. semninga), ebenso Angl. 12,501 (s. S. 88 Fn. 1), außerdem findet es sich Wulfstan S. 290, Conf. Ecgb. L. a. I. S. 344, 351 (vgl. efolsian?), Poen. Ecgb. ib. S. 386, 387, in der Poesie auch Metra 9,7,33, vgl. S. 65 ff.

Deminutivsuffix erna sieht Kluge Et. Wb. in Dirne, Eichhorn (?), got. widuwalrna. Auffallend berührt sich nihtern mit lat. nocturnus, andererseits dwg-pern mit diu turnus (trna neben rna), vgl. Wilmanns DGr. II § 244,2. Auch im Deutschen scheint sich von 'eisern', mhd. iserin, isernin, das r von got. eisarn bewahrt, -ern analogisch auf steinern (mhd. steinin), hölzern etc. ausgebreitet zu haben.

sigor ist vorwiegend poetisch-anglisch, beachte sigor Dial. Greg. 122,24, Ep. Al., Hom. Assm. 18,202 (Klaeber Angl. 27,251 Fn. 3). Es begegnet aber auch Aelfc. Hom. I 594. Ws. i. a. nur sige.

beger Beere, winbeger Lind. R2, R1. Doch ws. beigbeam Lk. 20,37.

stæner(e) pl. petrosa Lind. R₂ (R₁ stænig, ws. stæniht) vgl. Sievers § 290 Anm. 3.1

- 2. gemyne recordatus R₁ 5,23, ein bemerkenswerter Rest adjektivischer *i*-Stämme auf angl. Boden, vgl. Sievers Gramm. § 302, Kluge Stammbild. § 178. Die übrigen Beispiele, welche Sievers anführt, begegnen mit Ausnahme des indeklinabeln *lyt* nur in poetischen Texten. Neben gemyne steht gemun Oros. S. 48,11.
- (3. Über die späte Produktivität der Patronymika auf -ing in Lind. Lk. c. 3 vgl. Kluge § 26 a; doch sind die letzten Beispiele in der Chronik D 1067 noch jünger.)

bemerken: Beide sind nur vorwiegend poetisch, wohl archaisch und nicht spezifisch anglisch. dögor ist bei Aelfred (Past. 281,13, Oros. 168,6) belegt, scheint sich allerdings im Nordh. am längsten erhalten zu haben. rodor findet sich u. a. noch bei Aelfric, z. B. Hom. II 138, 256, Angl. 7, Interr. Sigew. Z. 143, häufig in der Über setzung von Basils Hexameron. Für das Nordh. charakteristisch ist jedoch dæg (*dögiz).

Kapitel IV.

Ergebnisse.

Fragen wir zum Schluß nach den über den Einzelheiten stehenden Ergebnissen der Untersuchung, so können diese in zwei Richtungen liegen: nach vorwärts, d. h. nach der späteren Sprache, dem NE. zu, und nach rückwärts, in der vorliterarischen Periode.

I.

Untersuchen wir zunächst, was sich an Beziehungen beider Dialekte zur ne. Schriftsprache ergibt. Selbstverständlich soll hier nicht etwa versucht werden, vom Ae. aus den Ursprung der ne. Schriftsprache zu bestimmen, da doch ein Zeitraum von etwa drei Jahrhunderten zwischen dem Ende der ae. Periode und den Ansätzen zur Entwicklung der ne. Schriftsprache liegt. Wohl aber kann es von Interesse sein, festzustellen, welcher der beiden Dialekte schon in ae. Zeit im Wortschatz der ne. Schriftsprache näher stand — soweit dies auf Grund unseres Materials möglich ist.

Stellen wir die in Kap. I und II behandelten Fälle zusammen, in denen sich Äquivalente im Anglischen und Wests. gegenüberstehen, und vergleichen wir damit das im NE. erhaltene Wort, so ergibt sich folgendes:

I. (Bei den zuerst genannten — aus Kap. I — fehlt das anglische Wort dem Ws. von Anfang an, bei den andern — aus Kap. II — schwindet es erst später.)

Angl Mercisch.	Ws.	NE.	
1. roc(c)ettan	bealc(ett)an	to belch	
	bielc(ett)an		
nemne-nympe	b ūton	but 'nisi'	
bebycgan	sellan	sell	
2. fēogan	hatian	to hate	
gefēon	fægnian, fag(e)- nian	to fain, fawn	
snyttru	wisdom	wisdom	
tīd 'Zeit'	$t\bar{\imath}ma$	time	
<i>cēgan</i> 'rufen'	clipian	veraltet clepe. ycleped	
sēa p	pytt	$oldsymbol{pit}$	
hwele-hwugu	sum	some.	

Zur ersten Gruppe (Kap. I) ist noch zu nennen:

sōpfæst 'gerecht' rihtwīs righteous,

vgl. H. Bartlett S. 16 (doch sōpfæst 'wahr' auch ws.).

elcor elles else,

vgl. Klaeber Angl. 27,261,

zur zweiten (Kap. II)

esol spät nur assa¹ ass.

Obwohl von air. assan (oder cymr. asyn) herrührend, herrscht assa 'Esel' gerade im späteren Ws. vor, während das alte, vom Kontinent stammende esol sich länger auf mercischem Gebiet erhält (Bl. Hom., R1); im Nordh. kontaminierten sich beide zu asald, vgl. Kluge Grdr. 1929, Verf. Die ae. Säugetiernamen, Angl. Forsch. 12, 8. 118.

- II. Anders ist das Verhältnis zum NE. bei angl. los, ws. lor, ne. loss,
 - » in, » on, » in,
 - » morpor, » morth, » murther.

Das Ergebnis ist, daß in der weitaus überwiegenden Anzahl aller Fälle (I) das im Wests., nicht das im Anglischen vorwiegend oder allein gebräuchliche Wort in der ne. Schriftsprache erhalten ist. Man kann also behaupten, daß der ws. Wortschatz dem ne. näher steht oder ähnlicher ist als der anglische, und zwar auch der mercische. Allerdings kommt bei den meisten der zu Gunsten des Ws. angeführten Fälle das ws. Wort auch im Angl. vor (z. B. bāton, wīsdōm, āscian, sum), aber am häufigsten sind diese Worte doch im Ws., und das Ws. steht dem NE. doch auch dann näher, wenn es den im Ne. erhaltenen Ausdruck ausschließlich gebraucht, während im Anglischen ein anderer damit konkurriert.

Man könnte einwenden, in unserer Zusammenstellung überwiegten vielleicht nur zufällig auf der Seite des Ws. die im NE. erhaltenen Worte, das hier angeführte Material sei viel zu spärlich, um die Behauptung zu rechtfertigen, der altws. Wortschatz stehe der ne. Schriftsprache am nächsten.

Allein unsere Beobachtung wird ganz verständlich und erklärlich, wenn wir damit die Ergebnisse der Forschungen Morsbachs über den Ursprung der ne. Schriftsprache zusammenhalten. Nach der übereinstimmenden Ansicht Ten Brinks und Morsbachs ist der Londoner Dialekt die Quelle der ne. Schriftsprache. Der Londoner Dialekt ist aber nach Morsbach ein ursprünglich sächsischer gewesen, vgl. Ursprung der ne. Schriftsprache S. 161 und besonders S. 164; 'Es geht nicht nur aus dem Dialekt der

Londoner Urkunden, der Proklamation Heinrichs III., sondern, wie Murray treffend bemerkt, auch aus der geographischen Lage Londons, welches im alten Sachsenlande, den Grafschaften Sussex und Kent benachbart, gelegen ist, zweifellos hervor, daß die Sprache Londons ursprünglich ein wesentlich südlicher, und zwar sächsischer Dialekt gewesen ist'.

Hiernach kann es uns gar nicht wundern, wenn in ae. Zeit das Westsächsische als Vertreter des Sächsischen überhaupt im Wortschatz der ne. Schriftsprache ähnlicher ist als das Anglische, und zwar im besonderen das Mercische (vom Nordhumbrischen gar nicht zu reden, denn daß dieses ferner steht, ist wegen der geographischen Lage von vornherein zu erwarten). Das Schwergewicht der Verbreitung der unter I genannten, in der ne. Schriftsprache erhaltenen Worte lag eben in ae. Zeit nicht im Mittellande, sondern im Süden.¹

Ob dann das entsprechende anglische Wort in späterer Zeit geschwunden ist oder sich in mittelländischen und nördlichen Mundarten erhalten hat², ist für unsere Frage (S. 108) gleichgültig.

Bezeichnend ist für unsere Beobachtung noch Folgendes:

darf hier wohl auch erwähnt werden. — gen — get und frignan — āscian lasse ich hier lieber weg, da get und āscian auch im südlichen Mercischen herrschen. — Bei bearn — cild ist die dialektische Scheidung im Ae. doch noch zu undeutlich, als daß ich sie hier verwenden möchte.

² Vgl. $s\bar{e}a\bar{p}=seath$, seeth Chesh., $s\bar{o}pfxst$ 'gerecht' = soothfast 'trustworthy, honest, true' Scot. Irel. North. Lan. Lin.

Vergleicht man den Wortschatz Aelfreds mit dem der erheblich jüngeren mercischen Blickling-Homilien (deren Heimat, wenn sie aus Ostanglien stammen — vgl. S. 11, Fußnote 3 —, dem Londoner Gebiet nicht viel ferner lag als das ws. Zentrum Winchester), so ergibt sich, daß in mehreren der oben genannten Punkte (būton: nympe, fægnian: gefēon, tīma: tīd, clipian: cēgan, wīsdōm: snytru) der altws. Aelfred dem ne. Gebrauch schon näher steht als die spätmercischen Bl.-Hom. Man sieht, wie weit zurück sich diese besondere Beziehung des sächsischen Elements zur ne. Schriftsprache verfolgen läßt.

In der späteren Entwicklung übten natürlich andererseits auch mittelländische und nördliche Dialekte ihren Einfluß auf die Schriftsprache aus; der Einfluß des Mittellandes wurde ja erwiesenermaßen immer stärker, und man denke nur an das Eindringen des skandinavischen Elements. So kann es nicht auffallen, wenn wir auch spezifisch anglische Worte (los, morpor, lēapor [lather], stemman [to stem]) später in der Schriftsprache finden.

II.

Doch das Verhältnis der beiden Dialekte zur ne. Schriftsprache, zu dem wir ja nur einige Andeutungen geben können, interessiert uns hier nicht in erster Linie. Wer sich mit dialektischen Verschiedenheiten im ae. Wortschatz befaßt, dem muß sich unwiderstehlich die Frage aufdrängen, was sich wohl daraus für die Stellung der beiden Hauptdialekte zu einander und zu den benachbarten kontinentalen Dialekten ergeben könnte, eine Frage, die mit dem Problem der Heimat der Angelsachsen eng zusammenhängt.

¹ in ist im Me. wieder nach Süden vorgedrungen. An ne. spittan, praet. spat haben sowohl angl. spittan als ws. spætan Anteil.

Ehe wir jedoch diese Frage zu beantworten suchen, müssen wir uns natürlich zunächst über die sprachliche Stellung des Altenglischen oder Angelsächsischen Ganzen orientieren. Hier können wir als sicher annehmen, daß das Ae. sprachlich zwischen das Friesische und Skandinavische zu stellen ist, oder daß von den Gliedern der sogenannten westgermanischen Spracheinheit das Ae. dem Nordischen am nächsten steht. Während das Friesische in gewissen Punkten eine Mittelstellung zwischen dem Altenglischen und Altsächsischen einnimmt, zeigt das Ae. Beziehungen zum Skandinavischen, die das Friesische nicht kennt. Schlagend sind in dieser Hinsicht die Hinweise Möllers ZfdA. NF. 28, Anz. S 148 Fn. 1 (vgl. auch Siebs Grdr. I S. 1156): es fehlt dem Ae. die deutschfriesische Präposition von, statt deren neben af, of das im Deutsch-Friesischen als Präposition unübliche fram, from, an. frā gebraucht wird; den Gebrauch des i-Stammes germ. rugi-z 'Roggen', ae. ryge, an. rygr hat das Ae. mit dem Nord. gemein gegenüber dem deutsch-friesischen n-Stamm afries. rogga, and. rocco, ebenso das r aus z in ae. hara, an. here 'Hase' gegenüber dem deutsch-friesischen s. — Aus der Lautlehre ist hier die dem Friesischen fehlende u- und a-Brechung des e im Nordischen zu nennen, die dem ae. 'u- und a-Umlaut' entspricht, aber auch mit der ae. 'Brechung' vor r- und l-Kombinationen wesensverwandt ist.1 Wenn hier auch gesonderte Entwicklungen vorliegen, so ist doch die gleiche Entwicklungstendenz anzuerkennen (vgl. Siebs Grdr. I 1157). — Erwähnung verdient hier

Im An. bewahren gerade die Verbindungen r, l + Kons. die Brechung. Vgl. über diese Beziehungen Joh. Schmidt Idg. Vokalismus II 388 ff., 451, Kluge Grdr. I 421.

auch die unter gewissen Bedingungen der ae. gleiche Entwicklung des $ai > \bar{a}$ im Nordischen.¹

Daß die Theorie Erdmanns von der Heimat der Angelsachsen an der mittleren Elbe und Saale schlecht mit dieser sprachlichen Stellung des Ae. zu vereinigen ist, hat schon Möller a. a. O. ausgeführt. Ebenso ist es aber schon nach dem Obigen bedenklich, wenn Heuser, IF. 14 Anz. S. 26 ff., die Sachsen und Angelu trennen und jene mit den Jüten südwestlich der Friesen ansiedeln will.²

Es entsteht nun die Frage, welcher der beiden wichtigsten Stämme, der Angeln und Sachsen, den Skandinaviern, welcher den Friesen und weiterhin den Altsachsen sprachlich näher steht.

Möller a. a. O. S. 148 nimmt als sicher an, «daß die Dialekte von Mercien und Ostangeln in den Punkten, die auf die Zeit vor dem Auszug zurückgehen, dem Nordischen näher stehen als die gesamten sächsischen Dialekte Südenglands und der kentische Dialekt», Siebs a. a. O. S. 1156, «daß die anglischen Mundarten mehr als die sächsischen und kentischen Berührungen mit dem

¹ Es ist bemerkenswert, daß germ. ai im Nord. gerade in ungefähr denselben Fällen zu ā wird, in denen es im Ahd. ē ergibt, — also entgegengesetzte Entwicklung.

² Auf die seltsame, von Middendorf wieder aufgegriffene Theorie von der nahen Verwandtschaft des Bayrisch-Alemannischen mit dem Ae. gehe ich hier nicht näher ein (Ae. Flurnamenbuch S. VI, Frankf. Ztg. 18. Aug. 1903). Mißtrauen kann es erregen, wenn M. die Erhaltung des Pronominal-Duals als Beweis anführt oder gar lautliche Übereinstimmungen zwischen heutigem Bayrisch und dem Ae. findet!

³ In betreff der Jüten (Euten) enthalte ich mich hier vorläufig des Urteils, da ja das Kentische in meiner Untersuchung nicht einbegriffen war.

Nordischen zeigen. Beide stellen also das Anglische dem Skandinavischen zunächst (abgesehen davon, daß Möller das Nordhumbrische ausnimmt)¹, aber weder Möller noch Siebs haben meines Wissens sprachliche Beweise für engere Beziehung des Anglischen zum Skandinavischen erbracht. Mit den lautlichen Verhältnissen ist nicht viel anzufangen. Höchstens könnte man darauf verweisen, daß der u- und a-Umlaut im Anglischen weiter geht als im Sächsischen. Die verschiedene Entwicklung der Gutturale im Norden und Süden ist ein recht unsicheres Kriterium.

Immerhin fehlt es nicht an sprachlichen Anzeichen für eine solche Stellung des Anglischen. Skeat hat, Academy 1245, 12. März 1886, den nördlichen plur. earun, nordh. aron = an. ero gegen südlich sind(on) = afries. send betont. Andererseits weist Miller in seiner trefflichen Einleitung zum Beda darauf hin, daß das (West)sächsische im Gebrauch von on für 'in' sich zum Alts. stellt (ebenso zum Fries. nach Siebs Engl.-fries. Spr. S. 142), jedenfalls ist hier die gemeinsame Tendenz anzuerkennen. (Auf den Gebrauch von mid c. acc., der im Anglischen und Nordischen häufiger ist, ist dagegen wohl weniger Gewicht

The spricht a. a. O. S. 159 Fn. von Berührungen des Fries. mit dem Nordhumbr.» und will sie durch frühe Wanderung von Chauken und Friesen nach Schleswig und Holstein erklären. Die hierher gehörigen Erscheinungen entbehren aber der Beweiskraft. Die im Spätnordh. bewahrte Scheidung von eo und io hat Sievers, Zum ags. Vokalismus S. 26 ff., auch für das Altws. nachgewiesen. Der Abfall des End-n im Inf. ist sicher spät; der alte Hymnus Caedmons hat ihn noch nicht. Ebensowenig ist wohl auf die zum Altostfries. stimmenden analogischen Praeterita wie band, fand statt bond, fond Gewicht zu legen. Im übrigen verweise ich für Beziehungen des Anglischen zum Friesischen auf Siebs a. a. O. S. 1159.

zu legen, da er vereinzelt auch im As. und Ahd. vorkommt, vgl. Miller S. XLVIII.)¹

Ich habe nun an der Hand des im Vorstehenden angeführten Materials aus dem Wortschatz zahlreichere zuverlässige Kriterien für die sprachliche Stellung des Anglischen zu ermitteln gesucht. Es ist klar, daß dabei alle gemeingermanischen Worte ausscheiden müssen. Denn sie müssen einmal gemeinaltenglisch gewesen sein: wann sie das (West)sächsische verloren hat, wissen wir nicht. Ihre Erhaltung in dem einen oder anderen Dialekt ist kein Kriterium für besondere Beziehung. Sie alle hier aufzuzählen, hätte keinen Zweck; ich erinnere nur an einige Beispiele. Angl. *gōian, *gēgan, dessen Entsprechung mit an. geyja leicht in die Augen fällt, muß ausscheiden, da es sich auch im Friesischen und - wenigstens in Ableitungen — auch im Deutschen findet; ebenso sprintan, obwohl es auf niederdeutschem Gebiet überhaupt zu fehlen scheint.2 Je genauer man das Material untersucht,

¹ Der Monatsname Frimilee (bei Beda de. t. rat. Kluge Leseb.³ S. 13, Mart. 68,22, Menol. 78) hat eine Entsprechung im schwed. trimjölksgräs; der in denselben Quellen belegte Name sölmönaß enthält söl 'Sonne' = an. söl, das sonst nur noch in den Ep. Gl. (Sonderausg. von Sweet S. 21 A 11) und im ursprünglich mercischen Par. Ps. 120,6 belegt ist. Vgl. Imelmann Das ae. Menologium S. 51. Dies sind anglisch-nordische Übereinstimmungen, aber freilich waren frimilee und sölmönaß, wenn das Menol. südlichen Ursprungs ist. auch im Süden bekannt. Vgl. übrigens, oben S. 67 Fn. 2. — söl ist doch wohl nicht lat. Lehnwort, wie Sweet Stud. Dict. annimmt.

² Dies könnte sonst sowohl für Beziehung zum Nord. wie zum Hochdeutschen in Anspruch genommen werden, ebenso dian. Man muß bedenken, daß im Fries. und Ndd. — mit Ausnahme des spärlich überlieferten As. — die Überlieferung später beginnt als im Ae. und Ahd. — Als gemeingerm. muß auch sunor S. 24 ausscheiden. das zudem nicht einmal ganz sicher spezifisch anglisch ist. Be-

desto mehr wird man enttäuscht in bezug auf seine Verwendbarkeit.

Doch kommen wir zum Entscheidenden. Das Anglische stellt sich zum Nordischen, das Ws. zu den westgermanischen Dialekten in folgenden Punkten:

angl. vorwiegend los 'Verderben, Untergang' = an. los 'Auflösung', ws. (for)lor = as. ahd. farlor. S. 15.

angl. æften 1 (merc. Par. Ps. 64,9 æften-tid 'vesper', sowie efte[r]n-locad 'advesperascit' Lind. Lk. 24,29) = an. aptann, dän. aften, schwed. afton; ws. und gemeinae. æfen, ēfen = afries. ēwend (Siebs Engl.-fries. Spr. S. 204), as. āband, ndl. avond, ahd. āband 'Abend'.

Anglisch-nordische Worte sind ferner:

wālan 'vexare', zu an. veill 'schwach, krank, elend', veilendi 'Schwachheit, Krankheit', norw. veil. S. 57.

wloh 'Zotte, Franse' = isl. lo, dän. lu, schwed. dial. lo 'Wollhaar, Flaumhaar'. S. 57.

 $l\bar{e}upor$, $l\bar{e}pran$ 'lather' = an. laupr, leypra, schwed. $l\ddot{o}dder$. S. 18.

 $s\bar{a}$ 'Zuber, Bottich' = an. $s\bar{a}r$, dän. dial. saa, schwed. $s\hat{a}$. S. 70.

bront (a) 'steil' = aisl. brattr, norw. bratt, dän., schwed. brant. S. 73.

An. dieselbe Form sunor haben, während im Hochd. ablautend swaner vorkommt. — Daß das sonst nur noch im Got. selbständig begegnende alja- (Kluge Grdr. I 514 § 53) noch einmal auf mercischem Boden begegnet, sei hier kurz erinnert.

¹ Ich habe das Wort bis hierher aufgespart. BT. versteht es nicht. Kluge Et. Wb. nennt nur 'ags.' aftentīd. — Daß nicht etwa aften sich speziell in der Verbindung aftentīd erhalten hat, zeigen die Belege für āfentīd.

(?) wærc 'Schmerz' = an. verkr, dän. værk, schwed. värk. S. 51.

Die größte Beweiskraft besitzen ohne Frage die beiden zuerst genannten Punkte, weil wir hier Aquivalente auf allen Seiten haben. los gegen lor hat für das Anglische gegenüber dem (West)sächsischen ähnliche Bedeutung, wie sie Möllers hara — hase für das Gemeinae. gegenüber dem Friesischen hat. Wenn auch Doppelformen vorhanden sein mochten, so ist doch eben die Art des Ausgleichs bezeichnend. Daß für lor der friesische Beleg fehlt, ist nicht sehr bedenklich, da wir den altsächsischen haben. æften finden wir im Nordh. und einem auf mercischer Grundlage beruhenden, wenn auch stark ws. überarbeiteten Text. Wir können also für æften zwei anglische Zeugen in Anspruch nehmen, und es wird schwerlich Zufall sein, daß die nordische Form gerade bei ihnen begegnet. An Entlehnung von los und æften ist natürlich nicht zu denken.

Daß wælan, wloh u. s. w. dem Sächsischen wie den übrigen westgermanischen Dialekten von jeher gefehlt haben, kann man natürlich nicht zur Evidenz beweisen. Wir haben die Worte zunächst vom intern ae. Standpunkt als spezifisch anglisch erkannt und nach Durchmusterung der germanischen Dialekte, auch der neueren Mundarten, nur im Nordischen eine Entsprechung gefunden. Um es umzukehren: das eigentliche Verbreitungsgebiet dieser Worte ist, soviel wir erkennen können, das Nordgermanische, und sonst hat nur das Anglische an ihnen Anteil. — Daß wloh, sā, lēafor, bront auch außer-

¹ Vgl. H. Bartletts Diss. über Par. Ps. II. Auch wir haben mehrfach anglische Elemente in seinem Wortschatz beobachtet, vgl. 8. 63.

germanische Verwandte oder Entsprechungen haben (s. die Etym., zu bront vgl. Tamm Etym. Ordbog), also auch im Urgermanischen vorhanden gewesen sein müssen, beweist nicht, daß sie auch allen germanischen Einzeldialekten gemeinsam waren; die Wurzel von lēafor begegnet allerdings westgermanisch in Lauge. — Bei sā und bront ist nicht völlig ausgeschlossen, daß die spätere Erhaltung in nördlichen Mundarten, auf die sich unsere Beurteilung gründete, etwa mit nordischem Einfluß zusammenhängen könnte; doch ist das durch nichts erwiesen und auch nicht eben wahrscheinlich. — wære darf allerdings hier nur dann genannt werden, wenn nordfries. wark aus dem Dänischen entlehnt ist, vgl. S. 52 Fn. 2.

Erwähnung verdienen auch noch illerocad crapulatus (S. 85, freilich nicht sicher spezifisch anglisch), das an. illr enthält — und zwar sicher nicht als Lehnwort —, sowie das anlautende h in nordh. heonu, zu an. hana.² — Auf rif 'reißend, wild' = schwed. dial. riv (S. 26) ist wegen der Möglichkeit weiterer Anknüpfungen wenig Gewicht zu legen, ebenso auf lēoran, zu schwed. dial. lūra, lōra (?), dessen etymologische Beurteilung überhaupt unsicher ist. — Daß alan außer im Anglischen nur im Nordischen und Gotischen vorkommt, könnte man im Hinblick auf die nordisch-gotischen Beziehungen hier betonen; doch kann das Wort auch gemeingermanisch gewesen sein; im Westgermanischen haben wir ja noch alt.

¹ Zu ae. bront, das natürlich nicht entlehnt ist, vgl. Sievers PBB. 11,358. Das ebenda genannte atol (= an. atall) finde ich als atel(l)ic in Aelfc. Hom. — Übrigens beachte zu unseren Aufstellungen auch Sarrazin E. St. 23,225 unten.

² Vgl. Miller I Einl. S. XXXII. Das mercische ono nähert sich andererseits dem An. im Vokal. Vgl. ahd. inu, mndl. ene.

— pyle 'Redner, Sprecher, Spaßmacher' (Beow., Lib. Scint. 119,3, WW. 458,16 orator, 385,3 de scurris hofdelum, Nap. OEG. 1,3115, 2,154 rhetorica: pelcræft; Rit. 121,18 gidyll 'aura, säuselnde Luft') = an. pulr 'Redner, fahrender Sänger, Schwätzer', pylja 'sprechen, reden, leise singen, murmeln' (schwed. dial. tule 'homo ridiculus', tul(l)a 'singen') kann wohl nur als gemeinae.-nordische Übereinstimmung betrachtet werden. — Andere, ganz unsichere Beziehungen des Anglischen zum Nordischen erwähne ich hier nicht weiter.¹

Wenn einige anglische Worte sich sonst nur im Hochdeutschen finden (z. B. gescræpe, gnēaþ, ?andustrian. wiperbreca) oder im Altsächsischen (drysnian), (hochdeutsch und niederdeutsch scia), so brauchen wir darin nicht im Widerspruch zu dem oben Gefundenen einen Beweis für nähere Beziehung zu diesen Dialekten zu sehen. Wir können — ohne uns einer petitio principii schuldig zu machen und ohne uns geradezu auf den Standpunkt der Stammbaumtheorie zu stellen — diese Worte als westgermanisch betrachten und annehmen, daß sie das Ws. verloren hat. Aus der Fülle des altererbten Sprachschatzes bevorzugt der eine Dialekt dieses, der andere jenes Synonymon, und so kann es nicht auffallen, wenn das Anglische ein westgermanisches Wort bewahrt, das im Ws. ungebräuchlich wurde. Anders freilich würde die Sache liegen, wenn sich im Ws. ein Aquivalent fände, das nach dem Norden weist (s. unten tid und tima). Besondere Beziehungen des Anglischen zum Friesischen haben sich übrigens nicht ergeben. rendan (S. 75) ist

Nachträglich bemerke ich, daß das m (aus b) in nemne, nympe sich auch in gleichbed, an. nema, aschwed, adän, num findet, vgl, schwed, dän, om < of, adän, em < cf wenn, ob; s. Falk-Torp s. v. om, Noreen Aisl. Gr. § 229, 2.

nicht spezifisch anglisch; tohte (zu afries. tocht, S. 74) ist wenigstens zweifelhaft.

Was andererseits die Stellung des Ws., als Vertreters des britischen Sächsisch, betrifft, so haben wir außer den schon erwähnten charakteristischen Merkmalen (on für in, S. 42, lor, ausschließlich æfen), die das Ws. zum Fries. und As. rücken, nicht viel anzuführen, da ja unsere Untersuchung auf das spezifisch Anglische ausging und sich spezifisch (West)sächsisches nur da ergab, wo sich deutlich zwei Äquivalente gegenüberstehen. — Auf ws. cwincan = afries. kwinka (angl. cwinan) ist wohl kaum Wert zu legen, s. S. 29, 30.

Ein Fall freilich scheint, dem Bisherigen widersprechend, das Ws. in engere Beziehung zum Nordischen zu stellen: Das (mit Ausnahme zweier poet. Belege) nur ws. tima (S. 92) entspricht an. timi (dän. time, schwed. timma 'Stunde'), das anglische tid dagegen ist gemeingerm. 1, und in dem fast ausschließlichen Gebrauch von tid stellt sich das Anglische zu den kontinental-westgermanischen Dialekten. Wie löst sich diese Schwierigkeit? Daß tīd und tīma alte urgermanische Doppelformen sind (vgl. lat. sēmen neben Sā-t), ließe sich ja auch gegen das oben vorgebrachte los: lor anführen. Es scheint aber, daß tima in der Bedeutung 'Zeit, Stunde' erst spät und unabhängig im Nordischen und Ws. gebräuchlich wurde und in einer älteren, weniger gebräuchlichen Bedeutung auch im Anglischen vorhanden war. Auf einen Bedeutungsunterschied zwischen tid und tima weist ja vielleicht in ussera tīda tīmum Guthlac 726, und die Zunahme des Gebrauchs von tima können wir im Ws. beobachten.

¹ Im Got. ist keines von beiden belegt.

Vor allem aber fehlt ja das anglische tid dem Nordischen durchaus nicht (an. tid, dän. schwed. tid), die Verteilung von tid und tima läßt sich also nicht mit gleicher Beweiskraft den zuerst genannten los: lor und æften: æfen entgegenstellen.

Nach allem dürfen wir daran festhalten, daß das Anglische als Ganzes sich näher zum Nordischen, das Westsächsische zum Friesischen und Altsächsischen stellt. Dies Ergebnis bestätigt das von Siebs Grdr. I S. 1156 Ausgesprochene.

Der Wortschatz weist auf engen Zusammenhang des Mercischen und Nordhumbrischen. Ein Versuch, kleinere sprachliche Gruppen innerhalb des Anglischen herauszuschälen und diesen besondere Beziehungen anzuweisen, zu dem Möller ZfdA. 40 Anz. S. 148 auffordert, dürfte zu gewagten Hypothesen führen.¹

Gegenüber Heuser IF. 14 Anz. S. 26 ff. ist zu betonen, daß die Unterschiede zwischen anglischem und westsächsischem Wortschatz nicht so beträchtlich sind, daß sie auf weite Trennung der kontinentalen Wohnsitze hinweisen. Im Gegenteil macht das Altenglische trotz der behandelten dialektischen Unterschiede im Wortschatz ebensowohl wie in den grundlegenden Lauterscheinungen einen verhältnismäßig einheitlichen Eindruck, wenn man auch nicht ein völlig einheitliches Uraltenglisch voraussetzen darf. Der Name Angelsächsisch — nicht Anglisch und Sächsisch — drückt diese Einheit gut aus. Wie aus gemeinsamer Basis durch Differenzierung Unterschiede entstehen können, das haben wir ja in Kap. II an einigen

¹ Von scheinbaren Beziehungen des Nordh. zum Friesischen war schon oben S. 115 Fn. die Rede.

Fällen beobachtet. Das Anglische steht allerdings dem Nordischen näher als das Ws., aber auch dieses steht ihm nicht allzufern und darf, wie schon oben ausgeführt, jedenfalls nicht über das Friesische hinaus von ihm weggerückt werden.

Bedenken gegen die Vulgatansicht könnte Heusers Hinweis auf die kontinentalen lateinischen Lehnworte erregen (a. a. O. S. 30), deren Verbreitung bis nach Holstein und Schleswig wenig glaublich ist. Allein wenn dieser Einwand in seiner Allgemeinheit stichhaltig wäre, dann würde auch die Ansetzung der Angeln auf der kimbrischen Halbinsel unsicher, die Heuser nicht in Frage stellt. Denn wir haben oben unter den spezifisch anglischen Worten auch alte kontinentale lateinische Lehnworte gefunden (vgl. segne, cäsering, cælc), die zwar einst auch südenglisch gewesen sein mögen, die aber schwerlich erst durch südenglische Vermittlung nach Norden gelangt sind.

In betreff des Problems der kontinentalen lateinischen Lehnworte im Altenglischen kann ich jetzt auf Kap. XIV des kürzlich erschienenen Werkes von Hoops, Waldbäume und Kulturpflanzen im germanischen Altertum, verweisen. Hoops macht es von verschiedenen Gesichtspunkten aus höchst wahrscheinlich, daß die große Masse dieser Lehnworte am Niederrhein, in Nordbrabant, Westflandern und Nordfrankreich aufgenommen wurde, wo sich die Angelsachsen vor dem Übergang nach Britannien niederließen. Was jedoch die dauernden Sitze vor der Auswanderung betrifft, so haben wir, wie auch Hoops annimmt, allen Grund, an der Vulgatansicht festzuhalten, wonach die Angeln in Schleswig, vielleicht auch auf den dänischen

Inseln, die Sachsen ihnen südlich benachbart, also in Holstein, wohnten.¹

¹ Aus den Ortsnamen, die ich ja nicht berücksichtigt habe, möchte ich nur auf ein Beispiel hinweisen. In der Urkundensammlung der Schleswig-Holstein-Lauenburgischen Gesellschaft für vaterländische Geschichte Bd. I wird in der Urkunde Nr. 126 S. 140 (3. Jun. 1295) ein Ort Celmerstorpe erwähnt = Seltendorf, ein ehemaliges Dorf im Kirchspiel Eckernförde in der Gegend des heutigen Altenhof. Vgl. auch Celmerstorp, Name eines Lübecker Bürgers Cod. Dipl. Lubecensis I. Abt. Bd. IV Nr. 593 S. 662. — Sollte etwa Celmer- in Zusammenhang stehen mit dem Flußnamen Chelmer in Essex? — Eine Etymologie kenne ich nicht.

Literatur.

Eine Aufzählung aller ae. Texte wäre hier überstüssig. Ich begnüge mich — abgesehen von ganz neuen Textausgaben — mit den notwendigsten Erklärungen von Abkürzungen und Angabe der Hülfsmittel, soweit sich deren Benutzung nicht von selbst versteht.

Carl Winter's Universitätsbuchhandlung

Terlago-Arobit No. 66

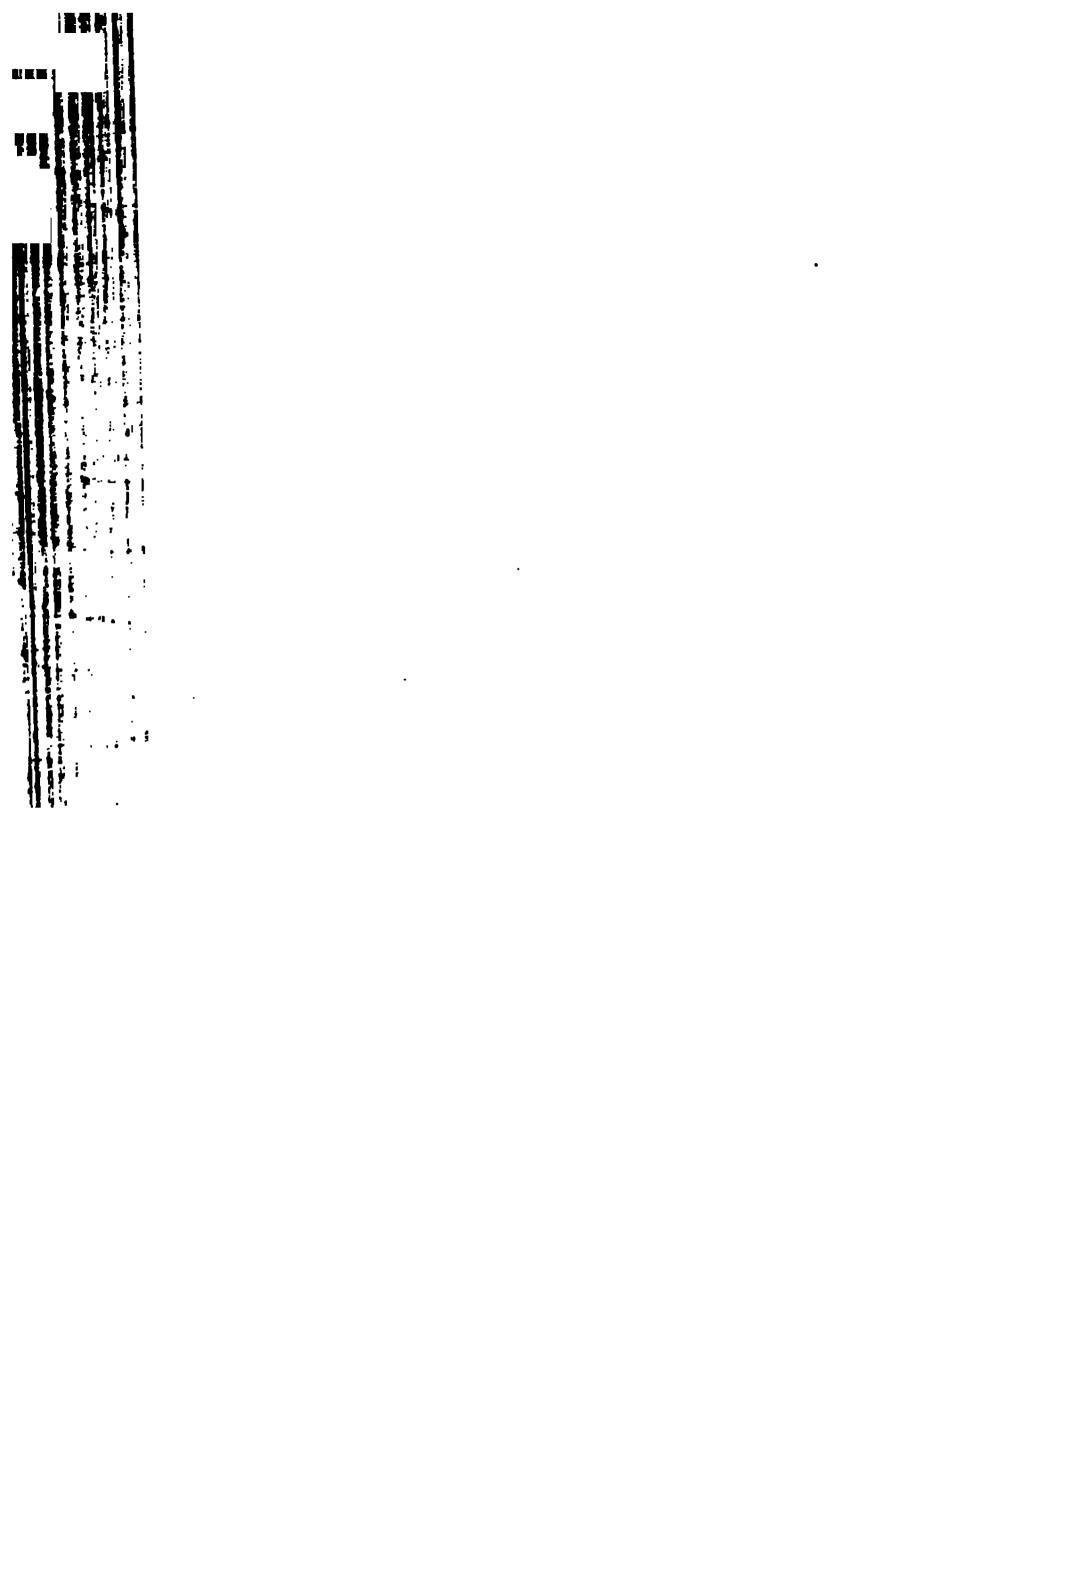

Alle Rechte, besonders das Recht der Übersetzung in fremde Sprachen, werden vorbehalten. Seinem hochverehrten Lehrer,

Herrn Professor Dr. Johannes Hoops,

als Zeichen steter Dankbarkeit und Ergebenheit

gewidmet

vom Verfasser.

Zu der Anordnung der vorliegenden Arbeit sei folgendes bemerkt. Hinter dem Stichwort ist die Bedeutung desselben mit dem lateinischen Äquivalent in Anführungszeichen wiedergegeben. Zwischen Stichwort und Bedeutung ist bei Substantivis die Angabe des Geschlechtes und Stammes beigefügt; bei Verbis, ob stark oder schwach u. s. w. Nach der lateinischen Bedeutung folgen die im Text belegten Stellen, nach Genus, Kasus, Numerus bezw. Personen und Tempora geordnet. Die Komposita der Verben sind der Übersicht wegen unter dem entsprechenden Simplex aufgeführt; ist ein solches im Text nicht vorgekommen, so ist das Kompositum unter seinem Anfangsbuchstaben behandelt. In der Arbeit sind überall die nötigen Verweise gegeben.

Die Abkürzungen sind die üblichen: Masculinum = m.; Femininum = f.; Neutrum = n.; Singular = sg.; Plural = pl.; Nominativ = n. etc.; Nominativ Singular Masculinum = nsm. etc.; bei den Verben bezeichnet stv. = starkes, swv. = schwaches Verbum; Indicativ Praesens 1. Person Singularis = ind. prs. 1. sg. etc.; Optativ = opt.; Participium Praesentis = p. prs.; Imperativ = imp. etc.; Adjectivum = adj.; Comparativ = comp.; Praeposition = prp.; Conjunction = conj.; Adverbium = aev. etc.

Die Arbeit wurde bereits im Herbst 1903 abgeschlossen und der philosophischen Fakultät zu Heidelberg eingereicht. Inzwischen ist das Glossar der Vespa-

sian-Hymnen von S. G. Thomas und H. C. Wyld in den Otia Merseiana (vol. 4, p. 84-119; Williams and Norgate, London, 1904) erschienen. Wenn ich gleichwohl in der nachstehenden Arbeit auch die Belege aus den Hymnen zum Abdruck bringe, so wird wohl niemand daran Anstoß nehmen, da es seine großen Vorzüge hat, den gesamten Wortschatz dieses wichtigsten mercischen Sprachdenkmals in einem Bande beisammen zu haben.

Es bleibt mir noch übrig, mich der angenehmen Pflicht zu entledigen, Herrn Professor Dr. Johannes Hoops meinen verbindlichsten Dank auszusprechen nicht nur für die Anregung zu der vorliegenden Arbeit, sondern auch für die jederzeit in freundlichster Weise erteilten wertvollen Ratschläge.

Ferner danke ich Herrn Lehramtspraktikant R. Umbsen aus Oldenburg für sein eifriges Mitwirken bei der ersten Durchsicht.

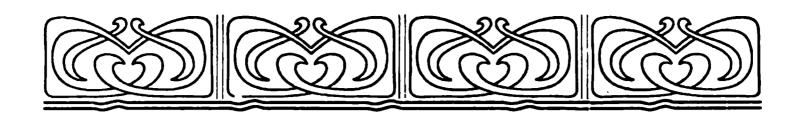

Conrad Grimm.
